The Peabody Picture Vocabulary Test 4th Edition (PPVT-4) is a well-respected vocabulary evaluation that has been in practice for almost 50 years. Created by Lloyd M. Dunn and Douglas M. Dunn, the evaluation is designed to assess receptive vocabulary for American English. It is swift and simple to carry out, conserving important time so that concentration can be placed on applying effective strategies.

The PPVT-4 test subject matter includes a wide array of vocabulary comprehension ranks, ranging from preschool through adult age. The assessment questions widely sample words that depict 20 topic areas (e.g., actions, vegetables, tools), speech parts (nouns, verbs, attributes), and home and educational vocabulary.

The evaluation offers two identical editions which include various vocabulary words, ensuring that the individual has not "memorized" the assessment. One edition can be used before intervention implementation to measure people's vocabulary knowledge and the other edition can be employed for re-assessment to measure and record progress. The PPVT-4 also includes a distinctive Growth Scale Value (GSV) which is responsive to minor changes over time.
