Developing Teachers' Assessment Capacity

2019-12-13 Christopher DeLuca Given the academic benefits of assessment-driven teaching, and the growing accountability context of educational systems around the world, there is a rapidly developing need to educate teachers in effectively using assessments to promote, monitor, and report on student learning. However, assessment has historically been a neglected area in teacher education programmes, and empirical research has consistently shown assessment as an area of challenge for many teachers. While there is an increased focus across teacher education and professional literature on enhancing the assessment capacity of educators, there remains little empirical research on innovative and data-based strategies to effectively achieve this goal. The purpose of this text is to consolidate existing research on assessment education and to provoke innovative and effective approaches to educating teachers and teachers-in-training about assessment. Given the dearth of relevant research, this text also considers the matter of retention and extension of initial assessment learning into teaching careers. Combined, the articles in this text provide a foundation for novel thinking about developing teachers' assessment capacity from pre-service to in-service

contexts. This book was originally published as a special issue of Assessment in Education.

Corporate Finance and the Securities Laws, 6th Edition

2019-12-10 Johnson, McLaughlin, and Haueter Corporate Finance and the Securities Laws has been winning over practitioners with its clear "how to do it" approach ever since its publication in 1990. This acclaimed guide is now completely updated in this Sixth Edition to help you meet the challenges of raising capital in today's increasingly regulated marketplace. Written in plain English by two top experts in the field - each with literally hundreds of successful deals under his belt, Corporate Finance and the Securities Laws is the "go to" resource which explains the mechanics of corporate finance together with the statutes that govern each type of deal. You'll receive expert corporate finance analysis, procedural guidance, and practical securities law pointers every step of the way to help you Structure all types of corporate finance deals - from public, private, and offshore offerings to corporate debt restructurings, commercial paper programs, raising capital, and asset-based securities transactions Root out problems before corporate finance deals are put in motion, with heads-up input on securities law prohibited practices, potential liabilities, conflicts of interest, due diligence concerns, and other red-flag issues Shepherd transactions through the corporate finance regulatory process with a clear understanding of applicable statutes and their implications in real-life situations Know what to do when securities law problems crop up - and find clear answers to the countless questions that develop in the course of a corporate finance deal Close deals, raising capital in a timely manner and work shoulder to shoulder with clients to accomplish your corporate finance objectives

Unmanned Aircraft Systems Traffic Management

2021-08-24 Michael Scott Baum This book introduces unmanned aircraft systems traffic management (UTM) and how this new paradigm in traffic management integrates unmanned aircraft operations into national airspace systems. Exploring how UTM is expected to operate, including possible architectures for UTM implementations, and UTM services, including flight planning, strategic coordination, and conformance monitoring, Unmanned Aircraft Systems Traffic Management: UTM considers the boundaries of UTM and how it is expected to interlace with tactical coordination systems to maintain airspace safety. The book also presents the work of the global ecosystem of players advancing UTM, including relevant standards

development organizations (SDOs), and considers UTM governance paradigms and challenges. FEATURES Describes UTM concept of operations (ConOps) and global variations in architectures Explores envisioned UTM services, including flight planning, strategic coordination, conformance monitoring, contingency management, constraints and geo-awareness, and remote identification Highlights cybersecurity standards development and awareness Covers approaches to the approval, management, and oversight of UTM components and ecosystem Considers the future of UTM and potential barriers to its success, international coordination, and regulatory reform This book is an essential, in-depth, annotated resource for developers, unmanned aircraft system operators, pilots, policy makers, researchers, and academics engaged in unmanned systems, transportation management, and the future of aviation.

Model Rules of Professional Conduct

2007 American Bar Association. House of Delegates The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

Translating Euclid

2022-05-31 GERRY STAHL Translating Euclid reports on an effort to transform geometry for students from a stylus-and-clay-tablet corpus of historical theorems to a stimulating computer-supported collaborative-learning inquiry experience. The origin of geometry was a turning point in the pre-history of informatics, literacy, and rational thought. Yet, this triumph of human intellect became ossified through historic layers of systematization, beginning with Euclid's organization of the Elements of geometry. Often taught by memorization of procedures, theorems, and proofs, geometry in schooling rarely conveys its underlying intellectual excitement. The recent development of dynamic-geometry software offers an opportunity to translate the study of geometry into a contemporary vernacular. However, this involves transformations along multiple dimensions of the conceptual and practical context of learning. Translating Euclid steps through the multiple challenges involved in redesigning geometry education to take advantage of computer support. Networked computers portend an interactive approach to exploring dynamic geometry as well as broadened

prospects for collaboration. The proposed conception of geometry emphasizes the central role of the construction of dependencies as a design activity, integrating human creation and mathematical discovery to form a human-centered approach to mathematics. This book chronicles an iterative effort to adapt technology, theory, pedagogy and practice to support this vision of collaborative dynamic geometry and to evolve the approach through on-going cycles of trial with students and refinement of resources. It thereby provides a case study of a design-based research effort in computer-supported collaborative learning from a human-centered informatics perspective.

How to Invest in Structured Products

2009-09-15 Andreas Bluemke This book is essential in understanding, investing and risk managing the holy grail of investments - structured products. The book begins by introducing structured products by way of a basic guide so that readers will be able to understand a payoff graphic, read a termsheet or assess a payoff formula, before moving on to the key asset classes and their peculiarities. Readers will then move on to the more advanced subjects such as structured products construction and behaviour during their lifetime. It also explains how to avoid important pitfalls in products across all asset classes, pitfalls that have led to huge losses over recent years, including detailed coverage of counterparty risk, the fall of Lehman Brothers and other key aspects of the financial crisis related to structured products. The second part of the book presents an original approach to implementing structured products in a portfolio. Key features include: A comprehensive list of factors an investor needs to take into consideration before investing. This makes it a great help to any buyer of structured products; Unbiased advice on product investments across several asset classes: equities, fixed income, foreign exchange and commodities; Guidance on how to implement structured products in a portfolio context; A comprehensive questionnaire that will help investors to define their own investment preferences, allowing for a greater precision when facing investment decisions; An original approach determining the typical distribution of returns for major product types, essential for product classification and optimal portfolio implementation purposes; Written in a fresh, clear and understandable style, with many figures illustrating the products and very little mathematics. This book will enable you to better comprehend the use of structured products in everyday banking, quickly analyzing a product, assessing which of your clients it suits, and recognizing its major pitfalls. You will be able to see the added value versus the cost of a product and if the payoff is compatible with the market expectations.
