Teaching 20th-century European History 2001-01-01 Robert Stradling Produced for the Council of Europe project " Learning and teaching about the history of Europe in the 20th century", this book concentrates on the how rather than the what of teaching. Besides a study of selected themes and topics, it covers the teaching of sensitive issues, the reading of visual archives, analysing history on television and the Internet and assessing new technologies. Some of these new sources have not been made part of standard teacher training, yet they have a powerful role in the way young people perceive the past. The author is a Senior Research Fellow at Leirsinn Research Centre, University of Highlands and Islands Millennium Institute.

Diversity Management and Discrimination 2016-05-23 John Wrench What can diversity management offer those concerned with ethnic inequality, racial discrimination, and issues of social and economic inclusion and exclusion? In this book John Wrench traces the emergence of diversity management in the US in the late 1980s, and explores its subsequent development in Europe. He outlines the various critiques of diversity management that have been suggested both by academics and equality activists and highlights recent issues and trends that should be monitored by those concerned with racial and ethnic equality in employment. In particular, Wrench examines whether diversity management can be seen as a 'soft option' in terms of combating racism and discrimination, or instead, a new way of mainstreaming anti-discrimination measures. He also addresses the important question of whether the development of diversity management in Europe will follow a relatively uniform trajectory because of common demographic, economic and market pressures, or whether the historical, cultural and institutional differences which exist between EU countries, and between the EU and the US, will have a determining impact on the adoption, content and operation of this particular management practice.

The Belief in a Just World 2013-06-29 Melvin Lerner The "belief in a just world" is an attempt to capmre in a phrase one of the ways, if not the way, that people come to terms with-make sense out of-find meaning in, their experiences. We do not believe that things just happen in our world; there is a pattern to events which conveys not only a sense of orderli ness or predictability, but also the compelling experience of appropriateness ex pressed in the typically implicit judgment, "Yes, that is the way it should be." There are probably many reasons why people discover or develop a view of their environment in which events occur for good, understandable reasons. One explanation is simply that this view of reality is a direct reflection of the way both the human mind and the environment are constructed. Constancies, patterns which actually do exist in the environment-out there-are perceived, represented symbolically, and retained in the mind. This approach cenainly has some validity, and would probably

suffice, if it were not for that sense of "appropriateness," the pervasive affective com ponent in human experience. People have emotions and feelings, and these are especially apparent in their expectations about their world: their hopes, fears, disappointments, disillusionment, surprise, confidence, trust, despondency, anticipation-and certainly their sense of right, wrong, good, bad, ought, en titled, fair, deserving, just.

Scripts, Plans, Goals, and Understanding 2013-05-13 Roger C. Schank First Published in 1977. In the summer of 1971, there was a workshop in an ill-defined field at the intersection of psychology, artificial intelligence, and linguistics. The fifteen participants were in various ways interested in the representation of large systems of knowledge (or beliefs) based upon an understanding process operating upon information expressed in natural language. This book reflects a convergence of interests at the intersection of psychology and artificial intelligence. What is the nature of knowledge and how is this knowledge used? These questions lie at the core of both psychology and artificial intelligence.

The Approval Motive 1980 Douglas P. Crowne The authors explore the social-desirability response set--a type of habitual response preference identifiable in personality testing. The intuitive plausibility of this test response distortion led the authors to undertake research to determine if it supported the theory that people describe themselves in favorable terms to obtain the approval of others.

Sex Differences in Cognitive Abilities 2000-02 Diane F. Halpern
 In the third edition of her popular text, *Sex Differences in Cognitive Abilities*, Diane Halpern tackles fundamental questions about the meaning of sex differences in cognition and why people are so afraid of the differences. She provides a comprehensive context for understanding the theories and research on this controversial topic. The author employs the psychobiosocial model of cognition to negotiate a cease fire on the nature-nurture wars and offers a more holistic and integrative conceptualization of the forces that make people unique. This new edition reflects the explosion of theories and research in the area over the past several years. New techniques for peering into the human brain have changed the nature of the questions being asked and the kinds of answers that can be expected. There have been surprising new findings on the influence of sex hormones on cognitive abilities across the life span, as well as an increasing number of studies examining how attention paid to category variables such as one's sex, race, or age affects unconscious and automatic cognitive processes. Written in a clear, engaging style, this new edition takes a refreshing look at the science and politics of cognitive sex differences. Although it is a comprehensive and up-to-date synthesis of scientific theory and research into how, why, when, and to what extent females and males differ in intellectual abilities, it conveys complex ideas and interrelationships among variables in an engrossing and understandable manner, bridging the gap between sensationalized 'pop' literature and highly technical scientific journals. Halpern's thought-provoking perspectives on this controversial topic will be of interest to students and professionals alike. [features used for book mailer] FEATURES:
 *Includes new information about sex differences and similarities in the brain, the role of sex hormones on cognition (including exciting new work on hormone replacement therapy during menopause), new perspectives from evolutionary psychology, the way stereotypes and other group-based expectations unconsciously and automatically influence thought, the influence of pervasive sex-differentiated child rearing and other sex role effects, and understanding how research is conducted and interpreted. *Takes a cognitive process approach that examines similarities and differences in visuospatial working memory, verbal working memory, long-term acquisition and retrieval, sensation and perception, and other stages in information processing. *Provides a developmental analysis of sex differences and similarities in cognition extending from the early prenatal phase into very old age. *Tackles both political and scientific issues and explains how they influence each other--readers are warned that science is not value-free. *Uses cross-cultural data and warns readers about the limitations on conclusions that have not been assessed in multiple cultures. *Includes many new figures and tables that summarize complex issues and provide section reviews. It is a beautifully written book by a master teacher who really cares about presenting a clear and honest picture of contemporary psychology's most politicized topic.

Discrimination in Labor Markets 2015-03-08 Orley Ashenfelter
 This volume contains revised versions of the papers presented in 1971 at the Princeton University Conference on Discrimination in Labor Markets, and the formal discussions of them. This paper is by Kenneth Arrow, winner of the Nobel Prize in Economics, who lays the theoretical foundations of the economic analysis of discrimination in labor markets. Finis Welch discusses the relationship between schooling and labor market discrimination. Orley Ashenfelter's paper presents a method for estimating the effect of an important institution—trade unionism—on the wages of black workers relative to whites. Ronald Oaxaca provides a framework for measuring the extent of discrimination against women. Finally, Phyllis Wallace examines public policy on discrimination and suggests strategies for public policy in this area. Originally published in 1974. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Illustrated History of Europe 2001 Frédéric Delouche
 The *Illustrated History of Europe* represents a watershed in historical writing. The collective effort of a team of twelve European historians, it unravels the many cultural, economic, social and political strands of over 14,000 years of Europe's history from a European rather than a national perspective. With this broad view it examines the great prehistoric people migrations, the cave paintings of Spain and France, the Roman Empire, the spread of Christianity, the Middle Ages, the glory of the Renaissance, the revolutions of the Reformation, the dawn of industrialization, Empire building and the two world wars of this century, the fall of the Berlin Wall and the disintegration of the USSR. It concludes with the unexpected return of war to Europe with the collapse of Yugoslavia and examines current hopes and plans for a united Europe in this new millennium.

metrical variety of the play, and the distinctly modern perspective on the play as containing dark and disturbing elements. To compliment these new essays, the collection features significant scholarship and commentary on *The Comedy of Errors* that is published in obscure and difficulty accessible journals, newspapers, and other sources. This collection brings together these essays for the first time.

The Greek East and the Latin West 1995 Philip Sherrard The division of Christendom into the Greek East and the Latin West has its origins far back in history but its consequences still affect Europe, and thus Western Civilization. Sherrard's study seeks to indicate both the fundamental character and some of the consequences of this division. He points especially to the underlying metaphysical bases of Greek Christian thought, and contrasts them with those of the Latin West.

Stereotype Accuracy 1995 Yueh-Ting Lee This provocative book challenges conventional thinking that stereotypes are always inaccurate, exaggerated, and generally destructive by daring to look at stereotyping empirically. The chapters provide insights into how stereotyping may help us manage information without necessarily being destructive. They also unearth the complex cognitive and attitudinal processes that underlie stereotyping, so we may harness these processes to better understand group differences and to promote greater respect for those we see as different from ourselves.

Routledge Handbook of Sustainability Indicators 2018-06-14 Simon Bell This handbook provides researchers and students with an overview of the field of sustainability indicators (SIs) as applied in the interdisciplinary field of sustainable development. The editors have sought to include views from the center ground of SI development but also divergent ideas which represent some of the diverse, challenging and even edgy observations which are prominent in the wider field of SI thinking. The contributions in this handbook: • clearly set out the theoretical background and history of SIs, their origins, roots and initial goals • expand on the disciplines and modalities employed to develop SIs of various kinds • assess the various ways in which SI data are gathered and the availability (over space and time) and quality issues that surround them • explore the multiplex world of SIs as expressed in agencies around the world, via examples of SI practice and the lessons that have emerged from them • critically review the progress that SIs have made over the last 30 years • express the divergence of views which are held about the value of SIs, including differing theories on their efficacy, efficiency and ethics • explore the frontier of contemporary SI thinking, reviewing ante/post and systemic alternatives This multidisciplinary and international handbook will be of great interest to researchers, students and practitioners working in sustainability research and practice.

The Byzantine Achievement 2010 Robert Byron Robert Byron believed that the summit of ancient Greek civilization was not to be found in 5th century B.C.E. Athens, but in post-classical Byzantium, also called Constantinople by the Romans. Byzantine civilization was truly glorious, as we see by looking through Byron's fresh eyes. Byron was a brilliant writer and dashing figure whose life was cut short in WWII. The introduction is by Richard Lockett, Byron's biographer.

The Guest Worker Question in Postwar Germany 2007-03-05 Rita Chin This book provides the first English-language history of the postwar labor migration to West Germany. Drawing on government bulletins, statements by political leaders, parliamentary arguments, industry newsletters, social welfare studies, press coverage, and the cultural production of immigrant artists and intellectuals, Rita Chin offers an account of West German public debate about guest workers. She traces the historical and ideological shifts around the meanings of the labor migration, moving from the concept of guest workers as a "temporary labor supplement" in the 1950s and 1960s to early ideas about "multiculturalism" by the end of the 1980s. She argues that the efforts to come to terms with the permanent residence of guest workers, especially Muslim Turks, forced a major rethinking of German identity, culture, and nation. What began as a policy initiative to fuel the economic miracle ultimately became a much broader discussion about the parameters of a specifically German brand of multiculturalism.

Polysemy in Cognitive Linguistics 2001-01-01 H. Cuyckens In *Cognitive Linguistics*, polysemy is regarded as a categorizing phenomenon; i.e., related meanings of words form categories centering around a prototype and bearing family resemblance relations to one another. Under this polysemy = categorization view, the scope of investigation has been gradually broadened from categories in the lexical and lexico-grammatical domain to morphological, syntactic, and phonological categories. The papers in this volume illustrate the importance of polysemy in describing these various categories. A first set of papers analyzes the polysemy of such lexical categories as prepositions and scalar particles, and looks at the import of polysemy in frame-based dictionary definitions. A second set shows that noun classes, case, and locative prefixes constitute meaningful and polysemous categories. Three papers, then, pay attention to polysemy from a psychological perspective, looking for psychological evidence of polysemy in lexical categories.

Introduction to Altaic Linguistics 1965 Nicholas Poppe The "Introduction to Altaic Linguistics" is designed as a manual for university students. The first part gives a survey of the Altaic languages, i.e., Mongolian, Manchu-Tungus, Chuvash-Turkic and Korean, and a classification of the Altaic languages and classifications of languages within each family. The second part presents a brief outline of the history of studying Altaic linguistics. It also contains a number of bibliographical data and bibliographies of famous scholars. The third part gives a brief history of the Altaic theory. The subsequent portions of the book deal with problems of mutual influences of the Altaic languages (e.g., the Turkic influence of Mongolian), Altaic influences in non-Altaic languages (e.g., the Turkic influence on Sayan-Samoyed, or Mari), non-Altaic influences in Altaic languages (e.g. Sogdian elements in Turkic), and structural features common to all Altaic languages.

Language in the USA 1981-08-31 Charles A. Ferguson Grouped under four headings -- American English, Languages before English, Languages after English and Language in use -- these essays lay to rest some myths about the monolingual nature of language in America and set forth the problems that must be confronted as a consequence of language and cultural pluralism. The essays of the first group range from U.S. language heritage to black American language. The second group deals with American Indian languages and New World Spanish. The last two groups deal with ethnic language varieties and various other topics.

Semantic Ambiguity and Underspecification 1996-02-23 Kees van Deemter In the winter of 1993-1994, essays were commissioned on the topic of ambiguity and underspecification. All papers received were subjected to a thorough review process. The present volume, comprising ten self-contained papers and an introductory chapter, is the result. Natural language is known for the ambiguity of its expressions. Whereas artificial forms of communication tend to be designed in such a way that ambiguity is reduced to a minimum, natural language is ambiguous at various 'levels' of interpretation. At a low (e.g., speech recognition) level, a signal can be ambiguous between various utterances; at a higher (semantic) level, a fully recognised utterance can be used to express various different propositions; and at an even higher (pragmatic) level, a proposition may be used for various different purposes. The present volume focuses on ambiguities of the second kind, which are sometimes called semantic ambiguities, or mostly just ambiguities, when there is no likelihood of confusion.
