Fairness in Educational and Psychological Testing: Examining Theoretical, Research, Practice, and Policy Implications of the 2014 Standards 2022-06-01 Jessica L. Jonson This book examines scholarship, best practice methodologies, and examples of policy and practice from various professional fields in education and psychology to illuminate the elevated emphasis on test fairness in the 2014 Standards for Educational and Psychological Testing. Together, the chapters provide a survey of critical and current issues with a view to broadening and contextualizing the fairness guidelines for different types of tests, test takers, and testing contexts. Researchers and practitioners from school psychology, clinical/counseling psychology, industrial/organizational psychology, and education will find the content useful in thinking more acutely about fairness in testing in their work. The book also has chapters that address implications for policy makers, and, in some cases, the public. These discussions are offered as a starting point for future scholarship on the theoretical, empirical, and applied aspects of fairness in testing particularly given the ever-increasing importance of addressing equity in testing.

Canada on the United Nations Security Council 2019-09-01 Adam Chapnick As the twentieth century ended, Canada was completing its sixth term on the UN Security Council. A decade later, Ottawa's attempt to return to the council was dramatically rejected by its global peers, leaving Canadians – and international observers – shocked and disappointed. Canada on the United Nations Security Council tells the story of that defeat and what it means for future campaigns, describing and analyzing Canada's attempts since 1946, both successful and unsuccessful, to gain a seat as a non-permanent member. Impeccably researched and clearly written, this is the definitive history of the Canadian experience on the world's most powerful stage.

Creating a Modern Countryside 2011-11-01 James Murton In the early 1900s, British Columbia embarked on a brief but intense effort to manufacture a modern countryside. The government wished to reward Great War veterans with new lives: settlers would benefit from living in a rural community, considered a more healthy and moral alternative to urban life. But the fundamental reason for the land resettlement project was the rise of progressive or “new liberal” thinking, as reformers advocated an expanded role for the state in guaranteeing the prosperity and economic security of its citizens. James Murton examines how this process unfolded, and demonstrates how the human-environment relationship of the early twentieth century shaped the province as it is today.
