Armed Conflicts in South Asia 2011 2017-11-01 D. Suba Chandran Fourth in the annual series, this volume reviews the transformative changes which have emerged in the armed conflicts in South Asia in 2010, several of these with long and convoluted histories, including the conflicts in Jammu & Kashmir, northeast India and the Naxalite movement in central India; as also issues of autonomy in Balochistan, the FATA region in Pakistan, the Chittagong Hill Tracts in Bangladesh, and the Terai foothills in Nepal. The book examines whether armed conflicts have transformed since their inception; or only metamorphosed into the sullen acceptance that could usher future violence. While conflicts in South Asia have been interspersed with peace efforts, the book looks at the complex trajectories that such attempts have taken. Specifically, it identifies three regions where most significant transformative trends were witnessed in South Asia in 2010: conflict-ridden Sri Lanka, Af-Pak and the Naxalite regions of India.

Gender and Migration in Italy 2017-05-15 Elisa Olivito Recent migratory flows to Europe have brought about considerable changes in many countries. Italy in particular offers a unique point of view, since it is possible to observe not only the way migration has changed specific features of the country, but also how it is intertwined with gender relations. Considering both the type of migration that has affected Italy and the consequent measures adopted by the Government, a variety of distinctive elements may be seen. By providing a broad and more complete picture of the Italian perspective on gender and migration, this book makes a valuable contribution to the wider debate. The contributions consider the problematic linkage between gender and migration, as well as analyse particular aspects including Italian colonial past, domestic work, self-determination, access to social services, second-generation migrant women, family law, multiculturalism and religious symbols. Taking an empirical and theoretical approach, the volume underlines both the multifaceted problems affecting migrant women in Italy and the way in which questions raised in other countries are introduced and redefined by Italian scholarship. The book presents a valuable resource for researchers, academics and policy-makers working in the areas of migration and gender studies.

Fundamental Labour Rights and the Constitution 2023-07-05 Giulia Frosecchi The book reflects on constitutional balancing from the perspective of fundamental labour rights. It draws on neo-constitutional theories and builds on the assumption that fundamental labour rights, understood as rights aimed at protecting workers during their working life or after retirement, are the normative expression of founding values and can be balanced against equally axiological constitutional principles. The balancing of constitutional labour rights can be conducted by various institutional actors and by applying different techniques. This volume reviews the theoretical debates on judicial balancing and the approaches adopted by the Court of Justice of the European Union and the European Court of Human Rights, to proceed with a closer assessment of Italian and Spanish judicial traditions. In particular, it addresses the main profiles of the case law of the Italian and Spanish Constitutional Courts on labour and social law reforms adopted in the aftermath of the 2008 crisis, where balancing takes place between labour rights and economic principles. The analysis is focused on four main aspects: the fundamental labour rights in the balance; the role of the Courts; the technique applied by the Judges; and the constitutional interests subject to the balancing. It ultimately reveals that the axiological nature of fundamental labour rights is preserved and the economic and financial contingencies confirm their factual character, although they are occasionally recognised a prominent role in the ratio decidendi. The book will be a valuable resource for academics and researchers working in the areas of labour law, social security law, legal theory and constitutional law.

The Governance of Insurance Undertakings 2022-03-14 Pierpaolo Marano This open access volume of the AIDA Europe Research Series on Insurance Law and Regulation brings together contributions from authors with different legal cultures. It aims to identify the legal issues that arise from the intersection of two disciplines: insurance law and corporate/company law. These legal issues are examined mainly from the perspective of European Union (EU) law. However, there are also contributions from other legal systems, enriching the perspective with which to approach these issues.

The International Application of FIDIC Contracts 2019-10-10 Donald Charrett FIDIC contracts are the most widely used contracts for international construction around the world and are used in many different jurisdictions, both common law and civil law. For any construction project, the General Conditions of Contract published by FIDIC need to be supplemented by Particular Conditions that specify the specific requirements of that project. The International Application of FIDIC Contracts: A Practical Guide provides readers with detailed guidance and resources for the preparation of the Particular Conditions that will comply with the requirements of the applicable laws that apply to the site where the work is carried out, and for the governing law of the contract, for a number of the jurisdictions in which FIDIC contracts are used. This book is essential reading for construction professionals, lawyers and students of construction law.

Borders, Fences and Walls 2016-04-08 Elisabeth Vallet Twenty years after the fall of the Berlin Wall, the question remains 'Do good fences still make good neighbours'? Since the Great Wall of China, the Antonine Wall, built in Scotland to support Hadrian's Wall, the Roman 'Limes' or the Danevirk fence, the 'wall' has been a constant in the protection of defined entities claiming sovereignty, East and West. But is the wall more than an historical relict for the management of borders? In recent years, the wall has been given renewed vigour in North America, particularly along the U.S.-Mexico border, and in Israel-Palestine. But the success of these new walls in the development of friendly and orderly relations between nations (or indeed, within nations) remains unclear. What role does the wall play in the development of security and insecurity? Do walls contribute to a sense of insecurity as much as they assuage fears and create a sense of security for those 'behind the line'? Exactly what kind of security is associated with border walls? This book explores the issue of how the return of the border fences and walls as a political tool may be symptomatic of a new era in border studies and international relations. Taking a multidisciplinary approach, this volume examines problems that include security issues ; the recurrence and/or decline of the wall; wall discourses ; legal approaches to the wall; the 'wall industry' and border technology, as well as their symbolism, role, objectives and efficiency.

Mind, Values, and Metaphysics 2014-08-06 Anne Reboul There are three themed parts to this book: values, ethics and emotions in the first part, epistemology, perception and consciousness in the second part and philosophy of mind and philosophy of language in the third part. Papers in this volume provide links between emotions and values and explore dependency between language, meanings and concepts and topics such as the liar's paradox, reference and metaphor are examined. This book is the second of a two-volume set that originates in papers presented to Professor Kevin Mulligan, covering the subjects that he contributed to during his career. This volume opens with a paper by Moya, who proposes that there is an asymmetrical relation between the possibility of choice and moral responsibility. The first part of this volume ends with a description of foolishness as insensitivity to the values of knowledge, by Engel. Marconi's article makes three negative claims about relative truth and Sundholm notes shortcomings of the English language for epistemology, amongst other papers. This section ends with a discussion of the term 'subjective character' by Nida-Rümelin, who finds it misleading. The third part of this volume contains papers exploring topics such as the mind-body problem, whether theory of mind is based on simulation or theory and Künne shows that the most common analyses of the so-called 'Liar' paradox are wanting. At the end of this section, Rizzi introduces syntactic cartography and illustrates its use in scope-discourse semantics. This second volume contains twenty nine chapters, written by both high profile and upcoming researchers from across Europe, North America and North Africa. The first volume of this set has two main themes: metaphysics, especially truth-making and the notion of explanation and the second theme is the history of philosophy with an emphasis on Austrian philosophy.

Dispositif 2023-12-05 Greg Bird A ground-breaking anthology that places dispositifs ("apparatuses") at the center of contemporary thought. Dispositif is one of the most prevalent yet elusive terms in contemporary thought. This comprehensive anthology brings together formative, seminal, and contemporary texts and visual applications to illuminate how central dispositifs are to contemporary theory. Greg Bird and Giovanbattista Tusa's selection and placement of critical texts invite readers to explore common themes and genealogies, different interpretations and readings, and their diverse deployments across multiple disciplines and genres by such figures as Karl Marx, Franz Kafka, Judith Butler, Martin Heidegger, Gilbert Simondon, Michel Foucault, Edward Said, Jasbir Puar, Donna Haraway, Giorgio Agamben, Jacques Derrida, Tiqqun, Claire Fontaine, and many others. Dispositif: A Cartography is a true toolbox for the development of technological ecology thinking that accounts for situated knowledge. This collection provides coordinates for reorienting oneself in a permanently changing world, offering possible roadmaps for navigating these profoundly uncertain times. More than just a compilation of interventions on the dispositif, this volume acts as a guide for understanding the complex interaction between technology, philosophy, and the languages of the arts and media.

Ethics in Research 2023-03-18 Lorella Congiunti This book draws a connection between ethics and research across social sciences, philosophy, medical sciences and legal sciences, and demonstrates that any research activity needs to be conducted by means of rules deriving from the field of ethics. Although having a common core, such rules assume different characteristics depending on the branch of science, as the contributions on philosophy, medicine, dentistry, law, biotechnology, robotics and architecture highlight. It also investigates the more complex ethical concerns and places them in a larger, technological context. Starting with an introduction to common-sense ethical principles, the contributions then guide the reader, helping them develop and understand a comprehensive knowledge on the field. Notably, it appeared interesting to analyze recent events related to the arrival of the Sars-CoV-2 pandemic in light of ethical principles, highlighting in what terms their applicability can still be confirmed. Moreover, the book makes these topics accessible to a non-expert audience, while also offering alternative reading pathways to inspire more specialized readers.

Philosophical and Sociological Reflections on Labour Law in Times of Crisis 2022-05-13 Eduardo von Adamovich Starting from the assertion that crisis is part of the essence of labour law, this volume brings together researchers in the field who accepted the challenge to critically reflect on this branch of the discipline. As the COVID-19 pandemic has had a global impact, labour law across the world must come to terms with a new reality. In this context, it would be prudent to adapt to new circumstances by taking known paths. To this end, this book reflects on what effectively constitutes labour law, considering questions which are not usual within labour law. Insights from philosophical, sociological and even economic standpoints are mobilised to reconcile the past with the future of labour law.

ESG Integration and SRI Strategies in the EU 2023-10-25 Luca Spataro This book analyses sustainable finance policies implemented by the European Commission since January 2020. Gathering contributors from a range of European and international universities, it particularly aims to explore how EU strategy on green finance encourages and stimulates socially responsible investments that provide solutions to the challenges of the energy transition. The book provides a comprehensive coverage of economic, financial and legal issues concerning green finance and ESG factor integration in the EU. The first part of the book discusses theoretical and empirical perspectives on socially responsible investments (SRIs) and ESG integration, while the second section focuses specifically on the role of corporate governance in both institutional and private investment spheres. The third part of the book explores valuation and risk, including a discussion of current trends in SRI funding in the new European ESG Regulatory Framework. The final section of the book discusses legal and regulatory issues including an exploration of blue finance and its incorporation into EU financial strategy. This edited collection will be of interest to researchers and policymakers working in green finance, sustainability, energy economics and financial law.

The UN Convention on the Rights of Persons with Disabilities in Practice 2018-05-24 Lisa Waddington Introduced in 2008, the UN Convention on the Rights of Persons with Disabilities has existed for nearly a decade. This comprehensive study examines how courts in thirteen different jurisdictions make use of the Convention. The first sustained comparative international law analysis of the CRPD, Waddington and Lawsons ground breaking text illuminates the intersection between human rights law, disability law and international law through an examination of the role of courts. The first part of the book contains chapters specific to each jurisdiction. The second part consists of comparative chapters which draw on the rich analysis of the jurisdiction-specific chapters. These chapters reflect on emerging patterns of judicial usage and interpretation of the CRPD and on the wider implications for human rights theory and the nascent field of international comparative human rights law. This volume is a vital and thought-provoking addition to the literature on comparative international law and disability rights.

The Responsibility to Protect 2018-03-08 SONJA GROVER This book presents the views of various international law and human rights experts on the contested meaning, scope of application, value and viability of R2P; the principle of the Responsibility to Protect. R2P refers to the notion that the international community has a legal responsibility to protect civilians against the potential or ongoing occurrence of the mass atrocity crimes of genocide, large scale war crimes, ethnic cleansing and crimes against humanity. R2P allows for intervention where the individual State is unable or unwilling to so protect its people or is in fact a

perpetrator. The book addresses also the controversial issue of whether intervention by States implementing R2P with or without the endorsement of the United Nations Security Council constitutes a State act of aggression or instead is legally justified and not an infringement on the offending State's sovereign jurisdiction. The adverse impact on global peace and security of the failure to protect civilians from mass atrocity crimes has put in stark relief the need to address anew the principle of 'responsibility to protect' and the feasibility and wisdom of its application and this book is a significant contribution to that effort. This book was originally published as a special issue of the International Journal of Human Rights.

Justice as Improvisation 2013 Sara Ramshaw Justice as Improvisation: The Law of the Extempore theorises the relationship between justice and improvisation through the case of the New York City cabaret laws. Discourses around improvisation often imprison it in a quasi-ethical relationship with the authentic, singular 'other'. The same can be said of justice. This book interrogates this relationship by highlighting the parallels between the aporetic conception of justice advanced by the late French philosopher Jacques Derrida and the nuanced approach to improvisation pursued by musicians and theorists alike in the new and emerging interdisciplinary field of Critical Studies in Improvisation (CSI). Justice as Improvisation re-imagines justice as a species of improvisation through the formal structure of the most basic of legal mechanisms, judicial decision-making, offering law and legal theory a richer, more concrete, understanding of justice. Not further mystery or mystique, but a negotiation between abstract notions of justice and the everyday practice of judging. Improvisation in judgment calls for ongoing, practical decision-making as the constant negotiation between the freedom of the judge to take account of the otherness or singularity of the case and the existing laws or rules that both allow for and constrain that freedom. Yes, it is necessary to judge, yes, it is necessary to decide, but to judge well, to decide justly, that is a music lesson perhaps best taught by critical improvisation scholars.

Engaging with the Past, c.250-c.650 2023-04-18 Brian Croke Between c.250 and c.650, the way the past was seen, recorded and interpreted for a contemporary audience changed fundamentally. Only since the 1970s have the key elements of this historiographical revolution become clear, with the recasting of the period, across both east and west, as 'late antiquity'. Historiography, however, has struggled to find its place in this new scholarly world. No longer is decline and fall the natural explanatory model for cultural and literary developments, but continuity and transformation. In addition, the emergence of 'late antiquity' coincided with a methodological challenge arising from the 'linguistic turn' which impacted on history writing in all eras. This book is focussed on the development of modern understanding of how the ways of seeing and recording the past changed in the course of adjusting to emerging social, religious and cultural developments over the period from c.250 to c.650. Its overriding theme is how modern historiography has adapted over the past half century to engaging with the past between c.250 and c.650. Now, as explained in this book, the newly dominant historiographical genres (chronicles, epitomes, church histories) are seen as the preferred modes of telling the story of the past, rather than being considered rudimentary and naïve.

Maritime Law Evolving 2014-07-18 Malcolm Clarke To mark the 30th anniversary of the Institute of Maritime Law at Southampton University, current and former maritime law researchers came together to discuss the evolution of this fascinating area of law in the last 30 years and to stimulate discussion on its possible future. Their papers, edited by Professor Malcolm Clarke under the title Maritime Law Evolving, provide a series of thought-provoking essays on the most controversial and topical issues which have occupied maritime law researchers in the last three decades and which will continue to be at the heart of this ever-evolving discipline in the foreseeable future. The resulting work cuts across disciplines, spanning developments in areas as diverse as the management of the oceans and the evolution of the carriage and insurance sides of shipping law, including the ever-increasing influence of the European legislator in matters of conflict of laws and enforcement.

Filtering Populist Claims to Fight Populism 2021-11-25 Giuseppe Martinico Exploring Italy as a case study, this book investigates how populists in power manipulate categories and instruments of constitutional law.

Becoming Roman? 2016-06-16 Ralph Haeussler Few empires had such an impact on the conquered peoples as did the Roman empire, creating social, economic, and cultural changes that erased long-standing differences in material culture, languages, cults, rituals and identities. But even Rome could not create a single unified culture. Individual decisions introduced changes in material culture, identity, and behavior, creating local cultures within the global world of the Roman empire that were neither Roman nor native. The author uses Northwest Italy as an exemplary case as it went from a marginal zone to one of the most flourishing and strongly urbanized regions of Italy, while developing a unique regional culture. This volume will appeal to researchers interested in the Roman Empire, as well as those interested in individual and cultural identity in the past.

Jews and Christians in the First and Second Centuries: The Interbellum 70-132 CE 2017-10-02 Joshua J. Schwartz This volume discusses crucial aspects of the period between the two revolts against Rome in Judaea. This period saw the rise of rabbinic Judaism and the beginning of the split between Judaism and Christianity.

Novel Perspectives on Communication Practices in Antiquity 2022-11-14 Documents such as papyri and inscriptions are essential to our knowledge of ancient history in a broad sense. This volume turns the attention to the texts themselves, and explores in an interdisciplinary way how people communicated with each other in antiquity.

Italy's Jews from Emancipation to Fascism 2018-01-18 Shira Klein How did Italy treat Jews during World War II? Historians have shown beyond doubt that many Italians were complicit in the Holocaust, yet Italy is still known as the Axis state that helped Jews. Shira Klein uncovers how Italian Jews, though victims of Italian persecution, promoted the view that Fascist Italy was categorically good to them. She shows how the Jews' experience in the decades before World War II - during which they became fervent Italian patriots while maintaining their distinctive Jewish culture - led them later to bolster the myth of Italy's wartime innocence in the Fascist racial campaign. Italy's Jews experienced a century of dramatic changes, from emancipation in 1848, to the 1938 Racial Laws, wartime refuge in America and Palestine, and the rehabilitation of Holocaust survivors. This cultural and social history draws on a wealth of unexplored sources, including original interviews and unpublished memoirs.

The Medieval Salento 2014-03-10 Linda Safran Located in the heel of the Italian boot, the Salento region was home to a diverse population between the ninth and fifteenth centuries. Inhabitants spoke Latin, Greek, and various vernaculars, and their houses of worship served sizable congregations of Jews as well as Roman-rite and Orthodox Christians. Yet the Salentines of this period laid claim to a definable local identity that transcended linguistic and religious boundaries. The evidence of their collective culture is embedded in the traces they left behind: wall paintings and inscriptions, graffiti, carved tombstone decorations, belt fittings from graves, and other artifacts reveal a wide range of religious, civic, and domestic practices that helped inhabitants construct and maintain personal, group, and regional identities. The Medieval Salento allows the reader to explore the visual and material culture of a people using a database of over three hundred texts and images, indexed by site. Linda Safran draws from art history, archaeology, anthropology, and ethnohistory to reconstruct medieval Salentine customs of naming, language, appearance, and status. She pays particular attention to Jewish and nonelite residents, whose lives in southern Italy have historically received little scholarly attention. This extraordinarily detailed visual analysis reveals how ethnic and religious identities can remain distinct even as they mingle to become a regional culture.

Gender Studies, Entrepreneurship and Human Capital 2020-07-08 Paola Paoloni In today's climate, academics, professional community and policy makers all have input in critical gender issues, as well as in the entrepreneurship and human capital issues. Various gender issues are published involving many scientific fields, including business, management and accounting research. Presenting the topic of gender issues, entrepreneurship and human capital, this book collects the main output of the researches presented at the Annual Workshop of IPAZIA 2019 of Rome in Italy. The authors provide a renewed and fruitful analysis of these topics, with the purpose of advancing the gender theories in the international context.

Sociological Debates on Gestational Surrogacy 2021-10-31 Daniela Bandelli This open access book discusses and analyses competing views and social implications of gestational surrogacy, which is making inroads as an option for parenthood as well as a work opportunity for women. It provides a rich account of transnational mobilizations for the abolition and regulation of surrogacy, with focus on United States, Italy and Mexico. The author critically assesses the core narratives of supporters and opponents of surrogacy, in order to understand this reproductive practice in light of some of the essential elements of contemporary societies, such as the "child at any cost" culture, individualism, technology and female emancipation. This book appeals to scholars, policy makers and all those who want to understand the controversial debate on this unprecedented method of family formation and life production.

Images of Europe 2021-05-20 Francesco Mangiapane This book deals with the fundamental semantics of images of Europe, which consist of valences, mirror beliefs and affectivities. This is why it relaunches the importance of the European discourse in its symbolic dimension. As such, it explores the many images of Europe, or rather the many images through which European discourse is actually constituted in daily life, in search of their enunciative responsibility in today's world for determining the current "State of the Union". The identity of the European continent is based on a millenary tension between universalism and particularism: images of Europe have in fact been alternately inspired, over the centuries, by a model of homogeneity – Roman and Carolingian imperial disposition – on the one hand, and by a model of fragmentation – a Europe of city-states, municipalities, regions and small fatherlands – on the other. In the European Union, a political and economic organism, this issue has recently been amplified to the point that it has reentered public debate, and political parties that are only recognizable for being Europeanists or anti-Europeanists are now ubiquitous. In this regard, one major bone of contention is how to portray the quintessential aspects of the European territory, which are either interpreted as "thresholds" to be overcome in the name of a model of United Europe – "integral totality" – or are instead regarded as insurmountable obstacles for a Europe that is irreparably and perhaps, according to anti-Europeanists, fortunately fragmented – "partitive totality". Further, this is to be done without excluding the possibility of contradictory and complementary solutions to these binary visions. In this context the book analyzes various texts in order to obtain a more precise picture of the clash, reveal its semiotic forms, and by doing so, identify a way out of the crisis.

Diplomacy and the Aristocracy as Patrons of Music and Theatre in the Europe of the Ancien Régime 2019-11-15 Iskrena Yordanova This volume explores the dense networks created by diplomatic relationships between European courts and aristocratic households in the early modern age, with the emphasis on celebratory events and the circulation of theatrical plots and practitioners promoted by political and diplomatic connections. The offices of plenipotentiary ministers were often outposts providing useful information about cultural life in foreign countries. Sometimes the artistic strategies defined through the exchanges of couriers were destined to leave a legacy in the history of arts, especially of music and theatre. Ministers favored or promoted careers, described or made pieces of repertoire available to new audiences, and even supported practitioners in their difficult travels by planning profitable tours. They stood behind extraordinary artists and protected many stage performers with their authority, while carefully observing and transmitting precious information about the cultural and musical life of the countries where they resided.

Linguistic Variation: Structure and Interpretation 2019-12-16 Ludovico Franco In this volume scholars honor M. Rita Manzini for her contributions to the field of Generative Morphosyntax. The essays in this book celebrate her career by continuing to explore inter-area research in linguistics and by pursuing a broad comparative approach, investigating and comparing different languages and dialects.

From Darkness to Light: Writers in Museums 1798-1898 2019 Katherine Manthorne "From Darkness to Light" explores from a variety of angles the subject of museum lighting in exhibition spaces in America, Japan, and Western Europe throughout the nineteenth and twentieth centuries. Written by an array of international experts, these collected essays gather perspectives from a diverse range of cultural sensibilities. From sensitive discussions of Tintoretto's unique approach to the play of light and darkness as exhibited in the Scuola Grande di San Rocco in Venice, to the development of museum lighting as part of Japanese artistic self-fashioning, via the story of an epic American painting on tour, museum illumination in the work of Henry James, and lighting alterations at Chatsworth (to name only a few topics) this book is a treasure trove of illuminating contributions. The collection is at once a refreshing insight for the enthusiastic museum-goer, who is brought to an awareness of the exhibit in its immediate environment, and a wide-ranging scholarly compendium for the professional who seeks to proceed in their academic or curatorial work with a more enlightened sense of the lighted space."--Publisher's website.

Banking Supervision and Criminal Investigation 2019-08-22 Giulia Lasagni In the aftermath of the last financial crisis, on both sides of the Atlantic banking supervisors were given new supervisory and enforcement powers, which are often of a substantially punitive-criminal nature. In Europe in particular, the establishment of the Single Supervisory Mechanism within the European Central Bank substantially increased centralised investigatory and sanctioning powers. This major innovation, together with the development of forms of real-time monitoring of banking (often digital) records, challenges traditional banking criminal investigations in their national-based and analogue dimension. The book offers a comprehensive account and perspective analysis of the interactions between the criminal and administrative nature of such new powers, highlighting their "punitive" overall nature and their impact on fundamental rights. Covering both the US and the EU regulatory frameworks, it presents unprecedented, trans-systemic research between criminal law and procedure, and between regulatory and administrative law, at the international, European and national level. The book also includes a rich and detailed selection of case law from the US and the European supreme courts, with a specific focus on CJEU and ECtHR decisions.

The Impact of Plain Language on Legal English in the United Kingdom 2022-08-23 Christopher Williams This volume offers insights into the ways in which plain language has influenced the language of the law in the United Kingdom, critically reflecting on its historical development and future directions. The book opens with an overview of the theoretical frameworks underpinning plain language and a brief history of plain language initiatives as a foundation from which to outline ongoing debates on the opportunities and challenges of using plain language in the legal domain. The volume details strands where plain language has had considerable impact thus far on legal English in the UK, notably in legislative drafting, but it also explores areas in which plain language has made fewer inroads, such as the language of court judgments and that of online terms and conditions. The book looks ahead to unpack highly topical areas within the plain language debate, including the question of design and visualisation and the ramifications of digitalisation, contributing to ongoing conversations on the importance of plain language both in the UK and beyond. This book will be of particular interest to students and scholars interested in the intersection of language and the law as well as related disciplinary areas such as applied linguistics and English for Specific Purposes.
