The Peabody Picture Vocabulary Test 4th Edition (PPVT-4) is a widely recognized vocabulary test that has been in use for close to 50 years. Formulated by Lloyd M. Dunn and Douglas M. Dunn, the test is made to assess vocabulary comprehension for Standard American English. It is swift and effortless to administer, preserving important time so that concentration can be set on implementing intelligent interventions.

The PPVT-4 evaluation content covers a broad range of receptive vocabulary levels, spanning from pre-kindergarten through adult age. The test questions broadly feature words that represent 20 content domains (e.g., actions, vegetables, tools), speech parts (nouns, verbs, attributes), and home and educational vocabulary.

The assessment offers two equivalent forms which hold distinct vocabulary terms, making sure that the person has not "mastered" the test. One edition can be utilized ahead of intervention implementation to evaluate people's vocabulary understanding and the alternative version can be employed for re-assessment to evaluate and document improvement. The PPVT-4 also contains a distinctive Growth Scale Value (GSV) which is sensitive to small changes with time.
