Learning Targets 2012-07-02 Connie M. Moss In *Learning Targets*, Connie M. Moss and Susan M. Brookhart contend that improving student learning and achievement happens in the immediacy of an individual lesson--what they call "today's lesson"—or it doesn't happen at all. The key to making today's lesson meaningful? Learning targets. Written from students' point of view, a learning target describes a lesson-sized chunk of information and skills that students will come to know deeply. Each lesson's learning target connects to the next lesson's target, enabling students to master a coherent series of challenges that ultimately lead to important curricular standards. Drawing from the authors' extensive research and professional learning partnerships with classrooms, schools, and school districts, this practical book - Situates learning targets in a theory of action that students, teachers, principals, and central-office administrators can use to unify their efforts to raise student achievement and create a culture of evidence-based, results-oriented practice. - Provides strategies for designing learning targets that promote higher-order thinking and foster student goal setting, self-assessment, and self-regulation. - Explains how to design a strong performance of understanding, an activity that produces evidence of students' progress toward the learning target. - Shows how to use learning targets to guide summative assessment and grading. *Learning Targets* also includes reproducible planning forms, a classroom walk-through guide, a lesson-planning process guide, and guides to teacher and student self-assessment. What students are actually doing during today's lesson is both the source of and the yardstick for school improvement efforts. By applying the insights in this book to your own work, you can improve your teaching expertise and dramatically empower all students as stakeholders in their own learning.

Your Inner Fish 2008-01-15 Neil Shubin The paleontologist and professor of anatomy who co-discovered Tiktaalik, the “fish with hands,” tells a “compelling scientific adventure story that will change forever how you understand what it means to be human” (Oliver Sacks). By examining fossils and DNA, he shows us that our hands actually resemble fish fins, our heads are organized like long-extinct jawless fish, and major parts of our genomes look and function like those of worms and bacteria. *Your Inner Fish* makes us look at ourselves and our world in an illuminating new light. This is science writing at its finest—enlightening, accessible and told with irresistible enthusiasm.

What do children need to know and experience to enable them to access phonics teaching with success? This book looks in detail at the knowledge, understanding, skills and attitudes that children need to enable them to come to phonics teaching ready to learn and with a good chance of success. Vietnam, My Deliverance; Traumatic Stress, My Salvation 2022-05-08 Jim Carmichael Post-traumatic stress disorder is both a gift and tool in God’s hands. The Lord has designed a person’s brain to adjust to the rigors of combat or abuse. Combat’s despair can also drive us to Christ. Jim Carmichael, Ph.D. looks back at his service in Vietnam and how it impacted his life upon returning home in this book. More importantly, he reveals how God led him to find redemption, obedience to God, and transformation into the image of Jesus Christ through suffering. In sharing his story, the author seeks to answer questions such as: · What is the purpose of PTSD? · Why don’t all combatants suffer from PTSD? · How can God deliver individuals from bondage? · What can be done to prevent PTSD victims from dying by suicide? The author stresses that the Veterans Administration should do more to teach veterans and their families about how the brain changes when it’s subjected to constant stress. He also highlights how combatants throughout history have been impacted by stress. Join the author as he praises and thanks God for using the horrors of Vietnam to drive him to Christ.

The Road 2007-03-20 Cormac McCarthy WINNER OF THE PULITZER PRIZE • NATIONAL BESTSELLER • A searing, post-apocalyptic novel about a father and son's fight to survive, this "tale of survival and the miracle of goodness only adds to McCarthy's stature as a living master. It's gripping, frightening and, ultimately, beautiful" (San Francisco Chronicle). • From the bestselling author of *The Passenger* A father and his son walk alone through burned America. Nothing moves in the ravaged landscape save the ash on the wind. It is cold enough to crack stones, and when the snow falls it is gray. The sky is dark. Their destination is the coast, although they don't know what, if anything, awaits them there. They have nothing; just a pistol to defend themselves against the lawless bands that stalk the road, the clothes they are wearing, a

cart of scavenged food—and each other. The Road is the profoundly moving story of a journey. It boldly imagines a future in which no hope remains, but in which the father and his son, "each the other's world entire," are sustained by love. Awesome in the totality of its vision, it is an unflinching meditation on the worst and the best that we are capable of: ultimate destructiveness, desperate tenacity, and the tenderness that keeps two people alive in the face of total devastation. Look for Cormac McCarthy's latest bestselling novels, *The Passenger* and *Stella Maris*.

Seeking to further the conversation about the most effective ways to integrate ICT into the classroom, this publication presents theoretical frameworks to support educators and administrators. Alleviating Poverty Through Profitable Partnerships 2020-03-10 Patricia H. Werhane Poverty is an unnecessary form of human degradation and badly conceived economics. Our thesis is that poverty can be reduced, if not eradicated, both locally and globally. But this will occur only if we change our shared narratives about global free enterprise, remind ourselves that poverty is a system, and conceive of poverty alleviation as a "bottom-up" project. There is no "one size fits all" for poverty reduction. Rather, poverty is a system and must be addressed locally. It is our aim, as it is the aim of the United Nations, the World Bank, and many other organizations, to erase it from our vocabulary and from this planet. With a series of case studies that accompany each chapter, this book should assist readers in thinking about poverty alleviation from a number of perspectives, from bottom-up entrepreneurial projects, local-corporate ventures, with public-private partnerships, from focused philanthropy, with education and health care initiatives, and agriculture reforms in rural communities, all with the aim of creating a win-win result for local and partnership individuals, organizations, and communities. The book should be useful in various undergraduate and graduate courses on ethics, applied ethics, developing economic systems, and poverty.
