Evidence-Based Orthopedics

2021-07-13 Mohit Bhandari Evidence-Based Orthopedics is an up-to-date review of the best evidence for the diagnosis, management, and treatment of orthopedic conditions. Covering orthopedic surgery as well as pre- and post-operative complications, this comprehensive guide provides recommendations for implementing evidence-based practice in the clinical setting. Chapters written by leading clinicians and researchers in the field are supported by tables of evidence that summarize systematic reviews and randomized controlled trials. In areas where evidence is insufficient to recommend a practice, summaries of the available research are provided to assist in decision-making. This fully revised new edition reflects the most recent evidence using the approved evidence-based medicine (EBM) guidelines and methodology. The text now places greater emphasis on GRADE—a transparent framework for developing and presenting summaries of evidence—to allow readers to easily evaluate the quality of evidence and the strength of recommendations. The second edition offers a streamlined presentation and an improved standardized format emphasizing how evidence in each chapter directly affects clinical decisions. Incorporating a vast amount of new evidence, Evidence-Based Orthopedics: Features thoroughly revised and updated content, including a new chapter on pediatric orthopedics and new X-ray images Provides the evidence base for orthopedic surgery as well as pediatric orthopedics and orthopedic conditions requiring medical treatment Covers the different methods for most orthopedic surgical procedures, such as hip replacements, arthroscopy, and knee replacements Helps surgeons and orthopedic specialists achieve a uniform optimum standard through a condition-based approach Aligns with internationally accepted guidelines and best health economic principles Evidence-Based Orthopedics is an invaluable resource for orthopedic specialists, surgeons, trauma surgeons, trainees, and medical students.

Journey of a Thousand Miles

He was weary of his living. He was uninterested, sad, and discontented. He had a job he detested, a manager he despised, and a partner he didn't adore. He had no zeal, no purpose, no meaning. He sensed like he was misusing his hours, his possibility, his life. He desired to alter, he wanted to run away, he desired to exist. He decided to quit his job, to end things with his partner, to sell his belongings, and to purchase a single fare to the far end of the globe. He didn't understand where he was proceeding, he didn't know what he was doing, he didn't realize what he was searching for. He only realized that he had to leave, that he had to explore, that he had to discover. He set out on a voyage of a thousand miles, a voyage of thrill, of obstacle, of knowledge, of growth, of alteration.
