Developed by Lloyd M. Dunn and Douglas M. Dunn, the assessment is made to evaluate receptive vocabulary for American English. It is swift and effortless to administer, saving valuable time so that focus can be placed on applying successful interventions.

The PPVT-4 evaluation content includes a broad scope of vocabulary comprehension levels, extending from pre-kindergarten through adulthood. The assessment problems broadly feature words that depict 20 subject areas (e.g., actions, vegetables, tools), parts of speech (nouns, verbs, attributes), and home and school vocabulary. The test offers two identical forms which include distinct vocabulary items, guaranteeing that the individual has not "learned" the test. One edition can be utilized prior to intervention implementation to evaluate people's vocabulary understanding and the alternative form can be used for re-assessment to assess and document progress. The PPVT-4 also contains a unique Growth Scale Value (GSV) which is sensitive to minor changes over time.
