Trends in Language Assessment Research and Practice 2016-02-29 Vahid Aryadoust Despite prodigious developments in the field of language assessment in the Middle East and the Pacific Rim, research and practice in these areas have been underrepresented in mainstream literature. This volume takes a fresh look at language assessment in these regions, and provides a unique overview of contemporary language assessment research. In compiling this book, the editors have tapped into the knowledge of language and educational assessment experts whose diversity of perspectives and experience has enriched the focus and scope of language and educational assessment in general, and the present volume in particular. The six 'trends' addressed in the 26 chapters that comprise this title consider such contemporary topics as data mining, in-class assessment, and washback. The contributors explore new approaches and techniques in language assessment including advances resulting from multidisciplinary collaboration with researchers in computer science, genetics, and neuroscience. The current trends and promising new directions identified in this volume and the research reported here suggest that researchers across the Middle East and the Pacific Rim are playing—and will continue to play—an important role in advancing the quality, utility, and fairness of language testing and assessment practices.

Pacific Rim Objective Measurement Symposium (PROMS) 2015 Conference Proceedings 2016-08-06 Quan Zhang This book collects and organizes the original studies presented at PROMS 2015 conference on theories and applications of Rasch model. It provides useful examples of the Rasch model used to address practical measurement problems across a range of different disciplines including Item Response Theory (IRT), philosophy of measurement, dimensionality, the role of fit statistics and residuals, application, educational application, language testing, health-related research, business and industrial application and Rasch-based computer software. PROMS 2015 (Pacific Rim Objective Measurement Symposium) was held from August 20-24th 2015, in Fukuoka, Japan. The goal of this conference is to bring together the researchers from

academia, universities, hospitals, industry, management sector as well as practitioners to share ideas, problems and solutions relating to the multifaceted aspects of Rasch Model.

Assessing L2 Students with Learning and Other Disabilities 2013-09-17 George Spanoudis This edited volume discusses the theoretical, ethical and practical considerations involved in the assessment of Second Language Learners (SLLs) with Specific Language Learning Disorders (SpLD), such as dyslexia and Attention Deficit and Hyperactivity Disorder, and with other disabilities like visual and hearing impairments. The volume contains 14 chapters. These explore various theoretical models and research findings that identify and evaluate the language and special needs of SLLs with SpLD and other disabilities and evaluate the effectiveness of the accommodation practices employed so far. The studies involve both high-stakes tests and classroom-based assessments conducted by professionals and researchers working in the areas of psychology, special education and second/foreign language testing and assessment from various countries around the globe, including the USA, Canada, New Zealand and European countries such as Italy, UK, Greece, Germany, and Slovenia. The volume accommodates high-quality submissions that cover a gap in a research area that has long been in need of theoretical and empirical attention. This volume will become a valuable point of reference and springboard for future research initiatives.

Handbook of Second Language Assessment 2016-03-07 Dina Tsagari Second language assessment is ubiquitous. It has found its way from education into questions about access to professions and migration. This volume focuses on the main debates and research advances in second language assessment in the last fifty years or so, showing the influence of linguistics, politics, philosophy, psychology, sociology, and psychometrics. There are four parts which, when taken together, address the principles and practices of second language assessment while considering its impact on society. Read separately, each part addresses a different aspect of the field. Part I deals with the conceptual foundations of second language assessment with chapters on the purposes of assessment, and standards and frameworks, as well as matters of scoring, quality assurance, and test validation. Part II addresses the theory and practice of assessing different second language skills including aspects like intercultural competence and fluency. Part III examines the challenges and opportunities of second language assessment in a range of contexts. In addition to chapters on second

language assessment on a national scale, there are chapters on learning-oriented assessment, as well as the uses of second language assessment in the workplace and for migration. Part IV examines a selection of important issues in the field that deserve attention. These include the alignment of language examinations to external frameworks, the increasing use of technology to both deliver and score second language tests, the responsibilities associated with assessing test takers with special needs, the concept of 'voice' in second language assessment, and assessment literacy for teachers and other test and score users.

The Official Met Practice Test Book with Answers 2019-07-16 Michigan Language Assessment The Michigan English Test (MET) is a standardized international examination designed by Michigan Language Assessment and aimed at upper-beginner to advanced levels--A2 to C1 of the Common European Framework of Reference for Languages. The test assesses general English language proficiency in educational, social, and workplace contexts. The MET is intended for adults and adolescents at or above a secondary level of education who want to measure their general English language proficiency in a variety of linguistic contexts. The test results can be used for educational purposes, such as when finishing an English language course, or for employment purposes, like when applying for a job or pursuing a promotion that requires an English language qualification. The Official MET Practice Test Book is the first book to provide actual practice tests for students preparing to take the MET. The Official MET Practice Test Book with Answers, designed for self-study (information about the Classroom Edition can be found at https://www.press.umich.edu/11390089/official_met_practice_test_book_classroom_edition), includes: 4 complete practice tests (Listening, Reading and Grammar, Writing) 4 sets of Speaking test prompts tips for practicing the different sections of the tests a progress tracking log for recording practice test scores selected practice test vocabulary lists answer keys audio transcripts for the Listening section Writing test responses with commentary for two of the tests Examiner scripts for the Speaking test actual test form instructions and a sample answer sheet The audio for the Listening section can be accessed at www.press.umich.edu/elt/compsite/met For more information about the MET, go to www.michiganassessment.org

Quantitative Data Analysis for Language Assessment Volume II 2019-07-04 Vahid Aryadoust Quantitative Data Analysis for Language Assessment Volume II: Advanced Methods demonstrates advanced quantitative techniques for language assessment. The volume takes an interdisciplinary approach and taps into expertise from language assessment, data mining, and psychometrics. The techniques covered include Structural

Equation Modeling, Data Mining, Multidimensional Psychometrics and Multilevel Data Analysis. Volume II is distinct among available books in language assessment, as it engages the readers in both theory and application of the methods and introduces relevant techniques for theory construction and validation. This book is highly recommended to graduate students and researchers who are searching for innovative and rigorous approaches and methods to achieve excellence in their dissertations and research. It is also a valuable source for academics who teach quantitative approaches in language assessment and data analysis courses.

Building a Validity Argument for a Listening Test of Academic Proficiency 2013-07-26 Vahid Aryadoust Over the years, various approaches to validation have emerged in psychological and educational assessment research, which can be classified into traditional approaches and modern approaches. Traditional approaches view validity as a multicomponential concept including, for example, content, construct, and predictive validity, while modern approaches conceptualize it as a unitary concept evaluated through argumentation. Drawing on the modern approach, this book builds a validity argument for an International English Language Testing System (IELTS) listening test sample. The book provides some insights into the listening sub-skills that the test engages, the psychometric dimensionality of the test, variables that predict item difficulty parameters, bias across age, nationality, test experience, and gender, as well as predictive-referenced evidence of validity. A variety of techniques including the Rasch model and structural equation modelling are used to answer the research questions and to build a validity argument framework; this argument organizes the thematically related findings into a coherent treatment of the validity of the listening test. The book presents the first treatment of validity argument and related analytical tools in one volume and maps the psychometric/statistical analysis tools onto the validity argument framework. It also provides an extensive literature review of listening comprehension, validation, and psychometric modeling and proposes both methods for developing and validating self-assessment instruments and novel approaches to improving the quality of language assessments.

Using Corpus Methods to Triangulate Linguistic Analysis 2019-09-17 Jesse Egbert This book builds on Baker and Egbert's previous work on triangulating methodological approaches in corpus linguistics and takes triangulation one step further to highlight its broader applicability when implemented with other linguistic research methods. The volume showcases research methods from other linguistic disciplines and draws on ten empirical studies from a range of topics in psycholinguistics, applied linguistics, and discourse analysis to demonstrate how these methods might be most effectively triangulated with corpus-linguistic methods. A concluding chapter synthesizes these findings as a means of pointing the way toward future directions for triangulation and its implications for future linguistic research. The combined effect reveals the potential for the triangulation of these methods to not only enhance rigor in empirical linguistic research but also our understanding of linguistic phenomena and variation by studying them from multiple perspectives, making this book essential reading for graduate students and researchers in corpus linguistics, applied linguistics, psycholinguistics, and discourse analysis.

Language Assessment Literacy 2020-04-21 Dina Tsagari The field of language testing and assessment has recognized the importance and underlying theoretical and practical underpinnings of language assessment literacy (LAL), an area that is gradually coming to prominence. This book addresses issues that promote the concept of LAL for language research, teaching, and learning, covering a range of topics. It brings together 14 chapters based on high-stakes and classroom-based studies authored by academics, professionals and researchers in the field. The text examines diverse issues through a multifaceted approach, presenting high-quality contributions that fill a gap in a research area that has long been in need of theoretical and empirical attention.

Contemporary Second Language Assessment 2016-06-30 Jayanti Veronique Banerjee Includes chapters on key aspects of second language assessment such as test construct, diagnosis, exam design, and the growing range of public policy, social and ethical issues. Each of the contributors is an expert in their area; some are

established names while others are talented newcomers to the field. The chapters present new research or perspectives on traditional concerns such as test quality; fairness and bias; the testing of different language skills; the needs of different groups of examinees, including English language learners who need to take content tests in English; and the use of language assessments for gate-keeping purposes. The volume demonstrates how language assessment is informed by and engages with neighbouring areas of applied linguistics such as technology and language corpora. The book represents the best of current practice in second language assessment and, as a one volume reference, will be invaluable to students and researchers looking for material that extends their understanding of the field.

Foundations of Statistical Inference 2012-12-06 Yoel Haitovsky This volume is a collection of papers presented at a conference held in Shores Holiday Resort near Jerusalem, Israel, in December 2000 organized by the Israeli Ministry of Science, Culture and Sport. The theme of the conference was "Foundation of Statistical Inference: Applications in the Medical and Social Sciences and in Industry and the Interface of Computer Sciences". The following is a quotation from the Program and Abstract booklet of the conference. "Over the past several decades, the field of statistics has seen tremendous growth and development in theory and methodology. At the same time, the advent of computers has facilitated the use of modern statistics in all branches of science, making statistics even more interdisciplinary than in the past; statistics, thus, has become strongly rooted in all empirical research in the medical, social, and engineering sciences. The abundance of computer programs and the variety of methods available to users brought to light the critical issues of choosing models and, given a data set, the methods most suitable for its analysis. Mathematical statisticians have devoted a great deal of effort to studying the appropriateness of models for various types of data, and defining the conditions under which a particular method work. " In 1985 an international conference with a similar title* was held in Israel. It provided a platform for a formal debate between the two main schools of thought in Statistics, the Bayesian, and the Frequentists.

Teaching ESL/EFL Listening and Speaking 2020-10-26 Jonathan M. Newton This guide for teachers and teacher trainees provides a wealth of suggestions for helping learners at all levels of proficiency develop their listening and speaking skills and fluency, using a framework based on principles of teaching and learning. By following these suggestions, which are organised around four strands—meaning-focused input, meaning-focused output, language-focused learning, and fluency development—teachers will be able to design and present a balanced programme for their students. Updated with cutting-edge research and theory, the second edition of Teaching ESL/EFL Listening and Speaking retains its hands-on focus and engaging format, and features new activities and information on emerging topics, including: Two new chapters on Extensive Listening and Teaching Using a Course Book Expanded coverage of key topics, including assessment, pronunciation, and using the internet to develop listening and speaking skills Easy-to-implement tasks and suggestions for further reading in every chapter More tools for preservice teachers and teacher trainers, such as a sample unit, a "survival syllabus", and topic prompts The second edition of this bestselling book is an essential text for all Certificate, Diploma, Masters, and Doctoral courses for teachers of English as a second or foreign language.

ESOL Tests and Testing 2005 Stephen Stoyhoff This volume describes how ESOL tests and test users have changed greatly in the past few decades. Some widely used ESOL tests have been revised, with a number of

new tests incorporating advances in computer technology. In addition, many more ESOL practitioners than in the past are responsible for selecting and using tests. Stephen Stoyhoff and Carol A. Chapelle introduce teachers and administrators to the principles, methods, and vocabulary of language assessment. Twenty-one reviewers of ESOL tests consider test purpose, methods, and justification of their use in particular situations.

Cognitive Assessment 2009-05-22 Kikumi K. Tatsuoka This book introduces a new methodology for the analysis of test results. Free from ambiguous interpretations, the results truly demonstrate an individual's progress. The methodology is ideal for highlighting patterns derived from test scores used in evaluating progress. Dr. Tatsuoka introduces readers to the Rule Space Method (RSM), a technique that transforms unobservable knowledge and skill variables into observable and measurable attributes. RSM converts item response patterns into attribute mastery probabilities. RSM is the only up-to-date methodology that can handle large scale assessment for tests such as the SAT and PSAT. PSAT used the results from this methodology to create cognitively diagnostic scoring reports. In this capacity, RSM helps teachers understand what scores mean by helping them ascertain an individual's cognitive strengths and weaknesses. For example, two students may have the exact same score, but for different reasons. One student might excel at processing grammatically complex texts but miss the main idea of the prose, while another excels at understanding the global message. Such knowledge helps teachers customize a student's education to his or her cognitive abilities. RSM is also used for medical diagnoses, genetics research, and to help classify music into various states of emotions for treating mental problems. The book opens with an overview of cognitive assessment research and nonparametric and parametric person-fit statistics. The Q-matrix theory is then introduced followed by the Rule Space method. Various properties of attribute mastery probabilities are then introduced along with the reliability theory of attributes and its connection to classical and item response theory. The book concludes with a discussion of how the construct validity of a test can be clarified with the Rule Space method. Intended for researchers and graduate students in quantitative, educational, and cognitive psychology, this book also appeals to those in computer science, neuroscience, medicine, and mathematics. The book is appropriate for advanced courses on cognometrics, latent class structures, and advanced psychometrics as well as statistical pattern recognition and classification courses taught in statistics and/or math departments.

Social Media Risk and the Law 2021-09-14 Susan Grantham Social media has many advantages for professional communication – but it also carries considerable risks, including legal pitfalls. This book equips

students and communication professionals with the knowledge and skills to help minimise the risks that can arise when they post or host on social media. It offers them strategies for taking advantage of the opportunities of social media while also navigating the ethical, legal, and organisational risks that can lead to audience outrage, brand damage, expensive litigation and communication crises. The book uses stakeholder theory and risk analysis tools to anticipate, identify, address and balance these opportunities and risks. It takes a global approach to risk and social media law, drawing on fascinating case studies from key international jurisdictions to explain and illustrate the basic principles. Whether you are a corporate communicator, social media manager, journalist, marketer, blogger or student you will find this book an essential addition to your professional library as the first reference point when social media and legal risks arise.

Applying the Rasch Model 2013-11-05 Trevor G. Bond Written in an accessible style, this book facilitates a deep understanding of the Rasch model. Authors Bond and Fox review the crucial properties of the Rasch model and demonstrate its use with a wide range of examples including the measurement of educational achievement, human development, attitudes, and medical rehabilitation. A glossary and numerous illustrations further aid the reader's understanding. The authors demonstrate how to apply Rasch analysis and prepare readers to perform their own analyses and interpret the results. Updated throughout, highlights of the Second Edition include: a new CD that features an introductory version of the latest Winsteps program and the data files for the book's examples, preprogrammed to run using Winsteps; a new chapter on invariance that highlights the parallels between physical and human science measurement; a new appendix on analyzing data to help those new to Rasch analysis; more explanation of the key concepts and item characteristic curves; a new empirical example with data sets demonstrates the many facets of the Rasch model and other new examples; and an increased focus on issues related to unidimensionality, multidimensionality, and the Rasch factor analysis of residuals. Applying the Rasch Model is intended for researchers and practitioners in psychology, especially developmental psychologists, education, health care, medical rehabilitation, business, government, and those interested in measuring attitude, ability, and/or performance. The book is an excellent text for use in courses on advanced research methods, measurement, or quantitative analysis. Significant knowledge of statistics is not required.

Teaching Digital Literacies is a valuable addition to the literature in our profession.

At the Crossroads: Challenges of Foreign Language Learning 2017-04-21 Ewa Piechurska-Kuciel This book offers a valuable contribution to the discussion on the complexities of L2 learning processes that pose a challenge to learners. Focusing on the cognitive, affective and socio-cultural perspectives, the papers included provide important insights into the individual's experiences in second language acquisition. This work also addresses social interactions and cultural background, shedding new light on their role in the context in L2 learning processes. It is a valuable resource for anyone interested in understanding the challenges of foreign-language (FL) learning and teaching.

Automated Evaluation of Text and Discourse with Coh-Metrix 2014-03-24 Danielle S. McNamara Coh-Metrix is among the broadest and most sophisticated automated textual assessment tools available today.

Automated Evaluation of Text and Discourse with Coh-Metrix describes this computational tool, as well as the wide range of language and discourse measures it provides. Part I of the book focuses on the theoretical perspectives that led to the development of Coh-Metrix, its measures, and empirical work that has been conducted using this approach. Part II shifts to the practical arena, describing how to use Coh-Metrix and how to analyze, interpret, and describe results. Coh-Metrix opens the door to a new paradigm of research that coordinates studies of language, corpus analysis, computational linguistics, education, and cognitive science. This tool empowers anyone with an interest in text to pursue a wide array of previously unanswerable

research questions.

Examining Reading 2009 Hanan Khalifa "This volume develops a theoretical framework for validating tests of second language reading ability. The framework is then applied through an examination of tasks in Cambridge ESOL reading tests from a number of different validity perspectives that reflect the socio-cognitive nature of any assessment event." --Back cover.

Second Language Listening 2005-02-07 John Flowerdew As an essential part of communicative competence, listening is a skill which deserves equal treatment with the other basic skills of speaking, reading, and writing. Second Language Listening combines up-to-date listening theory with case studies of actual pedagogical practice. The authors describe current models of listening theory and exemplify each with a textbook task. They address the role of technology in teaching listening, questioning techniques, and testing. Second Language Listening is designed to be used with both pre-service and in-service teachers who are involved in the teaching of listening or the design of pedagogic materials for listening.

Translation in Language Teaching and Assessment 2013-09-11 Georgios Floros The aim of this volume is to

record the resurgent influence of Language Learning in Translation Studies and the various contemporary ways in which translation is used in the fields of Language Teaching and Assessment. It examines the possibilities and limitations of the interplay between the two disciplines in attempting to investigate the degree to which recent calls for reinstating translation in language learning have borne fruit. The volume accommodates high-quality original submissions that address a variety of issues from a theoretical as well as an empirical point of view. The chapters of the volume raise important questions and demonstrate the beginning of a new era of conscious epistemological traffic between the two aforementioned disciplines. The contributors to the volume are academics, researchers and professionals in the fields of Translation Studies and Language Teaching and Assessment from various countries and educational contexts, including the USA, Canada, Taiwan R.O.C., and European countries such as Belgium, Germany, Greece, Slovenia and Sweden, and various professional and instructional settings, such as school sector and graduate, undergraduate and certificate programs. The contributions approach the interplay between the two disciplines from various angles, including functional approaches to translation, contemporary types of translation, and the discursive interaction between teachers and students.
