The Peabody Picture Vocabulary Test 4th Edition (PPVT-4) is a well-respected vocabulary test that has been in use for close to half a century. Formulated by Lloyd M. Dunn and Douglas M. Dunn, the test is designed to assess vocabulary comprehension for Standard American English. It is quick and easy to administer, conserving important time so that concentration can be placed on implementing intelligent interventions.

The PPVT-4 evaluation subject matter includes a wide array of vocabulary comprehension levels, extending from pre-kindergarten through adult age. The test items widely feature words that depict 20 subject areas (e.g., actions, vegetables, tools), speech parts (nouns, verbs, attributes), and household and school vocabulary.

The assessment gives two equal versions which include various vocabulary words, guaranteeing that the individual has not "mastered" the evaluation. One version can be employed ahead of intervention to measure individuals' vocabulary knowledge and the other form can be used for re-testing to assess and note advancement. The PPVT-4 also includes a special Growth Scale Value (GSV) which is responsive to slight changes with time.
