The work "Analyzing Casual Conversation" by Suzanne Eggins and Diana Slade, first issued in 1997, develops a systematic model for the examination and depiction of casual conversation in English. The authors argue that in spite of its sometimes aimless seeming and apparently unstructured substance, casual conversation is a very structured undertaking and plays a critical role in the social formation of reality. The publication works through authentic examples of casual conversations involving participants diverging in age, gender, ethnicity, and socio-economic class<sup>12</sup>. Deriving on insights from sociology, linguistics, and critical semiotics, the publication furnishes readers with the analytical skills to depict the strata of structure and critical interpretive models to clarify the 'social work' that happens on through chat.

The Peabody Picture Vocabulary Test 4th Edition (PPVT-4) is a well-respected vocabulary evaluation that has been in use for almost 50 years. Formulated by Lloyd M. Dunn and Douglas M. Dunn, the test is made to measure vocabulary comprehension for Standard American English. It is fast and simple to administer, preserving precious time so that concentration can be set on implementing successful interventions.

The PPVT-4 assessment content encompasses a wide scope of vocabulary comprehension grades, extending from pre-kindergarten through adult age. The evaluation questions extensively include words that portray 20 topic domains (e.g., actions, vegetables, tools), speech parts (nouns, verbs, attributes), and household and educational vocabulary.

The test gives two equal forms which contain various vocabulary words, guaranteeing that the person has not "learned" the test. One edition can be employed prior to intervention to assess people's vocabulary understanding and the alternative form can be used for re-assessment to measure and document advancement. The PPVT-4 also features a unique Growth Scale Value (GSV) which is responsive to slight changes with time.
