The SAGE Encyclopedia of Criminal Psychology

2019-04-25 Robert D. Morgan The SAGE Encyclopedia of Criminal Psychology will be a modern, interdisciplinary resource aimed at students and professionals interested in the intersection of psychology (e.g., social, forensic, clinical), criminal justice, sociology, and criminology. The interdisciplinary study of human behavior in legal contexts includes numerous topics on criminal behavior, criminal justice policies and legal process, crime detection and prevention, eyewitness identification, prison life, offender assessment and rehabilitation, risk assessment and management, offender mental health, community reintegration, and juvenile offending. The study of these topics has been increasing continually since the late 1800s, with people trained in many legal professions such as policing, social work, law, academia, mental health, and corrections. This will be a comprehensive work that will provide the most current empirical information on those topics of greatest concern to students who desire to work in these fields. This encyclopedia is a unique reference work that looks at criminal behavior primarily through a scientific lens. With over 500 entries the book brings together top empirically driven researchers and clinicians across multiple fields—psychology, criminology, social work, and sociology—to explore the field.

Diversity in Action

2022-01-01 Steve H. Koh This book presents an extensive collection of high-yield case vignettes with recommendations for a comprehensive approach to cultural psychiatry. Culture is defined from an anthropological perspective, with an emphasis on aspects of culture beyond race, ethnicity, and other traditional demographic categories. The goal of this book is to offer clinical applications of cultural psychiatry via examination of special populations, systems, and settings. With ever-changing geopolitical environments, institutional structures, and sociodynamics, attention and consideration of context is paramount. Theoretical models and specific frameworks for evaluating cultural influence on the manifestation, development, and treatment response of mental health illnesses are presented. The chapters are organized to showcase different ways in which culture plays into everyday clinical practice. Emphasis is placed on the full sum of the care delivery transaction within a larger context, including public and community systems of care. Real-world case examples are discussed in each chapter to help contextualize the dynamic nature that culture plays in practice across inpatient and outpatient settings. Each case presents with relevant academic and historical background and practical operational advice for psychiatrists providing care within these respective communities. The authors address diverse clinical cases related to refugee and asylum seekers, military service members, survivors of human trafficking, incarcerated populations, and more. Training recommendations and best practices are outlined including psychopharmacology, psychosocial treatments, and cultural adaptations to evidence based treatments. Diversity in Action: Case Studies in Cultural Psychiatry is a useful resource for all psychiatrists, psychologists, general practitioners, social workers, nurses, administrators, public policy officials, and all medical professionals working with a culturally diverse subset of patients seeking mental health.

Psychotherapy in Corrections

2022-09-13 Peter N. Novalis, M.D., Ph.D. To practice psychotherapy in a correctional setting is to encounter a range of cultural issues reflecting the various ethnic, class, gender, and physical subgroups of the prison population—as well as to navigate the culture of the prison, staff, and justice system that underpins the patients' circumstances. Drawing on the authors' extensive professional experience, Psychotherapy in Corrections offers mental health professionals a comprehensive look at the most common situations they are likely to face and provides practical advice on dealing with them. Diagnostically oriented chapters cover core issues that include self-harm and substance use disorders, as well as mood and personality disorders. Specific supportive therapy techniques for addressing these issues, as well as special situations—including the experience of women in prison, behaviors that can disrupt care, and efforts to reduce recidivism—are illustrated by clinical vignettes. In tackling the social and developmental conditions that lead individuals to interact with the correctional system, Psychotherapy in Corrections also acknowledges the effects of the COVID-19 pandemic and the movement for social justice in society. Anyone who conducts psychotherapy in a prison setting will benefit from an approach centered on treating the human in front of them, regardless of the setting or their crime.

Psychiatric Services in Jails and Prisons

2015-06-02 American Psychiatric Association The long-awaited report of the APA's Work Group to Revise the APA Guidelines on Psychiatric Services in Correctional Facilities, Psychiatric Services in Correctional Facilities comes at a time of growing incarceration rates, more rigid sentencing policies, harsher sanctions, and tougher public attitudes toward crime. The result is a near-doubling of the incarcerated population since the first report was issued in 1989 and a significant increase of inmates with serious mental health issues. The work group members address the implications of this troubling state of affairs for psychiatrists and other mental health practitioners who diagnose and treat within the correctional environment. On the basis of extensive input from multiple sources and perspectives, they have developed clear guidelines that equip clinicians to navigate the special challenges they face. This edition has been thoroughly updated and is structured to flow from the foundational principles that govern the delivery of psychiatric care in correctional facilities, to the guidelines for screening, referral, evaluation, treatment, and community reentry planning, to special applications of the principles and guidelines to specific disorders/ syndromes, patient populations, housing locations, treatment modalities, and inmate special needs. Readers will find the book well written, with clear guidance for the clinician, as well as challenges to think beyond the needs of individual patients to the larger relationship between mental illness and incarceration. Approximately three of every four incarcerated people with a serious mental illness have a co-occurring substance use disorder, complicating both diagnosis and treatment. The book offers strategies for treating co-occurring disorders and explores the need for evidence-based screening tools. Because some inmate populations have unique evaluation and treatment needs because of their disorders, demographics, or other

characteristics, separate sections are devoted to women; youths in adult correctional facilities; geriatrics; lesbian, gay, bisexual, and transgender patients; veterans; and patients with intellectual and developmental disabilities. New management and programmatic topics include hospice, mental illness and segregation, seclusion and restraint, telepsychiatry, and the spiritual lives of inmates. The appendix is a valuable resource that includes a selection of APA position statements on topics relevant to psychiatric services in correctional settings, such as capital punishment, access to care for transgender and gender-variant individuals, and the adjudication of youths as adults in the criminal justice system. Correctional psychiatry is an evolving field, and serious questions remain. The work group sees an expanded role for clinicians as physician leaders, managers, and directors, more effectively advocating for their patients and helping to shape optimal care delivery systems that empower patients and support successful transition back to the community. Psychiatric Services in Correctional Facilities provides the current knowledge and professional support clinicians need to meet these challenges.

Handbook of Mental Health Assessment and Treatment in Jails

2023-05-19 Virginia Barber-Rioja Jails are the largest service providers of mental health in the United States. Unlike prisons, where all incarcerated individuals have been convicted of a crime and are serving long sentences, most individuals incarcerated in jails are waiting a disposition to their court case, making this pretrial environment particularly chaotic. Jail detainees have higher prevalence rates of mental illness, trauma, suicide, and substance use than individuals in the community or even in prisons. Adequate mental health interventions are essential to prevent suicide; to mitigate acute psychopathology, retraumatization, and stress; and to reduce recidivism. Mental health practice and research in jails requires specialized knowledge, but the vast majority of the literature on correctional mental health is derived from prison research. The Handbook of Mental Health Assessment and Treatment in Jails draws upon existing research and the experiences of a range of correctional psychologists, psychiatrists, and researchers to provide guidance for working with people with mental health needs in jails. The Handbook both advances knowledge in correctional mental health in the jail setting and serves as a call to action for researchers to continue developing a scientific base for jail correctional mental health. Chapters include legal and ethical considerations in jails, reentry issues that are specific to jails, interventions for competency restoration in jail detainees, assessment and treatment of neurodevelopmental and neurocognitive disorders, special considerations for rural jails, and special populations such as adolescents and women. This book will serve as a go-to guide for mental health professionals who provide clinical services in jails, jail administrators, and researchers.

Psychiatric Services in Correctional Facilities

2015-06-02 American Psychiatric Association The 15 years since publication of the second edition of the American Psychiatric Association's task force report on psychiatric services in correctional facilities have seen increasing rates of incarceration of mentally ill individuals, continuing criminalization of substance use disorders, and a lack of accessible and appropriate care in the community. The purpose of the new edition, Psychiatric Services in Correctional Facilities, and the aim of the work group that authored it over many years of research, dialogue, and development, is to provide leadership in addressing the needs of the often disenfranchised population of the incarcerated and to provide guidance to mental health clinicians working in correctional settings. Urging an expanded role in leadership and advocacy, the work group members present the foundational principles that apply to providing care in correctional facilities, outline the basic types of services that should be provided, and apply the principles and guidelines previously established to specific disorders, patient populations, treatment modalities, and special needs. Working with these patients and in these settings presents particular challenges that clinicians are unlikely to have encountered elsewhere in practice, such as the use of seclusion and restraint and administrative issues. Psychiatric Services in Correctional Facilities provides critical guidance and support for mental health professionals operating in this often frustrating environment, enabling them to provide both effective treatment and informed advocacy for their patients.

The work goes through authentic instances of casual conversations including participants varying in age, gender, ethnicity, and socio-economic class¹². Drawing on insights from sociology, linguistics, and critical semiotics, the publication provides readers with the analytic skills to describe the layers of structure and critical interpretive frameworks to clarify the ‘social work’ that occurs on through chat.
