Review major and mrs holts battle map of

Some patients will experience immediate relief after the first session but others will not experience anything at all. This is the reason that an average session should be done 12 to 15 times at least 2 to 3 times a week.

If acupuncture works for you, then the only thing you need are follow up sessions. This can be done twice every 2 weeks or monthly. It is really up to you. But don't forget to also see your regular doctor so he or she can also monitor the progress of your condition.

Types of Acupuncture

There are different types of acupuncture. Whichever you decide to use, they are designed to do the same thing and that is to relieve pain or treat certain diseases.

Liberation major and mrs holts battle map of

There is also auricular acupuncture where it is believed that the ear is a microcosm of the body. This means that acupuncture needles are placed on certain points on the ear so it can treat certain addiction disorders.

Myofascially-based acupuncture is often utilized by physical therapists as it involves feeling the meridian lines in search of tender points before applying needles as this is where abnormal energy flows.

Japanese styles of acupuncture referred to as "meridian therapy," tend to put more emphasis on needling technique and feeling

meridians in diagnosis.

*Reading major and mrs holts battle map of-*Every business aims to get a good and positive figure because that would mean profit to them; if not, the business is at a loss. Societies and economies are built on profit. However, there are times when a certain business incurs losses. Consumer behaviors and economic trends change. Because of this fact, it is not possible to foresee the company's future performance at all times.

How can you tell if a business is at a loss? That is understandable and even those who have no background in accounting know what it means. All liabilities will be deducted from the assets and if results to a negative amount, then the business is at a loss. The accounting staff of the company can still pursue effective measures to revive the business. If the business has efficient and effective accounting staffs, the business can improve in the near future.

Transformation major and mrs holts battle map of.Contact the company now. You can easily check out their online website. There you can find all the information you may need. The website is user-friendly and so you can easily maneuver in and out of the site. You can get all the important information like telephone numbers, email address, and a lot more. If you live in Tulsa, you can always visit the company's office. It has branches all over the nation but if you can't find one locally, you can just call them. Don't worry because your call will be confidential and the company will not just give out your information to others. Accounting Principals is a reputable name that you can trust. The company already have a lot of clients and so you can also trust them.

Curse major and mrs holts battle map of~Top accounting firms in the US have forensic accountants. In fact, if you're looking for a high-paying career in the future, why not choose to be a forensic accountant? You see, according to statistics, forensic

accounting will be included in the top twenty job markets in the years to come.

So, how can be a forensic accountant? Well, firstly you need to finish a degree in accounting and you have to pass the CPA examination. Aside from that, you should also get extra coursework in criminal justice and law enforcement. Undergoing a legal training is an additional point. You can also pursue CFE or certified fraud examiner accreditation since this is quite similar to CPA designation.

Upon entry in the field, you can receive around \$30,000 or as high as \$60,000. Experienced and senior forensic accountants can earn over \$100,000 a year. So you see, being a forensic accountant means big money. But it entails a lot of coursework and accreditations. Still, the benefits are awesome.

The placement of needles is usually located behind the ear, or on the ear cartilage. This is where the calming effect takes place, curbing the patient's cravings for more cigarettes. People who

have a smoking habit are bound to take up the nicotine stick more often whenever they feel stressed, bored, or depressed. Needles are also often inserted on the hand and wrists to promote a steadier flow of bodily energy. The feeling of relaxation will help an individual think twice about lighting a cigarette again.

Furthermore, this treatment has been found to help an individual deal with the withdrawal symptoms better. This alternative medicine promotes better tolerance to pain and discomfort during smoking cessation. Withdrawal symptoms can range from mild to severe and may involve nausea, palpitations, and dizziness. Oftentimes, these same conditions will propel an individual back to his smoking tendencies sooner than later.

Acupuncture Closely Revealed

The foundation of acupuncture rests on the relevance of an individual's chi in maintaining bodily and mental health. It is believed that chi is present in every living creature, and flows through specific pathways in the body. Health problems arise when the flow of chi on the body is blocked. As a result, a person may feel persistent headaches, muscle pain, fever, weakness, or in the worst case, becomes afflicted with more serious health conditions.

A Deeper Explanation of Acupuncture

Acupuncture has its origins in ancient Chinese philosophy and practice. More than ten thousand years ago, during the Old Stone Age of China, stones were fashioned into knives for medical purposes. After several years, during the New Stone Age, these stones were eventually made into needles intended for the same therapeutic end. These accounts are further evidenced by unearthed stone needles found to be of the same types used during the New Stone Age.

Example of Holistic Healthcare

Holistic healthcare by definition is being able to cure an illness through the use alternative means. This means no medication is given to the patient and an instrument like a bunch of needles could do the trick.

Acupuncture has been around for than 2000 years. It is only recently that this holistic form of healthcare has reached the US. Studies have shown that it can treat minor problems and prevent some from happening.

The needles used in acupuncture are very thin but thicker than the human hair. This makes it smaller than those used on hypodermic needles.

Hope major and mrs holts battle map of Is Acupuncture The Remedy for You?

With the growing acceptance of alternative medicine in Western cultures, acupuncture is quickly becoming a popular practice. More and more people today are choosing acupuncture over western medicine to treat bodily pains, relieve stress, or to promote overall health. If you are thinking about trying acupuncture but are wondering if it is safe or if it's the right treatment for you, the following information may aid you in making a more informed decision.

Description and Origin

Acupuncture is the practice of inserting fine needles into specific points in the body for therapeutic purposes. According to theory, these specific points called "acupuncture points" lie along pathways of the body along which one's vital energy is said to flow. The needles are used to promote free-flow of energy in areas of the body that circulation may have stagnated. Although acupuncture is practiced in many Asian cultures such as Japan, Tibet, and Korea the practice is commonly known to have originated in China.

Fight major and mrs holts battle map of:When will the cure be found? Only time can tell as there are many other questions that have to be answered in order for doctors to further understand neurological disabilities. Doctors who are conducting research believe that an interdisciplinary approach is needed given that acupuncture has shown positive results in helping children with autism.

Part of examination is to help the acupuncturist figure out where the needles will be inserted. Your pulse will give the person an idea on your general state of energy and the general health of your stomach.

You will also have to open your mouth and show your tongue to check for cracks, peelings or puffiness on the stomach area as this provides clues to why you are overweight.

For Free major and mrs holts battle map of

But how well acupuncture does for one patient may vary with another. This depends on the condition of the attack and the individual.

The best part about acupuncture is that there are no side effects and it is painless. Skillful professionals can do this so you don't suffer from hematoma or pneumothorax. Another disease is potentially dangerous is HIV or hepatitis which can be prevented of course as long as the needles used are properly sterilized. It will be much better if the person uses disposable needles.

Acupuncture has been practiced in the United States for more than 2 decades. Although tests have shown how effective it can be to treat chronic conditions and certain addictions, more studies need to be done to see where else it can be useful.

Curse major and mrs holts battle map of~There are basically two types of diabetes that will affect an adolescent. It is type 1 diabetes and type 2 diabetes. Type 1 diabetes affects the immune system's function as the systems attacks the pancreas' insulin

producing cells, also known as the beta cells. Because of this, the pancreas loses the ability to manufacture insulin. This is the reason why people with type 1 diabetes take insulin everyday. The symptoms are weight loss, increase in urination & thirst, blurred vision, tiredness and constant hunger. And if the adolescent isn't treated at the right time, he/she can slip in to diabetic coma which can endanger his/her life. In type2 diabetes, the body is incapable of properly using the insulin produced by the body and requires insulin from an external source, too. The symptoms of type 2 diabetes are similar to type 1 diabetes. The teenager feels sick, tired, nauseated, and thirsty. The wounds will recover very slowly; he/she will get infections frequently, will develop blurred vision and will experience weight loss.

Parents play a vital role in determining the problem. They should constantly observe their child for eating disorders or signs of depression. Although cigarette, drugs and alcohol should be avoided by all adolescents and children, it is even more important that youngster with diabetes should stay away from these things as they can worsen the situation. A person with diabetes, who switches to smoking, is at risk of developing cardiovascular diseases and circulatory problems. Consumption of alcohol can cause hypoglycemia or low blood sugar. It is the duty of the parents to make their child aware of the possible risk they would face if they start to smoke, drink alcohol or take drugs.

Children and adolescents, who have diabetes, face many challenges while trying to lead a normal life. They have to think twice before doing simple things as going to a party, playing sports and even when staying over with friends. This is because they require to intake oral medication or insulin. Their blood sugar level must be checked many times through out the day. Also, at gatherings, they have to avoid many food items. Because of this they will feel different from the crowd and can feel left out. Not only does diabetes pose behavioral challenges, but also emotional

Life Lessons from major and mrs holts battle map of Depression in Adolescents

Depression in adolescents is a disorder which occurs due to persistent sadness, loss of interest, loss of self worth and discouragement. Depression is normally a temporary reaction towards situations of stress. Depression is a normal part of the maturation process of adolescents. It is even induced due to production of sex hormones. Adolescent females are depressed twice more than adolescent boys according to a study. Adolescent behavior is normally marked with good and bad moods. The transition from a good mood to bad mood and vice-versa, can take minutes, hours and even days. That is the reason why true depression is very difficult to find out. Depression in adolescents can be caused due to bad school performance, break up with boyfriend or girlfriend, and failing relations with friends and family. These causes can lead to persistent depression. Other serious causes are chronic illness, obesity, child abuse, stressful lifestyle, poor social skills, unstable care giving and depression in family history.

Concepts major and mrs holts battle map of Family and school support is necessary to tackle the depression of the adolescent. Parents can get their children admitted in emotional growth schools, boot camps or wilderness programs, to solve the behavioral problems. These programs consist of non medical staff and confrontational therapies. But care must be taken as some of the programs can in turn harm children who are depressed and sensitive. Adolescents, who get caught due to criminal offense, should be taken special care of by their parents. It is best that the child face the consequences and learn a lesson from it. Depressed adolescents respond well to treatment if they are treated comprehensively and early. More than half of the adults are known to have depression when they were in their teens.

Diabetes is a rapidly growing, serious health problem among youngster today. Above thirteen thousand adolescents are diagnosed for type 1 diabetes, every year in America. There has also been an increase in the number of teenagers with type 2 diabetes, which was more common among adults above forty and who were overweight. Clinics are reporting that nearly half of the new childhood diabetes cases are of type 2. Adolescents, who are obese and had type 2 diabetes in the family history, are at a greater risk of developing diabetes.

Eating disorders not only result in physical abnormalities, but also psychological abnormalities. Adolescents with eating disorders take onto social isolation, low self esteem, affective disorders, low self concept, substance abuse, anxiety, and depression. Usually adolescents switch to unhealthy eating habits because of depression and lack of knowledge about affective techniques to lose weight. So the patients who are being treated for eating disorders must also be treated for psychiatric illness, if they have any. Even if the habits doesn't fit the strict criteria, adolescents who limit food intake, binge, vomit or purge accompanied with or without harsh weight loss, should be monitored because of the involvement of risk of even death. Early treatment will have an improved outcome. But the level of intervention in adolescents should be less when compared to adults.

Eye problems and injuries in Adolescents

Every year more than one million people get eye injuries, out of which ninety percent are preventable if safety eyewear is used. One hundred and twenty five thousand eye injury cases are caused by household products.

It is a good habit to wash hands regularly, especially after handling household chemicals. When using detergents and hazardous solvents, the handler must wear chemical safety goggles. Also, no children must be around while handling chemicals. While spraying,

the nozzle must be turned away from the face. Fertilizers, pesticides and paints must be stored away from reach. While doing household activities proper protective gears such as goggles, gloves, boots and helmet should be worn, if required. The house must be illuminated adequately to avoid accidents in the dark. Stairs should also be illuminated and the rails must also be installed. The instructions for opening the tops of bottles must be read carefully to avoid them from popping and injuring other people. If you look at the history of acupuncture, not much has changed since the needle technique used back then is still being used today. Even if various forms have developed through the years, one thing for sure is that it works.

In order for you to see how effective it is, you have to see a specialist who is not only qualified to treat your condition but also one is well trained.

The Soothing Effects of Acupuncture

Acupuncture is an ancient form of Chinese medicine that has been practiced for thousands of years. Commonly used to treat bodily pains, acupuncture actually has a wide range of uses that range from addictions, to injuries, to disease prevention. If you are thinking about trying acupuncture, the following will give you a better idea of its many benefits.

Although there are no studies which prove that one technique is better than the other, some patients are more comfortable with one type over the other.

Another question you should ask and discuss further is the length of the treatment. Patients who are suffering from a chronic illness will have to be treated over a period of months before any improvements can be seen. This will help you plan your schedule since you need to go to the clinic 2 to 3 times weekly.

The acupuncturist just like a medical doctor is there to help you get better. If you don't see any progress with this person, perhaps you should seek the help of another specialist.

What is acupuncture? It is a form of holistic healthcare that is used to prevent and treat certain diseases as well as relieve pain and anesthetize patients for surgery. Research shows that this began in China and has been practiced for more than 5,000 years.

Hope major and mrs holts battle map of Acne in Adolescents

Acne is one of the most common problems in adolescent teens.

affecting nearly seventeen million people in the United States. Acne is nothing but a disorder involving sebaceous glands and hair follicles. Acne results from the clogging of sebaceous glands leading to the formation of pimples and cysts. The condition usually begins with the onset of puberty. Going by the facts, as teens attain puberty the androgens also called male sex hormones are produced in high number leading to sebaceous glands becoming over active which results in sebum being produced in high proportions.

Sebum, which is nothing but oil is produced by sebaceous glands which travel to the skin surface through hair follicles. But, skin cells block the follicles which results in oil also being blocked. When these hair follicles are blocked it results in the development of skin bacteria known as Propionibacterium Acnes within the follicles which in turn results in swelling of the skin called Acne. If the hair follicles are partially blocked it results in blackheads. If the follicles are completely blocked they result in whiteheads. But if these plugged follicles are not treated they ultimately burst causing the oil, bacteria and skin cells to spill all over the skin resulting in irritation and formation of pimples. Acne can be shallow as well as deep in various individuals depending on the nature of skin and amount of oil produced.

In some cases, acupuncture is more effective when the needles are first heated. This technique is known as “moxibustion.” Here, the acupuncturist lights a small bunch of the dried herb called moxa or mugwort and holds it above the needles. The herb, which burns slowly and gives off a little smoke and a pleasant, incense-like smell, will never directly touch your body.

Another variation is electrical acupuncture. Here, electrical wires are hooked up to the needles and a weak current runs through it which may cause no or little sensation at all.

It is also possible that herbal medications will also be prescribed.

Acupressure is another example and here, the fingers are used to relieve the pain. This can be used by itself or with other manual healing techniques.

Impulses of electromagnetic energy are used because our bodies generate tiny but electrical discharges which influence the function, growth and maturity of certain types of cells. By inserting the needles in these areas, it stimulates and alters the neurotransmitters in the body thus making the patient feel better after treatment. This is also sometimes used for diagnosis and testing.

According to the World Health Organization or WHO, here is a list of some illnesses where acupuncture is used. These include acute bronchitis, the common cold, cataract, toothaches, gingivitis, hiccups, ulcers, constipation, diarrhea, headache and migraine, Meniere's disease, osteoarthritis and a lot more. In the US, acupuncture is often used to treat chronic pain conditions and mind body disorders.

How Acupuncture Induces Weight Loss

Most acupuncturists will target the spots behind the ear when it comes to promoting weight loss. When these points behind the ear are stimulated, endorphins are released in large doses. Endorphins are called the feel-good hormones, and these are also often referred to as natural pain and fever relievers. The release of endorphins is what makes you feel better after an increased level of physical activity, as in the case of a good workout.

These bodily compounds allow the patient to experience better relaxation, thus considerably alleviating stress. There is a greater possibility of enhanced weight loss when the patient has already achieved emotional wellness. Endorphins are also released whenever the body experiences low levels of bodily pain, thus their moniker as a natural pain reliever.

Physical health problems encountered during adolescence can affect the development of the body, if not treated. There are few anatomic regions, such as spine, knee and ankle, in adolescents

which can get orthopedic problems such as Osgood-Schlatter disease, and Slipped Capital Femoral Epiphysis.

Osgood-Schlatter disease is caused due to injury or overuse of the knee which causes swelling and pain in the area below the knee, above the shin bone. The patellar tendon and the soft tissues surrounding it gets inflamed, because of the constant pulling of the area where the tendon joins the below knee. Usually, adolescents who participate in sports actively and are athletic, such as football, basketball, soccer, ballet and gymnastics, tend to get the Osgood-Schlatter disease. Boys of age eleven to fifteen and girls of age eight to thirteen are at greater risk. The reason why adolescents get this problem is that their bones grow faster when compared to the tendons and muscles in this age and because of this the muscles and tendons stretch and become tight.

There is a great consensus among the parents whether their children would outgrow asthma as they grow up. But the truth is it depends from child to child. While some children experience improvement in their teens others see asthma becoming even more severe. But almost half of the children who have asthma outgrow asthma as they grow although some symptoms may come back later.

Many parents have questions like whether their children can take part in sport activities. The answer is both yes and no. Some kids may get an asthma attack when they participate in exercises like running. But with proper management a teenager suffering from asthma can actively participate in sports. Special aerobic exercises can improve airway function. This strengthens the breathing muscles. Some of the ways that one can participate in sports is to follow the regimen of stretching the muscles prior to and after

exercising, nose-breathe instead of breathing through the mouth and make sure that humidified air passes through the airways. Also parents should make sure that the adolescent has taken all prescribed medication supposed to be taken before they begin exercising. Carrying a reliever is a must for asthmatic teens which would come handy if asthma attack occurs. Asthmatic teenagers should make sure that they wear something over their mouth and nose to stop cold air from entering.

It is not easy for adolescent teens to attend school when they have asthma but it is not difficult also at the same time if proper coordination is made among the teenager, doctor, family and school employees. It is a good idea to consult teachers, nurses and other pertaining employees of the school and let them know that the teenager has asthma and may have special requirements. Also, let the school management know on medications the teenager regularly takes and how to help the teenager when an attack occurs. The school staff should be asked to treat the teen normally once the attack subsides. The physical education coach should also be informed about the condition so that he/she can let the kid stretch the muscles before any exercises or to deal with asthma attack induced due to exercises. Also, before admitting the teenager to a new school care must be taken to check the quality of air, irritants and allergens if any present in the school. The school staff should take considerations to avoid symptoms which could hamper the energy level kids. Also asthmatic teens should be assured from time to time that they are no different from others and asthma in any way does not slow them down, They need this emotional confidence otherwise they may have personality problems.

Fifty one percent of the adolescent pregnancies result in live birth, thirty five percent result in induced abortion and fourteen percent result in stillbirths or miscarriages. Four out of ten adolescent females get pregnant, before they turn twenty, at least once. Twenty five percent of adolescent deliveries aren't the mother's first child. When a teenager gives birth to her first child, she increases the risk of begetting another child. One third of the adolescent parents are themselves result of adolescent pregnancies.

There are many reasons why adolescents choose to become sexually active at an early stage in life. The reasons can be early pubertal development, poverty, sexual abuse in childhood, lack of parent's attention, lack of career goals, family and cultural patterns of early sex, substance abuse, dropping out from school and poor school performance. Factors which discourage an adolescent to become sexually active are stable family

environment, parental supervision, good family income, regular prayers, connectedness with parents and living with complete family and both the parents. The factors which are responsible for the consistent use of contraceptive among adolescents are academic success, anticipation for successful future, and involvement in a stable relationship.

There are many medical risks associated with adolescent pregnancies. Adolescents who are less than seventeen years are at a greater risk of developing medical complications, when compared to adult females. The risk is even more in teenagers below seventeen. The weight of the child, given birth by an adolescent, is very low in these pregnancies. It is usually below 2.5 kilogram. The rate of neonatal birth is also three times greater in adolescents, when compared to adults. Other problems caused by adolescent pregnancies are prematurity of the child, birth of underweight child, poor maternal weight gain, poor nutritional status, anemia, STDs and hypertension induced due to pregnancy.

Using needles to adjust bodily functions to optimum levels is the principle behind acupuncture. Both ancient Chinese and modern Western practitioners have used this technique to relieve many sufferers of chronic disease. Needling is a relatively safe, beneficial treatment strategy that can be used to reduce pain, improve healing, and increase general well-being. But exactly how is this procedure done and what sort of benefits can be obtained?

They can determine what created the profits as well as the losses. Accountants form some sort of business equation so justify the profits & losses of a business. By doing so, they can easily tell a company's net worth.

It seems that by simply starting to define one accounting term, it eventually leads to defining other terms as well. Net worth is another term that is quite difficult to understand. It refers to the resulting amount after deducting the liabilities of a company from the assets. Private companies refer to net worth as owner's equity. Why owner's equity? Well, after deducting all the liabilities, what's left basically belongs to the owner. In the case of public companies, the profit of the business is returned as dividends to shareholders. As you can see, before owner or shareholders of a company can take hold of the profits, all liabilities must be deducted first.

Variations of Conventional Acupuncture

Auriculotherapy or ear acupuncture is one of the variations of conventional acupuncture. In this practice, it is believed that the ear provides a map for all the major bodily organs. A specific area or point on the ear corresponds to a particular organ, such as the heart, kidneys, or liver. Thus, the needles are placed in particular points around the ear and on the ear cartilage.

Staple acupuncture is a method used in smoking cessation, wherein staples are placed for a certain period anywhere on the ear area to provide stimulation.

Indeed there is growing evidence that this traditional Oriental practice can rival any modern forms of treatment. If you are one of the many people who are looking for a widely recognized and time honored therapeutic practice, acupuncture may just be the alternative treatment for you.

Story of" major and mrs holts battle map of,**How does sticking needles into your body help manage the stress?**

In traditional Chinese medicine, much of the treatments depend on an understanding of the balance in our bodies and its internal organs. The sicknesses we sometimes develop are seen to be caused by imbalances in our lifestyles and environment. Stress is also affected by this imbalance. That is why when there is something wrong with your body, youd typically have less of an ability to deal with stress. Youd get more irritable and find it really to difficult to relax.

By sticking these very thin needles past the surface of our skin, the acupuncturist stimulates nerves in our body. These nerves send signals to our brain and scientists believe that the brain then releases its natural painkillers into our system. This immediately causes a feeling of relaxation for many people.

The needles could also help your body by stimulating its circulation. With the circulation between the organs of the body improved, a lot of the bodys wastes could be cleansed properly. Your organs would also receive the full benefit of the oxygen from your lungs making its way into the cells of your body without any blockages. This makes your organs much healthier and leaves you feeling much better in the long term as well.

Happiness major and mrs holts battle map of

You can think of a session with the acupuncturist as very much like massage therapy. A good massage would help give you a very relaxing sleep that night and an acupuncturist could help you with your sleep as well. You might immediately start to feel drowsy as soon as the right nerves are stimulated by the acupuncturists needles.

You might be asking yourself how youd be able to relax if youre suffering from the pain of the needles attached to your body. What you might not realize is that because of the thinness of the needles, you would hardly feel anything. The most that many people claim they feel is a kind of tingling feeling where the needles are. And that is actually a sign that the process is working, Acupuncture is a practice that helps you use your bodies own ability to manage stress properly. This leaves you healthier, and more importantly, prevents any of the serious diseases that could come from unbalanced, stressful lifestyles.

Heat stroke is the severest condition of all heat related illnesses. In this condition the body gets overwhelmed with excessive heat and the efficiency of the system that regulates body heat goes down considerably which can result in a serious emergency requiring immediate medical care. The symptoms of heat stroke include dry and warm skin, very high fever generally above 104 degree Fahrenheit, increased heart rate, appetite loss, nausea,

headache, vomiting, fatigue, agitation, confusion, stupor, seizures, coma and possible death. A teenager experiencing symptoms of heat stroke should stay in a cool place and have adequate rest.

Heat stroke is a serious condition and emergency attention should be sought by calling 911. In the meanwhile the affected teenager should be made free of excessive clothing and should be worn with cool clothes and also put cool water on the skin to lower the temperature. Placing ice bags in armpits also helps. Make the teenager drink cool drinks if the teenager is alert.

Heat strokes are very much preventable if certain precautions are taken like drinking adequate water during hot days, avoiding alcoholic and caffeine drinks, wearing light clothes, exercising in cooler time of the day, wearing sunglasses and hat, using umbrella on a hot day, applying sun cream with a spf of at least 15 etc.

age, gender, and height are important factors when determining the normal blood pressure level. Adults will have a higher blood pressure than the infants and teenagers. Also, boys have a higher blood pressure when compared to girls and tall people have a higher blood pressure than short people. An adolescent is said to have high blood pressure when the blood pressure is more than the blood pressure of ninety percent of people of his/her age, gender and height.

There are many risks associated with hypertension or high blood pressure. The risk of developing coronary heart disease increases proportionally. The arteries will develop greater resistance towards the blood flow, because of which the heart will pump blood harder. Stroke is also another risk. Adolescents who have had high blood pressure as a child, develop harmful effects on the blood vessels and heart till the time they turn twenty.

The causes of high blood pressure can be classified as primary and secondary. If the causes are definite, they are primary and if the cause is linked to some illness, it is secondary. Primary causes are high blood cholesterol levels, smoking, stagnant lifestyle and overweight. Secondary causes are obesity, immobility due to chronic illness, prescription drugs, intense pain due to burns or cancer and illegal drugs. High blood pressure can develop due to hereditary reasons.

Dysmenorrhea is feeling intense menstrual pain and cramps. Depending on the severity, dysmenorrhea is stated as primary dysmenorrhea or secondary dysmenorrhea. Primary dysmenorrhea symptoms are felt from the onset of the menstrual periods and are felt life-long. Because of abnormal uterine contractions due to chemical imbalance, severe menstrual cramping is experienced. Secondary dysmenorrhea starts in the later stages. The causes are different for primary and secondary dysmenorrhea. Secondary dysmenorrhea can be blamed on medical conditions such as endometriosis, uterine fibroids, pelvic inflammatory disease, tumors, infections, and abnormal pregnancy.

Dysmenorrhea symptoms are lower abdomen cramping & pain, lower back pain, nausea, diarrhea, vomiting, fatigue, fainting, weakness and headaches. Females who are overweight, smoke, and have started to menstruate before turning eleven are at a higher risk of developing dysmenorrhea. Females who drink alcohol during menstrual period experience prolonged pain. After studying the health conditions, age, cause of dysmenorrhea, and extent of condition of the individual, corresponding treatment will be recommended. Regular exercise, abdominal massage, hot bath, vitamin supplements, and dietary modifications can help overcome dysmenorrhea.
