Social Equity and LGBTQ Rights

2020-12-30 Lorenda A. Naylor Can a baker refuse to make a wedding cake for a gay couple? Despite the U.S. Supreme Court decision guaranteeing marriage equality in 2015, lesbian, gay, bisexual, transgender, and queer (LGBTQ) citizens in the United States continue to be discriminated against in fundamental areas that others take for granted as a legal right. Using social equity theory and intersectionality but written in an accessible style, this book demonstrates some of the ways in which LGBTQ citizens have been marginalized for their identity and argues that the field of public administration has a unique responsibility to prioritize social equity. Categories utilized by the U.S. Census Bureau (male or female, heterosexual or homosexual), for example, must shift to a continuum to accurately capture demographic characteristics and citizen behavior. Evidenced-based outcomes and disparities between cisgender and heterosexual and LGBTQ populations are carefully delineated to provide a legal rationale for a compelling governmental interest, and policy recommendations are provided – including overdue federal legislation to prohibit discrimination based on sexual orientation and gender identity.

The Conflicted Superpower

2018-05-22 Andrew Kennedy For decades, leadership in technological

innovation has sustained U.S. power worldwide. Today, however, processes that undergird innovation increasingly transcend national borders. Cross-border flows of brainpower have reached unprecedented heights, while multinationals invest more and more in high-tech facilities abroad. In this new world, U.S. technological leadership increasingly involves collaboration with other countries. China and India have emerged as particularly prominent partners, most notably as suppliers of intellectual talent to the United States. In *The Conflicted Superpower*, Andrew Kennedy explores how the world's most powerful country approaches its growing collaboration with these two rising powers. Whereas China and India have embraced global innovation, policy in the United States is conflicted. Kennedy explains why, through in-depth case studies of U.S. policies toward skilled immigration, foreign students, and offshoring. These make clear that U.S. policy is more erratic than strategic, the outcome of domestic battles between competing interests. Pressing for openness is the "high-tech community"—the technology firms and research universities that embody U.S. technological leadership. Yet these pro-globalization forces can face resistance from a range of other interests, including labor and anti-immigration groups, and the nature of this resistance powerfully shapes just how open national policy is. Kennedy concludes by asking whether U.S. policies are accelerating or slowing American decline, and considering the prospects for U.S. policy making in years to come.

American Universities in a Global Market

2010-04-28 Charles T. Clotfelter In higher education, the United States is the preeminent global leader, dominating the list of the world's top research universities. But there are signs that America's position of global leadership will face challenges in the future, as it has in other realms of international competition. *American Universities in a Global Market* addresses the variety of issues crucial to understanding this preeminence and this challenge. The book examines the various factors that contributed to America's success in higher education, including openness to people and ideas, generous governmental support, and a tradition of decentralized friendly competition. It also explores the advantages of holding a dominant position in this marketplace and examines the current state of American higher education in a comparative context, placing particular emphasis on how market forces affect universities. By discussing the differences in quality among students and institutions around the world, this volume sheds light on the singular aspects of American higher education.

Human Capital Formation and Economic Growth in Asia and the Pacific

2013-07-18 Wendy Dobson The entire planet looks to Asian and other emerging markets to sustain growth momentum as traditional markets in the USA and Europe struggle with the slow and arduous processes of deleveraging after the global financial crisis. At the same time, there is growing recognition in Asia that the sources of growth must shift to sustain their own growth momentum in the years ahead. Heavy reliance on the region's high savings rates and plentiful supplies of low-cost labour will have to shift towards increasing the human capital embodied in more educated and skilled labour forces capable of contributing to productivity growth and innovation as future drivers of growth. Human

Capital Formation and Economic Growth in Asia and the Pacific focuses on why and how countries are making this shift. The demographic transition is shown to be a significant factor as ageing populations in Japan, South Korea and China manage declining growth in the labour force by stepping up investments in education, and by changing policies and institutions. Lessons to be learned from these experiences by more youthful populations in Southeast Asia are explored. In addition, attention is paid to the consequences of cross-border differentials in technical knowledge and the quantity and quality of human capital. Several implications for public policy and for international cooperation on human-capital issues in the Asian region are identified. The chapters in this volume are edited versions of papers presented at the 35th Pacific Trade and Development conference held in Vancouver, Canada, in June 2012. The conference goal was to better understand how governments and business in Asia and the Pacific can apply the key insight that one of the reasons economies grow is because of human-capital formation - the quality and diversity of the labour force are augmented - not just because the labour force grows in size. Students of Asia's growth prospects will find several aspects of this volume of particular value. It includes chapters on the big-picture conceptual and measurement issues; on country experiences in meeting the imperatives of the demographic transition and investing in education and skills training; and on country experiences with attracting foreign knowledge and the supply and recruitment of skills across borders in Asia and the Pacific. Policymakers will also find useful the discussions of policy implications and the menu of issues requiring intergovernmental cooperation within the Asian region.

Transforming Student Travel

2015-09-16 Faye Brenner Transforming Student Travel calls for a paradigm shift in the student tour industry: educators collaborating to create a student-centered, inquiry-based tour. Marcel Proust said, "The real voyage of discovery consists not in seeking new landscapes but in having new eyes." This resource guide explores ways educators can encourage students not only to see with "new eyes," but also to understand how they know. The International Baccalaureate informs the first part of the book which includes educational research as well as practical suggestions for improving the tour experience, including an integration of academic subjects. Although much has been written about the impact of international travel, this book explores ways educators can transform domestic tours for public and parochial school students. The second part of the book offers resource guides for four cities - Washington, D.C.; New York; Philadelphia; and Boston. Teachers, tour directors, and tour operators, will find discussion questions activities as well as detailed background information for four of the most visited cities by students. Many of the questions and strategies can be adapted for other landscapes.

Tourism Management

2022-09-14 Clare Inkson This introductory text provides readers with a

robust understanding of tourism and its industries, including how destinations are developed, marketed and managed, and how tourism impacts communities, environments and economies. The authors discuss the critical issues affecting 21st century tourism, such as sustainability, the climate crisis, globalisation, community, technology, the environment and the sharing economy. The text has been fully updated in light of the Covid-19 pandemic and its notable, and in some cases lasting, impacts on the tourism industry. The text features new mini-case studies (snapshots) and international case studies from countries around the globe including USA, Saudi Arabia, India, China, New Zealand, Australia, Namibia and the UK. It discusses the latest trends in transport, hospitality, attractions and the travel trade and includes examples from major tourism companies including Trip.com, TUI and Airbnb. The book is suitable for students who are starting their tourism studies as part of their college or university education. Clare Inkson is a Senior Lecturer in Tourism and Course Leader of BA Tourism with Business at the University of Westminster, London. Lynn Minnaert is the Academic Director and Clinical Associate Professor at New York University's Jonathan M. Tisch Center for Hospitality and Tourism.

Model Rules of Professional Conduct

2007 American Bar Association. House of Delegates The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more.
