On the Donation of Constantine
2008 Lorenzo Valla Valla (1407-1457) was the most important theorist of the humanist movement. His most famous work is the present volume, an oration in which Valla uses new philological methods to attack the authenticity of the most important document justifying the papacy's claims to temporal rule.

The Ecocriticism Reader

1996 Cheryll Glotfelty This book is the first collection of its kind, an anthology of classic and cutting-edge writings in the rapidly emerging field of literary ecology. Exploring the relationship between literature and the physical environment, literary ecology is the study of the ways that writing - from novels and folktales to U.S. government reports and corporate advertisements - both reflects and influences our interactions with the natural world.

Writing Architectural History

2021-12-14 Aggregate Architectural History Collective Over the past two decades, scholarship in architectural history has transformed, moving away from design studio pedagogy and postmodern historicism to draw instead from trends in critical theory focusing on gender, race, the environment, and more recently global history, connecting to revisionist trends in other fields. With examples across space and time—from medieval European coin trials and eighteenth-century Haitian revolutionary buildings to Weimar German construction firms and present-day African refugee camps—Writing Architectural History considers the impact of these shifting institutional landscapes and disciplinary positionings for architectural history. Contributors reveal how new methodological approaches have developed interdisciplinary research beyond the traditional boundaries of art history departments and architecture schools, and explore the challenges and opportunities presented by conventional and unorthodox forms of evidence and narrative, the tools used to write history.

Spatial and Temporal Dimensions for Legal History

2016-07-01 Massimo Meccarelli <http://dx.doi.org/10.12946/gplh6http://www.epubli.de/shop/buch/53894>"The spatiotemporal conjunction is a fundamental aspect of the juridical reflection on the historicity of law. Despite the fact that it seems to represent an issue directly connected with the question of where legal history is heading today, it still has not been the object of a focused inquiry. Against this background, the book’s proposal consists in rethinking key confluences related to this problem in order to provide coordinates for a collective understanding and dialogue. The aim of this volume, however, is not to offer abstract methodological considerations, but rather to rely both on concrete studies, out of which a reflection on this conjunction emerges, as well as on the reconstruction of certain research lines featuring a spatiotemporal component. This analytical approach makes a contribution by providing some suggestions for the employment of space and time as coordinates for legal history. Indeed, contrary to those historiographical attitudes reflecting a monistic conception of space and time (as well as a Eurocentric approach), the book emphasises the need for a delocalized global perspective. In general terms, the essays collected in this book intend to take into account the multiplicity of the spatiotemporal confines, the flexibility of those instruments that serve to create chronologies and scenarios, as well as certain processes of adaptation of law to different times and into different spaces. The spatiotemporal dynamism enables historians not only to detect new perspectives and dimensions in foregone themes, but also to achieve new and compelling interpretations of legal history. As far as the relationship between space and law is concerned, the book analyses experiences in which space operates as a determining factor of law, e.g. in terms of a field of action for law. Moreover, it outlines the attempted scales of spatiality in order to develop legal historical research. With reference to the connection between time and law, the volume sketches the possibility of considering the factor of time, not just as a descriptive tool, but as an ascriptive moment (quasi an inner feature) of a legal problem, thus making it possible to appreciate the synchronic aspects of the 'juridical experience'. As a whole, the volume aims to present spatiotemporality as a challenge for legal history. Indeed, reassessing the value of the spatiotemporal coordinates for legal history implies thinking through both the thematic and methodological boundaries of the discipline."

To the Uttermost Parts of the Earth

2021-08-26 Martti Koskenniemi To the Uttermost Parts of the Earth shows the vital role played by legal imagination in the formation of the international order during 1300–1870. It discusses how European statehood arose during early modernity as a locally specific combination of ideas about sovereign power and property rights, and how those ideas expanded to structure the formation of European empires and consolidate modern international relations. By connecting the development of legal thinking with the history of political thought and by showing the gradual rise of economic analysis into predominance, the author argues that legal ideas from different European legal systems - Spanish, French, English and German - have played a prominent role in the history of global power. This history has emerged in imaginative ways to combine public and private power, sovereignty and property. The book will appeal to readers crossing conventional limits between international law, international relations, history of political thought, jurisprudence and legal history.

White on Arrival

2004-09-30 Thomas A. Guglielmo Taking the mass Italian immigration of the late 19th century as his starting point and drawing on dozens of oral histories and a diverse array of primary sources in English and Italian, Guglielmo focuses on how perceptions of Italians' race and color were shaped in one of America's great centers of immigration and labor, Chicago. His account skillfully weaves together the major events of Chicago immigrant history—the "Chicago Color Riot" of 1919, the rise of Italian organized crime, and the rise of industrial unionism—with national and international events—such as the rise of fascism and the Italian-Ethiopian War of 1935-36—to present the story of how Italians approached, learned, and lived race. By tracking their evolving position in the city's racial hierarchy, Guglielmo reveals the impact of racial classification—both formal and informal—on immigrants' abilities to acquire homes and jobs, start families, and gain opportunities in America. White on Arrival was the winner of the 2004 Frederick Jackson Turner Award of the Organization of American Historians

Ecocriticism and Italy

2016-01-28 Serenella Iovino Winner of the MLA Aldo and Jeanne Scaglione Prize for Italian Studies 2016 Winner of the American Association for Italian Studies Book Prize 2016 This book is available as open access through the Bloomsbury Open Access programme and is available on www.bloomsburycollections.com. Written by one of Europe's leading critics, Ecocriticism and Italy reads the diverse landscapes of Italy in the cultural imagination. From death in Venice as a literary trope and petrochemical cure, through the volcanoes of Naples to wine, food and environmental violence in Piedmont, Serenella Iovino explores Italy as a text where ecology and imagination meet. Examining cases where justice, society and politics interlace with stories of land and life, pollution and redemption, the book argues that literature, art and criticism are able to transform the unexpressed voices of these suffering worlds into stories of resistance and practices of liberation.

Project 1816 2016 due secoli di rapporti italo:Space Battles that Altered Past

It had been the time 23, and the world was on the edge of battle. The United States and PRC, the two world powers, were engaged in a ferocious rivalry, competing for resources, influence, and dominance. They had both engineered sophisticated weapons, like laser weapons, drones, and spacecrafts, which could attack any place, any time. They had also secretly built orbital stations, which can fire nuclear missiles, which can destroy the earth. They were both prepared to use them, if ever necessary. But they were not the only ones. There was a 3rd entity, a secret entity, which had watching them both, waiting for them, getting ready for them. They were the extraterrestrials, and they had come come to halt them. They had come to protect the earth, or to end it all. They had come come to begin the star wars that altered past.

Nightmare that Never Ends

Sam awoke with a scream, his body drenched in perspiration. The same terrifying nightmare had once again tormented his sleep, the one where he was hunted by a shadowy figure wielding a knife. He glanced at the clock; it was 3:15 am. He tried to calm his thundering heart, attempting to convince himself that it was merely a product of his subconscious. Yet, deep down, he knew it was far more than that. He knew the enigmatic figure was existent, and it was moving relentlessly towards him. He had seen it before, in the frightening news reports, in the detailed police sketches, in the despairing faces of the victims. It was the notorious serial killer that had been terrorizing the city for what seemed like an eternity. And Sam was the killers next victim.

Project 1816 2016 due secoli di rapporti italo:The field of Engineering Economics and Cost Estimation is a vital aspect of any engineering project. It involves present and future economic factors, making it vital to obtain dependable estimates of future costs, benefits, and other economic parameters. Engineers regularly deal with projects whose scale, complexity, and uncertainty call for complex approaches to planning and budgeting[²][1]. Various methods are used for cost estimation, including rough estimates, semi-detailed estimates, or detailed estimates, depending on the needs for the estimates[¹][2]. Key concepts in this field include overhead costs, cost driver identification, cost allocation methods, capital budgeting, flexible budgeting, zero-based budgeting, budgets, and estimates. A number of models are available for developing cost (or benefit) estimates, such as the per-unit model, the segmenting model, cost indexes, the power-sizing model, and learning curve cost estimating. The quality of a cost estimate generally increases as the resources allocated to developing the estimate increase.

Journey of a Thousand Miles

He was tired of his existence. He was dull, unhappy, and unfulfilled. He had a employment he detested, a boss he despised, and a girlfriend he didn't cherish. He had no zeal, no aim, no value. He believed like he was squandering his moment, his potential, his life. He wished to change, he desired to flee, he wished to survive. He chose to leave his employment, to split up with his partner, to get rid of his possessions, and to acquire a one-way pass to the opposite end of the earth. He didn't realize where he was heading, he didn't know what he was doing, he didn't understand what he was searching for. He only knew that he had to go, that he had to discover, that he had to discover. He started on a trip of a thousand kilometers, a journey of thrill, of challenge, of learning, of development, of alteration.
