Economic Growth in the European Union 2020-08-29 Christos Nikas This book studies the economic recovery of individual European Union member states more than ten years after the beginning of the global economic crisis. In light of austerity policies and conservative government investments in many EU countries, it explores how higher growth rates can be achieved by stimulating firms and economic sectors with a high accelerator potential. The contributing authors analyze the effects of EU policies on small and medium-sized enterprises (SMEs), while also studying EU policies with the potential to foster investments and economic growth. Furthermore the book assesses the EU policy on foreign direct investment (FDI) in the member states, in comparison with similar policies in Russia and the US. The authors demonstrate that FDI, besides providing financial resources, can facilitate modernization especially in the high technology sectors. Finally, the book provides a sector analysis and policy recommendations on tourism and immigration, as well as economic protectionism, since tourism has proved to be the most dynamic sector, especially in the European South, while immigration is one of the most serious issues the EU is currently facing. This book will appeal to scholars in economics and related fields, as well as decision-makers and professionals at governmental institutions looking for policy measures and tools to stimulate economic growth.

Tools for regional policy with case study: 2007-12-04 Christian Nicke Essay from the year 2007 in the subject Business economics - Economic Policy, grade: 5,0 (sehr gut), University of Pécs (Faculty of Business and Economics), course: Public Policy II, language: English, abstract: As first approach to the topic it seems helpful to me to define which factors make a region. In general the literature mentions three ways how regions could be differentiated: • Definition through enumeration, i.e. with examples • Definition in the negative through enumeration of "non-regions" • Definition on basis if constructive criteria Most common in literature is the last approach, meanwhile the European Union in particular also follows the first possibility for defining the regions within the E.U. As a workable definition of a region the following definition on basis of constructive criteria is suggested: Regions A region is a geographical part of a whole economy that could be identified by means of political and administrative institutions. As constructive criteria a region is defined through free trade between certain regions, mobility of production factors, consistent currency, fiscal and macro-economic policy and shared (superior) institutions. The wider a nations' area is and the more regions a nation contains, the bigger the chance that the regions have different levels of economic development and economic power. The overall development of an economy is the sum of the development of the individual regions, more exactly the sum of individual economies. From this follows that the economic power of the certain regions must be bettered should the macroeconomic development be improved. This cognition lead to the development of a special field of public policy: regional (economic) policies. Regional policy should achieve two major goals: • maximise economic growth and • minimise social costs As I would show in the next chapter, regional (economic) policy includes a number of instruments. From this the definition of regional policy is as follows: Regional policy Regional policy is the sum of law, strategies and measures for setting and influencing a framework and processes in particular areas of a nation through the government. With special regional policy government seeks to reduce spatial disparities in economic.

Doing Business in Europe 2018-09-24 Gabriele Suder Fundamental theories and concepts for understanding how business is done in Europe, linked to the current European business environment through a range of up-to-date case studies and examples.

The European Union 2019-09-15 Kristin Archick The European Union (EU) is a political and economic partnership that represents a unique form of cooperation among sovereign countries. The EU is the latest stage in a process of integration begun after World War II, initially by six Western European countries, to foster interdependence and make another war in Europe unthinkable. The EU currently consists of 28 member states, including most of the countries of Central and Eastern Europe, and has helped to promote peace, stability, and economic prosperity throughout the European continent. The EU has been built through a series of binding treaties. Over the years, EU member states have sought to harmonize laws and adopt common policies on an increasing number of economic, social, and political issues. EU member states share a customs union; a single market in which capital, goods, services, and people move freely; a common trade policy; and a common agricultural policy. Nineteen EU member states use a common currency (the euro), and 22 member states participate in the Schengen area of free movement in which internal border controls have been eliminated. In addition, the EU has been developing a Common Foreign and Security Policy (CFSP), which includes a Common Security and Defense Policy (CSDP), and pursuing cooperation in the area of Justice and Home Affairs (JHA) to forge common internal security measures. Member states work together through several EU institutions to set policy and to promote their collective interests. In recent years, however, the EU has faced a number of internal and external crises. Most notably, in a June 2016 public referendum, voters in the United Kingdom (UK) backed leaving the EU. The pending British exit from the EU (dubbed "Brexit") comes amid multiple other challenges, including the rise of populist and to some extent anti-EU political parties, concerns about democratic backsliding in some member states (including Poland and Hungary), ongoing pressures related to migration, a heightened terrorism threat, and a resurgent Russia. The United States has supported the European integration project since its inception in the 1950s as a means to prevent another catastrophic conflict on the European continent and foster democratic allies and strong trading partners. Today, the United States and the EU have a dynamic political partnership and share a huge trade and investment relationship. Despite periodic tensions in U.S.-EU relations over the years, U.S. and EU policymakers alike have viewed the partnership as serving both sides' overall strategic and economic interests. EU leaders are anxious about the Trump Administration's commitment to the EU project, the transatlantic partnership, and an open international trading system-especially amid the Administration's imposition of tariffs on EU steel and aluminum products since 2018 and the prospects of future auto tariffs. In July 2018, President Trump reportedly called the EU a "foe" on trade but the Administration subsequently sought to de-escalate U.S.-EU tensions and signaled its intention to launch new U.S.-EU trade negotiations. Concerns also linger in Brussels about the implications of the Trump Administration's "America First" foreign policy and its positions on a range of international issues, including Russia, Iran, the Israeli-Palestinian conflict, climate change, and the role of multilateral institutions. This report serves as a primer on the EU. Despite the UK's vote to leave the EU, the UK remains a full member of the bloc until it officially exits the EU (which is scheduled to occur by October 31, 2019, but may be further delayed). As such, this report largely addresses the EU and its institutions as they currently exist. It also briefly describes U.S.-EU political and economic relations that may be of interest.

European Business 2001 Simon Mercado Course names: European Business. Degrees: BABS; European BABS; Politics; Economics. The module is usually an elective except on specialised European Business degrees. Also used commonly as secondary reading. This text examines the question of how the future of the European Union will affect organisations operating in member states. The business environment in Europe continues to change as the moves toward integration gathers pace. It is inevitable that this new environment will present new challenges to key players and businesses operating in Europe. This text therefore provides a comprehensive and general overview of the key topics for students who need to understand the complexities of the EU. In addition to addressing the present and likely future issues, each chapter contains discussion questions, a case study and questions on the case to test the students' understanding of the topics covered.

The Implementation and Enforcement of European Union Law in Small Member States 2021-03-11 Ivan Sammut The objective of this book is to examine how the legal order of Malta, the EU's smallest Member State, manages to cope with the obligations of the EU's *acquis communautaire*. As far as the legal obligations are concerned, size does not matter. Smaller Member States have the same obligations as the largest, yet they have to meet these same obligations with very fewer resources. This book examines how the Maltese legal system manages to fulfil its obligations both in terms of the supremacy of EU law, as well as how the substantive EU law is transposed and implemented. It also explores how Maltese courts look at EU law and how they manage, or not manage, to enforce it within the context of national law. It can serve as a model to demonstrate how EU law is being implemented in the smallest Member State and can serve as a basis to study the effectiveness of EU law into the domestic law of its Member States in general.

Genocide and the Europeans 2010-10-07 Karen E. Smith Genocide is one of the most heinous abuses of human rights imaginable, yet reaction to it by European governments in the post-Cold War world has been criticised for not matching the severity of the crime. European governments rarely agree on whether to call a situation genocide, and their responses to purported genocides have often been limited to delivering humanitarian aid to victims and supporting prosecution of perpetrators in international criminal tribunals. More coercive measures - including sanctions or military intervention - are usually rejected as infeasible or unnecessary. This book explores the European approach to genocide, reviewing government attitudes towards the negotiation and ratification of the 1948 Genocide Convention and analysing responses to purported genocides since the end of the Second World War. Karen E. Smith considers why some European governments were hostile to the Genocide Convention and why European governments have been reluctant to use the term genocide to describe atrocities ever since.

Governance and Politics in the Post-Crisis European Union 2020-08-27 Ramona Coman The European Union of today cannot be studied as it once was. This original new textbook provides a much-needed update on how the EU's policies and institutions have changed in light of the multiple crises and transformations since 2010. An international team of leading scholars offer systematic accounts on the EU's institutional regime, policies, and its community of people and states. Each chapter is structured to explain the relevant historical developments and institutional framework, presenting the key actors, the current controversies and discussing a paradigmatic case study. Each chapter also provides ideas for group discussions and individual research topics. Moving away from the typical, neutral account of the functioning of the EU, this textbook will stimulate readers' critical thinking towards the EU as it is today. It will serve as a core text for undergraduate and graduate students of politics and European studies taking courses on the politics of the EU, and those taking courses in comparative politics and international organizations including the EU.

Environmental Policy in the European Union 2005 Andrew Jordan This text brings together work on the full range of EU environmental policy. Incorporating a range of case studies, it explores the links between levels of governance and the environment in a number of policy areas.

Europeanization and Conflict Resolution 2004 Bruno Coppieters This volume studies the relevance of European integration for conflict settlement and conflict resolution in divided states such as Cyprus or Serbia and Montenegro.

Global Trends 2040 2021-03 National Intelligence Council "The ongoing COVID-19 pandemic marks the most significant, singular global disruption since World War II, with health, economic, political, and security implications that will ripple for years to come." -Global Trends 2040 (2021) Global Trends 2040-A More Contested World (2021), released by the US National Intelligence Council, is the latest report in its series of reports starting in 1997 about megatrends and the world's future. This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and describes a contested, fragmented and turbulent world. It specifically discusses the four main trends that will shape tomorrow's world: - Demographics-by 2040, 1.4 billion people will be added mostly in Africa and South Asia. - Economics-increased government debt and concentrated economic power will escalate problems for the poor and middleclass. - Climate-a hotter world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve and cause problems for human life. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading.

Beyond Employment 2001-04-26 Alain Supiot This book is the English edition of what has become widely known as 'The Supiot Report' - a bold and far-reaching look at the changing nature of work initiated by the EC. It takes as its starting point the profound changes that have taken place in the underlying employment relationship and associated human resource practices over the past twenty years. These developments are placed in their economic, social, institutional, and legal contexts. Competitive pressures on firms, the search for greater efficiency and effectiveness in the delivery of public services, the changing role of women in society, and the desire for greater choice on the part of individuals are all important motives for change. The legal framework and the structures and organizations which represent the interests of workers and employers must respond to these changes. Drawing on illustrations from a number of European countries, the book suggests that the legal framework should encourage greater collaboration in the workplace, particularly over issues such as training. But it should also place work within its social context and facilitate genuine choices by individuals.

Fabricating Quality in Education 2011-12-22 Jenny Ozga How is European Education Governed? Data is now the lifeblood of education governance. At the international level, organisations like the OECD steer education systems through their programmes of assessment and the European Commission's project of creating the most successful knowledge economy in the world is driven by data collection, analysis and comparison. At the national level, policy-makers increasingly depend on data to show them where they are positioned, in relation to their competitors, and draw on data to justify policy directions. Within systems, schools and teachers have become proficient in data use, and interpret their priorities with reference to data. This book draws on a three-year comparative study of the influence of data on education systems in Europe, looking at the contrasting policy contexts of Denmark, England, Finland, Scotland and Sweden, and examining the use of data in these systems, in relation to steering by Europe, as well as policy mediation and 'translation' of data within systems. The authors draw on interviews with key policy actors in the European Commission and with national policy makers in all five systems, as well as on local case studies and a major comparative survey of the effects of data production and use on the work of teachers and headteachers. The research brought together international researchers from a variety of disciplinary backgrounds, including educationalists, political scientists and specialists in research and evaluation. The book offers new arguments relating to the use of Quality Assurance and Evaluation as a means of standardising and harmonising education policy and practice, while also drawing attention to significant variation in policy and practice across these systems. It should be of interest to researchers, post-graduate students and advanced undergraduate students in policy studies in education and more generally.

Uniting of Europe 2020-11-15 Ernst B. Haas The University of Notre Dame Press is pleased to bring Ernst Haas's classic work on European integration, *The Uniting of Europe*, back into print. First published in 1958 and last printed in 1968, this seminal volume is the starting point for anyone interested in the pre-history of the European Union. Haas uses the European Coal and Steel Community (ECSC) as a case study of the community formation processes that occur across

traditional national and state boundaries. Haas points to the ECSC as an example of an organization with the "power to redirect the loyalties and expectations of political actors." In this pathbreaking book Haas contends that, based on his observations of the actual integration process, the idea of a "united Europe" took root in the years immediately following World War II. His careful and rigorous analysis tracks the development of the ECSC, including, in his 1968 preface, a discussion of the eventual loss of the individual identity of the ECSC through its absorption into the new European Community. Featuring a new introduction by Haas analyzing the impact of his book over time, as well as an updated bibliography, *The Uniting of Europe* is a must-have for political scientists and historians of modern and contemporary Europe. This book is the inaugural volume of Notre Dame's new Contemporary European Politics and Society Series.

Fairhurst's Law of the European Union eBook PDF 2018-06-14 Sonia Morano-Foadi The European Union is a legal system unlike any other in history. It is also facing unprecedented challenges, controversies and uncertainty as the UK seeks to implement Brexit. At its heart, Law of the European Union aims to shed light on this unique forum by providing a clear and accessible overview of the constitutional arrangements of the Union, and the law and jurisprudence which underpins the substantive areas of core EU Law. Building on previous editions of the book by John Fairhurst, this 12th edition has been extensively reworked by a new author team to ensure it continues to meet the requirements of contemporary EU Law modules by: Streamlining its coverage to focus only on the constitutional law of the EU and the core substantive areas of free movement of people, workers and goods to reflect the typical LLB syllabus. Expanding coverage of direct effect, fundamental rights and the division of competences to provide more detailed information on these topics. Increasing the level of debate and analysis providing more nuanced coverage of the subject enabling the student reader to reflect on broad, underlying issues or controversies. Incorporating a range of new or improved features and diagrams to support learning including case boxes which explicitly highlight the facts, ruling and significance of each case discussed and reflection boxes which draw attention to key issues, discussion points and future possibilities. Weaving coverage of Brexit throughout.

The European Union and Human Rights 2021 Jan Wouters This title provides analysis of the EU's human rights commitments through legislation, case law, and policy documents. Key developments to the EU's engagement with human rights, both internally and externally, are examined and it covers the topics of non-discrimination and competition law, migration, trade policy, and development cooperation.

Lifelong Vocational Guidance 1999 Sylvie Chioussé This document synthesizes the findings of case studies of career guidance and advice for adults in the European Union. Section 1 examines the problems of helping the following groups: marginalized individuals in need of vocational or social (re)integration; individuals in the process of becoming marginalized, individuals who appear to be "problem free"; and groups adversely affected by the economic recession. The case study findings pertinent to the issue of facilitating adults' social, personal, and/or occupational transitions are detailed in section 2. Special attention is paid to facilitating vocational integration, encouraging self-esteem and determination, teaching adults to network, helping adults make the best use of what they have learned, and helping adults reacquire a social role and reintegrate into temporary or permanent settings. Section 3 presents the following institutional solutions to the problems of personalizing help, advice, and guidance and offering guidance for the medium- or long-term future: improving services at the individual level, preventing marginalization, developing policies at the European and national levels, adopting a multidisciplinary and holistic approach, and linking passive and active measures. Appended is information about quantitative and qualitative methods of evaluating counseling services and evaluation for cost-benefit analyses and services adapted to needs. The report contains 35 references. (MN)

The economics of information 2021-01-11 Przemysław Deszczyński The economics of information. Theory and practice is an English-language version of the monograph *Ekonomia informacji* written in September 2019 and published at the beginning of 2020. The idea of translating it into English was born after posting the texts on Research-Gate. Then requests to make it available in English appeared. Rapid changes that have taken place in the world economy over the past year caused some authors to consider it necessary to include them in their texts. Therefore, the update of the texts have been provided, mainly in the context of consequences of the pandemic, but also concerning the entry of Brexit into the next phase. Attention was paid not only to the theoretical but most of all to the practical dimension of information economics. Moreover, the comments that appeared in reviews published in scientific journals, including those concerning the structure of work, have been taken into account. The monograph consists of eight chapters. Each of them was written by a different author. In the first chapter, the conceptualization of the term 'economics of information' was presented. It covers the genesis of information economics, an original definition and methodological foundations. It is a starting point and supporting structure of the entire book. The authors of the remaining chapters refer to and comply with the adopted convention of analysis presented by the research editor. The second chapter is devoted to the economics of information in internal communication in the era of social media. It constitutes a sort of bridge between information economics and public relations narrowed down to internal communication. Jacek Trębecki refers to the relationship between behavioral economics and classical economics. He emphasizes that the consequence of information asymmetry may be its influence on distortion of decisions. Chapter three by Waldemar Rydzak - Changes in Access to Information in Crisis Situations - as intended by the author, is to be a starting point for a discussion about the role of information in the contemporary market, which is more and more frequently discussed in the context of the fourth digital wave of development, with significant influence of mass media and the Internet, also in the context of the COVID-related situation. In the fourth chapter, Filip Kaczmarek used the assumptions of counterfactual analysis in his considerations, and on the basis of its results he showed that the so-called opportunity costs, or 'cost of non-Europe', are used as an instrument of legitimizing the European Union. In chapter five by Aleksandra Rabczun, Brexit and the Economics of Information, the Brexit case was analyzed in the context of the role played by information economics in this process. Chapter six, written by Izabela Janicka, is an example of using the concept of economics of information to analyze one country, in this case Germany. It was also assumed that both macro and micro aspects are taken into account. The author points to the overriding role of information in the post-industrial economy and to the fact that information has become one of the basic production factors. She also introduces the concept of a functional information minimum and an information gap. In the seventh chapter Marcin Leszczyński defines the role of the state's reputation in reducing information asymmetry in the global market. The chapter ends with the analysis of policy and diplomacy in shaping trust in a government and the demand for products from a given country on the example of the trade war between the US and China. In the eighth chapter, Information, Welfare and Migrations - Practical Remarks in the Context of the Economics of Information, Katarzyna Świerczyńska fitted into the scope of research on the impact of information on economy and economic decisions of entities at the mega-economic level.

The EU in the World 2020 EUROSTAT. This publication provides a statistical portrait of the European Union in relation to the rest of the world. It presents a broad range of indicators for the EU and the non-EU members of the Group of Twenty (G20). It is structured into three parts: people and society — population, health, education and training, the labour market, living conditions and digital society; economy and business — economy and finance, international trade, business, and science, technology and the digital society; environment and natural resources — transport, energy, the environment, and agriculture, forestry and fisheries. The publication complements information found in two of Eurostat's main publications, Key figures on Europe and the Regional yearbook, as well as the hundreds of articles available from Eurostat's Statistics Explained web portal. It may be viewed as an introduction to European and international statistics and provides a starting point for those who wish to explore the wide range of data that are freely available from a variety of international organisations and on Eurostat's website. The EU in the

world is published every second year with annual data. This 2020 edition only describes the situation in the EU and the G20 Member States up to the year 2018 at the most. As a consequence, first findings of any COVID-19 related implications will only be possible in the 2022 edition of *The EU in the world*, with the full scale of the crisis being revealed in later editions only.

The Quest for Regional Integration in the Twenty First Century 2012 Joram Mukama Biswaro In the last five decades, the world has witnessed dramatic changes. The Cold War has ended, and geopolitical relations among the major powers have been generally stable and tranquil. Moreover, the demise of colonialism has allowed newly independent countries to play a greater role in the international arena, and countries that used to be foes have now joined hands to develop their economies and raise the living standards of their peoples. At the same time, economic integration, both regional and global, has taken a strong hold. There is a growing realization that, for the survival of the modern world, with increasing cross-national links and externalities, global cooperation is a necessity. The opponents of integration argue that it is merely a guise for exploiting people in developing countries, which will cause massive disruptions of lives and with few benefits to the poor. Its proponents, however, point to the significantly reduced levels of poverty in countries that have adopted economic integration, such as China, India, Vietnam, Brazil, Chile, South Africa, Tanzania, and others. The EU experience is a successful example of integrating national economies, but how far should those promoting regional integration in Africa and other regions look to the EU as a model? Can regional and global integration proceed harmoniously? The journey towards fully-fledged regional integration in Africa and beyond could be long, rough and tough. Challenges and fears are enormous, but hopes, opportunities and prospects are immense. From this study it can be further concluded that Regional Integration and Cooperation in the 21st century is a reality and relevant.

Negotiating Membership in the WTO and EU 2017-02-17 Jamie E. Scalera With the accession of Afghanistan in 2016, the World Trade Organization (WTO) numbered 164 members with nineteen other states in line to join. The WTO is certainly not alone in its growth though; the Organization for Economic Cooperation and Development (OECD), the North Atlantic Treaty Organization (NATO), and the European Union (EU) are all expanding with dozens of states continuing to negotiate their potential membership. What impact does membership in international organizations really have? Why do some states have a seemingly easy path to joining international organizations while others find the process nearly impossible? What implications do these difficult accession processes have on the domestic and international politics of the acceding states? The author presents the two-level theory of accession, which highlights factors at the domestic level and international organization level, to explain how accession processes in the WTO and EU vary from state to state and the impact of these variations. In so doing, this book provides a unique perspective on the topic of membership in international organizations.

Bitcoin and Mobile Payments 2016-07-25 Gabriella Gimigliano This book provides a critical analysis of The European Union's regulatory framework for mobile payments and bitcoin. Chapters discuss the creation of the EU single market for e-payments and combine legal analysis with comparative case studies in their exploration of the regulatory challenges surrounding e-payments. The contributing authors analyse the key economic and legal issues of the development of bitcoin and mobile payments within the EU framework through a comparative lens. They cover topics ranging from user data and funds protection and the stability of the payment system to the competitiveness of the EU market. Providing a comprehensive and methodological guide to the bitcoin and mobile payments in Europe, this book will prove an illuminating and informative read for academics, students and policy makers with an interest in the impact of innovation on payment systems.

Contested Landscapes of Poverty and Homelessness In Southern Europe 2017-09-15 Vassilis P. Arapoglou The book uses Athens as a case study to identify the key features of urban anti-poverty policies in Greece and to discuss them in relation to policy developments in the crisis-ridden countries of Southern Europe. The idea of contested landscapes shapes the focus of the book on urban poverty and homelessness. Contested landscapes refer to the complex dynamics between visible and invisible poverty and to competing strategies on how to address them. The book takes a path-dependent view on the development of post-welfare arrangements, devolution, and pluralism that are being shaped by both neoliberal mentality, solidarity and communitarian practices. The authors draw on their own research and advocacy background in New York and Athens to shape their conceptual and methodological tools; however, rather than uncritically 'importing' North American and North European concepts to Greece, the book highlights the significance of distinctive Mediterranean features for analysing homelessness and anti-poverty policies. This will be a useful read for academics policy makers in areas of urban studies, sociology, social policy, human geography and anthropology.

Competition Law of the European Union 2021-03-01 Van Bael & Bellis This new Sixth Edition of a major work by the well-known competition law team at Van Bael & Bellis in Brussels brings the book up to date to take account of the many developments in the case law and relevant legislation that have occurred since the Fifth Edition in 2010. The authors have also taken the opportunity to write a much-extended chapter on private enforcement and a dedicated section on competition law in the pharmaceutical sector. As one would expect, the new edition continues to meet the challenge for businesses and their counsel, providing a thoroughly practical guide to the application of the EU competition rules. The critical commentary cuts through the theoretical underpinnings of EU competition law to expose its actual impact on business. In this comprehensive new edition, the authors examine such notable developments as the following: important rulings concerning the concept of a restriction by object under Article 101; the extensive case law in the field of cartels, including in relation to cartel facilitation and price signalling; important Article 102 rulings concerning pricing and exclusivity, including the Post Danmark and Intel judgments, as well as standard essential patents; the current block exemption and guidelines applicable to vertical agreements, including those applicable to the motor vehicle sector; developments concerning online distribution, including the Pierre Fabre and Coty rulings; the current guidelines and block exemptions in the field of horizontal cooperation, including the treatment of information exchange; the evolution of EU merger control, including court defeats suffered by the Commission and the case law on procedural infringements; the burgeoning case law related to pharmaceuticals, including concerning reverse payment settlements; the current technology transfer guidelines and block exemption; procedural developments, including in relation to the right to privacy, access to file, parental liability, fining methodology, inability to pay and hybrid settlements; the implementation of the Damages Directive and the first interpretative rulings. As a comprehensive, up-to-date and above all practical analysis of the EU competition rules as developed by the Commission and EU Courts, this authoritative new edition of a classic work stands alone. Like its predecessors, it will be of immeasurable value to both business persons and their legal advisers.

The European Court of Justice and the Policy Process 2018-01-26 Susanne K. Schmidt This is an open access title available under the terms of a CC BY-NC-ND 4.0 International licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. The European Court of Justice is one of the most important actors in the process of European integration. Political science still struggles to understand its significance, with recent scholarship emphasizing how closely rulings reflect member states' preferences. This book argues that the implications of the supremacy and direct effect of the EU Treaty have still been overlooked. As it constitutionalizes an intergovernmental treaty, the European Union has a detailed set of policies inscribed into its constitution that are extensively shaped by the Court's case law. If rulings have constitutional status, their impact will be considerable, even if the Court only occasionally diverts from member states' preferences. By focusing on the four freedoms of goods, services, persons, and capital, as well as citizenship rights, the book analyses how the Court's development of case law has ascribed a broad meaning to these freedoms. The constitutional status of this case law constrains policymaking at the European and member-state levels. Different case studies show how major pieces of EU legislation partly codify case law.

Judicialization is important in the EU. It also directly constrains member-state policies. Court rulings oriented towards individual disputes are difficult to translate into general policies-but if they have constitutional status they have to go through this process. Policy options are thereby withdrawn from majoritarian decision-making. As the Court cannot be overruled, short of a Treaty change, its case law casts a long shadow over policymaking in the European Union, undermining the legitimacy of this political order.

Transatlantic Policymaking in an Age of Austerity 2004-11-11 Flor Aarts  
Transatlantic Policymaking in an Age of Austerity integrates the study of politics and public policy across a broad spectrum of regulatory and social welfare policies in the United States and several nations of Western Europe. The editors and a sterling list of contributors look at policymaking in the 1990s through the present—providing a comparative politics framework—stressing both parallel development and the differences between and among the nations. Similar prevailing ideas and political factors can be identified and transatlantic comparisons made—providing for a clearer understanding of the policymaking process. Faith in regulated markets and the burden of rising welfare costs are concerns found on both sides of the Atlantic. Western democracies also share political climates colored by economic austerity; low trust in government, pressures from interest groups, and a sharply divided electorate. Because of differing political processes and differing policy starting points, a variety of disparate policy decisions have resulted. Real world policymaking in the areas of welfare, health, labor, immigration reform, disability rights, consumer and environmental regulation, administrative reforms, and corporate governance are compared. Ultimately, the last decade is best characterized as one of "drift," sluggish changes with little real innovation and much default to the private sector. In general, policymakers on both sides of the ocean, constrained by economic necessity, have been unable to produce policy outcomes that satisfy the key segments of the electorate. The contributors examine the United States, Great Britain, France, and Germany, as well as a number of other European countries, and study the European Union itself as a policymaking institution. Transatlantic Policymaking in an Age of Austerity distills the prominent issues, politics, and roles played by governmental institutions into a new understanding of the dynamics of policymaking in and among transatlantic nations.

Integrating Immigrants in Europe 2015-06-02 Peter Scholten  
This open access book explores how research and policymaking in the field of migrant integration have developed historically and how this interrelationship plays out in the strongly politicised climate of opinions on migration in Europe. It features interdisciplinary theoretical contributions as well as original empirical studies on research-policy dialogues at both the EU and country level. The chapters study not only how the dialogue between research and policy is structured (such as advisory bodies, research agencies, and ad-hoc committees), but also how these dialogues affect policymaking and the development of migrant integration research itself as well. The analysis reveals profound changes in the dialogue structures associated with the research-policy nexus in the domain of migrant integration. On the one hand, dialogue structures have become more ad-hoc, often established in response to distinct political events or to specific problems. On the other, politicisation has not thwarted all efforts to develop more institutionalised dialogue structures between producers and users of knowledge. In addition, research has contributed to policymaking in very different ways in various European countries. This edited volume is unique in this effort to reflect on the impact of research-policy dialogues both on the development of migrant integration policies as well as on migrant integration research. It will be of importance to scholars in this field as well as to policymakers and other stakeholders involved in migrant integration policymaking.

Regional Economics and Policy 2000 Harvey Armstrong  
The revised edition of this classic text contains discussions of the latest theoretical developments in regional economics and reviews recent changes in regional policy and institutions in the European Union. New case study material based on extensive academic research in Europe and the USA has been added throughout the book. This book is organized in two free-standing parts examining firstly the economic analysis of regions and then regional policy issues. Topics covered include multiplier and impact analysis, input-output models, growth theory, migration, regional labor markets, regional policy in the EU, regional devolution, small firms policy, foreign direct investment and a detailed explanation of the methods used to evaluate regional policy. Chapters can be read independently in cases where focused information is required, and the organization of the book makes this a very flexible and effective resource for course use.

International Labour Migration to Europe's Rural Regions 2020-10-18 Johan Fredrik Rye  
Emerging in the throes of a global pandemic that threatens Europe's economies and food security, International Labour Migration to Europe's Rural Regions combines a diverse range of empirically rich, in-depth case studies, analysis of their rural context specificities, and insights from labour market and migration theories, to critically examine the conditions and implications of rural labour migration. Despite its growing political, economic and social importance, our understanding of international labour migration to Europe's rural regions remains limited. This edited volume provides intricate descriptions of lived experience, critical theoretical analyses, analytical synthesis, and policy recommendations for this novel and developing phenomenon that has the potential to transform the lives of international migrants and local communities. The book's 25 authors represent a wide range of social science disciplines, with coverage of a vast range of Europe's rural regions, and diverse types of rural labour in areas such as horticulture, shepherding, wild berry picking and fish processing. The volume will be of interest to policy makers at local, regional, national and European levels, and scholars and students in a broad range of areas, including migration, labour markets, and rural studies. This book is available for free in PDF format as Open Access from the individual product page at [www.routledge.com](http://www.routledge.com).

The Government and Politics of the European Union 2017-09-16 Neill Nugent  
The definitive textbook on EU politics and governance, now in its 8th edition, has been thoroughly updated to take into account the ongoing developments and evolution of the EU. Major changes, recent developments, and the crises that have befallen the union in recent times are analysed within this context. This includes eurozone crisis, the migration crisis, and the UK's decision to leave the EU. Acclaimed author and academic Neill Nugent has written a comprehensive text, enabling students with no prior knowledge of the EU to master the subject. By detailing the historical evolution of European integration, Nugent gives the necessary context to his exhaustive analysis of policies, process, institutions and treaties. This has grown to include two new chapters on Member State Relations and Interest Representation. The final section considers concepts and theories with EU studies, providing a succinct, accessible introduction to theory, which can be read as standalone chapters. With a new structure to increase readability and packed with numerous pedagogical features - document excerpts, case studies, maps figures - and supported by a fully stocked companion website with resources for both students and lecturers, this text is an essential for students new to EU studies. This new edition offers: - New chapters on Member State relations and interest representation - Updates on all main institutions, policies and processes - Authoritative coverage of the main institutions, policies and processes of the EU - Redesigned textbook with even more pedagogical features - New companion website including updates, data resources, PowerPoint slides and test questions

E-Commerce Strategy 2014-10-30 Zheng Qin  
E-Commerce Strategy builds awareness and sharpens readers' understanding of the key issues about e-commerce strategies. To link theory of e-commerce strategy with practice in the real world, it brings together theoretical perspectives based on academic research, integrated use of technologies and large amount of cases, especially those of China. With regard to the innovative technical standards and frameworks, it proposes strategic analysis from a technical point of view. The book is intended for postgraduate students in e-commerce and computer science as well as government officials, entrepreneurs and managers. Prof. Zheng Qin is the Director of Software Engineering and Management Research Institute, Tsinghua University, China; Dr. Shundong Li is a Professor at the School of Computer Science, Shaanxi Normal University, China; Dr. Yang Chang and Dr. Fengxiang Li are both Research Assistants at the School of Software, Tsinghua University, China.

Intersecting Interregionalism 2013-12-28 Francis Baert  
This book has two mutually reinforcing aims/parts. The first aim is to contribute to a more productive debate between different theoretical standpoints. There is surprisingly little theoretical and conceptual debate in this burgeoning field, which is one major reason for the failure to fully grasp the diversity of today's interregionalism. Too often theorists speak past each other, without really engaging with alternative theoretical perspectives or competing research results. Indeed, this book constitutes the first systematic attempt to bring together leading theories and theorists of interregionalism. Leading scholars from around the world develop their own distinctive theoretical perspectives on interregionalism, with a particular emphasis on the dynamic relationship between regionalism and interregionalism. These highly acclaimed theorists have all been associated over the years with a variety of disciplines, institutions, schools and debates and so bring a rich set of insights and connections to this pioneering project. The second part of the book 'unpacks' and problematises the region, the driving actors and institutions that are engaged in interregional relations. There is a strong tendency in the field to treat regions as coherent units actors in an interregional relationship, and such simplified notions about 'regions' and 'regional organisations' necessarily result in superficial and misleading understandings of interregionalism. This part of the book connects the theoretical discussion in the first part with a manageable empirical object.

Violence Against Women 2014 "Violence against women undermines women's core fundamental rights such as dignity, access to justice and gender equality. For example, one in three women has experienced physical and/or sexual violence since the age of 15; one in five women has experienced stalking; every second woman has been confronted with one or more forms of sexual harassment. What emerges is a picture of extensive abuse that affects many women's lives but is systematically underreported to the authorities. The scale of violence against women is therefore not reflected by official data. This FRA survey is the first of its kind on violence against women across the 28 Member States of the European Union (EU). It is based on interviews with 42,000 women across the EU, who were asked about their experiences of physical, sexual and psychological violence, including incidents of intimate partner violence ('domestic violence'). The survey also included questions on stalking, sexual harassment, and the role played by new technologies in women's experiences of abuse. In addition, it asked about their experiences of violence in childhood. Based on the detailed findings, FRA suggests courses of action in different areas that are touched by violence against women and go beyond the narrow confines of criminal law, ranging from employment and health to the medium of new technologies."--Editor.

Health at a Glance: Europe 2020 State of Health in the EU Cycle 2020-11-19 OECD  
The 2020 edition of Health at a Glance: Europe focuses on the impact of the COVID-19 crisis. Chapter 1 provides an initial assessment of the resilience of European health systems to the COVID-19 pandemic and their ability to contain and respond to the worst pandemic in the past century.

Urban Planning in Europe 2002-09-11 Peter Newman  
An analysis of the influences on urban planning in Europe. Detailed case studies are used to explore planning policies in a range of European cities, and discuss the social and environmental objectives that influence today's urban planner.

The Brussels Effect 2020-01-27 Anu Bradford  
For many observers, the European Union is mired in a deep crisis. Between sluggish growth; political turmoil following a decade of austerity politics; Brexit; and the rise of Asian influence, the EU is seen as a declining power on the world stage. Columbia Law professor Anu Bradford argues the opposite in her important new book The Brussels Effect: the EU remains an influential superpower that shapes the world in its image. By promulgating regulations that shape the international business environment, elevating standards worldwide, and leading to a notable Europeanization of many important aspects of global commerce, the EU has managed to shape policy in areas such as data privacy, consumer health and safety, environmental protection, antitrust, and online hate speech. And in contrast to how superpowers wield their global influence, the Brussels Effect - a phrase first coined by Bradford in 2012 - absolves the EU from playing a direct role in imposing standards, as market forces alone are often sufficient as multinational companies voluntarily extend the EU rule to govern their global operations. The Brussels Effect shows how the EU has acquired such power, why multinational companies use EU standards as global standards, and why the EU's role as the world's regulator is likely to outlive its gradual economic decline, extending the EU's influence long into the future.

European Union Contested 2019-11-01 Elisabeth Johansson-Nogués  
The European Union's foreign policy and its international role are increasingly being contested both globally and at home. At the global level, a growing number of states are now challenging the Western-led liberal order defended by the EU. Large as well as smaller states are vying for more leeway to act out their own communitarian principles on and approaches to sovereignty, security and economic development. At the European level, a similar battle has begun over principles, values and institutions. The most vocal critics have been anti-globalization movements, developmental NGOs, and populist political parties at both extremes of the left-right political spectrum. This book, based on ten case studies, explores some of the most important current challenges to EU foreign policy norms, whether at the global, glocal or intra-EU level. The case studies cover contestation of the EU's fundamental norms, organizing principles and standardized procedures in relation to the abolition of the death penalty, climate, Responsibility to Protect, peacebuilding, natural resource governance, the International Criminal Court, lethal autonomous weapons systems, trade, the security-development nexus and the use of consensus on foreign policy matters in the European Parliament. The book also theorizes the current norm contestation in terms of the extent to, and conditions under which, the EU foreign policy is being put to the test.

The German NUTS-2 region of Arnsberg. An economic analysis of EUROSTAT regional data 2016-03-15 Lennart Voss  
Seminar paper from the year 2015 in the subject Geography / Earth Science - Economic Geography, University of Southern Denmark, course: Economic Geography and Regional Economics, language: English, abstract: This report will be about the German NUTS-2 region of Arnsberg. It will include a brief introduction to the region, stating the most important facts and information. This acquired basic knowledge will then be transferred to the more specific part of the assignment, the analysis of regional data. In this case, the used tool is called EUROSTAT. It is the European Union's official source for statistics and data concerning the different member states. The Main part therefore includes charts, diagrams and tables regarding different topics as population, wealth, employment or education. Every chart will be briefly described and analyzed. Furthermore, data of the German state and the European Union is used in addition to the regional NUTS-2 data to compare on national and international level. In continuation to this, location theories and the importance of economic key drivers and agents are discussed and applied to the NUTS-2 region of Arnsberg. The assignment is then rounded-off by a conclusion and the list of used sources.

Ukrainian Migration to the European Union 2016-11-02 Olena Fedyuk  
This book brings together research findings from a variety of disciplines in this integrated study of the migration of Ukrainian nationals to the EU. It contextualizes and historicizes this migration against the background of the series of crises experienced by Ukraine and the wider region over the last thirty or so years, from the dissolution of the USSR, through EU border changes, to the failed economic reforms of independent Ukraine. The book reviews major publications in a variety of disciplines and in several languages, including Russian, Ukrainian and English. It provides a critical analysis of these authoritative sources, linking historical and contemporary texts to establish a longitudinal perspective on migration trends and practices. The spatial, temporal, gender and geopolitical aspects of migration are examined, with expert analysis of the implications for economics, immigration policies, and migration studies. The contributors also draw on national and international academic research and country-specific data to describe the experience of Ukrainian migration in six European countries: Poland, the Czech Republic, Greece, Italy, Portugal, and Spain. These detailed portraits identify the principal trends and will help researchers, policy makers, and students to a better understanding of the dynamics of migration flow in the region as

a whole. "A timely volume covering many cases and many facets of Ukrainian mobility in the EU. A must have for all libraries." Anna Triandafyllidou, Robert Schuman Centre for Advanced Studies (RSCAS) "Is Ukraine the Mexico of Europe, I once asked. It is one of the most eminent migration cases to study. This book fills an acute knowledge gap and is a rich and important contribution." Franck Düvell, University of Oxford "This collection offers a comprehensive historical and geographical analysis of various migratory patterns from Ukraine to different European countries. It is a must read for migration scholars and for anyone interested in this highly topical phenomenon." Lena Näre, University of Helsinki

She became a celebrity, a celebrity, a phenomenon. She had it all, fans, wealth, awards. She was on cloud nine, she was realizing her goal. But she also had a shadowy aspect. She had a mystery, a dilemma, an habit. She started to fall apart, to make mistakes, to stir up trouble. She faced criticism, repercussions, litigations. She gave up her followers, her money, her honors. She tumbled down, she became a mockery, a disaster. She forfeited it all, her notoriety, her riches, her prestige. She was the climb and decline of a performer.

*First european union case study pdf pdf*~The book "Analyzing Casual Conversation" by Suzanne Eggins and Diana Slade, first released in 1997, creates a methodical model for the analysis and depiction of casual conversation in English. The scholars argue that in spite of its at times aimless look and apparently unstructured material, casual conversation is a very structured undertaking and performs a crucial part in the social construction of reality. The work goes through authentic instances of casual conversations involving participants diverging in age, gender, ethnicity, and socio-economic class<sup>12</sup>. Pulling on insights from sociology, linguistics, and critical semiotics, the work furnishes readers with the analytic skills to portray the levels of structure and critical interpretive models to explain the 'social work' that occurs on through chat.
