Task Force Black

2011-06-07 Mark Urban When American and British forces invaded Iraq in March 2003, select teams of special forces and intelligence operatives got to work looking for the WMD their governments had promised were there. They quickly realized no such weapons existed. Instead they faced an insurgency—a soaring spiral of extremism and violence that was almost impossible to understand, let alone reverse. Facing defeat, the Coalition waged a hidden war within a war. Major-General Stan McChrystal devised a campaign fusing special forces, aircraft, and the latest surveillance technology with the aim of taking down the enemy faster than it could regenerate. Guided by intelligence, British and American special forces conducted a relentless onslaught, night after night targeting al-Qaeda and other insurgent groups. Task Force Black reveals not only the intensity of the secret fight that turned the tide in Baghdad but the rivalries and personal battles that had to be overcome along the way. Incisive, dramatic, exceptionally revealing, the war in Iraq cannot be understood without this book.

Operation Red Wings

2013-12-17 Peter Nealen Marcus Luttrell's blockbuster bestseller, Lone Survivor—soon to be a major motion picture—tells the story of Operation Red Wings, in which four U.S. Navy SEALs were inserted into the mountains of eastern Afghanistan with the task of collecting intelligence and finding—or killing—a top al Qaeda commander. The SEALs were ambushed by over one hundred Taliban fighters and a horrific battle ensued. The rescue helicopter carrying eight SEALs was shot down by a reported Rocket Propelled Grenade (RPG), killing them instantly and erasing any hope for the SEALs already on the ground. Luttrell was the only survivor. OPERATION RED WINGS is an in-depth examination of the recovery mission to rescue Luttrell, filled with never-before-told details and shocking new revelations. Author Peter Nealen (former USMC Force Recon) and the team at SOFREP have an expansive network within the Special Operations community, providing them with access to exclusive interviews, after action reports, military intel and previously untold accounts of the rescue mission. Nealen and his team have uncovered eyewitness reports that put the "official" story into question as to how the initial rescue helicopter was shot down. If true, this potential coverup will have had severe consequences on subsequent helicopter insertion operations and put lives at risk. Complete with a foreword by former Navy SEAL Brandon Webb, this is a must-have companion to the blockbuster book and upcoming film. (12,000 words)

Lone Survivors

2012-03-13 Chris Stringer A leading researcher on human evolution proposes a new and controversial theory of how our species came to be In this groundbreaking and engaging work of science, world-renowned paleoanthropologist Chris Stringer sets out a new theory of humanity's origin, challenging both the multiregionalists (who hold that modern humans developed from ancient ancestors in different parts of the world) and his own "out of Africa" theory, which maintains that humans emerged rapidly in one small part of Africa and then spread to replace all other humans within and outside the continent. Stringer's new theory, based on archeological and genetic evidence, holds that distinct humans coexisted and competed across the African continent—exchanging genes, tools, and behavioral strategies. Stringer draws on analyses of old and new fossils from around the world, DNA studies of Neanderthals (using the full genome map) and other species, and recent archeological digs to unveil his new theory. He shows how the most sensational recent fossil findings fit with his model, and he questions previous concepts (including his own) of modernity and how it evolved. Lone Survivors will be the definitive account of who and what we were, and will change perceptions about our origins and about what it means to be human.

Lone Survivor

2007-06-12 Marcus Luttrell Follow along a Navy SEAL's firsthand account of American heroism during a secret military operation in Afghanistan in this true story of survival and difficult choices. On a clear night in late June 2005, four U.S. Navy SEALs left their base in northern Afghanistan for the mountainous Pakistani border. Their mission was to capture or kill a notorious al Qaeda leader known to be ensconced in a Taliban stronghold surrounded by a small but heavily armed force. Less than twenty-four hours later, only one of those Navy SEALs remained alive. This is the story of fire team leader Marcus Luttrell, the sole survivor of Operation Redwing, and the desperate battle in the mountains that led, ultimately, to the largest loss of life in Navy SEAL history. But it is also, more than anything, the story of his teammates, who fought ferociously beside him until he was the last one left—blasted unconscious by a rocket grenade, blown over a cliff, but still armed and still breathing. Over the next four days, badly injured and presumed dead, Luttrell fought off six al Qaeda assassins who were sent to finish him, then crawled for seven miles through the mountains before he was taken in by a Pashtun tribe, who risked everything to protect him from the encircling Taliban killers. A six-foot-five-inch Texan, Leading Petty Officer Luttrell takes us, blow by blow, through the brutal training of America's warrior elite and the relentless rites of passage required by the Navy SEALs. He transports us to a monstrous battle fought in the desolate peaks of Afghanistan, where the beleaguered American team plummeted headlong a thousand feet down a mountain as they fought back through flying shale and rocks. In this rich, moving chronicle of courage, honor, and patriotism, Marcus Luttrell delivers one of the most powerful narratives ever written about modern warfare -- and a tribute to his teammates, who made the ultimate sacrifice for their country.

Leave No Man Behind

2021-08-10 Tony Brooks A story of courage, perseverance, and patriotism behind the 75th Ranger Regiment's rescue mission following one of the deadliest Special Ops incidents in Afghanistan—a grueling search for twelve Navy SEAL casualties and eight downed Night Stalkers . . . but just one lone survivor On June 28th, 2005, a four-man Navy SEAL reconnaissance team under Operation Red Wings was ambushed in northeastern Afghanistan—as depicted in the book and film Lone Survivor. A quick reaction force was dispatched. Turbine 33, carrying eight Navy SEALs and eight members of the 160th Special

Operations Aviation Regiment, was struck by a rocket propelled grenade—careening the dual rotor Chinook toward the rugged peak of Sawtalo Sar. The result was the single deadliest incident in Special Operations history at the time. Commanders called on the largest element of US Special Forces, the 75th Ranger Regiment. The rescue mission: Operation Red Wings II. Author Tony Brooks gives a first-hand account of the daring recovery of Turbine 33 and the subsequent search for the remaining compromised Navy SEAL recon team—one of whom was Marcus Luttrell, the lone survivor. The Rangers were up against lack of intel, treacherous terrain, violent weather, and an enemy that was raised to fight. Tony Brooks lived—and many of his fellow Rangers died—by the axiom, “Leave No Man Behind.” He is the first to tell the story other books and films have omitted, one of overcoming overwhelming odds to accomplish a mission: to bring every American soldier home.

Sole Survivor

2013-02-27 Ruthanne Lum McCunn On November 23, 1942, German U-Boats torpedoed the British ship Benlomond and it sank in the Atlantic in two minutes. The sole survivor was a second steward named Poon Lim, who, with no knowledge of the sea, managed to stay alive for 133 days on a small wooden raft. Finally rescued at the mouth of the Amazon River, Poon was hailed as the "World's Champion Survivor." He still holds the Guinness World Record for survival at sea.
