Digital Histories 2020-12-07 Mats Fridlund
Historical scholarship is currently undergoing a digital turn. All historians have

experienced this change in one way or another, by writing on word processors, applying quantitative methods on digitalized source materials, or using internet resources and digital tools. Digital Histories showcases this emerging wave of digital history research. It presents work by historians who – on their own or through collaborations with e.g. information technology specialists – have uncovered new, empirical historical knowledge through digital and computational methods. The topics of the volume range from the medieval period to the present day, including various parts of Europe. The chapters apply an exemplary array of methods, such as digital metadata analysis, machine learning, network analysis, topic modelling, named entity recognition, collocation analysis, critical search, and text and data mining. The volume argues that digital history is entering a mature phase, digital history ‘in

action’, where its focus is shifting from the building of resources towards the making of new historical knowledge. This also involves novel challenges that digital methods pose to historical research, including awareness of the pitfalls and limitations of the digital tools and the necessity of new forms of digital source criticisms. Through its combination of empirical, conceptual and contextual studies, Digital Histories is a timely and pioneering contribution taking stock of how digital research currently advances historical scholarship.

Metrolingualism 2015-03-05 Alastair Pennycook
This book is about language and the city. Pennycook and Otsuji introduce the notion of 'metrolingualism', showing how language and the city are deeply involved in a perpetual exchange between people, history, migration, architecture, urban landscapes and linguistic resources. Cities and languages are in constant change, as new speakers with new repertoires come into contact as a result of globalization and the increased mobility of people and languages. Metrolingualism sheds light on the ordinariness of linguistic diversity as

people go about their daily lives, getting things done, eating and drinking, buying and selling, talking and joking, drawing on whatever linguistic resources are available. Engaging with current debates about multilingualism, and developing a new way of thinking about language, the authors explore language within a number of contemporary urban situations, including cafés, restaurants, shops, streets, construction sites and other places of work, in two diverse cities, Sydney and Tokyo. This is an invaluable look at how people of different backgrounds get by linguistically. Metrolingualism: Language in the city will be of special interest to advanced undergraduate/postgraduate students and researchers of sociolinguistics and applied linguistics.

Assessment and Learning in Content and Language Integrated Learning (CLIL) Classrooms 2020-11-17 Mark deBoer This volume builds a conceptual basis for assessment promoting learning in Content and Language Integrated Learning (CLIL) classrooms and proposes practical assessment approaches and activities that CLIL teachers can apply in the classroom. CLIL as an educational context is unique, as language and content learning happen simultaneously. The efficacy of such instruction has been studied extensively, but assessment in CLIL classrooms has drawn much less attention. The present volume aims to fill this gap. Arranged based on different ways that content and language are integrated in CLIL, the chapters in this book together build a solid theoretical basis for assessment promoting learning in CLIL classrooms. The authors discuss how assessment eliciting this integration yields

insights into learners' abilities, but more importantly, how these insights are used to promote learning. The contributors to the volume together build the understanding of classroom-based assessment as cyclic, of teaching, learning, and assessment as inter-related, and of content and language in CLIL classrooms as a dialectical unity. This volume will spark interest in and discussion of classroom-based assessment in CLIL among CLIL educators and researchers, enable reflection of classroom assessment practices, and foster collaboration between CLIL teachers and researchers. The assessment approaches and activities discussed in the volume, in turn, will help educators understand the scope of applications of assessment and inspire them to adapt these to their own classrooms.

Help Me 2019-01-29 Marianne Power A hilarious and heartwarming rampage

through the world of self-care Marianne Power was a self-help junkie. For years she lined her bookshelves with dog-eared copies of definitive guide after definitive guide on how to live your best life. Yet one day she woke up to find that the life she dreamed of and the life she was living were not miles but continents apart. So she set out to make a change. Or, actually, to make every change. Marianne decided to finally find out if her elusive perfect life—the one without debt, anxiety, hangovers or Netflix marathons, the one where she healthily bounced around town with perfect teeth to meet the cashmere-sweater-wearing man of her dreams—lay in the pages of those books. So for a year she vowed to test a book a month, following its advice to the letter, taking the surest road she knew to a perfect Marianne. As her year-long plan turned into a demented roller coaster where everything she knew was turned upside

down, she found herself confronted with a different question: Self-help can change your life, but is it for the better?

Hydrogen Production Technologies
2017-03-20 Mehmet Sankir The book is organized in three parts. Part I shows how the catalytic and electrochemical principles involve hydrogen production technologies. Part II is devoted to biohydrogen production and introduces gasification and fast pyrolysis biomass, dark fermentation, microbial electrolysis and power production from algae. The last part of the book is concerned with the photo hydrogen generation technologies. Recent developments in the area of semiconductor-based nanomaterials, specifically semiconductor oxides, nitrides and metal-free semiconductors based nanomaterials for photocatalytic hydrogen production are extensively discussed in this part.

Peatland Forestry 2013-03-09 Eero Paavilainen The book provides a review and synthesis of boreal mire ecosystems including peat soil properties, mire hydrology, carbon and nutrient cycling, and classification of mire sites. The emphasis, however, is on peatland forests as a renewable natural resource. The approach originated in northern Europe, because there, especially in Finland, operational scale forest drainage has a long tradition

based on research aiming to maintain and increase wood production on peatlands. Whenever relevant, a closer look is also given to other countries in Europe, Canada, and the USA. The results of recent studies on different environmental effects of peatland forestry are also discussed in detail.

Chemical, Microbiological, Health and Comfort Aspects of Indoor Air Quality - State of the Art in SBS 2013-03-09 Helmut Knöppel Interest in indoor air quality (IAQ) is growing at public, political and scientific levels. Complaints about poor IAQ, associated with acute symptoms such as mucous irritation, headaches and bad odor occur frequently, particularly in the office environment, where typical patterns of symptoms often occur, leading to the coining of the term 'Sick Building Syndrome'. In the present book, internationally known experts address the

following issues: the dynamics of the indoor environment and strategies for indoor measurement chemical and microbiological pollution, important species, sources and detection methods effects of indoor pollution, in particular sensory irritation, including odor airway, eye and skin irritation by organic indoor pollutants and their assessment immune effects, including allergic sensitization chemical hyper-responsiveness controlled human reactions to organic pollutants building investigation: approaches and results source characterization and control criteria, norms and techniques in indoor air pollution, and regulatory aspects. The complex, multifactorial nature of sick building syndrome requires multidisciplinary collaboration from very diverse fields. It is evident that communication between researchers coming from very different areas, all speaking their own language, is a

difficult task. This book, presenting as it does the state of the art on sick buildings and how to cure them, is a sound foundation on which to build for the future.

Literature and Society 2000 Pamela J. Annas An enriching introduction to the diverse and exciting world of literature, this anthology offers a broad collection of short fiction, poetry, drama and nonfiction selections written by a diverse group of writers who represent different social classes, races, genders, cultures, and sexual orientations. Organizes selections around five socially relevant themes-- Growing Up and Growing Older; Women and Men; Money and Work; Peace and War; and Varieties of Protest. Shows how literary technique serves larger purposes-- the recreation of experience, the

exploration of ideas, the analysis of social issues-- and how these larger purposes themselves shape literary form. Explains the ways in which literary form creates meaning, and provides a strong emphasis on writing about literature throughout, with a full chapter on all stages of the writing process -- generating ideas, developing a thesis, discovering a form, drafting, revising, and editing-- plus numerous excerpts from sample papers and journals. Now contains 42 new works, with more by Native American and Latino/Latina writers, as well as Bertolt Brecht's play *Mother Courage* and Shakespeare's *Othello*"; also includes 18 works of nonfiction prose that have been chosen both for their literary technique as well as for their exploration of the five major themes.

Neoliberal Bodies and the Gendered Fat Body 2016-08-25 Hannele Harjunen In

recent decades the rise of the so-called "global obesity epidemic" has led to fatness and fat bodies being debated incessantly in popular, professional, and academic arenas. Fatness and fat bodies are shamed and demonised, and the public monitoring, surveillance and outright policing by the media, health professionals, and the general public are pervasive and socially accepted. In *Neoliberal Bodies and the Gendered Fat Body*, Hannele Harjunen claims that neoliberal economic policy and rationale are enmeshed with conceptions of body, gender, and health in a profound way in contemporary western culture. She explores the relationships between fatness, health, and neoliberal discourse and the role of economic policy in the construction of the (gendered) fat body, and examines how neoliberal discourses join patriarchal and biomedical constructions of the fat female body. In neoliberal culture the fat body is

not just the unhealthy body one finds in medical discourse, but also the body that is costly, unproductive and inefficient, failing in the crucial task of self-management. With an emphasis on how neoliberal governmentality, in its many forms, affects the fat body and contributes to its vilification, this book is essential reading for scholars of feminist thought, sociology, cultural studies and social theory with interests in the body, gender and the effects of neoliberal discourse on social attitudes.

North Korea Sanctions Regulations (US Office of Foreign Assets Control Regulation) (Ofac) (2018 Edition) 2018-11-26 The Law The Law Library North Korea Sanctions Regulations (US Office of Foreign Assets Control Regulation) (OFAC) (2018 Edition) The Law Library presents the complete text of the North Korea Sanctions Regulations (US Office of Foreign Assets Control Regulation) (OFAC) (2018 Edition). Updated as of May 29, 2018 The Department of the Treasury's Office of Foreign Assets Control (OFAC) is amending the North Korea Sanctions Regulations and reissuing them in their entirety, in order to implement three recent Executive orders and to reference

the North Korea Sanctions and Policy Enhancement Act of 2016 and the Countering America's Adversaries Through Sanctions Act. OFAC is also incorporating several general licenses that have, until now, appeared only on OFAC's website on the North Korea Sanctions page, adding several new general licenses, and adding and expanding provisions to issue a more comprehensive set of regulations that will provide further guidance to the public. Finally, OFAC is updating certain regulatory provisions and making other technical and conforming changes. Due to the number of regulatory sections being updated or added, OFAC is reissuing the North Korea Sanctions Regulations in their entirety. This book contains: - The complete text of the North Korea Sanctions Regulations (US Office of Foreign Assets Control Regulation) (OFAC) (2018 Edition) - A table of contents with the page number of each section

Radar Instruction Manual 2005 United States. Maritime Administration Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern

techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardized up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation.
