Before you decide to have a session with them, talk to the acupuncturist to know their credentials. This will also give you the opportunity to find out how much do they charge as this can be from \$45 to more than \$100 per session.

You can probably ask for the name and contact number of a previous client so you can ask this person how everything went. Remember, if it doesn't work out for you, don't be afraid to find someone else who can do a better job.

The most important thing to do during the session is to relax. If you feel an itch or something, tell the acupuncturist. The same goes if you are nervous or experience a burning sensation so the specialist will take out the needles.

Concepts the yellow belt memory jogger a guide.Chances are, you were consulting with a doctor prior to your visit to the acupuncturist. If there are any prescription medicines given, don't forget to take them.

You will not feel any improvement after just one or two visits with the acupuncturist. Just the same, you should write this down so you can go back to the acupuncturist on your next visit and tell him or her how you felt during the previous session. Such feedback will let the specialist know what needs to be modified in the future to help you with your problem.

The acupuncturist might give you some herbs to take as part of your treatment. Since you don't know if taking them will have any side effects with the medication you are taking, you should first consult with your doctor if it is safe to consume both.

Behind the the yellow belt memory jogger a guide

The profit & loss of a certain company is determined by finance professionals through accounting. They can determine what created the profits as well as the losses. Accountants form some sort of business equation so justify the profits & losses of a business. By doing so, they can easily tell a company's net worth.

It seems that by simply starting to define one accounting term, it eventually leads to defining other terms as well. Net worth is another term that is quite difficult to understand. It refers to the resulting amount after deducting the liabilities of a company from the assets. Private companies refer to net worth as owner's equity.

Why owner's equity? Well, after deducting all the liabilities, what's left basically belongs to the owner. In the case of public companies, the profit of the business is returned as dividends to shareholders. As you can see, before owner or shareholders of a company can take hold of the profits, all liabilities must be deducted first.

It might not be something to replace regular trips to the doctor but with its many possible benefits, acupuncture might be worth trying out very soon.

Part of the curriculum will also include basic courses in traditional medicine covering subjects such as anatomy, biosciences, medical terminology, herbal medicine, moxibustion, and acupressure. In some schools, they may require students to also learn about nutrition and various kinds of research.

Once they graduate, they may start in an entry level position earning \$40,000 or more which will soon double or triple after years of experience and working themselves up the ladder.

If you want to look for a school that offers acupuncture degrees, it is best to go online and see which one has the best program that suits your requirements.

Discovery the yellow belt memory jogger a guide...An infant will have a normal blood pressure reading of 80/45, where as an adolescent will have a normal blood pressure reading of 110/70. Therefore, age, gender, and height are important factor when determining the normal blood pressure level. Adults will have a higher blood pressure than the infants and teenagers. Also, boys have a higher blood pressure when compared to girls and tall people have a higher blood pressure than short people. An adolescent is said to have high blood pressure when the blood pressure is more than the blood pressure of ninety percent people of his/her age, gender and height.

There are many risks associated with hypertension or high blood pressure. The risk of developing coronary heart disease increases proportionally. The arteries will develop greater resistance towards the blood flow, because of which the heart will pump blood harder. Stroke is also another risk. Adolescents who have had high blood pressure as a child, develop harmful effects on the blood vessels and heart till the time they turn twenty.

The causes of high blood pressure can be classified as primary and secondary. If the causes are definite, they are primary and if the cause is linked to some illness, it is secondary. Primary causes are high blood cholesterol levels, smoking, stagnant lifestyle and overweight. Secondary causes are obesity, immobility due to chronic illness, prescription drugs, intense pain due to burns or cancer and illegal drugs. High blood pressure can develop due to hereditary reasons.

A rest of about a month is generally advised and normal activities can be resumed after acute symptoms disappear. Also care should be taken to avoid physical activities which are heavy in nature and also activities or sports involving physical contacts should also be avoided. Care must also be taken to avoid eating sweet things in excess for few months.

Menstrual Disorders in Adolescent Girls

Adolescence is the time when there is sudden transformation in the body and many questions arises in the minds of the adolescents. Firstly they are not able to cope with the changes and secondly the changes bring along problems with them. The most challenging problems are related to menses, in girls. Menstrual conditions are many that may require physician's attention or any other healthcare professional's attention. The most common of the menstrual disorders are premenstrual syndrome, dysmenorrheal and amenorrhea.

Before the onset of the menses, females face many uncomfortable symptoms which last for a short period, stretching from few hours to few days. But some of them can be very intense and can disturb the normal functioning of the person. These symptoms are grouped as premenstrual syndrome. In usual cases, the symptoms come to a halt when the menses begin, but for some they may last even after the menstrual periods are over. Eighty five percent of the females experience some of the symptoms of premenstrual syndrome at one time or the other. Nearly forty percent experience the symptoms so intensely that their daily chores are affected by it and ten percent are disabled by it.

As the needles are embedded in the body, signals are sent to the brain thus promoting the release of endorphins from the pituitary gland.

There are also other points in the body that serve as gateways for better weight management. One of these placements promotes a decrease in an individual's appetite, while another has the ability to reduce water retention in the body. The acupuncturist may choose a multi-targeted approach, depending on the requirements of the patient.

Happiness the yellow belt memory jogger a guide.**Accounting Terms – Profit & Loss and Other Terms**

Different fields of study make use of certain terms that are not easily understood by others. If you're an accounting student or a professional accountant, you know the different terms used in accounting. One very popular term is profit & loss.

So, do you know what the term means? To start with, you have to determine what profit means. Profit can be referred to as net earnings or net income. Businesses can either sell services or even products. Profit will come from the sales of these services and products. If the costs of running a business are controlled, it can add up to the profits.

Profits are also called ROI or return on investment. However, this term is often limited to securities like bonds or stocks. But still, some companies use ROI to mean short or long term business outcomes. Taxable income is another term for profit.

But before anyone can try facial acupuncture, they first have to be evaluated by the acupuncturist. This person will evaluate your age, lifestyle and diet. If everything looks good, then you will probably do an average of about 12 to 15 treatments. More could be done if your skin tends to sag, manifest jowls or have droopy eyes.

Facial acupuncture treatment needs to be done twice a week for about 45 minutes to 1 hour. For those who can't make two sessions in a week, they can opt for the 1 treatment that will last 90 minutes.

Acupuncture and Autism

Studies have shown that there is an increase in the number of children that have been diagnosed with autism. Until now, doctors have not yet found a cure to this illness which is why some parents want to experiment with alternative forms of treatment and one example is acupuncture.

Acupuncture is a holistic approach in treating and preventing certain diseases. Its main tool are very thin needles that are inserted to targeted points in the body. The body has about 400 of them linked through a system known as meridians or pathways. Once these are stimulated, these are supposed to create balance in the body.

Autism on the other hand is a brain disorder that is long term. This disease is characterized by deficits in language, social communication and cognition. Children who are diagnosed with this illness may also suffer from secondary problems such as aggression, irritability, stereotypes, hyperactivity, negativism, volatile emotions, temper tantrums, short attention span and obsessive-compulsive behavior.

Common Oral Health Problems in Adolescents

Adolescents face many oral health problems which may require them to visit a dentist or any other healthcare professional. Irregular teeth growth is a common problem and adolescents with braces are a common sight. Another problem is wisdom teeth extraction or the removal of the third molar. Dental cavities are yet another common problem in adolescents.

Orthodontics is a specialty in dentistry which deals with correction, development and prevention of irregular teeth, jaw and bite. Orthodontics also helps to correct jaw disorders and facial abnormalities. If a general dentist feels abnormalities in the adolescent, he/she will refer the patient to an orthodontist. The American Dental Association suggests that every adolescent above the age of seven should get an orthodontic evaluation done. Problems which require orthodontic treatment are crowded or crooked teeth, extra teeth, missing teeth, under-bite, overbite, jaw joint disorder, and incorrect or misaligned jaw position.

To get braces or any other orthodontic treatments, the appropriate age is ten to fourteen years. But regardless of the age, the same physical and biological process is used in correcting and moving the teeth alignments. Braces are also known as fixed orthodontic appliances. There are three types of braces used to move and reposition the teeth. The first consists of brackets which are made out of plastic or metal. They are either of tooth color or clear and are bonded onto the teeth. The second type is the lingual type of brackets which are attached to the back teeth and cannot be seen while talking. The third type is a band. It is a metal band which covers the teeth and wraps around the last ones.

Allergic reactions can range from mild symptoms like runny nose to more severe ones such as difficulty in breathing. Teenagers suffering from asthma often have allergic reaction to cold and get asthma attack is another example of allergies. Some kinds of allergies trigger multiple symptoms. Allergic reactions in very rare cases also produce severe reaction known as "anaphylaxis" for which the signs are difficulty in breathing, difficulty in swallowing, swelling in tongue, lips and throat and dizziness. This allergic reaction occurs as soon as the system is exposed to substances that trigger allergic reactions like peanut although some reactions are delayed by as much as four hours.

The reasons why people get allergies can be various and one of the reasons could be hereditary but that that does not necessarily mean that children are bound to get allergies from their parents. Some of the common allergens include food, airborne particles, insect bite and sting, medicines, chemicals etc. Food allergies typically occur in infants and usually vanish as the child grows. The list of food allergens includes milk & dairy products, wheat, soy, eggs, peanuts, and seafood. Some people are allergic to stings and bites of certain insects. The venom in the bite is the one which actually causes reaction and can be as serious as anaphylactic in some teens. Some teens are also allergic to airborne particles which are also known as environmental allergens. They are also the commonest of all the allergens. Examples of these allergens include dust mites, animal dander, mold spores, grass pollens, trees and ragweed. Some adolescents are also allergic to certain antibiotic medicines. Another common allergen is chemical, certain chemicals present in laundry detergents or cosmetics can cause rashes that are itchy in nature.

Allergists usually treat allergic problems. They may ask questions like symptoms of the allergy and whether it is hereditary. They may also prescribe certain diagnostic tests like blood or skin test depending on the type of allergy. The best way to treat allergies is to completely avoid the substances that cause allergies. However there are certain medications and injections are also available to treat allergies.

There are two subcategories of eating disorders, anorexia nervosa and bulimia nervosa. Anorexia nervosa is the restrictive form, where the intake of food is limited severely. In bulimia nervosa is the eating disorder where the adolescent binges on food and then tries to minimize the effects by forcibly vomiting, fasting, and catharsis or over exercising. When handling adolescence eating disorders, they must be handled differently from adult eating disorders.

Adolescents face problems such as growth retardation, suppressed height, abnormal weight, pubertal delay, menstrual periods absence, and menses unpredictability. When the adolescent is growing there will be critical tissue components loss like loss of body fat, muscle mass and bone mineral.

Nutritional imbalance is also caused which reflect abnormalities in the levels of vitamins, mineral and other trace elements. The problem is that these abnormalities cannot be recognized clinically. But since protein and calories are essential to the growth of the adolescent, it is important to trace their abnormalities. Because of the problems, healthy adulthood is not a possible thing. Because of all these reasons, it is important to diagnose adolescence eating disorders as early as possible. Eating disorders give rise to peak bone mass impaired acquisition in case of adolescents. When they turn into adults, this problem aggravates to osteoporosis. Even internal organs get affected due to eating disorders. All this can be prevented by early intervention so as to limit, prevent and ameliorate medical complications, which can turn become life threatening.

Adolescents who practice unhealthy weight control practices and are obsessive about figure, weight, food or exercise should be treated clinically. Not only should the symptoms be checked, but their duration, intensity and frequency should also be checked. Although most of the physical complications caused due to eating disorders get solved with the help of nutritional rehabilitation some of the conditions become irreversible and the long term consequences of this are very dangerous. It is best if the eating disorders are recognized in the early stages as it won't result in irreparable damage. The medical monitoring should be pursued till the adolescent returns back to appropriate psychological and medical health.

Transformation the yellow belt memory jogger a guide...Precautions should not only be taken indoors, but outdoors too. This is because; more than forty thousand people get eye injuries outdoors. Ninety nine percent of the injuries are caused while playing sports. So it is necessary for the youngsters to wear protective eyewear while playing sports or when involved in outdoor recreational activities. A special helmet is designed with wire shield or polycarbonate face mask which is not only safe, but comfortable, too. Protective eyewear should also be worn while performing experiments in science lab. Fireworks must only be handled by adults.

Because of increasing use of computers, more and more youngsters are getting eye strains. The symptoms of eye strain caused by computer are red & watery eyes, focusing problems, aching & tired eyelids, eye muscle spasm, backache and headache. In such an environment, eye exercise must be done regularly. The eyes must be made to focus on distant objects and should be rotated from side to side. It is extremely important to give ample rest to the eyes. Glasses with UV shield must be worn when looking at the computer screen. Eye strain can be avoided by increasing the distance from the monitor.

Eye hazards are also caused when cosmetics are used improperly by contact lens wearers. Some of the adverse reactions are injury, eye irritation, allergy, dryness, infection, and lens deposition. That is the reason why adolescents must be made aware of the risk they will face when opting for contact lens. Girls should understand that they should buy hypoallergenic cosmetics and especially the non-scented variety, manufactured by big brand names.

Cosmetics should not be shared with anything else. The applicator brushes must be washed regularly and old mascara must be disposed and not refilled. Eye shadows which are glittery, pearlescent, frosted or iridescent contain ground tinsel or oyster shell, which should be always avoided. Eyeliner should not be applied in the inner lid edge. Loose powder should be avoided. Cream should not be applied near the eyes. The wearer should wash hands while handling contact lens. No crying, washing of face or bathing should be done with the contact lens on.

For Free the yellow belt memory jogger a guide:Eating disorders not only result in physical abnormalities, but also psychological abnormalities. Adolescents with eating disorders take onto social isolation, low self esteem, affective disorders, low self concept, substance abuse, anxiety, and depression. Usually adolescents switch to unhealthy eating habits because of depression and lack of knowledge about affective techniques to lose weight. So the patients who are being treated for eating disorders must also be treated for psychiatric illness, if they have any. Even if the habits doesn't fit the strict criteria, adolescents who limit food intake, binge, vomit or purge accompanied with or without harsh weight loss, should be monitored because of the involvement of risk of even death. Early treatment will have an improved outcome. But the level of intervention in adolescents should be less when compared to adults.

Eye problems and injuries in Adolescents

Every year more than one million people get eye injuries, out of which ninety percent are preventable if safety eyewear is used. One hundred and twenty five thousand eye injury cases are caused by household products.

It is a good habit to wash hands regularly, especially after handling household chemicals. When using detergents and hazardous solvents, the handler must wear chemical safety goggles. Also, no children must be around while handling chemicals. While spraying, the nozzle must be turned away from the face. Fertilizers, pesticides and paints must be stored away from reach. While doing household activities proper protective gears such as goggles, gloves,

boots and helmet should be worn, if required. The house must be illuminated adequately to avoid accidents in the dark. Stairs should also be illuminated and the rails must also be installed. The instructions for opening the tops of bottles must be read carefully to avoid them from popping and injuring other people. Children and adolescents should read instructions before handling operating equipment before playing games. All power equipment must be installed with guards. While playing outside, the eyes must be protected by UV protective goggles and it is a bad idea to look at the sun directly.

Symptoms of depression in adolescents are eating disorders, weight change, irritable mood, excessive sleeping in daytime, excessive temper, criminal behavior, memory loss, fatigue, self preoccupation, sadness, difficulty in concentrating, worthlessness feelings, loss of interest, self hatred, obsession with death and thought & attempts of suicides. When these symptoms are being noticed for more than two weeks, it is important to get treatment for the adolescent. Depression not only affects interpersonal relationships, but school performance as well. Depressed adolescents are more prone to take onto drugs and alcohol as an attempt to overcome their depression. Such problems require intensive treatment.

The doctor will take blood test and perform physical examination to determine the cause of depression. The adolescent can also be tested for substance abuse such as smoking, heavy alcohol consumption, marijuana smoking, and usage of other drugs. After the physical examination, psychiatric evaluation is also done to understand the cause of sadness, loss of interest and irritability. Depression can also lead to the development of other psychiatric disorders such as schizophrenia, mania and anxiety. It is also important to determine whether the adolescent poses a risk for himself/herself and others. Family and school personnel can provide valuable information about the adolescent to the doctor.

Treatment for depression for adolescent is similar to the treatment of depression for adults. Along with the treatment, the adolescent are given antidepressant medication and psychotherapy. Antidepressant medications include tricyclics, Prozac, selective serotonin reuptake inhibitors or SSRI. Some of the medicines increase the risk, so it is a good idea that parents discuss the possible risks with the doctor. Only some of the antidepressant medications are meant for children and adolescents. Adolescents with severe depression need to be hospitalized as they are more prone to kill themselves.

[Things You Should Know About Acupuncture](#)

Acupuncture has been practiced for hundreds of years. To let you know more about this practice, here are a few things that you should know.

First, acupuncture is a holistic healthcare technique that involves inserting needles into specific points in the body. Studies have been conducted and it has been proven to treat ear, nose, throat, respiratory, gastrointestinal, eye, nervous system and muscular disorders.

[Investment the yellow belt memory jogger a guide](#)

The history of acupuncture is first discussed in an ancient Chinese medical text called the "Huang Di Nei Jing" or The Yellow Emperors Classic of Internal Medicine.

But there have been a few who are skeptic as archaeologists have found a 5,000 year old mummy in the Alps with similar acupuncture points in the body. This gives some people the idea that it was used even before the Chinese did but sine there is no written text to prove that, no one is certain and credit to this ancient practice goes back to the Chinese.

In the 6th century, this knowledge moved to Japan. In the 17th century, a man by the name of Waichi Sugiyama wanted to make this procedure painless for the patient so he developed the insertion tube, a small cylindrical tube through which the needle is inserted. Believe it or not, this technique is still being used today.
