The volume's balance of theory and practice and its thematic and geographical breadth is explored and explained in an extended introduction, which situates the readings in the context of the extensive literature on museum archaeology. . . . Reconceptualising the Rule of Law in Global Governance, Resources, Investment and Trade 2016-06-30 Photini Pazartzis The relevance and importance of the rule of law to the international legal order cannot be doubted and was recently reaffirmed by the Declaration of the High-level Meeting of the General Assembly on the Rule of Law at the National and International Level's solemn commitment to it on behalf of states and international organizations. In this edited collection, leading scholars and practitioners from the fields of global governance, resources, investment and trade examine how the commitment to the rule of law manifests itself in the respective fields. The book looks at cutting-edge issues within each field and examines the questions arising from the interplay between them. With a clear three-part structure, it explores each area in detail and addresses contemporary challenges while trying to assure a commitment to the rule of law. The contributions also consider how the rule of law has been or should be reconceptualised. Taking a multi-disciplinary approach, the book will appeal to international lawyers from across the spectrum, including practitioners in the field of international investment and trade law.

Taiwan and International Human Rights 2019-05-16 Jerome A. Cohen This book tells a story of Taiwan's transformation from an authoritarian regime to a democratic system where human rights are protected as required by international human rights treaties. There were difficult times for human rights protection during the martial law era; however, there has also been remarkable transformation progress in human rights protection thereafter. The book reflects the transformation in Taiwan and elaborates whether or not it is facilitated or hampered by its Confucian tradition. There are a number of institutional arrangements, including the Constitutional Court, the Control Yuan, and the yet-to-be-created National Human Rights Commission, which could play or have already played certain key roles in human rights protections. Taiwan's voluntarily acceptance of human rights treaties through its implementation legislation and through the Constitutional Court's introduction of such treaties into its constitutional interpretation are also fully expounded in the book. Taiwan's NGOs are very active and have played critical roles in enhancing human rights practices. In the areas of civil and political rights, difficult human rights issues concerning the death penalty remain unresolved. But regarding the rights and freedoms in the spheres of personal liberty, expression, privacy, and fair trial (including lay participation in criminal trials), there are in-depth discussions on the respective developments in Taiwan that readers will find interesting. In the areas of economic, social, and cultural rights, the focuses of the book are on the achievements as well as the problems in the realization of the rights to health, a clean environment, adequate housing, and food. The protections of vulnerable groups, including indigenous people, women, LGBT (lesbian, gay, bisexual, and transgender) individuals, the disabled, and foreigners in Taiwan, are also the areas where Taiwan has made recognizable achievements, but still encounters problems. The comprehensive coverage of this book should be able to give readers a well-rounded picture of Taiwan's human rights performance. Readers will find appealing the story of the effort to achieve high standards of human rights protection in a jurisdiction barred from joining international human rights conventions. This book won the American Society of International Law 2021 Certificate of Merit in a Specialized Area of International Law.

Perioperative Care of the Elderly 2017-11-16 Gabriella Bettelli This innovative, comprehensive book covers the key elements of perioperative management of older patients. The book's chapter structure coincides with the clinical path patients tread during their treatment, from preoperative evaluation to post-hospital care. Epidemiological aspects and aging processes are illustrated, providing keys to understanding the quick expansion of geriatric surgery and defining the clinical profile of older surgical patients in a cybernetic perspective. Preoperative evaluation and preparation for surgery, including medication reconciliation and pre-habilitation, are developed in the light of supporting decision-making about surgery in an evidence-based and patient-focused way. Intra- and postoperative management are discussed, aiming to tailor anesthetic, surgical and nursing approaches to specific patients' needs, in order to prevent both general and age-related complications. This volume also addresses issues relevant to geriatric surgery, from different organizational models to clinical risk management and systems engineering applied to hospital organization.

Agricultural Supply Chain Management Research 2021-12-09 Onur Boyabatlı This book focuses on three essential elements of agricultural supply chains: Planting and Growing, Processing and Selling, and Government Interventions. For decades, most agricultural economists applied macro-economic theory in decisions pertaining to the optimization of food production and distribution. However, few researchers used micro-economic theory to examine how individual farmers respond to market information, incentive pricing mechanisms and different market structures in the trade of agricultural goods. Examining challenges in agricultural supply chain operations through the lens of micro-economic theory is imperative because it can enable policymakers and social enterprises to develop and design market information provision policy, incentive contracts and market structures for improving farmer and consumer welfare. In each chapter, contributing authors motivate their research questions by providing the context and articulating the importance of their questions. They present their analysis to examine the respective research questions and explain their results. At the end of each chapter, they provide a short list of future research questions.

Poverty and Famines 1983-01-20 Amartya Sen The main focus of this book is on the causation of starvation in general and of famines in particular. The author develops the alternative method of analysis—the 'entitlement approach'—concentrating on ownership and exchange, not on food supply. The book also provides a general analysis of the characterization and measurement of poverty. Various approaches used in economics, sociology, and political theory are critically examined. The predominance of distributional issues, including distribution between different occupation groups, links up the problem of conceptualizing poverty with that of analyzing starvation.

Nordic Nutrition Recommendations 2012 2014-03-06 Nordic Council of Ministers The Nordic countries have collaborated in setting guidelines for dietary composition and recommended intakes of nutrients for several decades through the joint publication of the Nordic Nutrition Recommendations (NNR). This 5th edition, the NNR 2012, gives Dietary Reference Values (DRVs) for nutrients, and compared with earlier editions more emphasis has been put on evaluating the scientific evidence for the role of food and food patterns contributing to the prevention of the major diet-related chronic diseases. Recommendations on physical activity are included and interaction with physical activity has been taken into account for the individual nutrient recommendations wherever appropriate. A chapter on sustainable food consumption has been added. A Nordic perspective has been accounted for in setting the reference values.The NNR 2012 has used an evidence-based and transparent approach in assessing associations between nutrients and foods and certain health outcomes. Systematic reviews form the basis for the recommendations of several nutrients and topics, while a less stringent update has been done for others. The systematic reviews and individual chapters have been peer reviewed and the systematic reviews are published in the Food & Nutrition Research journal. The draft chapters were subject to an open public consultation. Recommendations have been changed only when sufficient scientific evidence has evolved since the 4th edition. The primary aim of the NNR 2012 is to present the scientific background of the recommendations and their application. A secondary aim is for the NNR 2012 to function as a basis for the national recommendations that are adopted by the individual

At first consisting only of the Horus name, the titulary grew to include other phrases chosen to represent the king's special relationship with the divine world. By the Middle Kingdom (late twenty-first century B.C.E.), the full fivefold titulary was clearly established, and kings henceforth used all five names regularly. This volume includes all rulers' names from the so-called Dynasty 0 (ca. 3200 B.C.E.) to the last Ptolemaic ruler in the late first century B.C.E., offered in transliteration and English translation with an introduction and notes.

The 1.5 Billion People Question 2017-10-12 Harold Alderman Most of the people in low and middle-income countries covered by social protection receive assistance in the form of in-kind food. The origin of such support is rooted in countries' historical pursuit of three interconnected objectives, namely attaining self-sufficiency in food, managing domestic food prices, and providing income support to the poor. This volume sheds light on the complex, bumpy and non-linear process of how some flagship food-based social protection programs have evolved over time, and how they currently work. In particular, it lays out the broad trends in reforms, including a growing move from in-kind modalities to cash transfers, from universality to targeting, and from agriculture to social protection. Case studies from Egypt, India, Indonesia, Mexico, Sri Lanka, and United States document the specific experiences of managing the process of reform and implementation, including enhancing our understanding of the opportunities and challenges with different social protection transfer modalities.
