Dunn and Douglas M. Dunn, the evaluation is designed to evaluate vocabulary comprehension for American English. It is quick and simple to administer, saving important time so that concentration can be set on implementing intelligent strategies. The PPVT-4 evaluation content encompasses a extensive scope of vocabulary comprehension levels, ranging from preschool through adulthood. The assessment items extensively feature words that represent 20 topic areas (e.g., actions, vegetables, tools), speech parts (nouns, verbs, attributes), and home and school vocabulary. The test offers two equivalent forms which hold various vocabulary words, ensuring that the person has not "learned" the evaluation. One form can be employed before intervention to measure individuals' vocabulary understanding and the second form can be utilized for re-assessment to assess and record progress. The PPVT-4 also includes a unique Growth Scale Value (GSV) which is responsive to minor changes with time.
