Liberation Theology in Chicana/o Literature

2007-11-21 Alma Rosa Alvarez Liberation Theology in Chicana/o Literature looks at the ways in which Chicana/o authors who have experienced cultural disconnection or marginalization because of their gender, gender politics and sexual orientation attempt to forge a connection back to Chicana/o culture through their use of liberation theology.

In the Spirit of a New People

2014 Randy J. Ontiveros Reexamining the Chicano civil rights movement of the 1960s and 1970s, In the Spirit of a New People brings to light new insights about social activism in the twentieth-century and new lessons for progressive politics in the twenty-first. Randy J. Ontiveros explores the ways in which Chicano/a artists and activists used fiction, poetry, visual arts, theater, and other expressive forms to forge a common purpose and to challenge inequality in America. Focusing on cultural politics, Ontiveros reveals neglected stories about the Chicano movement and its impact: how writers used the street press to push back against the network news; how visual artists such as Santa Barraza used painting, installations, and mixed media to challenge racism in mainstream environmentalism; how El Teatro Campesino's innovative "actos," or short skits, sought to embody new, more inclusive forms of citizenship; and how Sandra Cisneros and other Chicana novelists broadened the narrative of the Chicano movement. In the Spirit of a New People articulates a fresh understanding of how the Chicano movement contributed to the social and political currents of postwar America, and how the movement remains meaningful today.

Opening the Floodgates

2007 Kevin R. Johnson Seeking to re-imagine the meaning and significance of the international border, Opening the Floodgates makes a case for eliminating the border as a legal construct that impedes the movement of people into this country. Open migration policies deserve fuller analysis, as evidenced by President Barack Obama's pledge to make immigration reform a priority. Kevin R. Johnson offers an alternative vision of how U.S. borders might be reconfigured, grounded in moral, economic, and policy arguments for open borders. Importantly, liberalizing migration through an open borders policy would recognize that the enforcement of closed borders cannot stifle the strong, perhaps irresistible, economic, social, and political pressures that fuel international migration. Controversially, Johnson suggests that open borders are entirely consistent with efforts to prevent terrorism that have dominated immigration enforcement since the events of September 11, 2001. More liberal migration, he suggests, would allow for full attention to be paid to the true dangers to public safety and national security.

Translating Childhoods

2009-05-18 Marjorie Faulstich Orellana Though the dynamics of immigrant family life has gained attention from scholars, little is known about the younger generation, often considered "invisible." Translating Childhoods, a unique contribution to the study of immigrant youth, brings children to the forefront by exploring the "work" they perform as language and culture brokers, and the impact of this largely unseen contribution. Skilled in two vernaculars, children shoulder basic and more complicated verbal exchanges for non-English speaking adults. Readers hear, through children's own words, what it means be "in the middle" or the "keys to communication" that adults otherwise would lack. Drawing from ethnographic data and research in three immigrant communities, Marjorie Faulstich Orellana's study expands the definition of child labor by assessing children's roles as translators as part of a cost equation in an era of global restructuring and considers how sociocultural learning and development is shaped as a result of children's contributions as translators.

Almost All Aliens

2022-09-15 Paul Spickard Almost All Aliens offers a unique reinterpretation of immigration in the history of the United States. Setting aside the European migrant-centered melting-pot model of immigrant assimilation, Paul Spickard, Francisco Beltrán, and Laura Hooton put forward a fresh and provocative reconceptualization that embraces the multicultural, racialized, and coloniality inflected reality of immigration that has always existed in the United States. Their astute study illustrates the complex relationship between ethnic identity and race, slavery, and colonial expansion. Examining the lives of those who crossed the Atlantic, as well as those who crossed the Pacific, the Caribbean, and the North American Borderlands, Almost All Aliens provides a distinct, inclusive, and critical analysis of immigration, race, and identity in the United States from 1600 until the present. The second edition updates Almost All Aliens through the first two decades of the twenty-first century, recounting and analyzing the massive changes in immigration policy, the reception of immigrants, and immigrant experiences that whipsawed back and forth throughout the era. It includes a new final chapter that brings the story up to the present day. This book will appeal to students and researchers alike studying the history of immigration, race, and colonialism in the United States, as well as those interested in American identity, especially in the context of the early twenty-first century.

Mapping South American Latina/o Literature in the United States

2018-03-13 Juanita Heredia This collection of interviews demonstrates that U.S. Latinas/os of South American background have contributed pioneering work to U.S. Latina/o literature and culture in the twenty-first century. In conversation with twelve significant authors of South American descent in the United States, Juanita Heredia reveals that, through their transnational experiences, they have developed multicultural identities throughout different regions and cities across the country. However, these authors' works also exemplify a return to their heritage in South America through memory and travel, often showing that they maintain strong cultural and literary ties across national borders. As such, they have created a new chapter in trans-American history by finding new ways of imagining South America from their formation and influences in the U.S.

Acne in Adolescents

Acne is one of the most common problems in adolescent teens affecting nearly seventeen million people in the United States. Acne is nothing but a disorder involving sebaceous glands and hair follicles. Acne results from the clogging of sebaceous glands leading to the formation of pimples and cysts. The condition usually begins with the onset of puberty. Going by the facts, as teens attain puberty the androgens also called male sex hormones are produced in high number leading to sebaceous glands becoming over active which results in sebum being produced in high proportions.

Sebum, which is nothing but oil is produced by sebaceous glands which travel to the skin surface through hair follicles. But, skin cells block the follicles which results in oil also being blocked. When these hair follicles are blocked it results in the development of skin bacteria known as Propionibacterium Acnes within the follicles which in turn results in swelling of the skin called Acne. If the hair follicles are partially blocked it results in blackheads. If the follicles are completely blocked they result in whiteheads. But if these plugged follicles are not treated they ultimately burst causing the oil, bacteria and skin cells to spill all over the skin resulting in irritation and formation of pimples. Acne can be shallow as well as deep in various individuals depending on the nature of skin and amount of oil produced.

There are basically 14 pathways throughout the body where chi flows continuously. These are called the meridian points. In order for chi to course through the body unobstructed, there has to be a balance between the strengths of yin and yang. In ancient Chinese philosophy, yin and yang represent the forces of the universe- yin is for feminine, while yang is for masculine. Every single thing in the universe is believed to contain both yin and yang for harmony. When the yin and yang are not balanced, chi cannot stream through the body liberally. Therefore, the meridian points through which chi courses through need to be stimulated. This is done by the insertion of hair-thin, disposable needles in specific areas on a person's body to induce bodily harmony and bring about healing. A certified and trained acupuncturist will be able to carry out an excellent therapy session for the patient. Trainings for acupuncturists are given in order for them to obtain their licenses.
