Challenging the Boycott, Divestment and Sanctions (BDS) Movement 2023-02-13 Ronnie Fraser Challenging the Boycott, Divestment and Sanctions (BDS) Movement focuses on the efforts to oppose antisemitism, the academic boycott, and the BDS movement. The State of Israel has faced many threats, most of them military, since it was established in 1948, but the threat posed by the NGO forum at the United Nations World Conference against Racism in Durban, South Africa, in August 2001 was different. The forum unleashed the "new" antisemitism which targeted the State of Israel, as well as a non-violent, civil society-based campaign based on the South African anti-apartheid campaign of the 1980s – which was to form the basis of the international Boycott, Divestment and Sanctions (BDS) movement directed at the State of Israel. Featuring case studies from the United States, Great Britain, Israel, and South Africa, each chapter of this wide-ranging volume discusses examples of opposition to the divisive BDS campaign and the proposed academic boycott of Israel over the last two decades, including the fight for formal recognition of the "new" antisemitism by governments and international bodies and the use of a variety of legal measures. The rise of antisemitism within academia and wider society is also examined. This book will be vital reading for students, scholars, and activists with an interest in social movements, Israel, and Middle East politics and history.

Measuring L2 Proficiency 2014-07-01 Pascale Leclercq The creation of the Common European Framework of Reference for Languages (CEFR) has given rise to interest and debate among policy makers, testers, teachers and researchers alike in the reliability and feasibility of the assessment of second language (L2) proficiency. This volume brings together concrete ideas on identifying and measuring L2 proficiency from different branches of SLA research (psycholinguistic, sociolinguistic, corpus-based, applied linguistics) to contribute to a deeper understanding of what it means to be proficient in an L2. The chapters introduce a wide range of tools that are innovative, reliable, and easy-to-use for the evaluation of learners' language level with respect to both productive and receptive skills and provide a variety of answers to the question of how to assess L2 proficiency in a valid, reliable and practical manner. The collection will therefore inspire language teachers, teacher trainers and language testing specialists and help them adapt their assessment practices when necessary, and will also be a valuable resource for postgraduate students and researchers.

South Asia in Global Power Rivalry 2019-06-07 Imtiaz Hussain This edited volume examines global power-rivalry in and around South Asia through Bangladeshi lenses using imperfect and overlapping interest concentric-circles as a template. Dynamics from three transitions –the United States exiting the Cold War, China emerging as a global-level power, and India's eastern interests squaring off with China's Belt Road Initiative, BRI–help place China, India, and the United States (in alphabetical order) in Bangladesh's "inner-most" circle, China, India, and the United States in a "mid-stream" circle, and the United States and Latin America, among other countries, in the "outer-most" circle, depending on the issue. In an atmosphere of short-term gains over-riding long-term considerations, the desperate, widespread search for infrastructural funding inside South Asia enhances China's value, raises local heat, releases new challenges, with costly default consequences looming, issue-specific analysis overtaking formal bilateral relations and a stubborn uncertainty riddling the Bangladeshi air as its policy preferences stubbornly show more certainty.

Intellectual Property in Global Governance 2013-03 Chidi Oguamanam Intellectual Property in Global Governance critically examines the evolution of international intellectual property law-making from the build up to the TRIPS Agreement, through the TRIPS and post-TRIPS era. The book focuses on a number of thematic intellectual property issue linkages, exploring the formal and informal institutional interactions and multi-stakeholder holder intrigues implicated in the global governance of intellectual property. Using examples from bio-technology, bio-diversity, bio-prospecting and bio-piracy it investigates the shift or concentration in the focus of innovation from physical to life sciences and the ensuing changes in international intellectual property law making and their implications for intellectual property jurisprudence. It examines the character of the reception, resistance and various nuanced reactions to the changes brought about by the TRIPS Agreement, exploring the various institutional sites and patterns of such responses, as well as the escalation in the issue-linkages associated with the concept and impact of intellectual property law. Drawing upon multiple methodological approaches including law and legal theory; regime theory, globalization and global governance Chidi Oguamanam explores the intellectual property dynamics in the "Global Knowledge Economy" focusing on digitization and information revolution phenomenon and the concept of a post-industrial society. The book articulates an agenda for global governance of intellectual property law in the 21st century and speculates on the future of intellectual property in North-South relations.

Scaling Impact 2023-02-01 Kuisami Hornberger The global challenges confronting us – climate change, poverty, inequality, and many others – can feel overwhelming. Those of us who believe in market-based solutions to these challenges get even more disheartened when we regularly see our existing capitalist system failing us, often causing more harm than good. Many examples show how the capitalist tools of finance and investment can and make real, positive impact. Approaches like blended finance and impact investing can help accelerate progress against the world's biggest remaining collective challenges. Yet use of these improved capitalist approaches remains far too subscale. Blended finance and impact investing remain 15 to 200 times smaller than traditional approaches to finance and investment. How can we continue to make capitalism work better by scaling these approaches and others? This book looks at how we can start making these necessary changes using strategies, structures, and practices that take advantage of capitalism's strengths. Its goal is to demonstrate how a reimaged financial system can be more inclusive and accountable to all. By shifting away from extractive, short-term practices in the name of shareholder primacy, we can move toward a system that values the role of all stakeholders.

Medical Biochemistry (Questions with Explanatory Answers) RAJESHWAR REDDY This book is a comprehensive, short textbook. It presents the subject in a simple and easily understandable language, written in a concise, flexible and question and answer format. The book is intended to cover topics most commonly tested. It contains everything students need to know and to succeed undergraduate, PLAB and USMLE examinations. It is compiled and edited as per the syllabus prescribed by Medical Council of India and based on the question papers of Rajiv Gandhi University of Health Sciences, Bangalore. Though the book is mainly useful for MBBS, BDS and B.Sc (Nursing) students, it is also immensely useful for all other students of biochemistry.

Advancing Environmental Justice for Marginalized Communities in India 2021-09-17 Alan Diduck This interdisciplinary collection examines social equity and environmental justice in India. It assesses the effectiveness of environmental policies and institutions in rendering justice for marginalized communities while ensuring protection of the environment. It also analyses the influence of the neoliberal state and its political economies on the development and outcomes of these policies and institutions. The book provides a unique perspective on environmental justice because of its consistent emphasis on social justice, rather than the prevailing predominant analyses from legal or environmental perspectives. It explores the themes of effectiveness and equity as they pertain to public policy instruments, such as environmental impact assessment, environmental licensing and enforcement, public hearings, and environmental activism strategies. The four interlinked dimensions of environmental justice, namely recognitional justice, procedural justice, distributive justice, and restorative justice, provide the core of the book's conceptual framework. The contributions draw on ideas and methods from development studies, environmental geography, environmental law and policy, natural resource management, public administration, and political economy The book concludes by considering planning, policy and institutional reforms and community-based initiatives that are needed to promote and protect environmental justice in India. Offering an important reference for researchers and scholars, this book will appeal to those in law, geography, environmental studies, natural resource management, development studies, sociology, and political science. It will also be of interest to community-based researchers, environmentalists and other civil society activists, natural resource managers, and policy makers.

Strengthening American Manufacturing 2013-10-03 Committee on 21st Century Manufacturing: The Role of the Manufacturing Extension Partnership Program of the National Institute of Standards and Technology The Manufacturing Extension Partnership (MEP)-- a program of the U.S. Department of Commerce's National Institute of Standards and Technology (NIST)-- has sought for more than two decades to strengthen American manufacturing. It is a national network of affiliated manufacturing extension centers and field offices located throughout all fifty states and Puerto Rico. Qualified MEP Centers work directly with small and medium manufacturing firms in their state or sub-state region, providing expertise, services and assistance directed to foster growth, improve supply chain positioning, leverage emerging technologies, upgrade manufacturing processes, develop work force training, and apply and implement new information. Strengthening American Manufacturing: The Role of the Manufacturing Extension Partnership is the summary of a symposium convened to review current operations and some of the recent MEP initiatives in the broader context of global manufacturing trends and the opportunities for high-value manufacturing companies. Business leaders, academic experts, and state and federal officials addressed the metrics and impacts of MEP and identified potential areas of improvement. The meeting drew attention to the scale and focuses of MEP, and highlighted the role it plays in supporting and enabling U.S. manufacturers to compete more effectively in the global marketplace. This report includes an overview of key issues raised at this workshop and a detailed summary of the conference presentations.

Indo-Pacific Strategies and Foreign Policy Challenges 2023-06-30 Hyun Ji Rim This book examines key issue areas of Indo-Pacific strategies such as cyber security, space security, maritime security, emerging technologies, and institutional frameworks in the context of deepening US–China rivalry. With greater interconnectedness across various fields, the Indo-Pacific region faces greater security challenges including future strategic power competition. States are increasingly engaging in intense strategic activities and strengthening partnerships. The first part of book focuses on the strategic competition between the United States and China in different areas including cyber security, space security, maritime security, emerging technologies, and institutional frameworks. The second part of the book presents the perspectives of different local actors in the regional theatre and the intentions and concepts behind their growing interconnectedness under Indo-Pacific strategies, including China, Russia, Taiwan, Hong Kong, and North Korea. Through examining different aspects of US–Indo-Pacific strategy, this edited book contributes to a better understanding of Indo-Pacific strategy and its implications for broader security cooperation in a more interconnected world. The book will be of interest to scholars and policy makers working on Asian Security, Politics, International Relations, and the security dynamics of East Asia and the Indo-Pacific.

Hello World: Being Human in the Age of Algorithms 2018-09-18 Hannah Fry Shortlisted for the 2018 Royal Society Investment Science Book Prize A look inside the algorithms that are shaping our lives and the dilemmas they bring with them. If you were accused of a crime, who would you rather decide your sentence—a mathematically consistent algorithm incapable of empathy or a compassionate human judge prone to bias and error? What if you want to buy a driverless car and must choose between one programmed to save as many lives as possible and another that prioritizes the lives of its own passengers? And would you agree to share your family’s full medical history if you were told that it would help researchers find a cure for cancer? These are just some of the dilemmas that we are beginning to face as we approach the age of the algorithm, when it feels as if the machines reign supreme. Already, these lines of code are telling us what to watch, where to go, whom to date, and even whom to send to jail. But as we rely on algorithms to automate big, important decisions—in crime, justice, healthcare, transportation, and money—they raise questions about what we want our world to look like. What matters most: Helping doctors with diagnosis or preserving privacy? Protecting victims of crime or preventing innocent people being falsely accused? Hello World takes us on a tour through the good, the bad, and the downright ugly of the algorithms that surround us on a daily basis. Mathematician Hannah Fry reveals their inner workings, showing us how algorithms are written and implemented, and demonstrates the ways in which human bias can literally be written into the code. By weaving in relatable, real world stories with accessible explanations of the underlying mathematics that power algorithms, Hello World helps us to determine their power, expose their limitations, and examine whether they really are improvement on the human systems they replace.

Practical Process Research and Development 2012-04-09 Neal G. Anderson Designed to provide a comprehensive, step-by-step approach to organic process research and development in the pharmaceutical, fine chemical, and agricultural chemical industries, this book describes the steps taken, following synthesis and evaluation, to bring key compounds to market in a cost-effective manner. It describes hands-on, step-by-step, approaches to solving process development problems, including route, reagent, and solvent selection; optimising catalytic reactions; chiral syntheses; and "green chemistry." Second Edition highlights: . Reflects the current thinking in chemical process R&D for small molecules . Retains similar structure and orientation to the first edition. . Contains approx. 85% new material . Primarily new examples (work-up and prospective considerations for pilot plant and manufacturing scale-up) . Some new/expanded topics (e.g. green chemistry, genotoxins, enzymatic processes) . Replaces the first edition, although the first edition contains useful older examples that readers may refer to Provides insights into generating rugged, practical, cost-effective processes for the chemical preparation of "small molecules" Breaks down process optimization into route, reagent and solvent selection, development of reaction conditions, workup, crystallizations and more Presents guidelines for implementing and troubleshooting processes

Eva had always been fascinated by magic, but she never expected to find out that she was a witch. She had grown up in a normal family, in a normal town, with no signs of anything supernatural. But on her sixteenth birthday, everything changed. She received a mysterious package from her grandmother, who had died years ago. Inside was a leather-bound book with the words "The Book of Shadows" engraved on the cover. Eva opened it and felt a surge of power run through her veins. She realized that the book contained the secrets of her family’s magical heritage, and that she was the last of a long line of powerful witches. But she also learned that she was not alone. There were others like her, and some of them wanted to use their magic for evil. Eva had to decide whether to embrace her destiny as a witch, or to reject it and live a normal life. But either way, she knew that her life would never be the same again.

Research Methods for Education in the Digital Age 2017-01-12 Maggi Savin-Baden What is research in education? And what is it for in a digital age? Reflecting upon these questions, this engaging introduction provides critical discussion about the dilemmas of researching education in the digital age and ways forward for research in this complex area. Research Methods for Education in the Digital Age begins by outlining forms of education that are seen as digital, such as virtual, blended, immersive learning and examining the extent to which these are different or just adapted versions of earlier methods and approaches to education. Maggi Savin-Baden and Gemma Tombs explore current practices in research, identifying the successful adoption and adaption of theories and present practical guidance on new and emerging methodologies, methods, and analytical practices for undertaking educational research. New methodologies discussed include digital arts-based inquiry and digital visual methodologies, as well as adaptations of widely used methodologies such as ethnography, for the specific needs of researching digital teaching and learning. The book outlines the major challenges faced by today’s digital researchers, exploring approaches to digital ethics, the relationship between qualitative and quantitative data in the digital age, digital data representations and portrayal and suggests helpful ways of dealing with the complexities and ethical challenges of undertaking research in and for digital spaces. Using case studies, research tips, a glossary and annotated further reading, the authors take a step by step approach from conceptualizing the research ideas, selecting the appropriate method to the dissemination of the findings. At a time when education is changing rapidly with digital and technological advances, Research Methods for Education in the Digital Age is essential reading for researchers wanting to undertake sound and rigorous research in the digital domain.

Decolonial Solidarity in Palestine-Israel 2021-06-17 Teodora Todorova Recent years have seen the Israeli state become ever more extreme in its treatment of Palestinians, manifested both in legislation stripping Palestinians of their rights and in the escalating scale and violence of the Israeli occupation. But this hard-line stance has in turn provoked a new spirit of dissent among a growing number of Israeli scholars and civil society activists. As well as recognising Palestinian claims to justice and self determination, this new dissent is characterised by calls for genuine decolonisation and an end to partition, as opposed to the now discredited 'two state solution.' Through the analytical lens of settler colonial studies, this book examines the impact of this new 'decolonial solidarity' through case studies of three activist groups: Zochrot, Anarchists Against the Wall, and the Israeli Committee Against House Demolitions (ICAHD). In doing so, Todorova extends the framework of settler colonial studies beyond scholarly analysis and into the realm of activist practice. She also looks at how decolonial solidarity has shaped, and been influenced by, the writings of both Palestinian and Israeli theorists. The book shows that new forms of civil society activism, bringing together Palestinian and Israeli activists, can rejuvenate the resistance to occupation and the Israeli state's growing authoritarianism.

The Innovative Business School 2020-11-01 Daphne Halkias The Innovative Business School formulates a blueprint for the innovative business school of the next decade, with proposed areas of innovation which will train executives to transform the coming technological disruptions into an avenue for world economic development and prosperity. Offering a new model of business education, the book maps the way forward for business school innovators in exploring questions related to innovation and strategy needed on the part of academic and industry leaders and educators across demographic divides. The chapters cover an overall international and cross-cultural approach in examining the factors at play for business schools of the future and the challenges they face across a range of megatrends affecting today’s business environment. The authors impress the need for stakeholders to strategically engage others in the business and education ecosystems through commitment to experimentation, innovation, and sustainable business strategy. Identifying such opportunities for development of a new model for business schools is important to educators and policymakers in preparing to leverage and contribute to existing megatrends to create shared value for regional economies and in new directions. The Innovative Business School is written for business schools' management and decision-makers, related stakeholders, universities, accreditation agencies, and postgraduate students.

Eva had always been fascinated by magic, but she never expected to find out that she was a witch. She had grown up in a normal family, in a normal town, with no signs of anything supernatural. But on her sixteenth birthday, everything changed. She received a mysterious package from her grandmother, who had died years ago. Inside was a leather-bound book with the words "The Book of Shadows" engraved on the cover. Eva opened it and felt a surge of power run through her veins. She realized that the book contained the secrets of her family's magical heritage, and that she was the last of a long line of powerful witches. But she also learned that she was not alone. There were others like her, and some of them wanted to use their magic for evil. Eva had to decide whether to embrace her destiny as a witch, or to reject it and live a normal life. But either way, she knew that her life would never be the same again.
