The Big Muddy

2012-08-21 Christopher Morris In The Big Muddy, the first long-term environmental history of the Mississippi, Christopher Morris offers a brilliant tour across five centuries as he illuminates the interaction between people and the landscape, from early hunter-gatherer bands to present-day industrial and post-industrial society. Morris shows that when Hernando de Soto arrived at the lower Mississippi Valley, he found an incredibly vast wetland, forty thousand square miles of some of the richest, wettest land in North America, deposited there by the big

muddy river that ran through it. But since then much has changed, for the river and for the surrounding valley. Indeed, by the 1890s, the valley was rapidly drying. Morris shows how centuries of increasingly intensified human meddling--including deforestation, swamp drainage, and levee construction--led to drought, disease, and severe flooding. He outlines the damage done by the introduction of foreign species, such as the Argentine nutria, which escaped into the wild and are now busy eating up Louisiana's wetlands. And he critiques the most monumental change in the lower Mississippi Valley--the reconstruction of the

river itself, largely under the direction of the Army Corps of Engineers. Valley residents have been paying the price for these human interventions, most visibly with the disaster that followed Hurricane Katrina. Morris also describes how valley residents have been struggling to reinvigorate the valley environment in recent years--such as with the burgeoning catfish and crawfish industries--so that they may once again live off its natural abundance. Morris concludes that the problem with Katrina is the problem with the Amazon Rainforest, drought and famine in Africa, and fires and mudslides in California--it is the end result of the ill-considered bending of natural environments to human purposes.

Uncertainty Analysis in Econometrics with Applications

2012-12-14 Van-Nam Huynh Unlike uncertain dynamical systems in physical sciences where models for prediction are somewhat given to us by physical laws, uncertain dynamical systems in economics need statistical models. In this context, modeling and optimization surface as basic ingredients for fruitful applications. This volume concentrates on the current methodology of copulas and maximum entropy optimization. This volume contains main research presentations at the Sixth International Conference of the Thailand Econometrics Society held at the Faculty of Economics, Chiang Mai University, Thailand, during January 10-11, 2013. It consists of keynote addresses, theoretical and applied contributions. These contributions to Econometrics are somewhat centered around the theme of Copulas and Maximum Entropy Econometrics. The method of copulas is applied to a variety of economic

problems where multivariate model building and correlation analysis are needed. As for the art of choosing copulas in practical problems, the principle of maximum entropy surfaces as a potential way to do so. The state-of-the-art of Maximum Entropy Econometrics is presented in the first keynote address, while the second keynote address focusses on testing stationarity in economic time series data.

2014-03-01 Bryan P. Piazza In this comprehensive, one-volume reference, Nature Conservancy scientist Bryan P. Piazza poses five key questions: —What is the Atchafalaya River Basin? —Why is it important? —How have its hydrology and natural habitats been managed? —What is its current state? —How do we ensure its survival? For more than five centuries, the Atchafalaya River Basin has captured the flow of the Mississippi River, becoming its main distributary as it reaches the Gulf of Mexico in south Louisiana. This dynamic environment, comprising almost a million acres of the lower Mississippi Alluvial Valley and Mississippi River Deltaic Plain, is perhaps best known for its expansive swamp environments dominated by baldcypress, water tupelo, and alligators. But the Atchafalaya River Basin contains a wide range of habitats and one of the highest levels of biodiversity on the North American continent. Piazza has compiled and synthesized the body of scientific knowledge for the Atchafalaya River

Basin, documenting the ecological state of the basin and providing a baseline of understanding. His research provides a crucial resource for future planning. He evaluates some common themes that have emerged from the research and identifies important scientific questions that remain unexplored.

Governing Through Markets

2004-01-01 Benjamin William Cashore In this important book, Lawrence Sager, a leading constitutional theorist, offers a lucid understanding and compelling defence of American constitutional practice. Sager treats judges as active partners in the enterprise of securing the fundamentals of political justice, and sees the process of constitutional adjudication as a promising and distinctly

*Louisiana State University Department

democratic addition to that enterprise. But his embrace of the constitutional judiciary is not unqualified. Judges in Sager's view should and do stop short of enforcing the whole of the Constitution; and the Supreme Court should welcome rather than condemn the efforts of Congress to pick up the slack. Among the surprising fruit of this justice-seeking account of American constitutional practice are a persuasive case for the constitutional right to secure a materially decent life and sympathy for the obduracy of the Constitution to amendment. No book can end debate in this conceptually tumultuous area; but Justice in Plainclothes is likely to help shape the ongoing debate for years to come.

Anna could never erase from memory her first love, Leo. Their paths had crossed when they were both 16, at a enchanting summer camp. They were utterly smitten, spending every day laughing, exchanging heartfelt thoughts, and sharing stolen kisses. Their bond was indestructible, and they vowed to stay connected, to cherish their connection, and to love each other forever. But life, as it often does, had a different path in store for them. They lost communication, they moved on with their lives, and they eventually married other people. Years passed, and the hustle and bustle of life took them in different directions. But fate, it seems, had not forgotten their unwavering connection. At a chance encounter, at a nostalgic reunion, their paths crossed once again. The moment they laid eyes on each other, the flame of their first love rekindled. The same electric spark that had drawn them together years ago was still unmistakable. They felt the same thrill that had fueled their

teenage romance, but they also felt the weight of time. Their hearts yearned for the unconditional love they had shared, but their minds grappled with the tangled web of their current lives. They were caught in a conflict of the heart, torn between the passion of their past and the stability and security of their present. They stood at a critical juncture, forced to make a difficult choice. Would they choose the all-consuming passion of their first love, risking the unknown that lay ahead, or would they hold onto the predictability of their current lives, forever wondering what could have been? Only time would tell if their first love would survive the test of time.
