## Knowledge Management and Industry 4.0

2020-06-09 Marco Bettiol The book discusses the opportunities and challenges of managing knowledge in the new reality of Industry 4.0.

Addressing paradigmatic changes in value creation due to the development of digital technologies applied to manufacturing (additive manufacturing, IoT, robotics, etc.), it includes theoretical and empirical contributions on how

Industry 4.0 technologies allow firms to create and exploit knowledge. The carefully selected expert contributions highlight the potential of these technologies in acquiring knowledge from a larger number of sources and examine approaches to innovation, organization of activities, and stakeholder development in the context of this next industrial revolution.

Le dinamiche della conoscenza nel  
Green Deal

2021-12-21 Monica Maglio Si definisce “conoscenza” l’insieme del patrimonio di saperi – acquisiti mediante istruzione e formazione, ricerca e innovazione – intriso di valori comuni e condivisi da una comunità. I soggetti che gestiscono le attività afferenti alla conoscenza (creazione, accrescimento, trasferimento, diffusione, conservazione, innovazione) formano un sistema complesso, composto da una varietà di strutture e di attori che devono funzionare con modalità coordinate e sinergiche, creando reti e connessioni: quanto più la conoscenza è omogenea e diffusa tra territori e popolazioni,

tanto più sarà possibile incrementare la qualità della vita. La creazione, l’acquisizione e la gestione della conoscenza vengono riconosciute, quindi, come condizioni strategiche per uno sviluppo equo e inclusivo. Non potrà esservi il progressivo abbandono di un paradigma di crescita basato sullo sfruttamento di enormi quantità di risorse naturali, mediante la cosiddetta transizione ecologica, fino a quando la conoscenza non apparterrà a tutti, con il rischio (già evidente) che la disattenzione alla problematica possa rafforzare il fenomeno del green knowledge divide. La prima parte del

volume focalizza l'attenzione su alcuni argomenti (strettamente connessi in un percorso lineare ed essenziale, sempre attingendo alla letteratura interdisciplinare) utili a inquadrare il rapporto economia green e conoscenza. La seconda parte ospita approfondimenti tematici, casi di studio e buone pratiche che mostrano come la conoscenza, gli attori coinvolti nel processo e gli strumenti per applicarla o diffonderla (ad esempio piattaforme, reti di attori, politiche) hanno già prodotto dei risultati in diversi territori e settori.

This professional technical book presents complex topics on System-of-System (SoS) and Systems-of-Systems (SOS) engineering, SOS enterprise architecture (SOSEA) design and analysis, and implementation of SOSEA framework along with the modeling, simulation and analysis (MS&A) models in MATLAB. In addition, the book also extends the use of SOS perspectives for the development of computer simulation models for complex processes, systems, decision support systems, and game-

theoretic models. This book is

intended for two reader categories; namely, a primary and secondary category. The primary category includes system engineers, SOS architects, and mathematicians. The secondary category includes scientists and researchers in space/airborne systems, wireless communications, medicine, and mathematics, who would benefit from several chapters that contain open problems and technical relevance.

Oltre alle funzioni tradizionali, viene evidenziato il carattere sociale del museo in quanto offre un servizio pubblico e protegge un pubblico interesse per tutti i segmenti di una comunità (inclusione e accessibilità). La museologia del presente si concentra, perciò, su progettualità etiche (equità sociale) e responsabili strutturate su piani di crescita sostenibile. I musei sono, tra gli edifici che producono cultura, quelli che hanno un maggior

impatto ambientale; di fatto, rimangono in funzione H24. Quasi tutte le strutture museali di recente costruzione hanno assecondato, fin dalla loro genesi, pratiche green che le hanno rese ecocompatibili a impatto zero (o quasi). La vera sfida, però, è quella di ridurre in modo consistente l'impatto di quelli già esistenti: missione non semplice in un Paese come l'Italia dove la maggior parte sono inseriti all'interno di edifici di rilevanza storica. La Biomuseologia, oltre ad affiancare la Biomuseografia nel progettare strutture museali ex novo, ha proprio questa priorità: diminuire drasticamente l'impatto ambientale di strutture

storiche rispettando le linee guida del Ministero della Cultura

## **Sustainability in Energy and Buildings 2020**

2020-12-07 John Littlewood

This book contains the proceedings of the 12th KES International Conference on Sustainability and Energy in Buildings 2020 (SEB20) held in Split, Croatia, during 24–26 June 2020 organized by KES International. SEB20 invited contributions on a range of topics related to sustainable buildings and explored innovative themes regarding

sustainable energy systems. The aim of the conference is to bring together researchers, and government and industry professionals to discuss the future of energy in buildings, neighbourhoods and cities from a theoretical, practical, implementation and simulation perspective. The conference formed an exciting chance to present, interact and learn about the latest research and practical developments on the subject. The conference attracted submissions from around the world. Submissions for the Full-Paper Track were subjected to a blind peer-review process. Only the best of these were selected for presentation

at the conference and publication in these proceedings. It is intended that this book provides a useful and informative snapshot of recent research developments in the important and vibrant area of sustainability in energy and buildings.

emerging circular economy advantage exists – now Lacy, Long and Spindler show you how to realize it at speed and scale in The Circular Economy Handbook. We stand at a crossroads, with rising geopolitical and geo-economic tensions, massive technological change and a host of social and environmental challenges. We are pushing planetary boundaries to their limits, with climate change and threats to biodiversity and oceans as just a few examples. Significant impacts are already being felt, and both people and planet face potentially catastrophic and irreversible consequences if we don't urgently change our global

model and systems. Our current linear “take, make, waste” models of production and consumption will not be sustainable in a world of some 9 billion people by 2050, especially with ever-expanding rates of consumption. Thriving within these dynamics demands more than incremental adjustments to business-as-usual. The circular economy offers a powerful means to decouple growth from use of scarce and harmful resources, enabling greater production and consumption with fewer negative environmental impacts—at the same time, making companies more innovative and competitive. In

fact, this book shows that \$4.5 trillion in economic value is at stake. Delivering on the promise of a circular economy demands impact and scale, extending through value chains and, ultimately, disrupting the entire economic system. In *The Circular Economy Handbook*, the authors illuminate the path from insight to action, from linear to circular. With case studies, advice and practical guidance, they show leaders how to pivot towards a holistic circular organization, embedding circularity internally and delivering broad-based system change. With unique insights across business models, technologies, and

industries – featuring stories and real-world examples from circular pioneers – this book is the essential guide to help companies become leaders in the movement to secure the circular economy advantage.

Luisa Ciuni e Marina Spadafora intrecciano le loro voci – di giornalista e di stilista militante – per raccontare l'avvento del fast fashion e le conseguenze del low cost, la bulimia dei consumi e le conseguenze dello spreco, le nuove schiavitù, l'esaurimento delle risorse e la crudeltà imposta agli animali. Eppure, l'innovazione tecnologica apre strade ecologiche, modelli di economia circolare
