## The Wind Farm Scam

2009 John R. Etherington This book argues that the drawbacks of wind power far outweigh the advantages. Wind turbines cannot generate enough energy to reduce global CO2 levels to a meaningful degree; what's more, wind power cannot generate a steady output, necessitating back-up coal and gas power plants that significantly negate the saving of greenhouse gas emissions. In a

## Dividing Paradise

2021-03-23 Jennifer Sherman How rural areas have become uneven proving grounds for the American Dream Late-stage capitalism is trying to remake rural America in its own image, and the resistance is telling. Small-town economies that have traditionally been based on logging, mining, farming, and ranching now increasingly rely on tourism, second-home ownership, and retirement migration. In Dividing Paradise, Jennifer Sherman tells the story of Paradise Valley, Washington, a rural community where amenity-driven economic growth has resulted in a new social landscape of inequality and privilege, with deep fault lines between old-timers and newcomers. In this complicated cultural reality, "class blindness" allows privileged newcomers to ignore or justify their impact on these towns, papering over the sentiments of anger, loss, and disempowerment of longtime locals. Based on in-depth interviews with individuals on both sides of the divide, this book explores the causes and repercussions of the stark inequity that has become commonplace across the United States. It exposes the mechanisms by which inequality flourishes and by which Americans have come to believe that disparity is acceptable and deserved. Sherman, who is known for her work on rural America, presents here a powerful case study of the ever-growing tensions between those who can and those who cannot achieve their visions of the American dream.

## Climate Change and Disaster Resilience

2021-12-21 Joaquin Jay Gonzalez III, Climate change and natural disasters have always been hot topics of discussion and debate from the living rooms of citizens to meetings to civil society organizations' candlelight vigils. The consensus from the scientific and academic community on the threat of climate change clashes with the lack of consensus from business and government leaders, while citizens question the scientific data on climate change and if it really affects their cities. Many cities have stepped up to provide united experience-backed testimonies explaining this threat and how climate change contributes to natural disasters, habitat destruction, and food shortage. This book brings together lucid essays and case studies from both scholars and individuals on the front lines who manage international collaborations, lead local communities, provide services for people impacted by disasters, and drive policy change that will lead to a sustainable future.

## Strangers in Paradise

1997-04 Daniel Simberloff Invasive nonindigenous species -- plants and animals that have been introduced to an ecosystem from someplace else -- are wreaking havoc around the globe. Because they did not co-evolve with species already in the ecosystem, they can profoundly disturb species interactions and ecosystem function. The state of Florida has one of the most severe exotic species problems in the country; as much as a quarter of many taxa in Florida are nonnative, and millions of acres of land and water are dominated by nonindigenous species. Strangers in Paradise provides an in-depth examination of the Florida experience and of the ongoing efforts to eradicate or manage introduced species. Chapters consider: natural disturbance and the spread of nonindigenous species case studies of insects, freshwater invertebrates, fishes, amphibians and reptiles, birds, marine invertebrates and algae, and mammals methods of managing nonindigenous species including ecological restoration, eradication, "maintenance control," and biological control management on public lands the regulatory framework including the role of the federal government as well as state authorities and responsibilities Strangers in Paradise is the first comprehensive volume to address a large, diverse region and the full range of nonindigenous species, the problems they cause, and the methods and impediments to dealing with them. Throughout, contributors emphasize solutions and relate the situation in Florida to problems faced by other states, making the book an important guide for anyone involved with control and management of invasive species.

## Paradise Destroyed

2017-07-04 Gregg Hubner Wind energy. It's free. It's green. It's healthy. It's sustainable. And it's lucrative for property-owners. If only this popular narrative were true. In Paradise Destroyed, Gregg Hubner fully exposes wind energy development for what it really is: a taxpayer scam. And not only is it a scam, but wind farms are a destructive force of 21st-century crony-capitalism that renders local communities divided and land permanently devalued. Hubner recounts his personal experience of wind energy colonization and shares his knowledge of just how much damage wind farms can cause property and property-owners. Complete with up-to-date research on the adverse health effects of wind energy, other chapters address the bane of PURPA legislation, legal risks in signing wind-rights contracts, and a host of other related issues. Whether you are a midwestern farmer considering a wind lease, or an environmental activist trying to save the planet, Paradise Destroyed is an absolute must-read. . . . a remarkable service in chronicling the devastation wrought by wind farms . . . For those of us who share their love of the Great Plains, let us hope that their struggle has attained more than a stay of execution." -JEFFREY HERBENER, Ph.D Chair of Economics, Grove City College "This is an extremely informative book and likely to become a must-read for anyone that lives around or is considering allowing a wind farm on their property. As a physician . . . I found this book very helpful." -THOMAS RIES, M.D. "At present, wind energy is a losing proposition for all but those developers that benefit from government subsidization of their industry. Hubner gives an accessible overview of how and why this is truly the case." -NORMAN HORN, Ph.D Engineering Post-Doc, MIT

Nelson Mandela stands as one of the most transformative leaders of the 20th century. His life journey began on July 18, 1918, in the tranquil village of Mvezo, South Africa. Born into the Thembu royal family, he was bestowed with the name Rolihlahla, meaning "troublemaker" in Xhosa. Mandelas upbringing unfolded amidst a backdrop of racial injustice, where he witnessed firsthand the harsh realities inflicted upon the Black majority by the ruling white minority government. Driven by a deep sense of equality, he dedicated his life to the struggle for freedom and equality, joining the African National Congress (ANC), a political organization dedicated to dismantling apartheid, the system of racial separation that plagued South Africa. Emerging as a charismatic lawyer, activist, and leader, Mandela faced numerous arrests and imprisonments for his unwavering resistance and defiance. For 27 years, he endured the harsh conditions and isolation of Robben Island, a notorious prison island, where his vision never wavered. His unwavering commitment to liberation continued to inspire and mobilize his people and the world at large. In 1990, he walked out of prison, free at last, and in 1994, he made history as South Africas first democratically elected Black president. Mandelas leadership ushered in a period of reconciliation, transforming South Africa into a nation of fairness. His global impact extended far beyond South Africas borders, as he became a beacon of peace, recognized for his unwavering dedication to these ideals. In 1993, he was awarded the Nobel Peace Prize, alongside numerous other accolades and honors. On December 5, 2013, at the age of 95, Mandela passed away, leaving behind a legacy of courage, insight, and kindness. Revered as the father of the nation and one of historys greatest heroes, Mandelas legacy continues to inspire generations to come.

Eva had always been fascinated by the realm of magic, but she never envisioned that she would uncover her own sorcerous abilities. She had spent her childhood in a typical family, living in a quaint town, devoid of any signs of the supernatural. However, on her sixteenth birthday, her life took an unexpected turn. A intriguing package arrived, sent by her grandmother, who had departed years ago. Within the package lay an ancient leather-bound book, its cover adorned with the inscription, "The Book of Shadows". As Eva opened the book, a torrent of magic coursed through her veins. She realized that the book held the secrets of her family's magical lineage, and that she was the last descendant of a long line of powerful witches. But she also discovered that she was not alone. There were others like her, individuals who possessed similar abilities, and some of them sought to wield their magic for evil purposes. Eva faced a pivotal decision: embrace her destiny as a witch and delve into the world of sorcery, or reject her newfound powers and continue living her life as she had always known it. Regardless of her choice, she knew that her life would forever be changed beyond recognition from that moment forward.

He was tired of his life. He was bored, depressed, and unfulfilled. He had a job he despised, a supervisor he abhorred, and a significant other he didn't adore. He had no passion, no purpose, no significance. He sensed like he was squandering his moment, his possibility, his being. He wanted to alter, he wished to escape, he wanted to exist. He resolved to leave his work, to break up with his girlfriend, to sell his possessions, and to acquire a direct fare to the other side of the earth. He didn't understand where he was proceeding, he didn't realize what he was carrying out, he didn't understand what he was seeking. He only knew that he had to depart, that he had to investigate, that he had to discover. He started on a trip of a thousand miles, a journey of thrill, of challenge, of learning, of progress, of alteration.
