The Peabody Picture Vocabulary Test 4th Edition (PPVT-4) is a highly regarded vocabulary assessment that has been in practice for almost 50 years. Formulated by Lloyd M. Dunn and Douglas M. Dunn, the evaluation is made to assess vocabulary comprehension for American English. It is quick and simple to carry out, preserving important time so that focus can be set on implementing intelligent strategies.

The PPVT-4 assessment material includes a extensive scope of vocabulary comprehension levels, extending from preschool through adulthood. The evaluation questions broadly sample words that represent 20 content fields (e.g., actions, vegetables, tools), parts of speech (nouns, verbs, attributes), and home and school vocabulary.

The assessment provides two equal forms which contain various vocabulary items, making sure that the test-taker has not “memorized” the assessment. One version can be employed ahead of intervention implementation to evaluate people’s vocabulary knowledge and the second version can be used for re-testing to assess and record progress. The PPVT-4 also includes a unique Growth Scale Value (GSV) which is responsive to small changes over time.
