The work "Analyzing Casual Conversation" by Suzanne Eggins and Diana Slade, first issued in 1997, develops a organized model for the analysis and portrayal of casual conversation in English. The scholars assert that notwithstanding its sometimes aimless look and seemingly unstructured content, casual conversation is a extremely structured activity and performs a vital function in the social building of reality. The book goes through authentic instances of casual conversations including participants diverging in age, gender, ethnicity, and socio-economic class¹². Pulling on insights from sociology, linguistics, and critical semiotics, the work provides readers with the analytical skills to describe the levels of structure and critical interpretive structures to elucidate the 'social work' that happens on through chat.
