Italian Foreign Policy during Matteo Renzi's Government 2019-03-13 Fabrizio Cotichchia This book explains the foreign policy of Italian Prime Minister Matteo Renzi. It argues that Renzi's domestic focus and outsider status are critical in allowing us to make sense of Renzi's policies toward the European Union as well as instability in Libya and the fight against the Islamic State of Iraq and the Levant.

The Boundaries of Europe 2015-04-24 Pietro Rossi Europe's boundaries have mainly been shaped by cultural, religious, and political conceptions rather than by geography. This volume of bilingual essays from renowned European scholars outlines the transformation of Europe's boundaries from the fall of the ancient world to the age of decolonization, or the end of the explicit endeavor to "Europeanize" the world.From the decline of the Roman Empire to the polycentrism of today's world, the essays span such aspects as the confrontation of Christian Europe with Islam and the changing role of the Mediterranean from "mare nostrum" to a frontier between nations. Scandinavia, eastern Europe and the Atlantic are also analyzed as boundaries in the context of exploration, migratory movements, cultural exchanges, and war. The Boundaries of Europe, edited by Pietro Rossi, is the first installment in the ALLEA book series Discourses on Intellectual Europe, which seeks to explore the question of an intrinsic or quintessential European identity in light of the rising skepticism towards Europe as an integrated cultural and intellectual region.

Root Causes of Suicide Terrorism 2006-09-27 Ami Pedahzur This highly topical new study clearly shows how there are at least two reasons to question the central role that is assigned to religion, in particular Islam, when explaining suicide terrorism. suicide terrorism is a modern phenomenon, yet Islam is a very old religion. Except for two periods in the twelfth and eighteenth centuries, suicide was never part of Islamist beliefs and behaviours. Actually, Islam clearly forbids suicide, hence, the argument that Islamic religious beliefs are the main cause of suicide terrorism is inherently dubious many suicide attacks have been carried out by secular organizations with little connection to fundamentalist Islam: Palestinian Fatah; the Popular Front for the Liberation of Palestine; and the Kurdish Workers Party. Moreover, one of the organizations that has employed this strategy devastatingly and regularly is the LTTE (Liberation Tigers of Tamil Elam). Not only are members of this organization not Muslim, most of them are not religious at all. This superb new book contains essays by some of the world's leading scholars of terrorism and political violence. It is essential reading for students of terrorism, political science and Middle Eastern politics, and useful to students of social psychology, theology and history.

The Wrecking of the Liberal World Order 2021-07-01 Vittorio Emanuele Parsi The 'Liberal World Order' (LWO) is today in crisis. But what explains this crisis? Whereas its critics see it as the unmasking of Western hypocrisy, its longstanding proponents argue it is under threat by competing illiberal projects. This book takes a different stance: neither internal hypocrisy, nor external attacks explain the decline of the LWO – a deviation from its original lane does. Emerged as a project aiming to harmonize state sovereignty and the market, through the promotion of liberal democracy domestically, and free trade and economic cooperation internationally, the LWO was hijacked in the 1980s: market forces overshadowed democratic forces, thus disfiguring the LWO into a Neoliberal Global Order. The book advocates for a revival of its original intellectual premises, that in the aftermath of World War II marked the zenith of political modernity.

Doing Fieldwork in Areas of International Intervention 2021-12-01 Bliesemann de Guevara, Berit Using detailed insights from those with first-hand experience of conducting research in areas of international intervention and conflict, this handbook provides essential practical guidance for researchers and students embarking on fieldwork in violent, repressive and closed contexts. Contributors detail their own experiences from areas including the Congo, Sudan, Yemen, Bosnia and Herzegovina and Myanmar, inviting readers into their reflections on mistakes and hard-learned lessons. Divided into sections on issues of control and confusion, security and risk, distance and closeness and sex and sensitivity, they look at how to negotiate complex grey areas and raise important questions that intervention researchers need to consider before, during and after their time on the ground.

Civil Society and Transitions in the Western Balkans 2013-01-11 V. Bojicic-Dzelilovic This book explores the ambiguous role played by civil society in the processes of state-building, democratization and post-conflict reconstruction in the Western Balkans challenging the assumption that civil society is always a force for good by analysing civil society actors and their effects in post-communist and post-conflict transition.

Foreign Fighters under International Law and Beyond 2016-02-27 Andrea De Guttry This book offers various perspectives, with an international legal focus, on an important and underexplored topic, which has recently gained momentum: the issue of foreign fighters. It provides an overview of challenges, pays considerable attention to the status of foreign fighters, and addresses numerous approaches, both at the supranational and national level, on how to tackle this problem. Outstanding experts in the field – lawyers, historians and political scientists – contributed to the present volume, providing the reader with a multitude of views concerning this multifaceted phenomenon. Particular attention is paid to its implications in light of the armed conflicts currently taking place in Syria and Iraq. Andrea de Guttry is a Full Professor of International Law at the Scuola Superiore Sant'Anna, Pisa, Italy. Francesca Capone is a Research Fellow in Public International Law at the Scuola Superiore Sant'Anna. Christophe Paulussen is a Senior Researcher at the T.M.C. Asser Instituut in The Hague, the Netherlands, and a Research Fellow at the International Centre for Counter-Terrorism – The Hague.

Corruption in the Aftermath of War 2017-10-02 Jonas Lindberg Corruption is a serious concern, one which can undermine state legitimacy, exacerbate inequality, and affect trust between social groups. Such effects are particularly problematic in societies that have gone through violent conflict, and are struggling to rebuild institutions, restore social trust, and recover economically. While anti-corruption measures are increasingly integrated into post-conflict programs, war-time structures and practices of corruption often prevail. This book explores corruption in post-war societies by focusing on the important issues of power, inequality and trust. To understand post-war power structures, and the extent to which they engrain, challenge, or transform corrupt practices, we need to study what kind of peace has emerged. The empirical cases in this book offer a variety of post-conflict situations, demonstrating how corruption is played out in, depending on the type and extent of international intervention, and in the case of a victor's peace, a contested peace, a partial peace etc. The chapters illustrate the experiences and perceptions of people on the ground in post-conflict societies, and by giving much space to local dynamics, the book shifts the focus from external intervention and actors to local contexts, striving for greater understanding of the interplay between corruption, power, inequality, and trust in post-war societies. This book was originally published as a special issue of Third World Quarterly.

Religion and International Relations Theory 2011-03-31 Jack Snyder Religious concerns stand at the center of international politics, yet key paradigms in international relations, namely realism, liberalism, and constructivism, barely consider religion in their analysis of political subjects. The essays in this collection rectify this. Authored by leading scholars, they introduce models that integrate religion into the study of international politics and connect religion to a rising form of populist politics in the developing world. Contributors identify religion as pervasive and distinctive, forcing a reframing of international relations theory that reinterprets traditional paradigms. One essay draws on both realism and constructivism in the examination of religious discourse and transnational networks. Another positions secularism not as the opposite of religion but as a comparable type of worldview drawing on and competing with religious ideas. With the secular state's perceived failure to address popular needs, religion has become a banner for movements that demand a more responsive government. The contributors to this volume recognize this trend and propose structural and theoretical innovations for future advances in the discipline.

Jihad - A Commitment To Universal Peace 1988 Marcel A. Boisard Jihad: A Commitment to Universal Peace by Marcel Boisard "In Jihad, Boisard explains, in very precise terms, what jihad really is. He discusses the fallacies and the falsities that surround the Western understanding and depiction of jihad. The West continues to refuse to accept that principles based on religion can be brought into the 'philosophy of our industrial age.' They ignore the fact that Islam is not hostility, but dynamism, and that 'adl, Ihsan, Musawat-justice, compassion, equality-are the three pillars of healthy human relations for the true believer." -Aminah Janan Assilmi In today's complex, and often confusing, social reality, Islam has been at the forefront of political, social, and economic debate. Dr. Boisard cuts through the maligned portrayal of jihad that runs rampant in modern times, to dispel the myths of this widely-misunderstood concept of social and personal struggle for righteousness. This book provides a clear, concise, and accurate explanation of jihad, that derives from the fundamentals of the religion itself.

Multi-stakeholder Security Partnerships 2011 Michael Brzoska In recent years, partnerships between diverse types of actors have had some success in addressing urgent problems. The chapters in this volume address the opportunities and problems of partnerships between local, national, and international actors from the public and private sectors in a particularly difficult field, namely the improvement of physical security in conflict and post-conflict situations. Based on a security governance perspective, thematic case studies explore conditions for the success and failure of multi-stakeholder partnerships in security sector reform, demobilization, disarmament and reintegration of combatants, small arms control, and community-based security. The practical implementations of multi-stakeholder partnerships are analyzed in three in-depth case studies: the partial demobilization of the former Kosovo Protection Corps, local security-building efforts in the Eastern Democratic Republic of Congo, and the disbandment of illegal armed groups in Afghanistan. These case studies show that multi-stakeholder partnerships can be effective in addressing problems. Their main pitfalls are the asymmetric relations between the various partners. These can easily lead to differing perceptions on the roles of partners, as well as the objectives of cooperation. (Series: Democracy, Security, Peace / Demokratie, Sicherheit, Frieden - Vol. 203)

Political Terrorism 1989-11-23 Grant Wardlaw This work outlines the important considerations of policy that confront a democratic state in trying to combat terrorism and at the same time remain democratic. Part I of this book, provides the reader with a comprehensive introduction to the definition, history, theory, operation and effects of terrorism as an essential background to policy analysis. Part II analyses counter-terrorist policies. It begins by outlining basic policy choices and then looks at specific policy areas such as the role of intelligence agencies, the use of the armed forces, the development of anti-terrorist legislation and international treaties, and the issue of regulation of media reporting of terrorist incidents. Developments in the strategic dimension of terrorism are discussed in chapters on the importance of hostage takings to international terrorism and issues surrounding state involvement in international terrorism. In the preparation of this second edition, Grant Wardlaw has considerably expanded the second part of the book, focusing firmly upon the international policy consequences of prevalent developments within international terrorism.

Terrorism in Asymmetrical Conflict 2008 Ekaterina A. Stepanova This volume combines qualitative research with the analysis of available data on trends in modern terrorism and the use of primary sources and writings. It puts forward an original typology of terrorism based on the overall level of a militant group's goals and the extent to which its terrorist activities are linked to a broader armed conflict.

Security in the West 2009 Giampiero Giacomello The goals of this volume are to analyze the evolution of the contested concept of security, how the concept of security has emerged as a "Western social enterprise," and how conceptions of security have developed and changed since the end of the Cold War.

The Judge in a Democracy 2009-01-10 Aharon Barak Whether examining election outcomes, the legal status of terrorism suspects, or if (or how) people can be sentenced to death, a judge in a modern democracy assumes a role that raises some of the most contentious political issues of our day. But do judges even have a role beyond deciding the

disputes before them under law? What are the criteria for judging the justices who write opinions for the United States Supreme Court or constitutional courts in other democracies? These are the questions that one of the world's foremost judges and legal theorists, Aharon Barak, poses in this book. In fluent prose, Barak sets forth a powerful vision of the role of the judge. He argues that this role comprises two central elements beyond dispute resolution: bridging the gap between the law and society, and protecting the constitution and democracy. The former involves balancing the need to adapt the law to social change against the need for stability; the latter, judges' ultimate accountability, not to public opinion or to politicians, but to the "internal morality" of democracy. Barak's vigorous support of "purposive interpretation" (interpreting legal texts--for example, statutes and constitutions--in light of their purpose) contrasts sharply with the influential "originalism" advocated by U.S. Supreme Court Justice Antonin Scalia. As he explores these questions, Barak also traces how supreme courts in major democracies have evolved since World War II, and he guides us through many of his own decisions to show how he has tried to put these principles into action, even under the burden of judging on terrorism.

The Castle on the Hudson 2017-07-25T00:00:00+02:00 Renato Cantore Charles Paterno was seven when he left Castelmezzano, a small mountain town in Basilicata to set sail on one of the rattletrap ships headed to America. Thirty years later he was one of the top builders in New York City, among the first to construct the skyscrapers that would form the world's most famous skyline. Intelligence, brilliance, intuition and an ability to stay ahead of the times made him a leading figure in the life of Manhattan. He created garden communities, focused on new technologies and turned to the best architects. Paterno didn't just want to offer houses, but new lifestyles to tens of thousands of people. His first American dream looked like a white castle at the northernmost tip of Manhattan, where he lived for years with his wife and son, surrounded by a small but very loyal retinue. A friend of Giuseppe Prezzolini, he donated a library of 20.000 books, the Paterno Library, to the Casa Italiana at Columbia University. Fiorello La Guardia, the Italian-American mayor of New York City, called him a genius. Born into poverty, Paterno died a wealthy man on the green of the most exclusive country club in Westchester.

Does Education Matter? 2002-05-30 Alison Wolf "Education, education, education" has become an obsession for politicians and the public alike. It is seen as an economic panacea: an engine for growth and prosperity. But is there a link between increased spending on higher education and economic growth? Professor Alison Wolf takes a critical look at successive governments' education policy and challenges many of the tenets of received wisdom: there are no economic reasons for spending more on higher education in order to stimulate growth. The conclusion of this devastating book is that a large proportion of the billions poured into vocational training and university provision might be better spent on teaching the basics at primary school.

Putin's Russia: really back? 2016 Aldo Ferrari Attempts by Washington and Brussels to push Russia to the fringes of global politics because of the Ukrainian crisis seem to have failed. Thanks to its important role in mediating the Iranian nuclear agreement, and to its unexpected military intervention in Syria, Moscow proved once again to be a key player in international politics. However, Russia's recovered assertiveness may represent a challenge to the uncertain leadership of the West. This report aims to gauging Russia's current role in the light of recent developments on the international stage. The overall Russian foreign policy strategy is examined by taking into account its most important issues: Ukraine and the relationship with the West; the Middle East (intervention in Syria, and ongoing relations with Turkey, Iran and Saudi Arabia); the development of the Eurasian Economic Union; the Russian pivot towards Asia, and China in particular. The volume also analyzes if and to what extent Moscow can fulfill its ambitions in a context of falling oil prices and international sanctions.

Governance Beyond the Law 2019-03-29 Abel Polese This volume explores the continuous line from informal and unrecorded practices all the way up to illegal and criminal practices, performed and reproduced by both individuals and organisations. The authors classify them as alternative, subversive forms of governance performed by marginal (and often invisible) peripheral actors. The volume studies how the informal and the extra-legal unfold transnationally and, in particular, how and why they have been/are being progressively criminalized and integrated into the construction of global and local dangerhoods; how the above-mentioned phenomena are embedded into a post-liberal security order; and whether they shape new states of exception and generate moral panic whose ultimate function is regulatory, disciplinary and one of crafting practices of political ordering.

Coercive Diplomacy, Sanctions and International Law 2016-03-24 Natalino Ronzitti This volume explores sanctions as instruments of coercive diplomacy, delving into a number of theoretical arguments and combining different perspectives from international law and international relations scholars and practitioners.

The Dark Side of Globalisation 2019-03-28 Leila Simona Talani Firmly rooted in the International Political Economy (IPE) tradition, this book addresses the negative consequences of globalisation, what is termed here the 'dark side of globalisation'. It explores different definitions of globalisation, whether the globalisation we have seen since the 1970s is substantially new, and to what extent it can be governed. Building on these foundations, the work assesses the prospects for de-globalisation. By focusing on this dark side of globalisation, the authors show how the global economic crisis, and its various local and sectorial manifestations, intensified – rather than generated – existing trends. This scholarship provides an account of the current predicament that is both more complex and more persuasive than the opposition between globalisation and de-globalisation.

The Mind of Pope Francis 2018-08-15 Massimo Borghesi A commonly held impression is that Pope Francis is a compassionate shepherd and determined leader but that he lacks the intellectual depth of his recent predecessors. Massimo Borghesi's The Mind of Pope Francis: Jorge Mario Bergoglio's Intellectual Journey dismantles that image. Borghesi recounts and analyzes, for the first time, Bergoglio's intellectual formation, exploring the philosophical, theological, and spiritual principles that support the profound vision at the heart of this pope's teaching and ministry. Central to that vision is the church as a coincidentia oppositorum, holding together what might seem to be opposing and irreconcilable realities. Among his guiding lights have been the Jesuit saints, Ignatius and Peter Faber; philosophers Gaston Fessard, Romano Guardini, and Alberto Methol Ferrer; and theologians Henri de Lubac and Hans Urs von Balthasar. Recognizing how these various strands have come together to shape the mind and heart of Jorge Mario Bergoglio offers essential insights into who he is and the way he is leading the church. Notably, this groundbreaking book is informed by four interviews provided to the author, via audio recordings, by the pope himself on his own intellectual formation, major portions of which are published here for the first time.

City of Panic 2005-08 Paul Virilio Written in the shadow of war, City of Panic argues that cities everywhere have been the dedicated target of political and technological terror throughout the 20th century. The wanton erasure of the past, the construction of identikit places, the proliferation of gated-communities, the ever-widening net of surveillance, the privatization of what was public. In this globalized and militarized "everywhere," all citizens are becoming one citizen--saturated, standardized and synchronized--ever more reliant on a media fabricating a world of fear. For the panic of the 21st century is simply the final phase of the pincer movement. Place-less, media-fed, panic-struck - welcome to the desert of the real. --- Product Description

The Girard Reader 1996 René Girard Rene Girard, the author of groundbreaking scholarly books such as Violence and the Sacred and Things Hidden Since the Foundation of the World, has long been an intellectual cause celebre in Europe. Although he has studied and taught in the United States since the 1940s, he is now -- in his 70's -- finding his lifework praised and taught in academic and religious circles throughout the country.The Girard Reader brings that work to a broader audience. It includes major excerpts from Girard's books and articles which cover all aspects of his theories on violence, religion, and culture. These views cut across theology, biblical studies, anthropology, psychology, and literature. The book concludes with a conversation between Rene Girard and editor James G. Williams that brings new focus to his Christian vision and breathtaking oeuvre.

Scientific Objectivity and Its Contexts 2014-03-11 Evandro Agazzi The first part of this book is of an epistemological nature and develops an original theory of scientific objectivity, understood in a weak sense (as intersubjective agreement among the specialists) and a strong sense (as having precise concrete referents). In both cases it relies upon the adoption of operational criteria designed within the particular perspective under which any single science considers reality. The "object" so attained has a proper ontological status, dependent on the specific character of the criteria of reference (regional ontologies). This justifies a form of scientific realism. Such perspectives are also the result of a complex cultural-historical situation. The awareness of such a "historical determinacy" of science justifies including in the philosophy of science the problems of ethics of science, relations of science with metaphysics and social dimensions of science that overstep the traditional restriction of the philosophy of science to an epistemology of science. It is to this "context" that the second part of the book is devoted.

Critique and Crisis 2000-03-13 Reinhart Koselleck Critique and Crisis established Reinhart Koselleck's reputation as the most important German intellectual historian of the postwar period. This first English translation of Koselleck's tour de force demonstrates a chronological breadth, a philosophical depth, and an originality which are hardly equalled in any scholarly domain. It is a history of the Enlightenment in miniature, fundamental to our understanding of that period and its consequences. Like Tocqueville, Koselleck views Enlightenment intellectuals as an uprooted, unrealistic group of onlookers who sowed the seeds of the modern political tensions that first flowered in the French Revolution. He argues that it was the split that developed between state and society during the Enlightenment that fostered the emergence of this intellectual elite divorced from the realities of politics. Koselleck describes how this disjunction between political authority proper and its subjects led to private spheres that later became centers of moral authority and, eventually, models for political society that took little or no notice of the constraints under which politicians must inevitably work. In this way progressive bourgeois philosophy, which seemed to offer the promise of a unified and peaceful world, in fact produced just the opposite. The book provides a wealth of examples drawn from all of Europe to illustrate the still relevant message that we evade the constraints and the necessities of the political realm at our own risk. Critique and Crisis is included in the series Studies in Contemporary German Social Thought, edited by Thomas McCarthy.

Victors' Justice 2020-01-28 Danilo Zolo Victors' Justice is a potent and articulate polemic against the manipulation of international penal law by the West, combining historical detail, juridical precision and philosophical analysis. Zolo's key thesis is that contemporary international law functions as a two-track system: a made-to-measure law for the hegemons and their allies, on the one hand, and a punitive regime for the losers and the disadvantaged, on the other. Though it constantly advertised its impartiality and universalism, international law served to bolster and legitimize, ever since the Tokyo and Nuremberg trials, a fundamentally unilateral and unequal international order.
