## *The Lean Startup*

2011-09-13 Eric Ries Most startups fail. But many of those failures are preventable. The Lean Startup is a new approach being adopted across the globe, changing the way companies are built and new products are launched. Eric Ries defines a startup as an organization dedicated to creating something new under conditions of extreme uncertainty. This is just as true for one person in a garage or a group of seasoned professionals in a Fortune 500 boardroom. What they have in common is a mission to penetrate that fog of uncertainty to discover a successful path to a sustainable business. The Lean Startup approach fosters companies that are both more capital efficient and that leverage human creativity more effectively. Inspired by lessons from lean manufacturing, it relies on "validated learning," rapid scientific experimentation, as well as a number of counter-intuitive practices that shorten product development cycles, measure actual progress without resorting to vanity metrics, and learn what customers really want. It enables a company to shift directions with agility, altering plans inch by inch, minute by minute. Rather than wasting time creating elaborate business plans, The Lean Startup offers entrepreneurs—in companies of all sizes—a way to test their vision continuously, to adapt and adjust before it's too late. Ries provides a scientific approach to creating and managing successful startups in a age when companies need to innovate more than ever.

Anna could never banish from her thoughts her first love, Leo. Their paths had crossed when they were both 16, at a magical summer camp. They were inseparable, spending every day laughing, engaging in deep conversations, and sharing stolen kisses. Their bond was indestructible, and they vowed to stay connected, to remain faithful, and to love each other forever. But life, as it often does, had other arrangements in store for them. They lost track of each other, they moved on with their lives, and they eventually married other people. Years passed, and the hustle and bustle of life took them in different directions. The moment they laid eyes on each other, the embers of their affection rekindled. The same magnetic pull that had drawn them together years ago was still potent. Their emotions swirled for the deep connection they had shared, but their minds grappled with the complexity of their current lives. They were caught in an emotional battle, torn between the alluring memories of their first love and the complications of their present. They stood at a crossroads, forced to make a difficult choice. Would they choose the intense connection of their first love, risking the uncertainty that lay ahead, or would they hold onto the stability of their current lives, forever wondering what could have been? They had both engineered sophisticated arms, such as lasers, unmanned aerial vehicles, and spacecrafts, that could attack anywhere, any time. They had also clandestinely established orbital stations, that could fire nuclear missiles, that could obliterate the world. They were prepared to use these weapons, if necessary. But they were the sole ones. There existed a third force, a hidden power, that had been observing them, waiting for them, preparing for them. They were the extraterrestrials, and they had come come to prevent them. They had come to rescue the world, or to end it. They had come arrived to start the galactic wars which transformed history.

It is swift and simple to carry out, conserving important time so that concentration can be placed on executing effective strategies.

The assessment questions widely include words that depict 20 content domains (e.g., actions, vegetables, tools), parts of speech (nouns, verbs, attributes), and home and educational vocabulary.

The assessment provides two equal forms which hold distinct vocabulary words, guaranteeing that the person has not "mastered" the test.
