Dangerous bodies 2016-01-01 Marie Mulvey-Roberts Through an investigation of the body and its oppression by the church, the medical profession and the state, this book reveals the actual horrors lying beneath fictional horror in settings as diverse as the monastic community, slave plantation, operating theatre, Jewish ghetto and battlefield trench. The book provides original readings of canonical Gothic literary and film texts including The Castle of Otranto, The Monk, Frankenstein, Dracula and Nosferatu. This collection of fictionalised dangerous bodies is traced back to the effects of the English Reformation, Spanish Inquisition, French Revolution, Caribbean slavery, Victorian medical malpractice, European anti-Semitism and finally warfare, ranging from the Crimean up to the Vietnam War. The endangered or dangerous body lies at the centre of the clash between victim and persecutor and has generated tales of terror and narratives of horror, which function to either salve, purge or dangerously perpetuate such

oppositions. This ground-breaking book will be of interest to academics and students of Gothic studies, gender and film studies and especially to readers interested in the relationship between history and literature.

Fractal Analysis of the Binding and Dissociation Kinetics for Different Analytes on Biosensor Surfaces 2007-12-20 Ajit Sadana Biosensors are finding increasing applications in different areas. Over the last few years the areas where biosensors may be used effectively has increased dramatically. This book like the previous four books on analyte-receptor binding and dissociation kinetics by this author addresses the often neglected area. The kinetics of binding and dissociation in solution to appropriate receptors immobilized on biosensor surfaces occurs under diffusional limitations on structured surfaces. The receptors immobilized on the biosensor surface contribute to the degree of heterogeneity on the sensor chip surface. The fractal analysis examples presented throughout the book provide a convenient means to make quantitative the degree of heterogeneity present on the sensor surface, and relates it to the binding and dissociation rate coefficients. The fractal dimension is a quantitative measure of the degree of heterogeneity present on the biosensor surface. The book emphasizes medially-oriented examples. The detection of disease-related analytes is also emphasized. The intent being that if intractable and insidious diseases are detected earlier, they will be controlled better, eventually leading to a better prognosis. Chapter 3 is a new chapter that emphasizes enhancing the relevant biosensor performance parameters such as sensitivity, stability, selectivity, response time, etc. As usual, as done in previous books by this author, the last chapter provides an update of the economics involved in biosensors, and the difficulties encounters in starting-up a biosensor company. - Modelling of binding and dissociation kinetics of analyte-receptor reactions on biosensor surfaces: provides physical insights into these reactions occurring on biosensor surfaces. Very few researchers even attempt to analyze the kinetics of these types of reactions. - Fractal analysis used to model the binding and dissociation kinetics: original and unique approach. - Economic analysis provided in the last chapter: helps balance the book; besides providing much-needed information not available in the open literature. - Emphasis on improving biosensor performance parameters: helps make biosensors better. - Emphasis on medically-related analytes: helps in prognosis of diseases.

Imagine, a World Without DIS-EASE 2020-01-20 Mark S. Grenon Volume Two of 'Imagine, A World Without DIS-EASE' is an autobiographical narrative of the Genesis II Church of Health and Healing told by the Co-founder, Mark S. Grenon. This Amazing Journey started back in 2006 where Mark, then a missionary pilot in the Dominican Republic was working with medical teams in the D.R. and in Haiti when he contracted MRSA, a staph

infection along with his three sons while working as interpreters. The MRSA spread to all of his 8 children! Nothing worked to kill this infection. After months of using the 'latest and greatest' antibiotics known at that time, it was getting worse! In desperation to save his son, Jonathan's leg, he found a free eBook on the internet written by a miner named Jim Humble. That book, 'Breakthrough, The Miracle Mineral Supplement of the 21st Century' not only 'restored health' for him and his family from the MRSA but put him on a path that changed his life! Mark and his sons, Jonathan and Joseph went on to help hundreds in the D.R. and Haiti 'restore health' from many different illnesses such as: Diabetes, AIDS, Dengue, Gastritis, Cancer, to name just a few. In 2010, Jim Humble came to live with the Grenon Family at their mission compound in Barahona, D.R. where they founded the G2Church. The G2Church has grown today as of January 2020, to over 3,700 members in 145+ countries with 1997 Health Ministers, 115 Bishops and 252 Church Chapters. For the past 3 years, 10+ testimonies of 'restored health' from 95% of the illnesses in this world are coming in and being read in the free weekly G2Church Newsletter www.g2churchnews.org and on the weekly G2Voice Broadcast at: www.g2voice.is. This book will cover this incredible story starting in 2006 to 2014. May the Lord use this book to help many 'restore health!' Mark S. Grenon

The Birth of the Past 2011-11-01 Zachary S. Schiffman How we learned to distinguish past from present and see the world historically. Outstanding Academic Title, Choice How did people learn to distinguish between past and present? How did they come to see the past as existing in its own distinctive context? In *The Birth of the Past*, Zachary Sayre Schiffman explores these questions in his sweeping survey of historical thinking in the Western world. Today we automatically distinguish between past and present, labeling things that appear out of place as "anachronisms." Schiffman shows how this tendency did not always exist and how the past as such was born of a perceived difference between past and present. Schiffman takes readers on a grand tour of historical thinking from antiquity to modernity. He shows how ancient historians could not distinguish between past and present because they conceived of multiple pasts. Christian theologians coalesced these multiple pasts into a single temporal space where past merged with present and future. Renaissance humanists began to disentangle these temporal states in their desire to resurrect classical culture, creating a "living past." French enlighteners killed off this living past when they engendered a form of social scientific thinking that measured the relations between historical entities, thus sustaining the distance between past and present and relegating each culture to its own distinctive context. Featuring a foreword by the eminent historian Anthony Grafton, this fascinating book draws upon a diverse range of sources—ancient histories, medieval theology, Renaissance art, literature, legal thought, and early modern mathematics and social science—to uncover the meaning of the past and its relationship to the present.
