First chapter 24 section 3 guided reading answers.Church Accounting Software

The church is a respected institution since it commands the people's general faith. It is always given utmost respect. The secular welfare and religious functions of the church are performed through the faith of its constituents. Church activities need funding and the funds come from Christians all over the world. Are you aware that the Christian contributions can reach billions?

That's true and with such great amount of money, the church should make use of accounting. One way to do this is through a church accounting software. The church should be accountable for their people's money; church officials should therefore monitor where all the money came from and where it is being spent.

The church is a large institution and so are its financial transactions. In order to manage the accounts, the church will need a skilled force of financial experts. However, that would mean additional cost to the church since they have to pay for the services. It can consume so much time and money.

answers...Acupuncture Can Help Treat Migraines

Acupuncture can help treat migraines. This was discovered after a comparative study was done with conventional medical care. In some cases, it even prevents it from happening which helps improve the quality of life for the patient.

To understand how acupuncture helps migraine sufferers, you have to understand that in traditional Chinese medicine, it is believed that an imbalance in the flow of blood and energy causes this to happen. In order to treat it, the specialist must relieve the tension by inserting needles into the body to improve the blood flow to the brain thus reducing the pain experienced during an attack.

History chapter 24 section 3 guided reading answers

There is a great consensus among the parents whether their children would outgrow asthma as they grow up. But the truth is it depends from child to child. While some children experience improvement in their teens others see asthma becoming even more severe. But almost half of the children who have asthma outgrow asthma as they grow although some symptoms may come back later.

Many parents have questions like whether their children can take part in sport activities. The answer is both yes and no. Some kids may get an asthma attack when they participate in exercises like running. But with proper management a teenager suffering from asthma can actively participate in sports. Special aerobic exercises can improve airway function. This strengthens the breathing muscles. Some of the ways that one can participate in sports is to follow the regimen of stretching the muscles prior to and after exercising, nose-breathe instead of breathing through the mouth and make sure that humidified air passes through the airways. Also parents should make sure that the adolescent has taken all prescribed medication supposed to be taken before they begin exercising. Carrying a reliever is a must for

Asthmatic teenagers should make sure that they wear something over their mouth and nose to stop cold air from entering.

It is not easy for adolescent teens to attend school when they have asthma but it is not difficult also at the same time if proper coordination is made among the teenager, doctor, family and school employees. It is a good idea to consult teachers, nurses and other pertaining employees of the school and let them know that the teenager has asthma and may have special requirements. Also, let the school management know on medications the teenager regularly takes and how to help the teenager when an attack occurs. The school staff should be asked to treat the teen normally once the attack subsides. The physical education coach should also be informed about the condition so that he/she can let the kid stretch the muscles before any exercises or to deal with asthma attack induced due to exercises. Also, before admitting the teenager to a new school care must be taken to check the quality of air, irritants and allergens if any present in the school. The school staff should take considerations to avoid symptoms which could hamper the energy level kids. Also asthmatic teens should be assured from time to time that they are no different from others and asthma in any way does not slow them down, They need this emotional confidence otherwise they may have personality problems.

Challenge chapter 24 section 3 guided reading answers...Seventy four percent of females above fourteen years and sixty percent of females below fifteen years have reported to have involuntary sex. Fifty percent of the adolescent pregnancies are within the time period of six months after the initial sexual intercourse. More than nine hundred thousand teenagers are reported to have become pregnant every year in the United States. Fifty one percent of the adolescent pregnancies result in live birth, thirty five percent result in induced abortion and fourteen percent result in stillbirths or miscarriages. Four out of ten adolescent females get pregnant, before they turn twenty, at

least once. Twenty five percent of adolescent deliveries aren't the mother's first child. When a teenager gives birth to her first child, she increases the risk of begetting another child. One third of the adolescent parents are themselves result of adolescent pregnancies. There are many reasons why adolescents choose to become sexually active at an early stage in life. The reasons can be early pubertal development, poverty, sexual abuse in childhood, lack of parent's attention, lack of career goals, family and cultural patterns of early sex, substance abuse, dropping out from school and poor school performance. Factors which discourage an adolescent to become sexually active are stable family environment, parental supervision, good family income, regular prayers, connectedness with parents and living with complete family and both the parents. The factors which are responsible for the consistent use of contraceptive among adolescents are academic success, anticipation for successful future, and involvement in a stable relationship.

There are many medical risks associated with adolescent pregnancies. Adolescents who are less than seventeen years are at a greater risk of developing medical complications, when compared to adult females. The risk is even more in teenagers below seventeen. The weight of the child, given birth by an adolescent, is very low in these pregnancies. It is usually below 2.5 kilogram. The rate of neonatal birth is also three times greater in adolescents, when compared to adults. Other problems caused by adolescent pregnancies are prematurity of the child, birth of underweight child, poor maternal weight gain, poor nutritional status, anemia, STDs and hypertension induced due to pregnancy.

Guide chapter 24 section 3 guided reading answers;Cholesterol screening helps to determine the cholesterol and fat levels in the blood. Children and adolescents with normal cholesterol level is a thing of the past. Because of the changing lifestyle and junk food trend, even they have a high risk to develop high levels of cholesterol.

which also increases the risk of developing heart diseases which can affect the blood vessels and the coronary arteries. The main cause of this change is obesity, junk food high in fat, fast food diets, sedentary lifestyle and high cholesterol level in family history. Keeping the blood cholesterol levels at normal is a good way of avoiding high blood pressure and coronary artery diseases.

The blood cholesterol level can vary from individual to individual. Healthy levels of LDL is less than one hundred and thirty milligrams, HDL is greater than thirty five milligrams. If the HDL is less than thirty five milligrams then the adolescent is at a higher risk of developing heart diseases. And LDL more than one hundred and thirty milligrams is dangerous. But a high level of LDL cholesterol is a problem in many citizens of America. And there is an expected increase in number, the figure is unknown, of adolescents who have a family history of high cholesterol levels.

An adolescent or a child who has a parent having high levels of blood cholesterol and family history of heart diseases at an early age, should take cholesterol test from the age of two. Adolescents who are obese also should have lipid test along with cholesterol test. The lipid test shows levels of kinds of fats in blood such as triglycerides, LDL and HDL.

Happiness chapter 24 section 3 guided reading answers, Cholesterol in Adolescents

Parts of adolescent's body are filled with a waxy stuff identified as cholesterol. It helps to produce vitamin D, cell membranes and certain hormones. Blood cholesterol comes from two different sources, liver within the body and food. The adolescent's liver produces enough cholesterol to carry out proper functioning.

The blood acts as the carrier of cholesterol and transports it to different parts of the body. They are transported in round particle form known as lipoproteins. There are two types of lipoproteins called the low density lipoproteins or LDL and high density lipoproteins or HDL.

Low density lipoprotein or LDL cholesterol is commonly known as bad cholesterol. It helps in the building up of plaque in arteries and this condition is known as atherosclerosis. The LDL level must be low in the blood and if it is high it must be decreased. Healthy weight must be maintained and exercise should be done regularly. Food items which have high contents of calories, dietary cholesterol and saturated fat must be avoided.

High density lipoprotein or HDL cholesterol is the good cholesterol. It is actually a kind of fat in blood which helps to remove bad cholesterol from the body and stops the build up of plaque in the arteries. The more the HDL cholesterol in the blood the better it is. The HDL can be raised by at least twenty minutes of exercising daily, decreasing body mass and keeping away from food with saturated fat. Some adolescents need to take medications in order to increase HDL. In such cases, increasing HDL can be a complicated procedure and the physician can make a therapeutic plan to increase HDL in the blood stream.

The greatest advantage of this ancient Oriental procedure is the absence of side-effects during and after treatment. Unlike smoking cessation medications and nicotine replacement therapy products, acupuncture does not employ chemically manufactured substances. There is also no risk of weight gain during therapy. In conjunction with helping a patient quit smoking, it can also curb appetite, thus reducing food cravings. If you have tried several methods in smoking cessation to no avail, perhaps it is high time you consider the alternative method that is acupuncture. With the right practitioner and the right frame of mind, there is no reason why you won't be nicotine-free before long.

By inserting the needles in these areas, it stimulates and alters the neurotransmitters in the body thus making the patient feel better after treatment. This is also sometimes used for diagnosis and testing.

There are also other forms of acupuncture that do not use needles. For instance there is sonopuncture that uses an ultrasound device that transmits sound waves to points in the body to treat a patient. Some practitioners use a tuning fork or other vibration devices.

Acupressure is another. Here, the professional will use their hands to relieve the pain. This can be used on it sown or with other manual healing techniques.

In short, the business' language is accounting. All business activities are quantified through accounting and this is where all business reports are derived and later on, communicated to the management level. What career opportunities can you expect if you're a graduate of accountancy?

Public Practice – if you become a CPA, you can do public practice. You can give your services to clients in exchange for an affordable fee. Usually, CPAs work in partnerships and they offer their services to businesses, governments, and even to individuals. The job responsibilities of an accountant in public practice will usually include auditing, taxation, management advisory services, etc. You can gain a

lot of work experience in this field.

Education – accountancy graduates can also teach after they get their methods of teaching. They can become a researcher, reviewer, and a professor. If you choose this profession, you can learn a lot of things. You can clear out certain accounting issues, conduct research, and then distribute the results.

The treatment is finished after an hour and when the needles are removed, you are advised to wear ear magnets so your session continues even when you leave the clinic. While acupuncture itself is a painless procedure, some smokers have claimed that they felt a prick or get sleepy.

Most smokers will have to come to the clinic 4 to 6 times before seeing any significant results. Just to give you an idea, one study shows that the respondents reported a decrease in the number of cravings to smoke just after one or two sessions. Seven out of 10 of the respondents were able to kick the habit after 5 or 6 sessions.

Because the number of test subjects is small, there are some who doubt the effectiveness of acupuncture. This is because although there are positive signs with regards to the short term effects of this technique, its effects were not sustained. This is why some medical journals have stated that it is unclear what acupuncture can do in smoking cessation.

Menstrual Disorders in Adolescent Girls

Adolescence is the time when there is sudden transformation in the body and many questions arises in the minds of the adolescents. Firstly they are not able to cope with the changes and secondly the changes bring along problems with them. The most challenging problems are related to menses, in girls. Menstrual conditions are many that may require physician's attention or any other healthcare professional's attention. The most common of the menstrual disorders are premenstrual syndrome, dysmenorrheal and amenorrhea.

Before the onset of the menses, females face many uncomfortable symptoms which last for a short period, stretching from few hours to few days. But some of them can be very intense and can disturb the normal functioning of the person. These symptoms are grouped as premenstrual syndrome. In usual cases, the symptoms come to a halt when the menses begin, but for some they may last even after the menstrual periods are over. Eighty five percent of the females experience some of the symptoms of premenstrual syndrome at one time or the other. Nearly forty percent experience the symptoms so

If you're already a CPA, you can serve the general public. You will be called a public accountant once there is already the so-called practitioner-client connection or relationship.

Even those accountants who are not yet certified can already practice their profession. Oftentimes, CPAs join partnerships and they have a

wide scope of clientele from the local area to the national and even international clients at times.

Being a government accountant is another career. In this profession, you will be working for the government, whether local, state, or federal. The accounting methods used conventionally are also used in government accounting. You will make use of the method called double-entry systems and you will be using journals as well as ledgers. If you're a government accountant, you will be focusing more in rendering service. Government units are not very particular with profits because they are put up to serve the public.

Fiduciary accounting is another type of accountancy careers. Here, accounting relies on trust. Executors, administrators, trustees, or any other person who is trustworthy can do fiduciary accounting. A fiduciary accountant keeps important records and he also prepares certain reports. The courts can authorize these fiduciary accountants to carry out their tasks.

The imbalance in the Qi may go one way or the other because of Yin and Yang. The person can only be normal if there is harmony between the two which is what acupuncture is trying to achieve. This can only be restored by stimulating these acupuncture points so your Qi can be adjusted, balanced and harmonized.

Apart from using needles, practitioners also use friction, heat, impulses of electromagnetic energy and pressure to stimulate these points in order to balance the movement of energy in the body to reduce one's health.

An example of this is sonopuncture where an ultrasound device that transmits sound waves is applied to these points in the body. Some use a tuning fork and other vibration devices.

Age should not hinder your ambitions. Besides, by now you're probably a senior accountant in the company and you're earning big money. Still, if you're not contented with your current position, you can always take advanced career trainings to improve and develop up-to-date accounting skills. Don't be left behind and don't stop learning. Bear in mind that every year, new accounting graduates are produced and you have to stay as competitive as ever to maintain your seniority in the office. The licensing requirements for accountants vary from state to state. This is a very important consideration when choosing a degree program in accounting. Before you can take the exams to become a CPA, you will need a 150 hours course. By 2009, almost all the states in the US will follow the same requirements.

Review chapter 24 section 3 guided reading answers

The history of acupuncture is first discussed in an ancient Chinese medical text called the "Huang Di Nei Jing" or The Yellow Emperors Classic of Internal Medicine.

But there have been a few who are skeptic as archaeologists have found a 5,000 year old mummy in the Alps with similar acupuncture points in the body. This gives some people the idea that it was used even before the Chinese did but since there is no written text to prove that, no one is certain and credit to this ancient practice goes back to the Chinese.

In the 6th century, this knowledge moved to Japan. In the 17th century, a man by the name of Waichi Sugiyama wanted to make this procedure painless for the patient so he developed the insertion tube, a small cylindrical tube through which the needle is inserted. Believe it or not, this technique is still being used today.

Legend chapter 24 section 3 guided reading answers;**Reactions And Research**

Not everyone is impressed with acupuncture itself. Most western medical professionals have expressed either doubt or indifference to the oriental method while others have downright driven it down into the earth with criticisms and brutal skepticism. However, recent research shows the efficacy (or lack thereof) of acupuncture, and while more research has to be done, it has been proven to actually positively affect some, but not all, forms of ailments that it claims to cure.

So as the doors open to a new age of acupuncture, give it a try when you feel the need for pain relief and you will not be disappointed. As the Chinese have used it for many centuries, so should we.

Other pain related ailments that can be cured by acupuncture are severe headaches and migraines, acute backaches, shoulder and neck aches, leg pains, trapped nerves, muscle related injuries, after surgery, carpal tunnel syndrome, sports injuries, menstrual pains, tooth aches, abdominal pains, and rheumatic pains.

Depression

Acupuncture is widely recommended for symptoms of depression and anxiety such as irritability, insomnia, loss of appetite, loss of interest in social activity and suicidal tendencies. Acupuncture is thought to relieve stress and improve flow of energy that may be causing the depressive symptoms. Improvement in symptoms can be seen as early as the first session. Experts have found acupuncture to be a beneficial complement to other forms of depression therapy such as psychological counseling, and healthier than chemical alternatives such as anti-depressants.

Start now and look and look for a career in accountancy while you're still young. New accountancy graduates are produced every year and so you mustn't lose hope if you still don't have a career right now. Exert some effort and time and soon you will have a rewarding career. If the church doesn't want to hire a skilled force of financial experts, they can simply make use of the church accounting software. Accounting experts designed the software and it can assist church officials in managing finances. The software engineers are already well-acquainted with the church's various needs and so they can easily tailor-fit a certain church's software according to its particular requirements.

The church accounting software is quite different from other software. Ordinary accounting software is designed to suit the needs of modern businesses. The church accounting software on the other hand focuses mainly on the necessities of the institution. The church has no ambition or any financial interest. Remember, the church is not being taxed by the government and so its expenditure and resources takes a different curve altogether. Aside from that, the church has several expenditure and income account heads.

The History of Acupuncture

Acupuncture comes from two Latin words namely "acus" which means needle in English and "pungere" which means prick. Its history originated in China more than 2000 years ago and has evolved into various forms.

Some of the techniques of acupuncture do not even use needles anymore. Vibrating objects, ultrasound and even the fingers of the practitioner have taken some of the work to make the person feel better.

Depression in adolescents is a disorder which occurs due to persistent sadness, loss of interest, loss of self worth and discouragement.

Depression is normally a temporary reaction towards situations of stress. Depression is a normal part of the maturation process of adolescents. It is even induced due to production of sex hormones.

Adolescent females are depressed twice more than adolescent boys according to a study.

Adolescent behavior is normally marked with good and bad moods.

The transition from a good mood to bad mood and vice-versa, can take minutes, hours and even days. That is the reason why true depression is very difficult to find out. Depression in adolescents can be caused due to bad school performance, break up with boyfriend or girlfriend, and failing relations with friends and family. These causes can lead to persistent depression. Other serious causes are chronic illness, obesity, child abuse, stressful lifestyle, poor social skills, unstable care giving and depression in family history.

Behind the chapter 24 section 3 guided reading answers

There are basically two types of diabetes that will affect an adolescent.

It is type 1 diabetes and type 2 diabetes. Type 1 diabetes affects the immune system's function as the system attacks the pancreas' insulin producing cells, also known as the beta cells. Because of this, the pancreas loses the ability to manufacture insulin. This is the reason why people with type 1 diabetes take insulin everyday. The symptoms are weight loss, increase in urination & thirst, blurred vision, tiredness and constant hunger. And if the adolescent isn't treated at the right time, he/she can slip in to diabetic coma which can endanger his/her life. In type 2 diabetes, the body is incapable of properly using the insulin produced by the body and requires insulin from an external source, too. The symptoms of type 2 diabetes are similar to type 1 diabetes. The teenager feels sick, tired, nauseated, and thirsty. The wounds will recover very slowly; he/she will get infections frequently, will develop blurred vision and will experience weight loss.

Parents play a vital role in determining the problem. They should constantly observe their child for eating disorders or signs of depression. Although cigarette, drugs and alcohol should be avoided by all adolescents and children, it is even more important that youngster with diabetes should stay away from these things as they can worsen the situation. A person with diabetes, who switches to smoking, is at risk of developing cardiovascular diseases and circulatory problems. Consumption of alcohol can cause hypoglycemia or low blood sugar. It is the duty of the parents to make their child aware of the possible risk they would face if they start to smoke, drink alcohol or take drugs.

Children and adolescents, who have diabetes, face many challenges while trying to lead a normal life. They have to think twice before doing simple things as going to a party, playing sports and even when staying over with friends. This is because they require to intake oral medication or insulin. Their blood sugar level must be checked many times through out the day. Also, at gatherings, they have to avoid many food items. Because of this they will feel different from the crowd and can feel left out. Not only does diabetes pose behavioral challenges, but also emotional challenges.

Aside from that, you should also make some lifestyle changes as there are trigger factors that have been known to cause migraines. Stress is number one on the list so you get enough rest and exercise as well as a balanced diet.

Patients who are suffering from migraine should also check if acupuncture is covered by their HMO. Most insurance providers and HMO's these days cover all or part of the cost but there are restrictions so you should check what is covered by your policy. Once these spots are identified, these sharp needles are then inserted. Usually 5 needles are placed in various acupoints.

Symptoms of depression in adolescents are eating disorders, weight change, irritable mood, excessive sleeping in daytime, excessive temper, criminal behavior, memory loss, fatigue, self preoccupation, sadness, difficulty in concentrating, worthlessness feelings, loss of interest, self hatred, obsession with death and thought & attempts of suicides. When these symptoms are being noticed for more than two weeks, it is important to get treatment for the adolescent. Depression not only affects interpersonal relationships, but school performance as well. Depressed adolescents are more prone to take onto drugs and alcohol as an attempt to overcome their depression. Such problems require intensive treatment.

The doctor will take blood test and perform physical examination to determine the cause of depression. The adolescent can also be tested for substance abuse such as smoking, heavy alcohol consumption, marijuana smoking, and usage of other drugs. After the physical examination, psychiatric evaluation is also done to understand the cause of sadness, loss of interest and irritability. Depression can also lead to the development of other psychiatric disorders such as schizophrenia, mania and anxiety. It is also important to determine whether the adolescent poses a risk for himself/herself and others. Family and school personnel can provide valuable information about the adolescent to the doctor.

Treatment for depression for adolescent is similar to the treatment of depression for adults. Along with the treatment, the adolescent are given antidepressant medication and psychotherapy. Antidepressant medications include tricyclics, Prozac, selective serotonin reuptake inhibitors or SSRI. Some of the medicines increase the risk, so it is a good idea that parents discuss the possible risks with the doctor. Only some of the antidepressant medications are meant for children and adolescents. Adolescents with severe depression need to be hospitalized as they are more prone to kill themselves.

Precautions should not only be taken indoors, but outdoors too. This is because; more than forty thousand people get eye injuries outdoors. Ninety nine percent of the injuries are caused while playing sports. So it is necessary for the youngsters to wear protective eyewear while playing sports or when involved in outdoor recreational activities. A special helmet is designed with wire shield or polycarbonate face mask which is not only safe, but comfortable, too. Protective eyewear should also be worn while performing experiments in science lab. Fireworks must only be handled by adults.

Because of increasing use of computers, more and more youngsters are getting eye strains. The symptoms of eye strain caused by computer are red & watery eyes, focusing problems, aching & tired eyelids, eye muscle spasm, backache and headache. In such an environment, eye exercise must be done regularly. The eyes must be made to focus on distant objects and should be rotated from side to side. It is extremely important to give ample rest to the eyes. Glasses with UV shield must be worn when looking at the computer screen. Eye strain can be avoided by increasing the distance from the monitor. Eye hazards are also caused when cosmetics are used improperly by contact lens wearers. Some of the adverse reactions are injury, eye irritation, allergy, dryness, infection, and lens deposition. That is the reason why adolescents must be made aware of the risk they will face when opting for contact lens. Girls should understand that they should buy hypoallergenic cosmetics and especially the non-scented variety, manufactured by big brand names. Cosmetics should not be shared with anything else. The applicator brushes must be washed regularly and old mascara must be disposed and not refilled. Eye shadows which are glittery, pearlized, frosted or iridescent contain ground tinsel or oyster shell, which should be always avoided. Eyeliner should not be applied in the inner lid edge. Loose powder should be avoided. Cream should not be applied near the eyes. The wearer should wash hands while handling contact lens. No crying, washing of face should

bathing should be done with the contact lens on.

Opportunity chapter 24 section 3 guided reading answers Third, acupuncture is used to treat pain. This is only a half truth because this holistic technique has been proven to do other things such as stop a person's addiction, lose weight and prevent certain illnesses. Fourth, there are some who think that Asians are the only ones that can practice acupuncture. Since 1982, there are already 50 schools all across the country that teach students about this technique and become licensed acupuncturists.

This means that anyone who has the desire to learn about this ancient practice can do so and help treat patients. Just to give you an idea, there are at least 3,000 acupuncturists now working in the US.

Fifth, medical doctors do not believe in the potential of alternative medicine. This is not true because there are more doctors these days that are open to the idea that there are other ways to help patients aside from conventional medicine. In fact, some of them even recommend an acupuncturist if they know that what they have done is not effective.

Another myth is that every patient will undergo the four needle technique. This is not true and it will only be used when the specialist feels that the energy of the patient is virtually not moving as a last resort.

The seventh myth is that it is better for a medical doctor to perform acupuncture. This is wrong because the training is much different than that taught in medical school. Students who have an acupuncturist license train for 3,000 hours before they are allowed to practice this profession. So between an acupuncturist and a medical doctor, you should go with someone who has learned about this much longer.

answers...Anyone can try facial acupuncture because it is painless and it has proven to reverse the signs of aging. However, if you are pregnant, suffer from the colds or flu, have acute herpes or an allergic reaction, it is best to wait until this has passed.

But before anyone can try facial acupuncture, they first have to be evaluated by the acupuncturist. This person will evaluate your age, lifestyle and diet. If everything looks good, then you will probably do an average of about 12 to 15 treatments. More could be done if your skin tends to sag, manifest jowls or have droopy eyes.

Facial acupuncture treatment needs to be done twice a week for about 45 minutes to 1 hour. For those who can't make two sessions in a week, they can opt for the 1 treatment that will last 90 minutes.

Acupuncture can do more than just helping patients deal with arthritis or migraine. Clinical tests have shown that it can help obese people

lose weight and those who are suffering from insomnia.

In some countries, acupuncture has even been used to replace chemical anesthesia prior to surgery as there are some patients who are not able to tolerate regular anesthesia.

Another field which acupuncture has proven to be effective is helping patients deal with their addictions such as alcohol, drugs and smoking. One study of smokers revealed that the average patient will cut down by half the number of cigarettes they consume after just one treatment. Just imagine the potential after a few more sessions!
