of wanting him to die. Shocked by their reaction, they dig deeper and deeper into the case. Despite their vastly different circumstances, something in his story is unsettlingly, uncannily familiar. Crime, even the darkest and most unsayable acts, can happen to any one of us. As Alex pores over the facts of the murder, they find themselves thrust into the complicated narrative of Ricky's childhood. And by examining the details of Ricky's case, they are forced to face their own story, to unearth long-buried family secrets, and reckon with a past that colors their view of Ricky's crime. But another surprise awaits: They weren't the only one who saw their life in Ricky's. An intellectual and emotional thriller that is also a different kind of murder mystery, **THE FACT OF A BODY** is a book not only about how the story of one crime was constructed -- but about how we grapple with our own personal histories. Along the way it tackles questions about the nature of forgiveness, and the single narrative can

while they're asleep in their beds. Convinced his future is only as bright as the fluorescent lights in his cell, Smoke doesn't care that the "threads" that bind his soul to his body are wearing thin—that one day he may not make it back in time. That is, until he meets Pink, a tough, resourceful girl who sees him for who he truly is and wants to help him clear his name. Now Smoke is on a journey to redemption he never thought possible. With Pink's help, Smoke may be able to reveal the true killer, but the closer they get to the truth, the more deadly their search becomes. The web of lies, deceit, and corruption that put Smoke behind bars is more tangled than they could have ever imagined. With both of their lives on the line, Smoke will have to decide how much he's willing to risk, and if he can envision a future worth fighting for.

Camilla Sten One of Goodreads Most Popular Horror of 2022 "Engrossing, character-rich, powerful. Sten is on a roll."—Publishers Weekly(starred review) Crimson Peak meets The Sanatorium in The Resting Place, a heart-thumping, unforgettable novel of horror and suspense by international sensation Camilla Sten. Deep rooted secrets. A twisted family history. And a house that will never let go. Eleanor lives with prosopagnosia, the inability to recognize a familiar person's face. It causes stress. Acute anxiety. It can make you question what you think you know. When Eleanor walked in on the scene of her capriciously cruel grandmother, Vivianne's, murder, she came face to face with the killer—a maddening expression that means nothing to someone like her. With each passing day, the horror of having come so close to a murderer—and not knowing if they'd be back—overtakes both her dreams and her waking moments, thwarting her Perception of Reality. Then a Gripping True Crime Murder Investigation Pdf Pdf upload Dona a Murray

lawyer calls. Vivianne has left her a house—a looming estate tucked away in the Swedish woods. The place her grandfather died, suddenly. A place that has housed a chilling past for over fifty years. Eleanor. Her steadfast boyfriend, Sebastian. Her reckless aunt, Veronika. The lawyer. All will go to this house of secrets, looking for answers. But as they get closer to uncovering the truth, they'll wish they had never come to disturb what rests there.

new set of beautifully repackaged hardcover classics by Truman Capote—also available are *Breakfast at Tiffany's* and *Other Voices, Other Rooms* (in one volume), *Portraits and Observations*, and *The Complete Stories* Truman Capote's masterpiece, *In Cold Blood*, created a sensation when it was first published, serially, in *The New Yorker* in 1965. The intensively researched, atmospheric narrative of the lives of the Clutter family of Holcomb, Kansas, and of the two men, Richard Eugene Hickock and Perry Edward Smith, who brutally killed them on the night of November 15, 1959, is the seminal work of the "new journalism." Perry Smith is one of the great dark characters of American literature, full of contradictory emotions. "I thought he was a very nice gentleman," he says of Herb Clutter. "Soft-spoken. I thought so right up to the moment I cut his throat." Told in chapters that alternate between the Clutter household and the approach of Smith and Hickock

Savage Appetites 2020-07-07
Rachel Monroe A "necessary and brilliant" (NPR) exploration of our cultural fascination with true crime told through four "enthraling" (*The New York Times Book Review*) narratives of obsession. In *Savage Appetites*, Rachel Monroe links four criminal roles—Detective, Victim, Defender, and Killer—to four true stories about women driven by obsession. From a frustrated and brilliant heiress crafting crime-scene dollhouses to a young woman who became part of a Manson victim's family, from a landscape architect in love with a convicted murderer to a Columbine fangirl who planned her own mass shooting, these women are alternately mesmerizing, horrifying, and sympathetic. A revealing study of women's complex

relationship with true crime and the fear and desire it can inspire, together these stories provide a window into why many women are drawn to crime narratives—even as they also recoil from them. Monroe uses these four cases to trace the history of American crime through the growth of forensic science, the evolving role of victims, the Satanic Panic, the rise of online detectives, and the long shadow of the Columbine shooting. Combining personal narrative, reportage, and a sociological examination of violence and media in the 20th and 21st centuries, *Savage Appetites* is a “corrective to the genre it interrogates” (The New Statesman), scrupulously exploring empathy, justice, and the persistent appeal of crime.

One day he was a doctor treating the dying, and the next he was a patient struggling to live. And just like that, the future he and his wife had imagined evaporated. virtuous and meaningful life” into a neurosurgeon at Stanford working in the brain, the most critical place for human identity, and finally into a patient and new father confronting his own mortality. What makes life worth living in the face of death? What do you do when the future, no longer a ladder toward your goals in life, flattens out into a perpetual present? What does it mean to have a child, to nurture a new life as another fades away?

These are some of the questions Kalanithi wrestles with in this profoundly moving, exquisitely observed memoir. Paul Kalanithi died in March 2015, while working on this book, yet his words live on as a guide and a gift to us all. “I began to realize that coming face to face with my own mortality, in a sense, had changed nothing and everything,” he wrote. “Seven words from Samuel Beckett began to repeat in my head: ‘I can’t go on. —Karin Slaughter When Chloe Davis was twelve, six teenage girls went missing in her small Louisiana town. By the end of the summer, her own father had confessed to the crimes and was put away for life, leaving Chloe and the rest of her family to grapple with the truth and try to move forward while dealing with the aftermath. Now twenty years later, Chloe is a psychologist in Baton Rouge and getting ready for her wedding. While she finally has a fragile grasp on the happiness she's worked so hard to achieve, she sometimes feels as out of control of her own life as the troubled teens who are her patients. So when a local teenage girl goes missing, and then another, that terrifying summer comes crashing back. Is she paranoid, seeing parallels from her past that aren't actually there, or for the second time in her life, is Chloe about to unmask a killer? Gorilla Grip 2017-11-08 Rahul Mookerjee Do you secretly wish you got comments like the below most of the time - "You've got unnatural pulling power! It has to be something to do with the exercises you do!" (from folks that outweigh me by about a 1000 pounds - well - not really - but you get the drift - and folks from various disciplines of life, including, but not limited to those from the elite forces, boxers, weightlifters and the like). "You need to take it easy, man!" (when shaking hands with folks) "Man - you're a skinny dude - and yet you've got this amazing grip strength, not to mention the fact you're in shape". Farmers, wrestlers, strongmen (note - I mean STRONG men, not the bloated "muscle boys" you see preening "their stuff" in the gyms), tennis players, elite forces all over the world, and martial artists. What do the following groups of people have in common?

in common, other than the fact they perform different types of physical activity on a regular and daily basis? Some may have "bulging muscles", and some may not. Some may be "ripped to shreds" (UGH, I think I'm going to rip the next book apart that spouts that sort of nonsense), and others might be solidly built. Some might even need to lose a bit of weight, while others might be so skinny you could hang a pair of freshly pressed trousers on them. So, and again, what do these people all have in common? Strength and stamina, I hear some of you say. Well, good answer - - but what else? A STRONG GRIP. A farmer, for instance, might not have archetypical "show" muscles, but grip his hand at the end of a long, hard day (his, spent working on the farm), and you'll quickly experience the closest thing you can to an actual gorilla's grip. A wrestler's forearm might not look "pretty", and neither might his calloused and bandaged hands, but those very mitts can take the typical bodybuilder from

a vice like grip that the bodybuilder would be hard pressed to even TRY and escape from, and do things with it that would have the average "pretezel" blushing with shame (that old line, "twist you into a pretezel"!). A tennis player, martial artist, a boxer, a gymnast - you name it, and the list goes on and on - all people that perform physical activity on a daily basis, different sorts, but they have all that ONE thing in common i.e. a strong, bone crushing, vice like grip. And this, my friend, is one of the most important parts of a human being's overall physical development. The forearms, fingers and wrist are what make up the "gripping muscles", and you use these in virtually ALL situations in daily life, from carrying groceries up the stairs to lugging heavy furniture around. To put it another way, showy biceps might help you get the lady, for instance, but couple those with weak forearms, and you'll never be able to carry her up that flight of stairs to your

to curl impressive poundages in the gym using straps and other aids, but when it comes to doing pull-ups on a thick bar, a weak grip is what will let you down the most. On the other hand, a strong grip is an advantage in just about every situation. The PLETHORA of exercises that I give you in 0 Excuses Fitness do a great job of building a vice like, bone crushing grip, and truth be told that's all you need if you do 'em right - and yet - there are those that want MORE. Well, I wrote "Gorilla Grip" for those of you that "want more". And here it is. 16 exercises that should be done IN ADDITION to or in CONJUNCTION with (NOT "in place of!") the exercises I mention in 0 Excuses Fitness. Enjoy!

Where The Truth Lies 2018-10-22 M J Lee The case was closed. Until people started dying... DI Thomas Ridpath was on the up in the Manchester CID: a promising detective who captured a notorious serial killer. But ten years later he's recovering from a serious illness and on the brink of being forced out of the police. Then the murders began, in an uncanny echo of his first case. As the death count grows, old records, and bodies, go missing. Caught in a turf war between the police and the coroner's office, Ridpath is in a race against time. A race to save his career, his marriage, and innocent lives. When a detective disappears everything is on the line. Can Ridpath save his colleague? A nail-biting crime thriller, perfect for fans of Mark Billingham, Peter James and D. S. Butler.

The Girl Who Was Taken
2018-03-27 Charlie Donlea The bestselling author of Twenty Years Later delivers a chilling thriller where nothing is at it seems and each reveal is more shocking than the last...right up to the jaw-dropping final twist. "A gripping thriller that will blow readers away." -Mary Kubica, New York Times bestselling author on Don't Believe It "A superb storyteller." —Robert Dugoni, New York Times bestselling author Two abducted girls—one who returns, one who doesn't. The night they go missing, high school seniors Nicole Cutty and Megan McDonald are at a beach party in their small town of Emerson Bay, North Carolina. Police launch a massive search, but hope is almost lost—until Megan escapes from a bunker deep in the woods. . . . A year later, the bestselling account of her ordeal has made Megan a celebrity. It's a triumphant story, except for one inconvenient detail: Nicole is still missing. Nicole's older sister, Livia, a fellow in forensic pathology, expects that one

day soon Nicole's body will be found and her sister's fate determined. Instead, the first clue comes from another body—that of a young man connected to Nicole's past. Livia reaches out to Megan to learn more about that fateful night. Other girls have disappeared, and she's increasingly sure the cases are connected. Megan knows more than she revealed in her book. Flashes of memory are pointing to something more monstrous than she described. And the deeper she and Livia dig, the more they realize that sometimes true terror lies in finding exactly what you've been looking for . . . "A fast-moving page-turner. . . . Donlea skillfully maximizes suspense by juggling narrators and time all the way to the shocking final twists." —Publishers Weekly "Well worth the read." —Booklist "Donlea's sophomore effort is solid. He keeps the reader guessing and second-guessing until the end, thanks to an expertly crafted abundance of potential suspects." —Library Journal

The Devil In The White City
2010-09-30 Erik Larson 'An irresistible page-turner that reads like the most compelling, sleep defying fiction' TIME OUT One was an architect. The other a serial killer. This is the incredible story of these two men and their realization of the Chicago World's Fair of 1893, and its amazing 'White City'; one of the wonders of the world. The architect was Daniel H. Burnham, the driving force behind the White City, the massive, visionary landscape of white buildings set in a wonderland of canals and gardens. The killer was H. H. Holmes, a handsome doctor with striking blue eyes. He used the attraction of the great fair - and his own devilish charms - to lure scores of young women to their deaths. While Burnham overcame politics, infighting, personality clashes and Chicago's infamous weather to transform the swamps of Jackson Park into the greatest show on Earth, Holmes built his own edifice just west of the fairground. He called it the **World's Fair Hotel**. In reality it

Some patients will experience immediate relief after the first session but others will not experience anything at all. This is the reason that an average session should be done 12 to 15 times at least 2 to 3 times a week.

If acupuncture works for you, then the only thing you need are follow up sessions. This can be done twice every 2 weeks or monthly. It is really up to you. But don't forget to also see your regular doctor so he or she can also monitor the progress of your condition.

Types of Acupuncture

There are different types of acupuncture. Whichever you decide to use, they are designed to do the same thing and that is to relieve pain or treat certain diseases.

Challenge the fact of a body a gripping, Instruments

Modern acupuncturists nowadays use disposable fine stainless steel needles that are 0.007 to 0.020 inches in diameter which are sterilized with either ethylene oxide or by autoclave. Since they are way finer than hypodermic syringe needles, being poked by these needles are relatively painless. The upper third of the needle is covered with either a thicker bronze wire or plastic to make the needle sturdier and easier to handle. The length of the needle and how far they are inserted is all up to the acupuncturist and his practised style of acupuncture.

Example Of Treatment

If a patient has a headache, he/she is diagnosed and is treated by stimulating the sensitive points located at the webs between the thumbs and palms. In acupuncture theory, these points are connected to the face and head and can be used for treatment of headaches and other ailments involved. Needles are then carefully inserted into the skin until the patient feels a twinge, which is usually accompanied by a slight involuntary twitching of the area. During this treatment, a number of things may occur.

~~The sensitivity to pain in where needles are inserted.~~

- A hint of nausea during treatment in case of bad headaches.
- Near-immediate headache relief.

Curse the fact of a body a gripping

The greatest advantage of this ancient Oriental procedure is the absence of side-effects during and after treatment. Unlike smoking cessation medications and nicotine replacement therapy products, acupuncture does not employ chemically manufactured substances. There is also no risk of weight gain during therapy. In conjunction with helping a patient quit smoking, it can also curb appetite, thus reducing food cravings. If you have tried several methods in smoking cessation to no avail, perhaps it is high time you consider the alternative method that is acupuncture. With the right practitioner and the right frame of mind, there is no reason why you won't be nicotine-free before long.

What is acupuncture?

Acupuncture has surged in popularity for the last few decades as brought on by the recent health trend. Mostly known as a traditional Chinese medical technique, acupuncture is seen as a homeopathic method of treatment. While alternative medicine does raise a lot of eyebrows for the scientifically-inclined, it does merit attention before being dismissed as a quack cure.

Basic Procedure

Basically, needles are inserted into the skin, each corresponding to one of the numerous pressure points located throughout the body. According to Traditional Chinese Medicine, by inserting a needle into the pressure point, an acupuncturist can manipulate the flow of chi or life force, thus relieving pain and gradually treating the patient. While most would say that the whole chi thing is a bunch of nonsense, science has suggested that with the needles inserted, the bodys natural painkillers called endorphins are released, thus helping with pain relief.

Symptoms of depression in adolescents are eating disorders, weight change, irritable mood, excessive sleeping in daytime, excessive temper, criminal behavior, memory loss, fatigue, self preoccupation, sadness, difficulty in concentrating, worthlessness feelings, loss of interest, self hatred, obsession with death and thought & attempts of suicides. When these symptoms are being noticed for more than two weeks, it is important to get treatment for the adolescent. Depression not only affects interpersonal relationships, but school performance as well. Depressed adolescents are more prone to take onto drugs and alcohol as an

attempt to overcome their depression. Such problems require intensive treatment.

The doctor will take blood test and perform physical examination to determine the cause of depression. The adolescent can also be tested for substance abuse such as smoking, heavy alcohol consumption, marijuana smoking, and usage of other drugs. After the physical examination, psychiatric evaluation is also done to understand the cause of sadness, loss of interest and irritability. Depression can also lead to the development of other psychiatric disorders such as schizophrenia, mania and anxiety. It is also important to determine whether the adolescent poses a risk for himself/herself and others. Family and school personnel can provide valuable information about the adolescent to the doctor. Treatment for depression for adolescent is similar to the treatment of depression for adults. Along with the treatment, the adolescent are given antidepressant medication and psychotherapy. Antidepressant medications include tricyclics, Prozac, selective serotonin reuptake inhibitors or SSRI. Some of the medicines increase the risk, so it is a good idea that parents discuss the possible risks with the doctor. Only some of the antidepressant medications are meant for children and adolescents. Adolescents with severe depression need to be hospitalized as they are more prone to kill themselves.

There are basically two types of diabetes that will affect an adolescent. It is type 1 diabetes and type 2 diabetes. Type 1 diabetes affects the immune system's function as the systems attacks the pancreas' insulin producing cells, also known as the beta cells. Because of this, the pancreas loses the ability to manufacture insulin. This is the reason why people with type 1 diabetes take insulin everyday. The symptoms are weight loss, increase in urination & thirst, blurred vision, tiredness and

time, he/she can slip in to diabetic coma which can endanger his/her life. In type2 diabetes, the body is incapable of properly using the insulin produced by the body and requires insulin from an external source, too. The symptoms of type 2 diabetes are similar to type 1 diabetes. The teenager feels sick, tired, nauseated, and thirsty. The wounds will recover very slowly; he/she will get infections frequently, will develop blurred vision and will experience weight loss.

Parents play a vital role in determining the problem. They should constantly observe their child for eating disorders or signs of depression. Although cigarette, drugs and alcohol should be avoided by all adolescents and children, it is even more important that youngster with diabetes should stay away from these things as they can worsen the situation. A person with diabetes, who switches to smoking, is at risk of developing cardiovascular diseases and circulatory problems. Consumption of alcohol can cause hypoglycemia or low blood sugar. It is the duty of the parents to make their child aware of the possible risk they would face if they start to smoke, drink alcohol or take drugs.

Children and adolescents, who have diabetes, face many challenges while trying to lead a normal life. They have to think twice before doing simple things as going to a party, playing sports and even when staying over with friends. This is because they require to intake oral medication or insulin. Their blood sugar level must be checked many times through out the day. Also, at gatherings, they have to avoid many food items. Because of this they will feel different from the crowd and can feel left out. Not only does diabetes pose behavioral challenges, but also emotional challenges.

Lolita the fact of a body a gripping; Diabetes is a disease where the human body is incapable of producing or utilizing insulin. Insulin is a hormone produced by the body in order to get energy by converting starches, sugar and other items. Since the

insulin isn't used properly in diabetic people, the blood sugar level increases. This glucose buildup is found in blood and is then passed onto the urine and comes out of the body and the major source of body energy is lost.

Diabetes is a serious chronic disease and should be handled at proper time; otherwise it can create serious problems. It can pose a risk and can damage parts of the human body such as eyes, teeth, gums, blood vessels, nerves, and kidneys. This is the reason why diabetes is responsible in most of the cases of adult blindness, kidney failure and lower limb amputations. And if left untreated, it can cause stroke, heart disease and eventually, death. These problems are not only faced by adults, but also adolescents who get diabetes in their childhood. The important factor in treatment of diabetes is to keep the blood sugar level normal at all times.

Results have showed that of 30 respondents in the test, majority showed functional improvement of various degrees depending on the age and severity of their disabilities. Some improvement was noticeable within a few TAC sessions, especially for drooling, spasticity (scissoring or tiptoeing), ataxia, and poor balance in walking. Functional improvement was noted after one to two courses of TAC. Most children tolerated TAC well, with only occasional pain and minor bleeding in some patients.

The reason why tongue acupuncture is being experimented with is because there is a connection between the tongue and the heart through the meridians that spread to all the organs in the body. It is believed that the points on the tongue can influence the state of the other body organs thus giving relief to the one suffering from autism.

But many believe that acupuncture alone cannot help autism sufferers. It has to be combined with other things like maintaining a certain diet to help improve one's mood and communication

schools. Although it is only short term, it is better than nothing until a cure is found.

Control of pain is the most well researched of all of the indications for acupuncture. There is a definite beneficial effect for a majority

of patients using this method. Migraines, premenstrual syndrome, arthritis, carpal tunnel syndrome, and neuralgias are but a few examples. The theory behind its effectiveness is also medically accepted and well researched, called the gate-control theory of pain. It states that the needles can stimulate nerves so that they block the impulses from pain triggers.

Expected Puncture Session Result

It is important to emphasize that acupuncture is used only on top of existing medical therapy. At no time should a patient discontinue medication or ignore medical instructions in favor of needle puncture. After undergoing a needle puncture regimen, the primary care physician can make an evaluation with regards to decreasing dependence on other therapies.

Children and adolescents with normal cholesterol level is a thing of the past. Because of the changing lifestyle and junk food trend, even they have a high risk to develop high levels of cholesterol which also increases the risk of developing heart diseases which can affect the blood vessels and the coronary arteries. The main cause of this change is obesity, junk food high in fat, fast food diets, sedentary lifestyle and high cholesterol level in family history. Keeping the blood cholesterol levels at normal is a good way of avoiding high blood pressure and coronary artery diseases. The blood cholesterol level can vary from individual to individual. Healthy levels of LDL is less than one hundred and thirty milligrams, HDL is greater than thirty five milligrams. If the HDL is less than thirty five milligrams then the adolescent is at a higher risk of developing heart diseases. And LDL more than one hundred and thirty milligrams is dangerous. But a high level of LDL cholesterol is a problem in many citizens of America. And there is an expected increase in number, the figure is unknown, of adolescents who

An adolescent or a child who has a parent having high levels of blood cholesterol and family history of heart diseases at an early age, should take cholesterol test from the age of two. Adolescents who are obese also should have lipid test along with cholesterol test. The lipid test shows levels of kinds of fats in blood such as triglycerides, LDL and HDL.

the fact of a body a gripping; **Cholesterol in Adolescents**

Parts of adolescent's body are filled with a waxy stuff identified as cholesterol. It helps to produce vitamin D, cell membranes and certain hormones. Blood cholesterol comes from two different sources, liver within the body and food. The adolescent's liver produces enough cholesterol to carry out proper functioning. The blood acts as the carrier of cholesterol and transports it to different parts of the body. They are transported in round particle form known as lipoproteins. There are two types of lipoproteins called the low density lipoproteins or LDL and high density lipoproteins or HDL. Low density lipoprotein or LDL cholesterol is commonly known as bad cholesterol. It helps in the building up of plaque in arteries and this condition is known as atherosclerosis. The LDL level must be low in the blood and if it is high it must be decreased. Healthy weight must be maintained and exercise should be done regularly. Food items which have high contents of calories, dietary cholesterol and saturated fat must be avoided. High density lipoprotein or HDL cholesterol is the good cholesterol. It is actually a kind of fat in blood which helps to remove bad cholesterol from the body and stops the build up of plaque in the arteries. The more the HDL cholesterol in the blood the better it is. The HDL can be raised by at least twenty minutes of exercising daily, decreasing body mass and keeping away from food with saturated fat. Some adolescents need to take medications in order to increase HDL. In such cases, increasing HDL can be a complicated procedure and the physician can make a therapeutic plan to increase HDL in the blood stream.

Fifty percent of the adolescent pregnancies are within the time period of six months after the initial sexual intercourse. More than nine hundred thousand teenagers are reported to have become pregnant every year in the United States. Fifty one percent of the adolescent pregnancies result in live birth, thirty five percent result in induced abortion and fourteen percent result in stillbirths or miscarriages. Four out of ten adolescent females get pregnant, before they turn twenty, at least once. Twenty five percent of adolescent deliveries aren't the mother's first child. When a teenager gives birth to her first child, she increases the risk of begetting another child. One third of the adolescent parents are themselves result of adolescent pregnancies.

There are many reasons why adolescents choose to become sexually active at an early stage in life. The reasons can be early pubertal development, poverty, sexual abuse in childhood, lack of parent's attention, lack of career goals, family and cultural patterns of early sex, substance abuse, dropping out from school and poor school performance. Factors which discourage an adolescent to become sexually active are stable family environment, parental supervision, good family income, regular prayers, connectedness with parents and living with complete family and both the parents. The factors which are responsible for the consistent use of contraceptive among adolescents are academic success, anticipation for successful future, and involvement in a stable relationship.

There are many medical risks associated with adolescent pregnancies. Adolescents who are less than seventeen years are at a greater risk of developing medical complications, when compared to adult females. The risk is even more in teenagers below seventeen. The weight of the child, given birth by an adolescent, is very low in these pregnancies. It is usually below 2.5

kilogram. The rate of neonatal birth is also three times greater in adolescents, when compared to adults. Other problems caused by adolescent pregnancies are prematurity of the child, birth of underweight child, poor maternal weight gain, poor nutritional status, anemia, STDs and hypertension induced due to pregnancy.

Auriculotherapy or ear acupuncture is one of the variations of conventional acupuncture. In this practice, it is believed that the ear provides a map for all the major bodily organs. A specific area or point on the ear corresponds to a particular organ, such as the heart, kidneys, or liver. Thus, the needles are placed in particular points around the ear and on the ear cartilage.

Staple-puncture is a method used in smoking cessation, wherein staples are placed for a certain period anywhere on the ear area to provide stimulation.

Indeed there is growing evidence that this traditional Oriental practice can rival any modern forms of treatment. If you are one of the many people who are looking for a widely recognized and time honored therapeutic practice, acupuncture may just be the alternative treatment for you.

the normal blood pressure level. Adults will have a higher blood pressure than the infants and teenagers. Also, boys have a higher blood pressure when compared to girls and tall people have a higher blood pressure than short people. An adolescent is said to have high blood pressure when the blood pressure is more than the blood pressure of ninety percent people of his/her age, gender and height.

There are many risks associated with hypertension or high blood pressure. The risk of developing coronary heart disease increases proportionally. The arteries will develop greater resistance towards the blood flow, because of which the heart will pump blood harder. Stroke is also another risk. Adolescents who have had high blood pressure as a child, develop harmful effects on the blood vessels and heart till the time they turn twenty.

The causes of high blood pressure can be classified as primary and secondary. If the causes are definite, they are primary and if the cause is linked to some illness, it is secondary. Primary causes are high blood cholesterol levels, smoking, stagnant lifestyle and overweight. Secondary causes are obesity, immobility due to chronic illness, prescription drugs, intense pain due to burns or cancer and illegal drugs. High blood pressure can develop due to hereditary reasons.

Heat stroke is the severest condition of all heat related illnesses. In this condition the body gets overwhelmed with excessive heat and the efficiency of the system that regulates body heat goes down considerably which can result in a serious emergency requiring immediate medical care. The symptoms of heat stroke include dry and warm skin, very high fever generally above 104 degree Fahrenheit, increased heart rate, appetite loss, nausea, headache, vomiting, fatigue, agitation, confusion, stupor, seizures, coma and possible death. A teenager experiencing symptoms of heat stroke should stay in a cool place and have adequate rest.

Heat stroke is a serious condition and emergency attention should be sought by calling 911. In the meanwhile the affected teenager should be made free of excessive clothing and should be worn with cool clothes and also put cool water on the skin to lower the temperature. Placing ice bags in armpits also helps. Make the teenager drink cool drinks if the teenager is alert.

Heat strokes are very much preventable if certain precautions are taken like drinking adequate water during hot days, avoiding alcoholic and caffeine drinks, wearing light clothes, exercising in cooler time of the day, wearing sunglasses and hat, using umbrella on a hot day, applying sun cream with a spf of at least 15 etc.

What This Ancient Method Does

One of the foremost effects of acupuncture on the body is relaxation. Stress is frequently pinpointed as the main precursor for a host of physical ailments. There are particular points all over the body that direct the flow of harmony and relaxation and when these are enthused, the patient becomes more at ease.

Another positive effect of this alternative therapy is increased pain control. During a session, a patient will usually feel very minimal pain as the thin needles are being inserted gradually. However, the needles are deliberately placed in varying depths, depending on the health requirements of the patient. When the needles reach the right depth, the patient will feel deeper pain, although the entire procedure is not necessarily painful.

It is also recommended for relief from chemotherapy fatigue as well as chemotherapy-related nausea. It has also been found to be largely effective for back pains, migraines, menstrual cramps, and as a pain controller for patients after undergoing surgical operations.

High blood pressure is a condition where the blood pressure is more than normal. It is also known as hypertension. Heart pumps out blood, so that oxygen can reach to different parts of the body via blood. The pressure with which heart pumps blood is known as blood pressure. The blood pressure comprises of two measures, the systolic pressure and diastolic pressure. Systolic pressure is the larger figure and represents the pressure within the artery of the heart, when contractions take place which pump blood to different parts of the body. Diastolic pressure is the pressure within the artery of the heart, when the blood is filling in the heart and it is at rest. Both the pressures are measured in millimeters of mercury or mmHg. High blood pressure is abnormal increase in systolic pressure or diastole pressure.

Blood pressure is measured by putting a blood pressure cuff on the arm and placing a stethoscope on the chest. There can be very little variation in blood pressure depending upon the time, emotional moods, age, gender, weight, height, physical activity, stress and other illness such as heart disease and kidney disease. Children and adolescents become anxious when they visit the doctor. This is also an important factor which affects the blood pressure and the readings taken get tampered because of it. That is the reason why many blood pressure readings are taken in order to determine whether the adolescent has high blood pressure or not. The nurse may even ask the adolescent to calm down while taken the readings. Time gap is given between each reading, so as to give time to the adolescent to calm down. Emotions can also affect the blood pressure reading.
