Cretomania 2017-07-05 Alexandre Farnoux Since its rediscovery in the early 20th century, through spectacular finds such as those by Sir Arthur Evans at Knossos, Minoan Crete has captured the imagination not only of archaeologists but also of a wider public. This is shown, among other things, by its appearance and uses in a variety of modern cultural practices: from the innovative dances of Sergei Diaghilev and Ted Shawn, to public and vernacular architecture, psychoanalysis, literature, sculpture, fashion designs, and even neo-pagan movements, to mention a few examples.Cretomania is the first volume entirely devoted to such modern responses to (and uses of) the Minoan past. Although not an exhaustive and systematic study of the reception of Minoan Crete, it offers a wide range of intriguing examples and represents an original contribution to a thus far underexplored aspect of Minoan studies: the remarkable effects of Minoan Crete beyond the narrow boundaries of recondite archaeological research.The volume is organised in three main sections: the first deals with the conscious, unconscious, and coincidental allusions to Minoan Crete in modern architecture, and also discusses archaeological reconstructions; the second presents examples from the visual and performing arts (as well as other cultural practices) illustrating how Minoan Crete has been enlisted to explore and challenge questions of Orientalism, religion, sexuality, and gender relations; the third focuses on literature, and shows how the distant Minoan past has been used to interrogate critically more recent Greek history.

This Sacred Earth 2003-11-07 Roger S. Gods, Heroes and Tyrants 2009 Emmet John Sweeney Early Greek history as found in the textbooks leaves spurious "dark age" gaps where the evidence fails to match historians' fixed ideas. Dramatic claims regarding everything from the Trojan War to the "Mask of Agamemnon" are argued in detail from both an archaeological and a literary perspective, unraveling historical conundrums that have stumped classicists for generations.

From the Bodies of the Gods 2012-05-16 Earl Lee The origins of modern religion in human sacrifice, ritual cannibalism, visionary intoxication, and the Cult of the Dead • Explores ancient practices of producing sacred hallucinogenic foods and oils from the bodies of the dead for ritual consumption and religious anointing • Explains how these practices are deeply embedded in the symbolism, theology, and sacraments of modern religion, specifically Christianity and the Eucharist • Documents the rites of Cults of the Dead from the prehistoric Minoans on Crete to the ancient Egyptians, Greeks, and Hebrews to early and medieval Christian sects such as the Cathars Long before the beginnings of civilization, humans have been sacrificed and their flesh used to produce sacred foods and oils for use in religious rites. Originating with the sacred harvest of hallucinogenic mushrooms from the corpses of shamans and other holy men, these acts of ritual cannibalism and visionary intoxication are part of the history of all cultures, including Judeo-Christian ones, and provided a way to commune with the dead. These practices continued openly into the Dark Ages, when they were suppressed and adapted into the worship of saintly bones--or continued in secret by a few “heretical” sects, such as the Cathars and the Knights Templar. While little known today, these rites remain deeply embedded in the symbolism, theology, and sacraments of modern religion and bring a much more literal meaning to the church’s “Holy Communion” or symbolic consumption of the body and blood of Christ. Documenting the sacrificial, cannibalistic, and psychoactive sacramental practices associated with the Cult of the Dead from the prehistoric Minoans on Crete to the ancient Egyptians and Hebrews and onward to early and medieval Christian sects, Earl Lee shows how these religious rites influenced the development of Western religion. In particular, he reveals how Christianity originated with Jesus’s effort to restore the sacred rites of Moses, including the Marzeah, or Feast for the Dead. Examining the connections between these rites and the mysterious funeral of Father Sauniere in Rennes-le-Château, the author explains why the prehistoric Cult of the Dead has held such power over Western civilization, so much so that its echoes are still heard today in our literature, film, and arts.

Minoans 2002-01-04 Rodney Castleden Thoroughly researched, Rodney Castleden's Minoans: Life in Bronze Age Crete here sues the results of recent research to produce a comprehensive new vision of the peoples of Minoan Crete. Since Sir Arthur Evans rediscovered the Minoans in the early 1900s, we have defined a series of cultural traits that make the ‘Minoan personality’: elegant, graceful and sophisticated, these nature lovers lived in harmony with their neighbours, while their fleets ruled the seas around Crete. This, at least, is the popular view of the Minoans. But how far does the later work of archaeologists in Crete support this view? Drawing on his experience of being actively involved in research on landscapes processes and prehistory for the last twenty years, Castleden writes clearly and accessibly to provide a text essential to the study of this fascinating subject.

The Real Wealth of Nations 2008-11-03 Riane Eisler The author of The Chalice and the Blade proposes a new economics based on care in this “impressive work that’s . . . well argued, insightful and hopeful” (Publishers Weekly). Adam Smith's The Wealth of Nations provided the first explanation of the workings of modern economics. But with his focus on "the market" as the best mechanism for producing and distributing the necessities of life, Smith's concepts only told part of the story, leading to flawed economic models that devalue activities that fall outside of the market's parameters of buying and selling. The real wealth of nations, Riane Eisler argues, is not merely financial, but includes the contributions of people and our natural environment. In The Real Wealth of Nations, Eisler reexamines economics from a larger perspective, showing that we must give visibility and value to the essential work of caring for people and the planet. Eisler proposes a new “caring economics” that recognizes the full spectrum of economic activities—from the life-sustaining activities of the household to the life-enriching activities of caregivers and communities, to the life-supporting processes of nature. Eisler reveals how current economic models are based on a deep-seated culture of patriarchy and domination. She then shows how human needs would be better served by economic models based on caring. Most importantly, she provides practical proposals for new measures, policies, rules, and practices to bring about a caring economics that fulfills human needs.

Invented History, Fabricated Power 2020-11-16 Barry Wood Invented History, Fabricated Power begins with an examination of prehistoric beliefs (in spirits, souls, mana, orenda) that provided personal explanation and power through ritual and shamanism among tribal peoples. On this foundation, spiritual power evolved into various kinds of divine sanction for kings and emperors (Sumerian, Egyptian, Greek, Roman, Indian, Chinese and Japanese). As kingships expanded into empires, fictional histories and millennia-long genealogies developed that portrayed imperial superiority and greatness. Supernatural events and miracles were attached to religious founders (Hebrew, Hindu, Buddhist, Christian, Islamic). A unique variation developed in the Roman Church which fabricated papal power through forgeries in the first millennium CE and the later “doctrine of discovery” which authorized European domination and conquest around the world during the Age of Exploration. Elaborate fabrications continued with epic histories and literary cycles from the Persians, Ethiopians, Franks, British, Portuguese, and Iroquois Indians. Both Marxists and Nazis created doctrinal texts which passed for economic or political explanations but were in fact self-aggrandizing narratives that eventually collapsed. The book ends with the idealistic goals of the current liberal democratic way of life, pointing to its limitations as a sustaining narrative, along with numerous problems threatening its viability over the long term.

Flight from Grace 2022-03-30 Richard Pope Human animals are despoiling nature and causing a sixth extinction on Earth. Our natural environment is being compromised, and birds and other animals are disappearing at an alarming rate. Flight from Grace does not so much reveal the extent of the damage as ask and answer the perplexing question: why? This book traces human reverence for birds from the Stone Age and the New Stone Age, through the cultures of Mesopotamia, Egypt, Peru, and Greece and through biblical traditions, up to its vestiges in the present. Richard Pope takes a hard look at Judaeo-Christian and ancient Greek thought to demonstrate how the emergence of anthropocentrism and belittling of nature led to our present-day ecological dilemma. Striking images of cultural artifacts -- many little-known -- together with extensive discussion of art, music, literature, and religion illustrate the paradox in our contemporary relationship to the natural world. Humanity, in moving from its paleolithic origins to modern times, has simultaneously distanced itself from and disenchanting nature. Suggesting that the replacement of an animistic worldview with a mechanistic one has led humans to deny their animality, Flight from Grace calls on readers to appreciate how our past relationship with birds might help transform our current relationship with nature.

Communication and Culture in War and Peace 1993-02 Colleen Roach By exploring the role of both culture and the mass media, this volume fills a gap in the literature on war and peace. When Time Began 1994-03-01 Zecharia Sitchin Night and day, month after month, year after year, our ancestors dutifully recorded the passage of time on clay tablets, watching the heavens from stage towers and pyramids and from megalithic monuments whose incredible size and precise architecture boggle the mind. . . . Who were the builders of these mysterious structures? What was their purpose? Whose signature is indelibly written on these timeless stones, and who was the Divine Architect? Why was Stonehenge and its likes built by ancient civilizations at the very same time--4,100 years ago? What is their message for our time? With these questions in mind, Zecharia Sitchin, renowned researcher of past ages, takes us on a journey through the records of time in this, the fifth book of his Earth Chronicles series. Drawing deeply on Sumerian and Egyptian writings, millenia-old artifacts, and sacred architecture ranging from ancient Mesopotamia to pre-Columbian civilizations in the Americas, this bestselling scholar provides astounding insights into the origins of the calendar, astronomy, and astrology. He takes readers to the climax circa 2100 b.c. when Marduk, the Babylonian national god, attained supremacy on Earth and proclaimed the New Age of Aries--after which society, religion, science, and the status of women were never the same.

The Myth of the Goddess 1993-03-25 Anne Baring A comprehensive, scholarly accessible study, in which the authors draw upon poetry and mythology, art and literature, archaeology and psychology to show how the myth of the goddess has been lost from our formal Judeo-Christian images of the divine. They explain what happened to the goddess, when, and how she was excluded from western culture, and the implications of this loss.

The Chalice and the Blade 1987 Riane Tennenhaus Eisler "In prehistorical times, Eisler argues, women and men lived together in egalitarian communities devoted to nurturance; with the imposition of male domination, female values gave way to creeds of hierarchy, aggression, power, obedience. Eisler, a futurist, posits a new society based on the recovery of more humane values."--From Library journal (6/1/85).

The Line 2004 Cynthia Cockburn As Cyprus prepares to join the EU in 2004, the pressure is on to resolve the long-standing partition between the Greek Cypriot Republic of Cyprus and the Turkish Cypriot Republic of North Cyprus.

Envisioning a Sustainable Society 1989-01-01 Lester W. Milbrath The evidence is increasingly persuasive. We are changing the way our planet's physical systems work--irrevocably. These changes are global and interconnected and unavoidable. They are upon us already, making it virtually impossible for any modern society to continue its present trajectory of growth. This book provides a penetrating analysis of how we have come to this point, of why science and technology will fail to solve these problems, and of how we as a society must change in order to avoid ecological catastrophe. The scope is broad, the urgency of the message is impossible to ignore.

El cáliz y la espada 2021-04-26 Riane Eisler El cáliz y la espada cuenta una nueva historia de nuestros orígenes culturales. Muestra que el conflicto y la guerra de los sexos no han sido ordenados ni divina ni biológicamente y demuestra que es posible un futuro mejor, firmemente arraigado en los inquietantes dramas de lo que sucedió en nuestro pasado. Eisler presenta un marco conceptual para estudiar los sistemas sociales con especial atención a cómo una sociedad construye roles y relaciones entre lo femenino y lo masculino. Basándose en evidencias arqueológicas, antropológicas e históricas, la autora nos habla de un mundo en que prevalecieron el equilibrio y la comunidad antes que el caos y la destrucción, argumentando que la humanidad, en su origen, no estaba centrada en la lucha y en la competencia, sino más bien en la inclusión y la participación.

The Palaces of Crete 2017-03-14 James Walter Graham A desire to recreate Minoan palaces, villas, and houses of the Late Bronze Age inspired the author of this book to undertake an eight year research program that has radically modified our conception of the appearance of Cretan dwellings. He not only interprets the use of the rooms that partially survive but reconstructs the guest suites and banquet halls of the vanished upper storeys. Written both as a preparation for a visit to Crete and as an actual guide to the sites," the book is prefaced with an account of the island's geography, history, and culture in antiquity, and packed with illustrations including photographs, plans, reconstructions, and a map of the island showing the sites. The Dawn of Civilization 2014-09-28 Sean Ellerker An absorbing and enlightening adventure through time... This book tells the story of the ancient world from the Fourth Millennium to the Sixth Century BC. All the major civilizations are covered, from the Near East, Egypt and Mediterranean to the great river valleys of India and China and the coastlines of Mexico and Peru. The histories of these cultures have been woven into a compelling and compact narrative, illuminating this formative period and providing a context for the better-known classical era that followed. The Dawn of Civilization tells the story of the earliest kings and queens to grace the historical record, the rise and fall of the first empires, glorious battles, incredible innovations and colourful myths and legends from the works of Homer and the ancient religions. Discover the harsh and uncompromising world of vain Egyptian pharaohs, brutal Assyrian warlords and bloodthirsty barbarian hordes. Marvel at the awe-inspiring age of mystical Cretan priestesses, heroic warriors and earthly wonders such as the Egyptian pyramids and the Hanging Gardens of Babylon. Anyone who has not specialised in ancient history could be forgiven for thinking that nothing meaningful happened before the Fifth Century BC, when the western classical age is generally considered to have begun. However the civilized world existed and flourished for an incredible 3,500 years before the classical Greeks first came to prominence. Author Sean Ellerker provides a fresh perspective on antiquity by focusing solely on the ancient world before the rise of Greece and Rome, organising this remarkable period of history into a single volume. The Dawn of Civilization makes this fascinating and multifaceted era accessible to everyone. It is an ideal read for anyone interested in history, archaeology and the classics, including students of these subjects at school or university.

When God Was A Woman 2012-05-09 Merlin Stone Here, archaeologically documented,is the story of the religion of the Goddess. The Dawn of Genius 2014-06-03 Alan Butler The modern world looks back towards Ancient Greece for the start of its philosophy, for the origins of its science and even for the foundations of its excursion into democracy. But is this either correct or fair? Was there something long, long before the City States of Greece flirted with geometry, astronomy and inclusive politics from which Greece itself developed, merely as a pale reflection? Alan Butler has put together his most exhaustive and yet most compelling presentation of how we came to be what we are today. The Dawn Genius explores the genius that was the Minoan civilization and shows how accounts of the fabled Atlantis were actually memories of a worldwide catastrophe that occurred around 1600 BC. The Dawn of Genius puts back into the place the missing pieces of the puzzle that is Europe prior to a massive watershed in population and culture that took place after 2000 BC. A cataclysmic volcanic eruption in the Eastern Mediterranean destroyed an almost totally forgotten infrastructure that encompassed an entire continent, and opened Europe to an unparalleled invasion of much less sophisticated people from the East. The book recreates the culture and religion and scientific knowledge that was shattered in an instant and which plunged the world into a dark age from which it has taken over 3,000 years to emerge. This is probably the most comprehensive explanation of mysteries from a truly ancient world that has ever been written. Those interested in exploring the genuine origins of the modern world are certain to be enthralled.

The God Between 1995 Freda Edis Mercury is often treated as a light-weight planet which overemphasizes the intellect and ignores the emotional side of life. By drawing on mythology and a series of compelling case histories, Freda Edis shows that it can be far more. People who feel stuck - endlessly repeating the same unsatisfactory patterns of behaviour - and need to confront the darker aspects of themselves can find inspiration in stories of Hermes's descent into the Underworld. His love affair with Venus, and the birth of their hermaphrodite child, has much to teach us about reconciling the male and female within ourselves. The God Between explores Mercury's role as Eternal Child, Rapist, Trickster, Traveller, Healer and Alchemist; his aspects to the other planets; and how he operates in the different houses and signs. Psychological astrology, it concludes, offers illumination to anyone who truly wants 'to walk the path of deeper self-knowledge.'

In Search of the Labyrinth 2020-09-03 Nicoletta Momigliano Shortlisted for the European Association of Archaeologies 2023 book prize In Search of the Labyrinth explores the enduring cultural legacy of Minoan Crete by offering an overview of Minoan archaeology and modern responses to it in literature, the visual and performing arts, and other cultural practices. The focus is on the twentieth century, and on responses that involve a clear engagement with the material culture of Minoan Crete, not just with mythological narratives in Classical sources, as illustrated by the works of novelists, poets, avant-garde artists, couturiers, musicians, philosophers, architects, film directors, and even psychoanalysts – from Sigmund Freud and Marcel Proust to D.H. Lawrence, Cecil Day-Lewis, Oswald Spengler, Nikos Kazantzakis, Robert Graves, André Gide, Mary Renault, Christa Wolf, Don DeLillo, Rhea Galanaki, Léon Bakst, Marc Chagall, Mariano Fortuny, Robert Wise, Martin Heidegger, Karl Lagerfeld, and Harrison Birtwistle, among many others. The volume also explores the fascination with things Minoan in antiquity and in the present millennium: from Minoan-inspired motifs decorating pottery of the Greek Early Iron Age, to uses of the Minoans in twenty-first-century music, poetry, fashion, and other media.

The Minoans 1971 Sinclair Hood "The Minoan civilization was a Bronze Age civilization that arose on the island of Crete and flourished from approximately the 27th century BCE to the 15th century BCE. It was rediscovered at the beginning of the 20th century through the work of British archaeologist Arthur Evans."--Wikipedia.

Acne is one of the most common problems in adolescent teens affecting nearly seventeen million people in the United States. Acne is nothing but a disorder involving sebaceous glands and hair follicles. Acne results from the clogging of sebaceous glands leading to the formation of pimples and cysts. The condition usually begins with the onset of puberty. Going by the facts, as teens attain puberty the androgens also called male sex hormones are produced in high number leading to sebaceous glands becoming over active which results in sebum being produced in high proportions.

Sebum, which is nothing but oil is produced by sebaceous glands which travel to the skin surface through hair follicles. But, skin cells block the follicles which results in oil also being blocked. When these hair follicles are blocked it results in the development of skin bacteria known as Propionibacterium Acnes within the follicles which in turn results in swelling of the skin called Acne. If the hair follicles are partially blocked it results in blackheads. If the follicles are completely blocked they result in whiteheads. But if these plugged follicles are not treated they ultimately burst causing the oil, bacteria and skin cells to spill all over the skin resulting in irritation and formation of pimples. Acne can be shallow as well as deep in various individuals depending on the nature of skin and amount of oil produced.

Remember that this craving is only short term and will last only for a few minutes. You have worked so hard to leave this behind so stick to the path and stay smoke free.

Acupuncture and Autism

Studies have shown that there is an increase in the number of children that have been diagnosed with autism. Until now, doctors have not yet found a cure to this illness which is why some parents want to experiment with alternative forms of treatment and one example is acupuncture.

Acupuncture is a holistic approach in treating and preventing certain diseases. Its main tool are very thin needles that are inserted to targeted points in the body. The body has about 400 of them linked through a system known as meridians or pathways. Once these are stimulated, these are supposed to create balance in the body.

Autism on the other hand is a brain disorder that is long term. This disease is characterized by deficits in language, social communication and cognition. The most important thing to do during the session is to relax. If you feel an itch or something, tell the acupuncturist. The same goes if you are nervous or experience a burning sensation so the specialist will take out the needles.

Like other strategies used in treating health conditions, acupuncture may have some side effects. Medications have side effects and allergic reactions, surgeries have risk of infection and complications. For needle puncture, there is a risk of injury, rare infections, minor bleeding, small bruises, and some dizziness.

You can minimize the possible side effects by choosing a licensed acupuncturist. Most countries either have government licensing in place or have professional organizations with very strict rules and regulations.

How do treatments go?

An acupuncturist will do an initial evaluation of your medical history and your body's current state. Multiple pressure points are palpated, and a regimen of treatment is formulated. Most courses involve a series of 10 to 20 treatment sessions, each lasting 30 to 90 minutes. Needles will be carefully placed at the required points and kept in place for some time. Most patients report a feeling of mild sensation at the site of the puncture, but no real pain.

In TCM, practitioners adhere to the concept of Qi, or energy flow, and the meridians in which they travel. They use longer needles and insert them deeper in order to reach the acupuncture points. Modern science has found little evidence to prove the existence of these energy channels, but this is the technique that has been used effectively for thousands of years.

In medical acupuncture, the practitioners are graduates of western medical schools. Their application of needles is not based on the traditional acupuncture points, but on anatomic data. These acupuncturists use shorter needles and the insertions are shallower. They also tend to use fewer needles and leave them inserted for shorter periods of time. Adherents to TCM feel this is a watered-down version of the real thing. Nevertheless, many patients have felt relief of symptoms through this method.

Conditions for Puncture Application

There is a broad and extensive list of ailments which can be treated with acupuncture. The conditions run the gamut from asthma to constipation, anxiety to weight loss. Most TCM practitioners believe that any health condition results from an imbalance in Qi flow, therefore amenable to needle therapy. Western acupuncturists tend to have a more limited list of indications, the most common of which is undoubtedly control of pain.

But in cases where considerable amount of blood flows in small amount of time as a result of an injury due to a serious example for instance, it may not be possible for bone marrow to replace RBCs so quickly resulting in anemia. Also, losing small amounts of blood over long periods of time may also lead to anemia. Example of this situation can be seen in girls who get heavy periods attributed mainly to deficiency of iron in the diet.

Anemia due to iron deficiency is the most common kind of anemia in the United States. It occurs mainly due to lack of iron in a person's diet. A teen with iron deficiency would have lower hemoglobin production and consequently lower RBCs. When the production of RBCs is low the person is regarded as anemic. The signs of anemia are paleness and tiredness. There can be other reasons as to why enough RBCs are not produced in the body. Folic acid and Vitamin B-12 are also essential to produce RBCs. Getting these in adequate quantities is this important too. There can be a problem with bone marrow's working too resulting in anemia.

Hemolytic anemia occurs when a person has RBCs whose lifespan is shorter. The bone marrow may not be able to produce new blood cells if the blood cells die too early. This can result due to many reasons including person having disorders like sphenocytosis or sickle cell anemia. In some cases the immune system of the body may itself destroy the RBCs. In some cases certain antibodies can form in the blood as a result of reaction to certain drugs or infections and may attack the RBCs.

Children and adolescents with normal cholesterol level is a thing of the past. Because of the changing lifestyle and junk food trend, even they have a high risk to develop high levels of cholesterol which also increases the risk of developing heart diseases which can affect the blood vessels and the coronary arteries. The main cause of this change is obesity, junk food high in fat, fast food diets, sedentary lifestyle and high cholesterol level in family history. But a high level of LDL cholesterol is a problem in many citizens of America. And there is an expected increase in number, the figure is unknown, of adolescents who have a family history of high cholesterol levels.

Furthermore, acupuncture certification today is mostly a sham, used to make money on desperate patients who have not benefited from western medical treatments. The National Council Against Health Fraud has even declared acupuncture as an unproven means of treatment whose concepts of healing are primitive and false.

Should You Try It

One thing that Western science can agree upon is that there are no proven harmful effects of acupuncture. Many doctors agree that as long as a medication is not detrimental to ones health, then there is no reason why it should not be used if there are noticeable benefits. Most scientists would also state that it is simply due to a lack of research that the therapeutic properties of acupuncture have not yet been proven.

So as the doors open to a new age of acupuncture, give it a try when you feel the need for pain relief and you will not be disappointed. As the Chinese have used it for many centuries, so should we.
