Developed by Lloyd M. Dunn and Douglas M. Dunn, the assessment is made to assess vocabulary comprehension for Standard American English. It is swift and easy to administer, conserving important time so that concentration can be placed on implementing successful interventions.

The PPVT-4 evaluation material encompasses a wide array of vocabulary comprehension levels, spanning from pre-kindergarten through adulthood. The test problems extensively sample words that portray 20 content areas (e.g., actions, vegetables, tools), speech parts (nouns, verbs, attributes), and home and school vocabulary.

The test offers two equal editions which include various vocabulary terms, making sure that the test-taker has not “memorized” the test. One form can be

employed prior to intervention implementation to measure individuals' vocabulary knowledge and the alternative edition can be utilized for re-evaluation to evaluate and note progress. The PPVT-4 also includes a unique Growth Scale Value (GSV) which is sensitive to slight changes in time.
