The Peabody Picture Vocabulary Test Fourth Edition (PPVT-4) is a well-respected vocabulary assessment that has been in operation for close to 50 years. Developed by Lloyd M. Dunn and Douglas M. Dunn, the assessment is made to evaluate vocabulary comprehension for American English. It is fast and simple to administer, preserving valuable time so that attention can be put on implementing successful interventions.

The PPVT-4 assessment material encompasses a extensive range of receptive vocabulary grades, spanning from pre-kindergarten through adulthood. The assessment items broadly include words that portray 20 content fields (e.g., actions, vegetables, tools), parts of speech (nouns, verbs, attributes), and household and educational vocabulary.

The assessment provides two equivalent versions which contain different vocabulary items, making sure that the individual has not "learned" the evaluation. One version can be employed before intervention to evaluate individuals' vocabulary comprehension and the other form can be employed for re-testing to measure and document advancement. The PPVT-4 also includes a special Growth Scale Value (GSV) which is reactive to minor changes over time.
