The Peabody Picture Vocabulary Test 4th Edition (PPVT-4) is a highly regarded vocabulary evaluation that has been in use for nearly half a century. Developed by Lloyd M. Dunn and Douglas M. Dunn, the evaluation is crafted to assess vocabulary comprehension for American English. It is quick and easy to administer, preserving valuable time so that concentration can be put on applying intelligent approaches.

The PPVT-4 assessment material covers a broad range of receptive vocabulary levels, ranging from pre-kindergarten through adult age. The assessment problems broadly sample words that depict 20 content areas (e.g., actions, vegetables, tools), parts of speech (nouns, verbs, attributes), and household and school vocabulary.

The evaluation provides two equal forms which include various vocabulary words, guaranteeing that the person has not "learned" the test. One form can be used ahead of intervention to evaluate individuals' vocabulary understanding and the other edition can be employed for re-assessment to evaluate and record progress. The PPVT-4 also includes a unique Growth Scale Value (GSV) which is reactive to slight changes in time.
