feel, and do about listening, Dr. Kline promotes the need for honing this often neglected communication skill. He presents logical, practical methods that will help you to become a better listener in your personal and professional life in everyday and critical situations. Listening is the neglected communication skill. While all of us have had instruction in reading, writing, and speaking, few have had any formal instruction in listening. This void in our education is especially interesting in light of research showing that most of us spend seven of every 10 minutes we are awake in some form of communication activity. Of these seven minutes (or 70 percent of the time we are awake), 10 percent is spent writing, 15 percent reading, 30 percent talking, and 45 percent listening.
