APM - Archeologia Postmedievale, 14, 2010 - Conflict Archaeology. Landscapes of Conflicts e archeologia dei luoghi degli scontri 2013-11-01 Marco Milanese Conflict Archaeology. Landscapes of Conflicts e archeologia dei luoghi degli scontri, a cura di Marco Milanese Anche il numero 14 di “Archeologia Postmedievale” trova un suo fulcro in un innovativo nucleo di articoli dedicati alla Conflict Archaeology e caratterizzati da una diaconria che spazia in profondità, dal XVIII secolo fino alle stragi dei più recenti conflitti internazionali del XX-XXI secolo, in cui la memoria dei fatti è ancora pesante ed oggetto di scontri politici e giudiziari, dove l’archeologia - in assenza di altre fonti - produce documentazione per processi a crimini contro l’umanità. L’attenzione alla metodologia d’indagine ed al rapporto tra le fonti tradizionali, apparentemente risolutive, con quelle archeologiche, e videnzia la carica informativa di un nuovo approccio sul terreno per lo studio dei conflitti d’età moderna e contemporanea. Gli autori discutono diversamente i rapporti tra i sistemi di fonti, nei vecchi e nuovi approcci alla storia militare ed il collo di bottiglia della distanza di molta storiografia dalla conoscenza diretta da parte degli studiosi dei luoghi degli scontri, il più delle volte solo immaginati.

Journey Toward the Cradle of Mankind 1996 Guido Gozzano Before leaving home he had engaged to send back dispatches to La Stampa; after appearing there, his "letters from India" were collected and issued posthumously as Verso la cuna del mondo (1917), now published in English for the first time. The extent of Gozzano's travels - to Ceylon, Goa, Agra, Jaipur - makes one wonder how the writer was able to visit all or even most of the places he so vividly describes.

Military Landscapes 2021-06-08 Anatole Tchikine Military Landscapes seeks to develop a nuanced definition of military landscapes under the framework of landscape theory. It moves beyond discussions of infrastructure and battlefields, shifting the focus instead to often overlooked factors, highlighting the historical character of militarized environments as inherently gendered and racialized.

Le tre costituzioni pacifiste 2020 Mario G. Losano The three defeated Axis powers - Japan, Italy and Germany - incorporated a prohibition on wars of aggression into their democratic constitutions. This book covers the years of the Nuremberg and Tokyo Trials and the constituent assemblies of 1947- 49 through to current debates on the adaptation of the pacifi st articles in line with new “humanitarian” wars. Aspects relating to the birth of the three countries' constitutions are treated in great detail in three appendices.

History of the Italian Agricultural Landscape 2014-07-14 Emilio Sereni Emilio Sereni's classic work is now available in an English language edition. History of the Italian Agricultural Landscape is a synthesis of the agricultural history of Italy in its economic, social, and ecological context, from antiquity to the mid-twentieth century. From his perspective in the Italian tradition of cultural Marxism, Sereni guides the reader through the millennial changes that have affected the agriculture and ecology of the regions of Italy, as well as through the successes and failures of farmers and technicians in antiquity, the middle ages, the Renaissance, and the Industrial Revolution. In this sweeping historical survey, he describes attempts by successive generations to adapt Italy's natural environment for the purposes of agriculture and to respond to its changing ecological problems. History of the Italian Agricultural Landscape first appeared in 1961. At the time of its publication it was a pathbreaking work, parallel in its importance for Italy to Marc Bloc's masterwork of 1931, The Original Characteristics of French Rural History. Sereni invented the concept of the historical "agricultural landscape": an interdisciplinary characterization of rural life involving economic and social history, linguistics, archeology, art history, and ecological studies. The Story of Tönle 1998 Mario Rigoni Stern Mario Rigoni Stern was born in 1921 in Asiago, in the mountains of northeastern Italy. Throughout his literary career, he has remained deeply attached to the region of his birth, its peasant customs, its dialect, its seasonal cycles and shifting historical fortunes. Tonle Bintarn's story takes place in the mountains of the Veneto region, which once bordered the Austro-Hungarian Empire and where smuggling was a means of subsistence for the peasant population. Having run afoul of a patrol of revenue agents, Tonle must seek refuge beyond the frontier in Central Europe, where year after year he lives by doing odd jobs and working, among other things, as an itinerant print peddler, a horse trainer in Hungary, and a gardener in a Prague castle. But every winter he returns secretly to his home and family, until finally a pardon is granted. By now his children are grown and he has little to do but tend his sheep. Meanwhile, the times are changing, social values are disintegrating under the impact of modernization, and Europe moves ever closer to disaster. During the devastation of the First World War, the occupation and ultimate destruction of his village, and his own internment in an Austrian camp, it is Tonle's loyalty to his roots and his stubborn devotion to his task as a shepherd that persist and make him a quiet symbol of heroism and human endurance.

My Brilliant Friend 2020 Elena Ferrante The story of Elena and Lila begins in the 1950s in a poor but vibrant neighbourhood on the outskirts of Naples. Growing up on these tough streets the two girls learn to rely on each other ahead of anyone or anything else, as their friendship, beautifully and meticulously rendered, becomes a not-always-perfect shelter from hardship. A memorable portrait of two women, My Brilliant Friend is also the story of a nation. Through the lives of Elena and Lila, Ferrante gives her readers the story of a city and a country undergoing momentous change.

The volume contains 196 of the excellent papers presented at the conference. This multidisciplinary meeting was held to bring together workers in a wide range of materials science and engineering activities who employ common analytical and experimental methods in their day to day work. The results of the meeting are of worldwide interest, and will help to stimulate future research and analysis in this area.

The Protection of Cultural Property in Armed Conflict 2006-12-14 Roger O'Keefe Charting in detail the evolution of the international rules on the protection of historic and artistic sites and objects from destruction and plunder in war, this 2006 book analyses in depth their many often-overlapping provisions. It serves as a comprehensive and balanced guide to a subject of increasing public profile, which will be of interest to academics, students and practitioners of international law and to all those concerned with preserving the cultural heritage.

Copse 125 2020-05-21 Ernst Jünger Both memoir and essay, Copse 125 is an engaging and philosophical meditation on the nature of modern warfare in the era of the First World War, through a sustained and unified account of one aspect and episode, the battle at Rossignol Wood in France. Written in the early 1920s, several years after his classic Storm of Steel, Copse 125 also contains the essence of Jünger's thoughts on nationalism and the forging of a people in the furnace of heroic struggle.

The Era of the Witness 2006 Annette Wieviorka What is the role of the survivor testimony in Holocaust remembrance? In this book, a concise, rigorously argued, and provocative work of cultural and intellectual history, the author seeks to answer this surpassingly complex question.

Philanthropy and Voluntary Action in the First World War 2014-02-18 Peter Grant This book challenges scholarship which presents charity and voluntary activity during World War I as marking a downturn from the high point of the late Victorian period. Charitable donations rose to an all-time peak, and the scope and nature of charitable work shifted decisively. Far more working class activists, especially women, became involved, although there were significant differences between the suburban south and industrial north of England and Scotland. The book also corrects the idea that charitably-minded civilians' efforts alienated the men at the front, in contrast to the degree of negativity that surrounds much previous work on voluntary action in this period. Far from there being an unbridgeable gap in understanding or empathy between soldiers and civilians, the links were strong, and charitable contributions were enormously important in maintaining troop morale. This bond significantly contributed to the development and maintenance of social capital in Britain, which, in turn, strongly supported the war effort. This work draws on previously unused primary sources, notably those regarding the developing role of the UK's Director General of Voluntary Organizations and the regulatory legislation of the period.

Isonzo 2001-04-30 John R. Schindler This is the first account in English of a much-overlooked, but important, First World War battlefield located in the mountains astride the border between Italy and the Austro-Hungarian Empire. Not well known in the West, the battles of Isonzo were nevertheless ferocious, and compiled a record of bloodletting that totaled over 1.75 million for both sides. In sharp contrast to claims that neither the Italian nor the Austrian armies were viable fighting forces, Schindler aims to bring the terrible sacrifices endured by both armies back to their rightful place in the history of 20th century Europe. The Habsburg Empire, he contends, lost the war for military and economic reasons rather than for political or ethnic ones. Schindler's account includes references to remarkable personalities such as Mussolini; Tito; Hemingway; Rommel, and the great maestro Toscanini. This Alpine war had profound historical consequences that included the creation of the Yugoslav state, the problem of a rump Austrian state looking to Germany for leadership, and the traumatic effects on a generation of young Italian men who swelled the ranks of the fascists. After nearly a century, Isonzo can assume its proper place in the ranks of the tragic Great War clashes, alongside Verdun, the Somme, and Passchendaele.

The Nation as a Local Metaphor 2000-11-09 Alon Confino All nations make themselves up as they go along, but not all make themselves up in the same way. In this study, Alon Confino explores how Germans turned national and argues that they imagined the nation as an extension of their local place. In 1871, the work of political unification had been completed, but Germany remained a patchwork of regions with different histories and traditions. Germans had to construct a national memory to reconcile the peculiarities of the region and the totality of the nation. This identity project, examined by Confino as it evolved in the southwestern state of Württemberg, oscillated between failure and success. The national holiday of Sedan Day failed in the 1870s and 1880s to symbolically commingle localness and nationhood. Later, the idea of the Heimat, or homeland, did prove capable of representing interchangeably the locality, the region, and the nation in a distinct national narrative and in visual images. The German nationhood project was successful, argues Confino, because Germans made the nation into an everyday, local experience through a variety of cultural forms, including museums, school textbooks, popular poems, travel guides, posters, and postcards. But it was not unique. Confino situates German nationhood within the larger context of modernity, and in doing so he raises broader questions about how people in the modern world use the past in the construction of identity.

The Memory of Catastrophe 2004-09-04 Peter Gray Memories of catastrophes--both those which occur naturally and those which are consequences of human actions--loom large in the modern consciousness. The volume opens with an investigation of the concepts of catastrophe and collective memory, and the relationships between them. Arguing that a pervasive catastrophic memory may be as disabling as it is instructive, Gray and Oliver stress the necessity of rendering the phenomenon subject to secular critical inquiry. The value of such an approach is then demonstrated in a series of case studies.

The Men with Broken Faces 2015 Marjorie Gehrhardt This book explores for the first time the individual and collective significance of First World War facially disfigured combatants, with a special focus on France, Germany and Great Britain. It illuminates our understanding of how the combatant and the onlooker made sense of the experience and the memory of the war.

Digging the Trenches 2014-08-19 Andrew Robertshaw This comprehensive, illustrated survey of the latest in battlefield archaeology reveals “intimate insight into the realities of life” during WWI (Current Archaeology). Modern methods of archaeological, historical, and forensic research have transformed our understanding of the Great War. In Digging the Trenches, battlefield archaeologists Andrew Robertshaw and David Kenyon introduce the reader to this exciting new field and explore many of the remarkable projects that have been undertaken. Robertshaw and Kenyon show how archaeology can be used to reveal the positions of trenches, dugouts and other battlefield features, as well as what life on the Western Front was really like. They also show how individual soldiers are coming into focus as forensic investigation is so highly developed that individuals can be identified and their fates discovered. “An excellent introduction to the subject...Digging the Trenches is essential reading.”—Gary Sheffield, Military Illustrated “What a splendid book this is.”—Neil Faulkner, Current Archaeology

The Politics of Wounds 2014 Ana Carden-Coyne This volume offers a new cultural approach to the history of medicine and wounding in the First World War, placing personal experiences of pain into the social, cultural, and political contexts of military medical institutions.

Images of Conflict 2008-12-18 Jean Bourgeois Striking aerial views of war, and of the scarred landscapes of its aftermath are the focus of this unique and multidisciplinary book. For the first time, the history, significance, and technology of military aerial photography are brought together and explored by military historians, archaeologists, and anthropologists. This new approach opens the door to a modern reassessment of military aerial imagery, reveals the concepts and philosophies that guided their production and interpretation, and illustrates the complex interaction between humans and technology in creating and understanding the landscapes of conflict.

Himmler's SS 2009-04-01 Robin Lumsden The real story of the SS, unlike its popular mythology, is so complex as to almost defy belief: it is a tale of intrigue and nepotism, of archaeology and Teutonism, of art and symbolism. Himmler's SS is a story of street fighters and convicted criminals becoming Ministers of State and police commanders; the story of charitable works and mass extermination being administered from the same building; the story of boy generals directing vast heterogeneous armies on devastating campaigns of conquest. Here, indeed, fact is stranger than fiction. Himmler's SS looks at the wide-ranging effects that the SS had on the Police, racial policies, German history, education, the economy and public life, as well as the uniforms and regalia which were carefully designed to set Himmler's men apart as the new elite in Third Reich society. Fully illustrated, this book is an authoritative history of the SS and as such will appeal to all with an interest in Hitler's Third Reich.

A History of the First World War 2014-07-31 B. H. Liddell Hart Liddell Hart's History of the First World War first appeared in 1930 and is widely regarded as one of the greatest, most cogent accounts of the conflict ever published. A leading military strategist and historian who fought on the Western Front, Liddell Hart combines astute tactical analysis with compassion for those who lost their lives on the battlefield. He provides a vivid and fascinating picture of all the major campaigns, balancing documentary evidence with the testimony of personal witnesses to expose the mistakes that were made and why. From the political and cultural origins of war to the twists and turns of battle, to the critical decisions that resulted in such devastating losses and to the impact on modern nations, this magnificent history covers four brutal years in one volume and is a true military classic.

Externalising Migration Governance Through Civil Society 2020-05-29 Sabine Dini This book investigates how the externalisation of EU migration policies is implemented in Tunisia after the fall of the Ben Ali regime in 2011 through the involvement of civil society organisations. The ‘democratic transition’ initiated by the Tunisian Revolution led to the emergence of a ‘vibrant civil society’ as a new actor in the implementation of migration policies. In a country where migration issues are highly politicised and have strongly entered the public space, civil society is now included in the EU-Tunisia negotiation process and is assigned the role of an intermediary for the implementation of controversial European policies related to sedentarisation of the Tunisian population and to the construction of Tunisia as a ‘country of destination’. The volume concludes by suggesting an alternative way of thinking about migrant struggles challenging the European border regime as ‘uncivil society’ struggles.

Stari Bar. The Archaeological Project 2004. Preliminary Report 2005-09-01 Mitja Guštin Il progetto Stari Bar nasce nel quadro di una cooperazione tra le Università di Venezia (Italia), Università di Koper/Capodistria (Slovenia) e le autorità montenegrine (Museo di Bar, Ministero per la Cultura, Sito Archeologico di Bar) e si inserisce all'interno del programma Culture 2000 finanziato dalla Comunità Europea. Il sito di Stari Bar (Antivari) rappresenta indubbiamente un luogo di straordinario interesse archeologico, innanzitutto per il grado di conservazione dei resti materiali. Una città distrutta ed abbandonata durante la guerra per l'indipendenza montenegrina ci restituisce, anche se a livello di rudere, l'immagine di una piccola "Pompei" medievale. Obiettivo del progetto è lo studio delle fasi cronologiche dell'abitato, in relazione ai diversi gruppi sociali e culturali che vi hanno operato. Nel 2004 un primo studio delle architetture ha permesso di ricavare una valutazione archeologica della risorsa edilizia attraverso un'analisi della conservazione della leggibilità delle strutture della città. La valutazione preliminare sulla qualità dei depositi archeologici non ancora scavati, evidenzia l'eccezionale stato di conservazione delle stratigrafie e dei bacini sepolcrl, in relazione alle diverse fasi della città: bizantina, serba, veneziana e turca. Un saggio di scavo all'interno della Citadella ha permesso di datare le strutture fortificate di questa area alla fine del XII secolo, costruendo la prima sequenza stratigrafica con cronologie assolute, con interessanti associazioni ceramiche, disponibile per l'intero sito. The project on Stari Bar is part of a cooperation between the University of Venice (Italy), the University of Koper/Capodistria (Slovenia) and the Montenegrin authorities (Museum of Bar, Ministry of Culture, Archaeological site of Bar) and is inserted in a wider framework, of which also the University of Innsbruck is part, funded by the European Union, that aims to study the ways and modalities that qualify the Venetian presence on the eastern coast of the Adriatic sea (Programme Culture 2000, The heritage of Serenissima). In this perspective some case studies have been analyzed (the shipwreck of Gnalic, in Croatia, the late medieval ceramics of several sites of Slovenia (Piran/Pirano, Izola/Isola, Koper/Capodstria) and Croatia (Sv. Ivan pri Umagu/S. Giovanni di Umago, Split/Spalato), and the site of Bar in Montenegro), in order to build autonomous guidelines for research, some of which have already been completed. The site of Stari Bar (Antivari - Old Bar) represents undoubtedly an extraordinarily interesting archaeological site, first of all for the degree of preservation of the material remains. A village destroyed and abandoned during the Montenegrin Independence War gives us a picture, even if in ruins, of a small fossil town: with its streets, its palaces, its houses, its churches and monasteries, its mosques and its baths. A site whose archaeological potential stopped in 1870 AD. Stari Bar has been for a long time among the objects of restoration of the Montenegrin Community. The site has already in fact been restored, consolidated, cleaned, re-fitted in the past, making it partially suitable for visits. In the occasion of these restorations, which respected the monuments and were realized after an attentive work of architectural mapping by a team led by prof. Durde Boskovic after the second world war, many artefacts have been uncovered that allowed to reconstruct the history of the site. Some of these objects (late medieval pottery from three contexts) have been recently studied and published by Mladen Zagarcanin, as part of the present project. The book of the Montenegrin colleague is then the first product of this co-operation born under the sign of the heritage of Serenissima. But the archaeological resource contained in this micro-cosmos is in its greater part unexplored and will then be a success if our presence will be able to increase its knowledge and development. After this first campaign of research we would like to acknowledge many Institutes and people that helped us, encouraged us and supported us in our activity. On the Montenegrin side the Minister of Culture, Mrs. Vesna Kilibarda, the Superintendent of Montenegro Slobodan Mitrovic, the Mayor of Bar, Mrs. Anka Vojvodic, the director of the Centre of Culture of Bar Milun Lutovac, the director of the Museum of Bar Vladislav Kasalica and, of course, our friends Omer Perocevic and Mladen Zagarcanin. On the Italian side the Ministry for Foreign Affair, the Italian consulate of Podgorica and the Veneto Region for the fundings. Sauro Gelichi - Mitja Gustin Venezia - Koper, august 200

Instruction guida ai forti trincee e musei allaperto__Fifth, medical doctors do not believe in the potential of alternative medicine. This is not true because there are more doctors these days that are open to the idea that there are other ways to help patients aside from conventional medicine. In fact, some of them even recommend an acupuncturist if they know that what they have done is not effective. Another myth is that every patient will undergo the four needle technique. This is not true and it will only be used when the specialist feels that the energy of the patient is virtually not moving as a last resort. The seventh myth is that it is better for a medical doctor to perform acupuncture. This is wrong because the training is much different than that taught in medical school. Students who have an acupuncturist license train for 3,000 hours before they are allowed to practice this profession. So between an acupuncturist and a medical doctor, you should go with someone who has learned about this much longer.

Power guida ai forti trincee e musei allaperto Acupuncture and Weight Loss There are a lot of people who are overweight. For those who are obese, perhaps surgery is the best option but for those who can't, they can try to see if acupuncture can help take out the excess weight. Acupuncture is a form of holistic healthcare that uses needles to help treat a patient. Unlike the cartoon where the balloon will pop and all the air will go out, the needles that are inserted into the vital points will stimulate the body to release endorphins thus helping the person control their appetite. But before needles are inserted, the specialist will first ask the patient some questions and perform an examination. This is needed to understand the main cause for the person to be overweight.

*Revenge guida ai forti trincee e musei allaperto-*In the 5th or 7th treatment, this becomes more evident as your face looks more relaxed as though you just came from a vacation. The end result is that you will look and feel 5 to 15 years younger but of course this depends on how well the patient has taken care of themselves outside the confines of the clinic. To sum things up, facial acupuncture can do for you. It can eliminate fine lines and reduces wrinkles, improve your overall facial color and add luster to the skin, relaxes tension in the face and furrows in the brow, brightens the eyes and reduce dark circles and puffiness, improve muscle tone for sagging skin, enhance your natural radiance in the skin and eyes, slow the aging process within, promotes overall health and well being as well as relaxes and revitalizes the entire body.

Life Lessons from guida ai forti trincee e musei allaperto After the regular sessions, it is advisable to go back for follow up treatment. It should be every 2 weeks for the next 2 months and then once a month later on. Aside from needles, most clinics use herbs in the form of masks, poultices and moisturizers. Before you use it, check with your doctor to make sure there is no allergic reaction to any forms of medication that you are taking. After the first facial acupuncture treatment, you will usually seen an increased glow to one's complexion which the Chinese say an increased Qi or blood flow to the face. It becomes more open, the wrinkles start to disappear and the skin appears more toned.

Investment guida ai forti trincee e musei allaperto;Third, acupuncture is used to treat pain. This is only a half truth because this holistic technique has been proven to do other things such as stop a person's addiction, lose weight and prevent certain illnesses. Fourth, there are some who think that Asians are the only ones that can practice acupuncture. Since 1982, there are already 50 schools all across the country that teach students about this technique and become licensed acupuncturists. This means that anyone who has the desire to learn about this ancient practice can do so and help treat patients. Just to give you an idea, there are at least 3,000 acupuncturists now working in the US.

For Free guida ai forti trincee e musei allaperto;This has resulted in the establishment of clinics nationwide that only use acupuncture as the means of rehabilitation. Acupuncturists in the US charge from \$75 to \$150 per session. This usually gets lower in the succeeding treatments. The person will probably have to undergo 10 to 15 treatments 2 to 3 times a week but this really depends on the condition of the patient. Before you go to one, you should check if this is covered by your insurance. If it isn't, perhaps you should suggest that it should be included as it is much cheaper than having to undergo surgery.

*Curse guida ai forti trincee e musei allaperto-*These courses can be chosen on the basis of modules or on an hourly basis. The course material covers the history, theory and techniques of acupuncture. Courses that offer tools such as acupuncture DVD and video are ideal for acupuncturists or students of acupuncture to improve their clinical expertise. Once you graduate from acupuncture school, some will open their own practice while others will first work for a clinic. Those who decide to be employed will work with other professionals that may include naturopaths, chiropractors and other specialists that are also into Oriental Medicine. The average acupuncturist makes about \$45,000 a year but this can change in the years to follow as they add years or experience under their belt. This just goes to show that if you work hard, you too will make a fortune. Just make sure that you do this properly for each patient because one mistake could make this all go away.

Happiness guida ai forti trincee e musei allaperto Acupuncture Degrees If you want to pursue a career in acupuncture, you need to obtain a degree and become a licensed professional. This can easily be accomplished in three years of schooling from an accredited alternative medicine school which prepares students in the various acupuncture techniques to treat illnesses resulting from allergies, occupational stress, emphysema, gastrointestinal stress, arthritis, headaches, depression, and hypertension to name a few. Students who enroll in such courses will be taught through demonstration, discussion and hands on application.

Obsession guida ai forti trincee e musei allaperto...Quitting Smoking for Good with Acupuncture Acupuncture is already a renowned method used in treating smoking addiction. An alternative medicine believed to have originated as far as 3000 BC in ancient China, this treatment is now being widely utilized for various medicinal and therapeutic purposes. It has been found furthermore to successfully treat drug dependence and chronic smoking addiction. There are several smoking cessation medications and therapies available presently. However acupuncture is a recommended alternative procedure, especially where conventional therapies have already failed. The strategic insertion of needles in various parts of the body aims to treat the condition in a more profound and emotional level. A smoker needs to free himself from the physiological and psychological addiction of smoking, thus necessitating a more holistic treatment.

Challenge guida ai forti trincee e musei allaperto Eight Myths About Acupuncture There are a lot of myths with regards to acupuncture. Some of these are true; others are silly while the rest only have a half truth. As you read on, you will learn which ones are worth believing. The first myth is that acupuncture is painful. This is not true because those who have tried it claimed they only experienced a tiny prick while others did not feel anything at all. There is no tissue damage when the needle is inserted into the skin or pulled out and only in very rare cases are there traces of bruising. The second myth is that you can get hepatitis or AIDS from acupuncture. This is true only if the needles used are not sterilized. In the US, this will never happen because acupuncturists are required to use disposable needles thus you are not at risk from these two diseases.

Eight guida ai forti trincee e musei allaperto The lists of subjects you will be learning in school include anatomy, body therapy, massage therapy and the other sciences. Training will be done also in a clinical setting so you are able to put theory into practice but this will only happen in your third year. While some schools will let you finish a program in three years, there are those that can be completed after five. Lately, acupuncture school has also gone down the digital path by offering cyber distance programs for those who cannot go to school. Some of these offer CEU's or continuing education units to advance programs.

*Learn guida ai forti trincee e musei allaperto...*Obesity can be caused due to complex reasons including biological, genetic, cultural and behavioral factors. Usually a person gets obese when he/she consumes more calories than the body burns. Also there are fifty percent chances of becoming obese when both one of the parent is obese and when obesity has affected both the parents, the chances increases to eighty percent. One percent of obese people can have that fat because of health reasons, as obesity can be caused due to few medical disorders. The causes of obesity in adolescence are overeating, family history, bad eating habits, little or no exercise, medical illness, low self esteem, medications, depression, emotional problems, stressful life, and family problem. Obesity can cause many major problems. Some of them are diabetes, sleeping disorders, high blood pressure, breathing problems, emotional problems and increase in heart disease risk. Teenagers are more prone to get emotional problems. Because of the weight, they develop low self esteem. They get into depression, obsessive compulsion disorder and anxiety.

Adolescents who want to tackle the obesity problem should approach a pediatrician who will thoroughly evaluate the cause. If no physical disorder is to be blamed, the weight is reduced by limiting the calorie intake and increasing physical activity. The doctor can advice a weight management program and change the eating habits of the teenager, slowly. The patient must avoid oily, fatty, fast and junk food. The potions must be reduced in order to decrease the calorie intake. If the adolescent has developed emotional problems because of obesity, an adolescent psychiatrist can collaborate with the pediatrician in order to make a comprehensive plan for treatment. The plan includes reasonable goals, behavior modification, family participation, and management of physical activity.

guida ai forti trincee e musei allaperto.Patients of acupuncture typically experience very minimal or no pain at all, however most of the points are located near nerve endings and muscle tissues. As the needles are embedded in the body, signals are sent to the brain thus promoting the release of endorphins from the pituitary gland.

There are also other points in the body that serve as gateways for better weight management. One of these placements promotes a decrease in an individual’s appetite, while another has the ability to reduce water retention in the body. The acupuncturist may choose a multi-targeted approach, depending on the requirements of the patient.

Accounting Terms - Profit & Loss and Other Terms

Different fields of study make use of certain terms that are not easily understood by others. If you’re an accounting student or a professional accountant, you know the different terms used in accounting. One very popular term is profit & loss.

So, do you know what the term means? To start with, you have to determine what profit means. Profit can be referred to as net earnings or net income. Businesses can either sell services or even products. Profit will come from the sales of these services and products. If the costs of running a business are controlled, it can add up to the profits.

Profits are also called ROI or return on investment. However, this term is often limited to securities like bonds or stocks. But still, some companies use ROI to mean short or long term business outcomes. Taxable income is another term for profit.

Before you decide to have a session with them, talk to the acupuncturist to know their credentials. This will also give you the opportunity to find out how much do they charge as this can be from \$45 to more than \$100 per session.

You can probably ask for the name and contact number of a previous client so you can ask this person how everything went. Remember, if it doesn’t work out for you, don’t be afraid to find someone else who can do a better job.

The most important thing to do during the session is to relax. If you feel an itch or something, tell the acupuncturist. The same goes if you are nervous or experience a burning sensation so the specialist will take out the needles.

*observation guida ai forti trincee e musei allaperto,*Women who are pregnant are also advised not to undergo acupuncture treatment. However, they can engage in that once the baby is born.

How well the acupuncture treatment will go depends also on specialist who will be performing it. You have to take into account their years of experience and skill so they are able to make the correct diagnosis, finding the acupoints in the body, the angle at which the needles will be inserted and the techniques they know as there are different types of acupuncture.

This brings us to asking ourselves how to find a skill acupuncturist. For this to work, we have to do ask our doctor if they can refer anyone. It wouldn’t hurt to also do some research online. After all, there are about 3,000 acupuncturists all across the country so it won’t be that hard to find one.

The greatest advantage of this ancient Oriental procedure is the absence of side-effects during and after treatment. Unlike smoking cessation medications and nicotine replacement therapy products, acupuncture does not employ chemically manufactured substances. There is also no risk of weight gain during therapy. In conjunction with helping a patient quit smoking, it can also curb appetite, thus reducing food cravings. If you have tried several methods in smoking cessation to no avail, perhaps it is high time you consider the alternative method that is acupuncture. With the right practitioner and the right frame of mind, there is no reason why you won’t be nicotine-free before long.

The Do’s and Don’t of Acupuncture

Miracle guida ai forti trincee e musei allaperto:Chances are, you were consulting with a doctor prior to your visit to the acupuncturist. If there are any prescription medicines given, don’t forget to take them.

You will not feel any improvement after just one or two visits with the acupuncturist. Just the same, you should write this down so you can go back to the acupuncturist on your next visit and tell him or her how you felt during the previous session. Such feedback will let the specialist know what needs to be modified in the future to help you with your problem.

The acupuncturist might give you some herbs to take as part of your treatment. Since you don’t know if taking them will have any side effects with the medication you are taking, you should first consult with your doctor if it is safe to consume both.

The profit & loss of a certain company is determined by finance professionals through accounting. They can determine what created the profits as well as the losses. Accountants form some sort of business equation so justify the profits & losses of a business. By doing so, they can easily tell a company’s net worth.

It seems that by simply starting to define one accounting term, it eventually leads to defining other terms as well. Net worth is another term that is quite difficult to understand. It refers to the resulting amount after deducting the liabilities of a company from the assets. Private companies refer to net worth as owner’s equity.

Why owner’s equity? Well, after deducting all the liabilities, what’s left basically belongs to the owner. In the case of public companies, the profit of the business is returned as dividends to shareholders. As you can see, before owner or shareholders of a company can take hold of the profits, all liabilities must be deducted first.

First step, log on to the internet. Job sites are all over the web and so you can definitely find an accounting job there. Most of the sites allow jobseekers to sort the job openings through location. After that, you can simply search by using ‘accounting’ as the keyword. If you surf the net, you can also find websites that focus mainly on accounting jobs. These sites can truly help you in looking for the perfect accounting job. If you can find a job online, then there’s no need to check out other resources.

If the search for an accounting job online fails, your second step is to check out local papers. Local companies who are in need of accounting graduates will usually post an advertisement in the local paper and not on the internet. This only means that you can also find jobs through the local papers.

Take a close look at the classified ads section. Find the section about accounting jobs and there you have it. Sort through the job openings posted on the paper; get the address of the company, and the requirements. All the necessary contact information should be noted. Remember, you will be applying directly to the company and not an employment agency unless stated.

The Soothing Effects of Acupuncture

Acupuncture is an ancient form of Chinese medicine that has been practiced for thousands of years. Commonly used to treat bodily pains, acupuncture actually has a wide range of uses that range from additions, to injuries, to disease prevention. If you are thinking about trying acupuncture, the following will give you a better idea of its many benefits.

For Free guida ai forti trincee e musei allaperto.Reactions And Research

Not everyone is impressed with acupuncture itself. Most western medical professionals have expressed either doubt or indifference to the oriental method while others have downright driven it down into the earth with criticisms and brutal skepticism. However, recent research shows the efficacy (or lack thereof) of acupuncture, and while more research has to be done, it has been proven to actually positively affect some, but not all, forms of ailments that it claims to cure.

So as the doors open to a new age of acupuncture, give it a try when you feel the need for pain relief and you will not be disappointed. As the Chinese have used it for many centuries, so should we.

Precautions should not only be taken indoors, but outdoors too. This is because; more than forty thousand people get eye injuries outdoors. Ninety nine percent of the injuries are caused while playing sports. So it is necessary for the youngsters to wear protective eyewear while playing sports or when involved in outdoor recreational activities. A special helmet is designed with wire shield or polycarbonate face mask which is not only safe, but comfortable, too. Protective eyewear should also be worn while performing experiments in science lab. Fireworks must only be handled by adults.

Because of increasing use of computers, more and more youngsters are getting eye strains. The symptoms of eye strain caused by computer are red & watery eyes, focusing problems, aching & tired eyelids, eye muscle spasm, backache and headache. In such an environment, eye exercise must be done regularly. The eyes must be made to focus on distant objects and should be rotated from side to side. It is extremely important to give ample rest to the eyes. Glasses with UV shield must be worn when looking at the computer screen. Eye strain can be avoided by increasing the distance from the monitor.

Eye hazards are also caused when cosmetics are used improperly by contact lens wearers. Some of the adverse reactions are injury, eye irritation, allergy, dryness, infection, and lens deposition. That is the reason why adolescents must be made aware of the risk they will face when opting for contact lens. Girls should understand that they should buy hypoallergenic cosmetics and especially the non-scented variety, manufactured by big brand names. Cosmetics should not be shared with anything else. The applicator brushes must be washed regularly and old mascara must be disposed and not refilled. Eye shadows which are glittery, pearlized, frosted or iridescent contain ground tinsel or oyster shell, which should be always avoided. Eyeliner should not be applied in the inner lid edge. Loose powder should be avoided. Cream should not be applied near the eyes. The wearer should wash hands while handling contact lens. No crying, washing of face or bathing should be done with the contact lens on.

The patient will have to come back for regular treatment and have to pay attention to one’s diet and exercise regularly as needles can only do so much to control one’s weight.

The number of treatments for someone who is overweight varies depending on how many pounds they want to lose, the speed at which they want to lose it and their commitment to sticking to the plan.

The average patient on the other hand who wants to lose 5 to 10 pounds will have to come for treatment every three days or twice a week then once this is attained, once every two weeks. It is up to the person until when the treatment will be done which shows that acupuncture can help you lose weight.

The best part about acupuncture is that there are no side effects and it is painless. Skillful professionals can do this so you don’t suffer from hematoma or pneumothorax. Another disease is potentially dangerous is HIV or hepatitis which can be prevented of course as long as the needles used are properly sterilized. It will be much better if the person uses disposable needles.

Acupuncture has been practiced in the United States for more than 2 decades. Although tests have shown how effective it can be to treat chronic conditions and certain addictions, more studies need to be done to see where else it can be useful.

Life Lessons from guida ai forti trincee e musei allaperto-There are two subcategories of eating disorders, anorexia nervosa and bulimia nervosa. Anorexia nervosa is the restrictive form, where the intake of food is limited severely. In bulimia nervosa is the eating disorder where the adolescent binges on food and then tries to minimize the effects by forcibly vomiting, fasting, and catharsis or over exercising. When handling adolescence eating disorders, they must be handled differently from adult eating disorders. Adolescents face problems such as growth retardation, suppressed height, abnormal weight, pubertal delay, menstrual periods absence, and menses unpredictability. When the adolescent is growing there will be critical tissue components loss like loss of body fat, muscle mass and bone mineral.

Nutritional imbalance is also caused which reflect abnormalities in the levels of vitamins, mineral and other trace elements. The problem is that these abnormalities cannot be recognized clinically. But since protein and calories are essential to the growth of the adolescent, it is important to trace their abnormalities. Because of the problems, healthy adulthood is not a possible thing. Because of all these reasons, it is important to diagnose adolescence eating disorders as early as possible. Eating disorders give rise to peak bone mass impaired acquisition in case of adolescents. When they turn into adults, this problem aggravates to osteoporosis. Even internal organs get affected due to eating disorders. All this can be prevented by early intervention so as to limit, prevent and ameliorate medical complications, which can turn become life threatening.

Adolescents who practice unhealthy weight control practices and are obsessive about figure, weight, food or exercise should be treated clinically. Not only should the symptoms be checked, but their duration, intensity and frequency should also be checked. Although most of the physical complications caused due to eating disorders get solved with the help of nutritional rehabilitation some of the conditions become irreversible and the long term consequences of this are very dangerous. It is best if the eating disorders are recognized in the early stages as it won’t result in irreparable damage. The medical monitoring should be pursued till the adolescent returns back to appropriate psychological and medical health.

Control of pain is the most well researched of all of the indications for acupuncture. There is a definite beneficial effect for a majority of patients using this method. Migraines, premenstrual syndrome, arthritis, carpal tunnel syndrome, and neuralgias are but a few examples. The theory behind its effectiveness is also medically accepted and well researched, called the gate-control theory of pain. It states that the needles can stimulate nerves so that they block the impulses from pain triggers.

It is important to emphasize that acupuncture is used only on top of existing medical therapy. At no time should a patient discontinue medication or ignore medical instructions in favor of needle puncture. After undergoing a needle puncture regimen, the primary care physician can make an evaluation with regards to decreasing dependence on other therapies.

Solutions guida ai forti trincee e musei allaperto–Seventy four percent of females above fourteen years and sixty percent of females below fifteen years have reported to have involuntary sex. Fifty percent of the adolescent pregnancies are within the time period of six months after the initial sexual intercourse. More than nine hundred thousand teenagers are reported to have become pregnant every year in the United States. Fifty one percent of the adolescent pregnancies result in live birth, thirty five percent result in induced abortion and fourteen percent result in stillbirths or miscarriages. Four out of ten adolescent females get pregnant, before they turn twenty, at least once. Twenty five percent of adolescent deliveries aren’t the mother’s first child. When a teenager gives birth to her first child, she increases the risk of begetting another child. One third of the adolescent parents are themselves result of adolescent pregnancies.

There are many reasons why adolescents choose to become sexually active at an early stage in life. The reasons can be early pubertal development, poverty, sexual abuse in childhood, lack of parent’s attention, lack of career goals, family and cultural patterns of early sex, substance abuse, dropping out from school and poor school performance. Factors which discourage an adolescent to become sexually active are stable family environment, parental supervision, good family income, regular prayers, connectedness with parents and living with complete family and both the parents. The factors which are responsible for the consistent use of contraceptive among adolescents are academic success, anticipation for successful future, and involvement in a stable relationship.

There are many medical risks associated with adolescent pregnancies. Adolescents who are less than seventeen years are at a greater risk of developing medical complications, when compared to adult females. The risk is even more in teenagers below seventeen. The weight of the child, given birth by an adolescent, is very low in these pregnancies. It is usually below 2.5 kilogram. The rate of neonatal birth is also three times greater in adolescents, when compared to adults. Other problems caused by adolescent pregnancies are prematurity of the child, birth of underweight child, poor maternal weight gain, poor nutritional status, anemia, STDs and hypertension induced due to pregnancy.

But in cases where considerable amount of blood flows in small amount of time as a result of an injury due to a serious example for instance, it may not be possible for bone marrow to replace RBCs so quickly resulting in anemia. Also, losing small amounts of blood over long periods of time may also lead to anemia. Example of this situation can be seen in girls who get heavy periods attributed mainly to deficiency of iron in the diet.

Anemia due to iron deficiency is the most common kind of anemia in the United States. It occurs mainly due to lack of iron in a person’s diet. A teen with iron deficiency would have lower hemoglobin production and consequently lower RBCs. When the production of RBCs is low the person is regarded as anemic. The signs of anemia are paleness and tiredness. There can be other reasons as to why enough RBCs are not produced in the body. Folic acid and Vitamin B-12 are also essential to produce RBCs. Getting these in adequate quantities is this important too. There can be a problem with bone marrow’s working too resulting in anemia.

Hemolytic anemia occurs when a person has RBCs whose lifespan is shorter. The bone marrow may not be able to produce new blood cells if the blood cells die too early. This can result due to many reasons including person having disorders like sphenocytosis or sickle cell anemia. In some cases the immune system of the body may itself destroy the RBCs. In some cases certain antibodies can form in the blood as a result of reaction to certain drugs or infections and may attack the RBCs.

An infant will have a normal blood pressure reading of 80/45, where as an adolescent will have a normal blood pressure reading of 110/70. Therefore, age, gender, and height are important factor when determining the normal blood pressure level. Adults will have a higher blood pressure than the infants and teenagers. Also, boys have a higher blood pressure when compared to girls and tall people have a higher blood pressure than short people. An adolescent is said to have high blood pressure when the blood pressure is more than the blood pressure of ninety percent people of his/her age, gender and height.

There are many risks associated with hypertension or high blood pressure. The risk of developing coronary heart disease increases proportionally. The arteries will develop greater resistance towards the blood flow, because of which the heart will pump blood harder. Stroke is also another risk. Adolescents who have had high blood pressure as a child, develop harmful effects on the blood vessels and heart till the time they turn twenty.

The causes of high blood pressure can be classified as primary and secondary. If the causes are definite, they are primary and if the cause is linked to some illness, it is secondary. Primary causes are high blood cholesterol levels, smoking, stagnant lifestyle and overweight. Secondary causes are obesity, immobility due to chronic illness, prescription drugs, intense pain due to burns or cancer and illegal drugs. High blood pressure can develop due to hereditary reasons.

The other virus called cytomegalovirus which also belongs to the family of herpes simplex causes the cells to become enlarged. According to statistics, about eighty percent of adolescents infected with this virus generally don’t see any further symptoms. Although EBV has potential to develop infectious mononucleosis in adolescents the virus could make throat and blood cells its home for the lifetime. The virus has the capability to bounce back and reactive from time to time but the consolation is that it would reactivate without symptoms.

The condition usually lasts for 1-2 months. The symptoms may vary from one adolescent to other but may include inflamed lymph glands in areas such as groin, neck and armpits, fever, continuous fatigue, enlarged spleen, sore throat as a result of tonsillitis that can make things difficult to swallow and last but not the least minor liver damage that can lead to short-term jaundice. Some adolescents may also experience symptoms such as abdominal pain, petechial hemorrhage, muscle ache, headache, depression, loss of appetite, skin rash, weakness, dizziness, enlarged prostrate, dry cough, swelled genitals and puffy and swollen eyes. Some parents are puzzled by the symptoms of mononucleosis as it may be similar to other medical conditions. It is safe to consult a doctor in such cases.

The viruses are usually transmitted to other people through saliva (the reason why it is also called kissing disease), blood, sharing drinks and sharing utensils. The symptoms usually lasts for 4-6 weeks and do not cross 4 months. The disease is diagnosable but requires a thorough medical history of the adolescent. The diagnosis also involves physical examination of the adolescent and is based on symptoms reported to the physician. The diagnosis is further supported by laboratory test like blood test, antibody test and test to count white blood cells.

Amenorrhea is the condition in which the female skips her menses for more than three consecutive menstrual cycles. Amenorrhea is also classified as primary amenorrhea and secondary amenorrhea. Primary amenorrhea develops from the onset of menstrual periods. In this condition, the adolescent might not get periods when she enters puberty. Secondary amenorrhea is a condition where periods become irregular after a period of time and not from the start.

There are many causes of amenorrhea such as ovulation abnormality, eating disorders, birth defects, anatomical abnormalities, malnourishment, anorexia, bulimia, pregnancy, over exercising, thyroid disorder, obesity and other medical conditions. Out of these ovulation abnormalities are a common cause for absent or irregular periods. It is a must that an adolescent start getting menses at least by the age of sixteen. If not, anatomical abnormality, birth defect and other medical conditions are the cause. Adolescents who participate in sports actively and are athletic have a lower body fat content because of which they have absent menses. Even because of malnourishment, the body is incapable of sustaining pregnancy. So in turn the body itself shuts down the reproductive system and menses. Extra fat cells in the body interfere with ovulation and that is the reason why obese female have irregular menses. Amenorrhea is treated by dietary modifications, ovulation inhibitors and hormone treatment.

Menstrual Disorders in Adolescent Girls

Adolescence is the time when there is sudden transformation in the body and many questions arises in the minds of the adolescents. Firstly they are not able to cope with the changes and secondly the changes bring along problems with them. The most challenging problems are related to menses, in girls. Menstrual conditions are many that may require physician’s attention or any other healthcare professional’s attention. The most common of the menstrual disorders are premenstrual syndrome, dysmenorrheal and amenorrhea.

Before the onset of the menses, females face many uncomfortable symptoms which last for a short period, stretching from few hours to few days. But some of them can be very intense and can disturb the normal functioning of the person. These symptoms are grouped as premenstrual syndrome. In usual cases, the symptoms come to a halt when the menses begin, but for some they may last even after the menstrual periods are over. Eighty five percent of the females experience some of the symptoms of premenstrual syndrome at one time or the other. Nearly forty percent experience the symptoms so intensely that their daily chores are affected by it and ten percent are disabled by it.

While acupuncture itself is a painless procedure, some smokers have claimed that they felt a prick or get sleepy.

Most smokers will have to come to the clinic 4 to 6 times before seeing any significant results. Just to give you an idea, one study shows that the respondents reported a decrease in the number of cravings to smoke just after one or two sessions. Seven out of 10 of the respondents were able to kick the habit after 5 or 6 sessions.

Because the number of test subjects is small, there are some who doubt the effectiveness of acupuncture. This is because although there are positive signs with regards to the short term effects of this technique, its effects were not sustained. This is why some medical journals have stated that it is unclear what acupuncture can do in smoking cessation.

In some cases, acupuncture is more effective when the needles are first heated. This technique is known as “moxibustion.” Here, the acupuncturist lights a small bunch of the dried herb called moxa or mugwort and holds it above the needles. The herb, which burns slowly and gives off a little smoke and a pleasant, incense-like smell, will never directly touch your body.

Another variation is electrical acupuncture. Here, electrical wires are hooked up to the needles and a weak current runs through it which may cause no or little sensation at all.

It is also possible that herbal medications will also be prescribed by the acupuncturist for your treatment to be successful.

Acupuncture prevents and treats diseases by inserting very fine needles into the skin specifically at the anatomic points of the body.

The principle behind this concept is that illnesses occur because there is an imbalance in your life force otherwise known as Qi. It is believed that this flows in 14 channels in the human body known as meridians which branch out to bodily organs and functions. If there is a blockage or obstruction in any of them, this is when you succumb to a disease or an illness.
