This book shows you how to build eight different systems, from the shoebox-sized Shuttle system down to the stick-of-gum sized gumstix. Name Reactions and Reagents in Organic Synthesis 2005-05-20 Bradford P. Mundy This Second Edition is the premier name resource in the field. It provides a handy resource for navigating the web of named reactions and reagents. Reactions and reagents are listed alphabetically, followed by relevant mechanisms, experimental data (including yields where available), and references to the primary literature. The text also includes three indices based on reagents and reactions, starting materials, and desired products. Organic chemistry professors, graduate students, and undergraduates, as well as chemists working in industrial, government, and other laboratories, will all find this book to be an invaluable reference.

Protective Groups in Organic Chemistry 2012-12-06 J. McOmie During the past decade there has been a great increase in the use of protective groups, especially in the synthesis of large and complex organic molecules. Perhaps the greatest activity has been in the peptide field where such triumphs as the total synthesis of insulin and of bovine ribonuclease (molecular weight 13,700) have been achieved. Correspondingly, more protective groups have been devised for the protection of amino and imino groups than for any other functional group. There are many reviews and books on the synthesis of peptides but there has been no general survey of protective groups since my own review in 1963. At that time the five main methods for the removal of protective groups involved acid or base hydrolysis, reduction, oxidation, or thermal elimination reactions. Recent advances include the use of photo-sensitive and metal ion sensitive protective groups, and the attachment of functional groups to reactive polymers as a method of protection during the solid-phase synthesis of peptides and polynucleotides. Another interesting development is the design and use of protective groups with a built-in 'safety-catch', which can be 'released' by a specific chemical reaction, so that an otherwise stable bond is made labile at the appropriate moment thereby allowing the protective group to be removed under very mild conditions. My own interest in protective groups dates from 1944 when, as a student, I gave two lectures on the subject and produced an 11 page review including 70 references.

Asphaltenes and Asphalts, 1 1994-09-08 G.V. Chilingarian This is the first volume of a two-volume set of critical reviews of many aspects of both asphaltenes and asphalts and their interrelationship. Asphaltene is invariably present in asphalt or bitumen and other fossil fuel-derived liquids such as coal tar, coal liquefaction products, pyrolyzed shale oil from oil shales, source rock extracts and numerous naturally occurring bituminous substances. The latter include asphaltites, asphaltoids, waxes, and carbonaceous deposits containing a composition of petroleum and coal. The contents cover not only the basic science of asphaltene but also deal with the applications and technology such as upstreams (production, recovery) and downstreams (refining, upgrading) of petroleum, and the paving technology and formulation preparation. The main features of the book are: it provides an up-to-date, in-depth review of every aspect of asphaltenes and asphalts; it spans five decades of research and technology of heavy fractions of petroleum; it presents a global view of asphaltene related to exploration production, refining and upgrading. The book will be welcomed as a valuable reference source for petroleum companies, research institutes, refineries, universities and also by individuals dealing with the production, origin, formation, engineering, conversion and catalysis of heavy oil, tar sands and other bitumens

materials.

Helicobacter Pylori in the 21st Century 2010 Philip Sutton Helicobacter pylori is a globally significant pathogen that infects half of the population of the world. Providing a broad overview of the understanding of this pathogen, this book explores a range of topics including virulence factors, vaccine development and obstacles, epidemiology, antibiotic resistance and the role of Nod receptors.

Named Organic Reactions 2005-08-19 Thomas Laue This Second edition contains concise information on 134 carefully chosen named organic reactions - the standard set of undergraduate and graduate synthetic organic chemistry courses. Each reaction is detailed with clearly drawn mechanisms, references from the primary literature, and well-written accounts covering the mechanical aspects of the reactions, and the details of side reactions and substrate limitations. For the 2nd edition the complete text has been revised and updated, and four new reactions have been added: Baylis-Hillmann Reaction, Sonogashira Reaction, Pummerer Reaction, and the Swern Oxidation and Cyclopropanation. An essential text for students preparing for exams in organic chemistry.

007 2013-09-11 Rudyard Kipling "007" (originally subtitled "The Story of an American Locomotive") is a short story by Rudyard Kipling. It is a story in which steam locomotives are characters ("007" is the serial number of the protagonist), somewhat like the later, more well-known tales of The Railway Series. The locomotives themselves have personalities and talk in a manner reminiscent of what in real life would be the manner of the men who operate them. Human beings appear in the story only as seen from the perspective of the engines. The story relates a sort of rite of passage. A fast goods train was derailed by hitting a shoat (young pig) which got on the track, and ended up in a farm field. "007", a "sensitive," new, youthful engine performs in a heroic and manly way pulling the breakdown train, winning him the respect of his fellow engines. At the conclusion, the highest-ranking engine Purple Emperor, a "superb six-wheel-coupled racing-locomotive, who hauled the pride and glory of the road, the

millionaires' south-bound express" inducts him into a fraternal organisation: "I hereby declare and pronounce No. .007 a full and accepted Brother of the Amalgamated Brotherhood of Locomotives, and as such entitled to all shop, switch, track, tank, and round-house privileges throughout my jurisdiction, in the Degree of Superior Flier, it bein' well known and credibly reported to me that our Brother has covered forty-one miles in thirty-nine minutes and a half on an errand of mercy to the afflicted. At a convenient time, I myself will communicate to you the Song and Signal of this Degree whereby you may be recognised in the darkest night. Take your stall, newly entered Brother among Locomotives!" ".007" is one of a number of stories and poems that Kipling wrote about engines, engineers, and machines. A social history of technology notes Kipling was a pioneer in "establish[ing] the world of work as an appropriate subject for literature" and says, The affection between Kipling and engineers was mutual. Not only did Kipling use engineers in his plot, but engineers relished his work. He became their unofficial poet laureate. Another critic notes, A concern for artificial nature and its beneficent powers is also what attracts [Kipling] to the machine, from which, in turn, we get stories like 'The Ship That Found Herself' and '.007'. To Kipling..., the machine is a major expression of man's ability to understand and control the forces of nature. Some contemporary reviewers felt he went too far in this story. In a long essay in MacMillan's magazine, "an admirer"-who, judging from his comment on bicycles and horses, does not feel the same way about machines as Kipling-complained, Here all Mr. Kipling's mania break loose all at once-there is the madness of American slang, the madness of technical jargon, and the madness of believing that silly talk, mostly consisting of moral truisms, is amusing because you put it into the mouths of machines.... It is no doubt true that machines have their idiosyncrasies, their personalities even; a bicycle can be nearly as annoying as a horse. For once in a way it may be good fun to push the fancy a little farther and attribute to them sentient life, but Mr. Kipling has overdone the thing.

Business Adventures 2014-07-08 John Brooks "Business Adventures remains the best business book I've ever read." —Bill Gates, The Wall Street Journal What do the \$350 million Ford Motor Company disaster known as the Edsel, the fast and incredible rise of Xerox, and the unbelievable scandals at General Electric and Texas Gulf Sulphur have in common? Each is an example of how an iconic company was defined by a particular moment of fame or notoriety; these notable and fascinating accounts are as relevant today to understanding the intricacies of corporate life as they were when the events happened. Stories about Wall Street are infused with drama and adventure and reveal the machinations and volatile nature of the world of finance. Longtime New Yorker contributor John Brooks's insightful reportage is so full of personality and critical detail that whether he is looking at the astounding market crash of 1962, the collapse of a well-known brokerage firm, or the bold attempt by American bankers to save the British pound, one gets the sense that history repeats itself. Five additional stories on equally fascinating subjects round out this wonderful collection that will both entertain and inform readers . . . Business Adventures is truly financial journalism at its liveliest and best.

My Anecdotal Life 2014-03-18 Carl Reiner More than once, Carl Reiner has had friends say, "Hey, Reiner, you ought to write those things down." And at eighty, he finally has. In this funny and engaging memoir, one of the best raconteurs on the planet recalls his life in show business in short comic takes. Reiner tells of how, after answering an ad for free acting classes on his brother Charlie's advice, he forsakes a budding career as a machinist for an acting career. In "Sidney Bechet and His Jazz Band Meet Franz Kafka," he captivates the legendary jazz man and his band with an unusual reading of *The Metamorphosis*, during a thunderstorm at a Catskills resort in 1942. Reiner also recalls the highlights of the succeeding decades: his first sweaty audition, impersonating a dog impersonating movie stars; his forays into the theater; his work on *Your Show of Shows* and *The Dick Van Dyke Show* during TV's golden days; and his long friendship and collaboration with Mel Brooks which gave birth to the *Two Thousand Year Old Man*. In "A Recipe to Remember," he recites a recipe for cream cheese cookies to a star-studded audience that includes Paul Newman, Leonard Bernstein, and Barbra Streisand. In "The Gourmet Eating Club," he gives an insider's take on the now-legendary group that included Mario Puzo, Joseph Heller, Zero Mostel, and other luminaries. Mary Tyler Moore, Sid Caesar, Mickey Rooney, Johnny Carson, Cary Grant, Dinah Shore, Ann Bancroft, Jean Renoir – the list goes on and on – also appear in what Reiner calls the "literary variety show" that captures the highs and lows of his extraordinary life. Through it all, Reiner displays the wit and warmth that have made him one of the most beloved figures in the entertainment business. This charming memoir will delight anyone who wants a behind-the-scenes look at five decades of Hollywood and television history.
