WebJul 21, 2023 · The Biology of Peatlands May 19 2023 There is a growing awareness that peatlands are a key component of the global carbon cycle due to their role as an important carbon sink. However, many ecologists and conservation biologists lack a general understanding of peatlands

*Biology Peatlands' past suggests fast- changing future*

Webby peatlands has been so pervasive, until now? It's appealing, and it's a simpler explanation than one that demands a dramatic change in conditions. We examine how the plants that live there now support one another physically, and we infer a slow process of expansion of that support across the surface of the water. To explain the kind of sudden
