The Peabody Picture Vocabulary Test Fourth Edition (PPVT-4) is a widely recognized vocabulary assessment that has been in practice for close to half a century. Created by Lloyd M. Dunn and Douglas M. Dunn, the evaluation is crafted to measure vocabulary comprehension for American English. It is swift and simple to carry out, saving important time so that focus can be set on implementing effective approaches.

The PPVT-4 test content includes a broad range of vocabulary comprehension levels, ranging from preschool through adulthood. The test questions extensively feature words that depict 20 subject fields (e.g., actions, vegetables, tools), parts of speech (nouns, verbs, attributes), and household and school vocabulary.

The test provides two equal versions which contain different vocabulary items, guaranteeing that the test-taker has not “mastered” the evaluation. One version can be utilized prior to intervention implementation to evaluate test-takers’ vocabulary understanding and the second form can be employed for re-testing to measure and note progress. The PPVT-4 also features a unique Growth Scale Value (GSV) which is reactive to minor changes over time.
