Acupuncture can do more than just helping patients deal with arthritis or migraine. Clinical tests have shown that it can help obese people lose weight and those who are suffering from insomnia.

In some countries, acupuncture has even been used to replace chemical anesthesia prior to surgery as there are some patients who are not able to tolerate regular anesthesia.

Another field which acupuncture has proven to be effective is helping patients deal with their addictions such as alcohol, drugs and smoking. One study of smokers revealed that the average patient will cut down by half the number of cigarettes they consume after just one treatment. Just imagine the potential after a few more sessions!

Challenge the hospitalist manual pdf pdf; Acupuncture and Weight Loss

There are a lot of people who are overweight. For those who are obese, perhaps surgery is the best option but for those who can't, they can try to see if acupuncture can help take out the excess weight.

Acupuncture is a form of holistic healthcare that uses needles to help treat a patient. Unlike the cartoon where the balloon will pop and all the air will go out, the needles that are inserted into the vital points will stimulate the body to release endorphins thus helping the person control their appetite.

But before needles are inserted, the specialist will first ask the patient some questions and perform an examination. This is needed to understand the main cause for the person to be overweight.

Study case the hospitalist manual pdf pdf

Most patients that undergo acupuncture will not feel any significant change after one session which is why a few sessions are needed. Best of all, it is painless so your body will not feel sore afterwards.

Several studies have been conducted about acupuncture and there have been positive results. For instance in the UK, 400 participants who were suffering from migraines claimed they felt better after 3 months worth of sessions.

In the US, acupuncture has also proven to be effective in helping people deal with arthritis because the needles help the body fight against this chronic illness that is much cheaper and more effective than conventional medicine.

Guide the hospitalist manual pdf pdf... Although there are risks if you decide to go undergo acupuncture, these can be avoided as long as the one doing it is a licensed professional who makes sure that the needles used are sterilized before they are inserted into the body.

These days, a lot of people in the medical field have accepted the fact that alternative medicine such as this can also help the patient which is why they may refer someone when it is needed.

So, if you are tired of experiencing the side effects of conventional medicine and want to try a holistic form of healthcare, why don't you see what acupuncture can do for you? It is painless and cost effective. In fact, it is just one of many you can try to help treat a chronic condition.

Hope the hospitalist manual pdf pdf~The eighth myth is that acupuncture is only used in third world countries. This is not true because this technique originated in China more than 2000 years ago and this has spread to developed nations in Asia such as Japan, South Korea, Singapore and Malaysia.

Here at home, acupuncture been practiced for more than 2 decades and is legal in 30 states. In fact 22 of them, license professionals after they graduate once they pass the state board examination.

Although acupuncture has been around for a very long time, there is still a need for this form of holistic healthcare which is why this is being taught in colleges and in use today. It is painless and cost efficient and a lot of studies have shown that it is effective in treating various illnesses and preventing some of them.

Review the hospitalist manual pdf pdf

Anyone can try facial acupuncture because it is painless and it has proven to reverse the signs of aging. However, if you are pregnant, suffer from the colds or flu, have acute herpes or an allergic reaction, it is best to wait until this has passed.

But before anyone can try facial acupuncture, they first have to be evaluated by the acupuncturist. This person will evaluate your age, lifestyle and diet. If everything looks good, then you will probably do an average of about 12 to 15 treatments. More could be done if your skin tends to sag, manifest jowls or have droopy eyes.

Facial acupuncture treatment needs to be done twice a week for about 45 minutes to 1 hour. For those who can't make two sessions in a week, they can opt for the 1 treatment that will last 90 minutes.

Obsession the hospitalist manual pdf pdf: After the regular sessions, it is advisable to go back for follow up treatment. It should be every 2 weeks for the next 2 months and then once a month later on.

Aside from needles, most clinics use herbs in the form of masks, poultices and moisturizers. Before you use it, check with your doctor to make sure there is no allergic reaction to any forms of medication that you are taking.

After the first facial acupuncture treatment, you will usually seen an increased glow to one's complexion which the Chinese say an increased Qi or blood flow to the face. It becomes more open, the wrinkles start to disappear and the skin appears more toned.

The disease should not be taken lightly and if it's left untreated it can spread and affect the bones under the teeth which would eventually dissolve and would not longer support the teeth in its place. The chronic form of the disease is responsible for tooth loss in seventy percent of the cases affecting seventy five percent of the people at some time in their lives.

The causes of periodontal disease are similar to any other oral disease wherein plaque buildup and bacteria are responsible for the condition. According to statistics plaque buildup is the main cause of gum related diseases. Apart from the causes listed, the other possible causes of periodontal disease include: Genetics, unkempt oral hygiene, food getting stuck to frequently in the gums, mouth breathing, low nutrient diet or vitamin c deficient diet, smoking, diabetes, autoimmune/systemic disease, changes in hormone levels, certain medications and constantly teeth grinding.

According to statistics nearly sixty six percent young adult population suffers from periodontal disease and nearly fifty percent of teenagers suffer from periodontal disease. Also, it is the most widespread tooth loss cause in adults. But, what are the symptoms of periodontal disease? There are various symptoms and it could differ from one adolescent to the other which may include swollen, tender, and red gums; if one gets bleeding during brushing or flossing the teeth it is also one of the symptoms of periodontal disease; receding gums; constant odorous breath; loose teeth; dentures not fitting any longer; change in alignment of jaw and bite. The symptoms of the disease may be similar to other medical conditions and doctor's consultation is the best in this regard.

You won't have a hard time looking for one as the number of institutions which teach students about acupuncture have gone up at a rapid rate since 1982 when the Accreditation Commission for Acupuncture and Oriental Medicine (ACAOM) and the Council of Colleges of Acupuncture and Oriental Medicine (CCAOM) were established.

To date there are about 50 colleges and a few also offer a master's degree in Oriental Medicine and Acupuncture.

So what are you waiting for? If you think you have what it takes to be an acupuncturist, then go ahead and just do it.

For Free the hospitalist manual pdf pdf...Apart from studying the medical history of the patient, the doctor will recommend diagnostic procedures such as bone scans, X-ray, magnetic resonance imaging and blood test. The bone scans will determine the arthritic changes and degenerative changes in the joints, which helps to detect tumors & bone diseases and the cause of pain and inflammation. The X-ray will give the inside picture of the bones, tissues and organs. The magnetic resonance imaging provide detailed image of the structures within the body with the help of large magnets. It is best if slipped capital femoral epiphysis is determined in the early stages, so that the femur bone's head doesn't slip off any further. The adolescent may need to undergo a surgery along with physical therapy.

Periodontal Disease in Adolescents

The meaning of the word "periodontal" is around the tooth. Also known as gum diseases periodontal diseases are nothing but serious infections caused by bacteria that harm the gums and tissues in the vicinity of the mouth. While dental cavities or caries only affects the tooth Periodontal disease is devastating affecting the bones that surround the tooth, gums, coverings of teeth root and tooth membrane. A physician specializing in

the treatment of periodontal disease is known as Periodontist.

Accounting is basically the language of businesses.

In accounting, you will see that there will be a lot of career opportunities that you can consider.

The first is public practice. Most accountants start their career as a certified public accountant. In this career choice, you will be able to charge a fee for your services or you can also work as a staff accountant or an in-house accountant.

Opportunity the hospitalist manual pdf pdf~The profit & loss of a certain company is determined by finance professionals through accounting. They can determine what created the profits as well as the losses.

Accountants form some sort of business equation so justify the profits & losses of a business. By doing so, they can easily tell a company's net worth.

It seems that by simply starting to define one accounting term, it eventually leads to defining other terms as well. Net worth is another term that is quite difficult to understand. It refers to the resulting amount after deducting the liabilities of a company from the assets. Private companies refer to net worth as owner's equity.

Why owner's equity? Well, after deducting all the liabilities, what's left basically belongs to the owner. In the case of public companies, the profit of the business is returned as dividends to shareholders. As you can see, before owner or shareholders of a company can take hold of the profits, all liabilities must be deducted first.

Instruments

Modern acupuncturists nowadays use disposable fine stainless steel needles that are 0.007 to 0.020 inches in diameter which are sterilized with either ethylene oxide or by autoclave. Since they are way finer than hypodermic syringe needles, being poked by these needles are relatively painless. The upper third of the needle is covered with either a thicker bronze wire or plastic to make the needle sturdier and easier to handle. The length of the needle and how far they are inserted is all up to the acupuncturist and his practised style of acupuncture.

Example Of Treatment

If a patient has a headache, he/she is diagnosed and is treated by stimulating the sensitive points located at the webs between the thumbs and palms. In acupuncture theory, these points are connected to the face and head and can be used for treatment of headaches and other ailments involved. Needles are then carefully inserted into the skin until the patient feels a twinge, which is usually accompanied by a slight involuntary twitching of the area. During this treatment, a number of things may occur.

- Sensitivity to pain in where needles are inserted.
- A hint of nausea during treatment in case of bad headaches.
- Near-immediate headache relief.

Discovery the hospitalist manual pdf pdf__The greatest advantage of this ancient Oriental procedure is the absence of side-effects during and after treatment. Unlike smoking cessation medications and nicotine replacement therapy products, acupuncture does not employ chemically manufactured substances. There is also no risk of weight gain during therapy. In conjunction with helping a patient quit smoking, it can also curb appetite, thus reducing food cravings. If you have tried several methods in smoking cessation to no avail, perhaps it is high time you consider the alternative method that is acupuncture. With the right practitioner and the right frame of mind, there is no reason why you won't be nicotine-free before long.

Accounting experts designed the software and it can assist church officials in managing finances. The software engineers are already well-acquainted with the church's various needs and so they can easily tailor-fit a certain church's software according to its particular requirements.

The church accounting software is quite different from other software. Ordinary accounting software is designed to suit the needs of modern businesses. The church accounting software on the other hand focuses mainly on the necessities of the institution. The church has no ambition or any financial interest. Remember, the church is not being taxed by the government and so its expenditure and resources takes a different curve altogether. Aside from that, the church has several expenditure and income account heads.

Reactions And Research

Not everyone is impressed with acupuncture itself. Most western medical professionals have expressed either doubt or indifference to the oriental method while others have downright driven it down into the earth with criticisms and brutal skepticism. However, recent research shows the efficacy (or lack thereof) of acupuncture, and while more research has to be done, it has been proven to actually positively affect some, but not all, forms of ailments that it claims to cure.

So as the doors open to a new age of acupuncture, give it a try when you feel the need for pain relief and you will not be disappointed. As the Chinese have used it for many centuries, so should we.

The history of acupuncture is first discussed in an ancient Chinese medical text called the "Huang Di Nei Jing" or The Yellow Emperors Classic of Internal Medicine.

But there have been a few who are skeptic as archaeologists have found a 5,000 year old mummy in the Alps with similar acupuncture points in the body. This gives some people the idea that it was used even before the Chinese did but sine there is no written text to prove that, no one is certain and credit to this ancient practice goes back to the Chinese.

In the 6th century, this knowledge moved to Japan. In the 17th century, a man by the name of Waichi Sugiyama wanted to make this procedure painless for the patient so he developed the insertion tube, a small cylindrical tube through which the needle is inserted. Believe it or not, this technique is still being used today.

Opportunity the hospitalist manual pdf pdf;The earliest account of this is found in the book called Nei Jing which in English means the Yellow Emperor's Classic of Internal Medicine. The contents of this book date somewhere around 200 BC. Back then, they did not use metal needles and instead used those made out of stone, moxibustion and herbs to treat a patient.

Acupuncture prevents and treats diseases by inserting very fine needles into the skin specifically at the anatomic points of the body.

The principle behind this concept is that illnesses occur because there is an imbalance in your life force otherwise known as Qi. It is believed that this flows in 14 channels in the human body known as meridians which branch out to bodily organs and functions. If there is a blockage or obstruction in any of them, this is when you succumb to a disease or an illness.

In some instances the combination of both the methods might be the way to go for acne treatment. Topical medication is nothing but creams, gels, lotions, solutions etc. prescribed to patients for acne treatment. Some of the examples of topical medication are: Benzoyl Peroxide which kills the Propionibacterium Acnes bacteria, antibiotics helps in stopping or slowing down the growth of the bacteria and also reduces inflammation, Tretinoin helps in stopping the formation of new acne lesions and Adapalene reduces formation of comedo.

Systemic drug therapies involve prescription of systemic antibiotics primarily for the treatment of acne problem which is moderate to severe in nature. The examples of antibiotics prescribed are Doxycycline, erythromycin and tetracycline. In some cases an oral drug called Isotretinoin is prescribed for teenagers with severe acne problem which shrinks down the sebaceous glands that produce oil. The results are pretty good and almost ninety percent of the adolescents have success with this oral drug. But the drug has some serious side-effects and thus it is very important that one consults a doctor before use.

How It Stops the Addiction

The placement of needles is usually located behind the ear, or on the ear cartilage. This is where the calming effect takes place, curbing the patient's cravings for more cigarettes. People who have a smoking habit are bound to take up the nicotine stick more often whenever they feel stressed, bored, or depressed. Needles are also often inserted on the hand and wrists to promote a steadier flow of bodily energy. The feeling of relaxation will help an individual think twice about lighting a cigarette again.

Furthermore, this treatment has been found to help an individual deal with the withdrawal symptoms better. This alternative medicine promotes better tolerance to pain and discomfort during smoking cessation.

Withdrawal symptoms can range from mild to severe and may involve nausea, palpitations, and dizziness. Oftentimes, these same conditions will propel an individual back to his smoking tendencies sooner than later.

Acupuncture Closely Revealed

The foundation of acupuncture rests on the relevance of an individual's chi in maintaining bodily and mental health. It is believed that chi is present in every living creature, and flows through specific pathways in the body. Health problems arise when the flow of chi on the body is blocked. As a result, a person may feel persistent headaches, muscle pain, fever, weakness, or in the worst case, becomes afflicted with more serious

health conditions.

A Deeper Explanation of Acupuncture

Acupuncture has its origins in ancient Chinese philosophy and practice. More than ten thousand years ago, during the Old Stone Age of China, stones were fashioned into knives for medical purposes. After several years, during the New Stone Age, these stones were eventually made into needles intended for the same therapeutic end. These accounts are further evidenced by unearthed stone needles found to be of the same types used during the New Stone Age.

Eight Myths About Acupuncture

There are a lot of myths with regards to acupuncture. Some of these are true; others are silly while the rest only have a half truth. As you read on, you will learn which ones are worth believing.

The first myth is that acupuncture is painful. This is not true because those who have tried it claimed they only experienced a tiny prick while others did not feel anything at all. There is no tissue damage when the needle is inserted into the skin or pulled out and only in very rare cases are there traces of bruising.

The second myth is that you can get hepatitis or AIDS from acupuncture. This is true only if the needles used are not sterilized. In the US, this will never happen because acupuncturists are required to use disposable needles thus you are not at risk from these two diseases.

[Lolita the hospitalist manual pdf pdf](#): There are many premenstrual syndrome symptoms which can be broadly classified as neurologic & vascular symptoms, psychological symptoms, gastrointestinal symptoms, fluid retention, eye problems and respiratory problems. The cause of premenstrual syndrome are fluctuations in the levels of progesterone & estrogen, hypoglycemia, hyperprolactinemia, psychogenic factors, changes in carbohydrate metabolism, excessive aldosterone, progesterone allergy and water retention by kidneys. The good thing is that premenstrual syndrome can be prevented by exercising regularly, eating balanced diet and sleeping adequately.

Dysmenorrhea is feeling intense menstrual pain and cramps. Depending on the severity, dysmenorrhea is stated as primary dysmenorrhea or secondary dysmenorrhea. Primary dysmenorrhea symptoms are felt from the onset of the menstrual periods and are felt life-long. Because of abnormal uterine contractions due to chemical imbalance, severe menstrual cramping is experienced. Secondary dysmenorrhea starts in the later stages. The causes are different for primary and secondary dysmenorrhea. Secondary dysmenorrhea can be blamed on medical conditions such as endometriosis, uterine fibroids, pelvic inflammatory disease, tumors, infections, and abnormal pregnancy.

Dysmenorrhea symptoms are lower abdomen cramping & pain, lower back pain, nausea, diarrhea, vomiting, fatigue, fainting, weakness and headaches. Females who are overweight, smoke, and have started to menstruate before turning eleven are at a higher risk of developing dysmenorrhea. Females who drink alcohol during menstrual period experience prolonged pain. After studying the health conditions, age, cause of dysmenorrhea, and extent of condition of the individual, corresponding treatment will be recommended. Regular exercise, abdominal massage, hot bath, vitamin supplements, and dietary modifications can help overcome dysmenorrhea.

Heat related illnesses are caused due to prolonged exposure to heat and also humidity without any reprieve and due to inadequate intake of fluids. Kids and teens adjust to the variations in heat compared to adults who adapt more quickly. However the heat production is high in them when compared to adults but sweat relatively less. Sweating is the natural action of the body and cooling mechanism to counter heat. Kids and teens often ignore these facts and do not hydrate themselves enough while playing, participating in sports and exercises.

Kids and teens with health problems that are chronic or those who are on certain prescription could be more susceptible to heat related problems. Overweight adolescents or those who wear heavy clothing in times of exertion also suffer heat related illnesses. Heat related illnesses are basically classified into three types. They are: Heat cramps, heat stroke and heat exhaustion.

There are basically 14 pathways throughout the body where chi flows continuously. These are called the meridian points. In order for chi to course through the body unobstructed, there has to be a balance between the strengths of yin and yang. In ancient Chinese philosophy, yin and yang represent the forces of the universe- yin is for feminine, while yang is for masculine. Every single thing in the universe is believed to contain both yin and yang for harmony.

When the yin and yang are not balanced, chi cannot stream through the body liberally. Therefore, the meridian points through which chi courses through need to be stimulated. This is done by the insertion of hair-thin, disposable needles in specific areas on a person's body to induce bodily harmony and bring about healing.

A certified and trained acupuncturist will be able to carry out an excellent therapy session for the patient. Trainings for acupuncturists are given in order for them to obtain their licenses. A poor practitioner may not be proficient enough with the practice and could end up jeopardizing the results of the entire procedure. Nowadays, it is wise to verify on a practitioner's credentials to ensure a safe and effective acupuncture treatment.

Variations of Conventional Acupuncture

Auriculotherapy or ear acupuncture is one of the variations of conventional acupuncture. In this practice, it is believed that the ear provides a map for all the major bodily organs. A specific area or point on the ear corresponds to a particular organ, such as the heart, kidneys, or liver. Thus, the needles are placed in particular points around the ear and on the ear cartilage.

Staple acupuncture is a method used in smoking cessation, wherein staples are placed for a certain period anywhere on the ear area to provide stimulation.

Indeed there is growing evidence that this traditional Oriental practice can rival any modern forms of treatment. If you are one of the many people who are looking for a widely recognized and time honored therapeutic practice, acupuncture may just be the alternative treatment for you.

What This Ancient Method Does

One of the foremost effects of acupuncture on the body is relaxation. Stress is frequently pinpointed as the main precursor for a host of physical ailments. There are particular points all over the body that direct the flow of harmony and relaxation and when these are enthused, the patient becomes more at ease.

Another positive effect of this alternative therapy is increased pain control. During a session, a patient will usually feel very minimal pain as the thin needles are being inserted gradually. However, the needles are deliberately placed in varying depths, depending on the health requirements of the patient. When the needles reach the right depth, the patient will feel deeper pain, although the entire procedure is not necessarily painful.

It is also recommended for relief from chemotherapy fatigue as well as chemotherapy-related nausea. It has also been found to be largely effective for back pains, migraines, menstrual cramps, and as a pain controller for patients after undergoing surgical operations.

Life Lessons from the hospitalist manual pdf pdf, Heat cramps are the mildest of all heat related injuries and constitute aching muscle cramps and also spasms that occur during intense exercising and also after intense exercising and also sweating in high heat. The symptoms of heat cramps include cramps that are painful in the legs. Flushed and moist skin is also symptoms of heat cramps. The symptoms could also include mild fever generally below 102 degree Fahrenheit. Teens suffering from heat cramps should move to a cool place and take adequate rest. Remove any excessive clothing and wear or put cool clothing on skin or cool skin using air conditioner or fan. Sports drinks which are cool and which contains sugars and salts can also be taken. Stretching out cramped muscles slowly and steadily also helps reduce heat cramps.

On the other hand heat exhaustion is more serious and severe compared to heat cramps and occur due to heavy loss of salt and water from the body. Extreme heat conditions, inadequate fluid intake and excessive sweating results in this conditions. Also, heat exhaustion occurs as a result of inability of the body to maintain the body temperature below the normal which can deteriorate further and also result in a heat stroke which is even worse. The symptoms of heat exhaustion are: muscle cramps, moist skin, pale skin, nausea, fever above 102 degree Fahrenheit, diarrhea, vomiting, fatigue, headache, weakness, anxiety and faint feeling. Teens suffering from heat exhaustion should stay in cool surrounding and take enough rest. Removing excessive clothing, putting on cool clothes and sitting in fan or air conditioning also helps the situation. Intake of cold sports drinks which contains salts and sugars are also advisable. If a teen doesn't show any signs of improvement even after taking all these measures a physician should be consulted immediately.

In TCM, practitioners adhere to the concept of Qi, or energy flow, and the meridians in which they travel. They use longer needles and insert them deeper in order to reach the acupuncture points. Modern science has found little evidence to prove the existence of these energy channels, but this is the technique that has been used effectively for thousands of years.

In medical acupuncture, the practitioners are graduates of western medical schools. Their application of needles is not based on the traditional acupuncture points, but on anatomic data. These acupuncturists use shorter needles and the insertions are shallower. They also tend to use fewer needles and leave them inserted for shorter periods of time. Adherents to TCM feel this is a watered-down version of the real thing.

Nevertheless, many patients have felt relief of symptoms through this method.

Conditions for Puncture Application

There is a broad and extensive list of ailments which can be treated with acupuncture. The conditions run the gamut from asthma to constipation, anxiety to weight loss. Most TCM practitioners believe that any health condition results from an imbalance in Qi flow, therefore amenable to needle therapy. Western acupuncturists tend to have a more limited list of indications, the most common of which is undoubtedly control of pain.

Do not be alarmed and keep your acupuncturist updated on what you are feeling to ensure everything is going as expected.

You need never fear the thought of needles ever again. Acupuncture is a beneficial treatment with a long history of effectiveness. It is used to complement current medical therapy and should not replace currently existing medications or treatments.

The safe application of this once exclusively Chinese therapy can now be experienced by chronic disease sufferers worldwide.

Study case the hospitalist manual pdf pdf, Allergic reactions can range from mild symptoms like runny nose to more severe ones such as difficulty in breathing. Teenagers suffering from asthma often have allergic reaction to cold and get asthma attack is another example of allergies. Some kinds of allergies trigger multiple symptoms. Allergic reactions in very rare cases also produce severe reaction known as "anaphylaxis" for which the signs are difficulty in breathing, difficulty in swallowing, swelling in tongue, lips and throat and dizziness. This allergic reaction occurs as soon as the system is exposed to substances that trigger allergic reactions like peanut although some reactions are delayed by as much as four hours.

The reasons why people get allergies can be various and one of the reasons could be hereditary but that that does not necessarily mean that children are bound to get allergies from their parents. Some of the common allergens include food, airborne particles, insect bite and sting, medicines, chemicals etc. Food allergies typically occur in infants and usually vanish as the child grows. The list of food allergens includes milk & dairy products, wheat, soy, eggs, peanuts, and seafood. Some people are allergic to stings and bites of certain insects. The venom in the bite is the one which actually causes reaction and can be as serious as anaphylactic in some teens. Some teens are also allergic to airborne particles which are also known as environmental allergens. They are also the commonest of all the allergens. Examples of these allergens include dust mites, animal dander, mold spores, grass pollens, trees and ragweed. Some adolescents are also allergic to certain antibiotic medicines. Another common allergen is chemical, certain chemicals present in laundry detergents or cosmetics can cause rashes that are itchy in nature.

Allergists usually treat allergic problems. They may ask questions like symptoms of the allergy and whether it is hereditary. They may also prescribe certain diagnostic tests like blood or skin test depending on the type of allergy. The best way to treat allergies is to completely avoid the substances that cause allergies. However there are certain medications and injections are also available to treat allergies.

Cholesterol in Adolescents

Parts of adolescent's body are filled with a waxy stuff identified as cholesterol. It helps to produce vitamin D, cell membranes and certain hormones. Blood cholesterol comes from two different sources, liver within the body and food. The adolescent's liver produces enough cholesterol to carry out proper functioning.

The blood acts as the carrier of cholesterol and transports it to different parts of the body. They are transported in round particle form known as lipoproteins. There are two types of lipoproteins called the low density lipoproteins or LDL and high density lipoproteins or HDL. Low density lipoprotein or LDL cholesterol is commonly known as bad cholesterol. It helps in the building up of plaque in arteries and this condition is known as atherosclerosis. The LDL level must be low in the blood and if it is high it must be decreased. Healthy weight must be maintained and exercise should be done regularly. Food items which have high contents of calories, dietary cholesterol and saturated fat must be avoided.

High density lipoprotein or HDL cholesterol is the good cholesterol. It is actually a kind of fat in blood which helps to remove bad cholesterol from the body and stops the build up of plaque in the arteries. The more the HDL cholesterol in the blood the better it is. The HDL can be raised by at least twenty minutes of exercising daily, decreasing body mass and keeping away from food with saturated fat. Some adolescents need to take medications in order to increase HDL. In such cases, increasing HDL can be a complicated procedure and the physician can make a therapeutic plan to increase HDL in the blood stream.

Lolita the hospitalist manual pdf pdf When adolescents wear braces they have to take certain precautions in order to avoid any more oral health complications. The most important precautionary measure is to brush the teeth regularly after every meal. Since the food can be easily lodged in braces, it is a good idea to brush carefully with soft bristles toothbrush and fluoride toothpaste. In the morning, the adolescent must floss between the braces and teeth. Food stuffs which are sticky or hard must be avoided as they are very difficult to remove. Foods like caramel, chew candy, popcorn, and nuts must be avoided. Cleaning must be done by the orthodontist or general dentist, every five to six months.

The wisdom teeth or third molars can grow in people of the age fifteen to twenty five. These teeth cause problem, because most of the mouths are too small to adjust new teeth and hence they need to be removed. If the wisdom tooth has place to grow, without affecting other teeth, they can be left to themselves. But if the adolescent experiences pain, facial swelling, mouth infection and gum-line swelling, then they should be extracted immediately. They can also destroy the second molars and impact other tooth. Various gum and jaw diseases can be caused. There can be a tumor development; cysts development and plaque build up. Hence, a surgery is performed to remove the tooth or teeth. The gum tissue covering the wisdom tooth is removed and the connective tissue connecting the tooth to the bone is detached. The tooth is then removed and the opening is sutured. A general dentist can perform wisdom tooth surgery in the local office using anesthesia.

Five times common than asthma is tooth cavities. The tooth above the gum line is made up of enamel, the hardest tissue within the human body. The tooth below the gum-line comprise of nerves, roots and dentin. Dentin is another type of tissue and isn't as hard as the enamel. The acid which leads to tooth decay is produced by bacteria. These acids, along with dietary sugar, attach the enamel and eat away the minerals within the enamel, until a cavity is formed. This is known as tooth cavity. The biggest prevention against dental cavities is brushing teeth twice a day and even better, after every meal with fluoride toothpaste and soft bristle toothbrush. Carbonated drinks must be avoided strictly and must be replaced with fruit juices and sugary food must be avoided. Intake of fluoridated water also helps a lot or fluoride supplements can be used as replacement.

But how well acupuncture does for one patient may vary with another. This depends on the condition of the attack and the individual.

The best part about acupuncture is that there are no side effects and it is painless. Skillful professionals can do this so you don't suffer from hematoma or pneumothorax. Another disease is potentially dangerous is HIV or hepatitis which can be prevented of course as long as the needles used are properly sterilized. It will be much better if the person uses disposable needles.

Acupuncture has been practiced in the United States for more than 2 decades. Although tests have shown how effective it can be to treat chronic conditions and certain addictions, more studies need to be done to see where else it can be useful.

The areas where the needles will be inserted will be in the ear and in two of three body points. These areas could also include the mouth, the stomach, the lung, the endocrine, the spleen, kidney or thyroid.

During the initial treatment, the "Four Gate" points would be used to circulate energy throughout the entire body. It is also possible that electro stimulation will also be done to increase endorphin release and stimulate metabolism.

Read Only : the hospitalist manual pdf pdf There are basically two types of diabetes that will affect an adolescent. It is type 1 diabetes and type 2 diabetes. Type 1 diabetes affects the immune system's function as the systems attacks the pancreas' insulin producing cells, also known as the beta cells. Because of this, the pancreas loses the ability to manufacture insulin. This is the reason why people with type 1 diabetes take insulin everyday. The symptoms are weight loss, increase in urination & thirst, blurred vision, tiredness and constant hunger. And if the adolescent isn't treated at the right time, he/she can slip in to diabetic coma which can endanger his/her life. In type2 diabetes, the body is incapable of properly using the insulin produced by the body and requires insulin from an external source, too. The symptoms of type 2 diabetes are similar to type 1 diabetes. The teenager feels sick, tired, nauseated, and thirsty. The wounds will recover very slowly; he/she will get infections frequently, will develop blurred vision and will experience weight loss.

Parents play a vital role in determining the problem. They should constantly observe their child for eating disorders or signs of depression. Although cigarette, drugs and alcohol should be avoided by all adolescents and children, it is even more important that youngster with diabetes should stay away from these things as they can worsen the situation. A person with diabetes, who switches to smoking, is at risk of developing cardiovascular diseases and circulatory problems. Consumption of alcohol can cause hypoglycemia or low blood sugar. It is the duty of the parents to make their child aware of the possible risk they would face if they start to smoke, drink alcohol or take drugs.

Children and adolescents, who have diabetes, face many challenges while trying to lead a normal life. They have to think twice before doing simple things as going to a party, playing sports and even when staying over with friends. This is because they require to intake oral medication or insulin. Their blood sugar level must be checked many times through out the day. Also, at gatherings, they have to avoid many food items. Symptoms of depression in adolescents are eating disorders, weight change, irritable mood, excessive sleeping in daytime, excessive temper, criminal behavior, memory loss, fatigue, self preoccupation, sadness, difficulty in concentrating, worthlessness feelings, loss of interest, self hatred, obsession with death and thought & attempts of suicides. When these symptoms are being noticed for more than two weeks, it is important to get treatment for the adolescent. Depression not only affects interpersonal relationships, but school performance as well. Depressed adolescents are more prone to take onto drugs and alcohol as an attempt to overcome their depression. Such problems require intensive treatment.

The doctor will take blood test and perform physical examination to determine the cause of depression. The adolescent can also be tested for substance abuse such as smoking, heavy alcohol consumption, marijuana smoking, and usage of other drugs. After the physical examination, psychiatric evaluation is also done to understand the cause of sadness, loss of interest and irritability. Depression can also lead to the development of other psychiatric disorders such as schizophrenia, mania and anxiety. It is also important to determine whether the adolescent poses a risk for himself/herself and others. Family and school personnel can provide valuable information about the adolescent to the doctor.

Treatment for depression for adolescent is similar to the treatment of depression for adults. Along with the treatment, the adolescent are given antidepressant medication and psychotherapy. Antidepressant medications include tricyclics, Prozac, selective serotonin reuptake inhibitors or SSRI. Some of the medicines increase the risk, so it is a good idea that parents discuss the possible risks with the doctor. Only some of the antidepressant medications are meant for children and adolescents. Adolescents with severe depression need to be hospitalized as they are more prone to kill themselves.
