A Public Service 2020-01-06 Tim Schwartz "This timely book is a guide to any would-be whistleblower, any person considering the disclosure of information which exposes wrong doing or harmful behavior. In today's highly surveilled digital world, knowing the safest and most secure way to reveal wrongdoing is critical. Thoroughly and in detail, Tim Schwartz outlines the pros and cons of different methods of exposure. It is the must-have handbook for concerned employees as well as journalists and lawyers working with whistleblowers." – Katharine Gun, former British intelligence worker who revealed illegal U.S. wiretapping of the United Nations Security Council prior to the 2003 invasion of Iraq "Before reaching out to the media, whistleblowers need to safely and anonymously gather documentation of wrongdoing, and then figure out how to securely discuss it with journalists. In the age of ubiquitous surveillance, where even doing a single Google search could out you as the source, this is no simple or easy feat. The techniques described in this book are vital for anyone who wishes to blow the whistle while reducing their risk of retaliation." – Micah Lee, director of information security at The Intercept "Despite my 40 years of working with whistleblowers, Tim Schwartz taught me how much I still have to learn about protecting their identities. This easy-to-understand book, packed with practical nuts-and-bolts guidance, is a must-read for anyone who wants to blow the whistle anonymously." –Tom Devine, legal director, Government Accountability Project "A simple guide to a daunting and vital subject. Schwartz has done outstanding work explaining the ethical, personal, technical and

legal considerations in blowing the whistle."—Cory Doctorow, Boing Boing "In today's digital age with the vast amount of information technology available to target disclosures that those in power would prefer remain hidden, this book provides a practical roadmap when making that often life-altering choice of standing up and exposing abuse and misuse of power across all sectors of society." —Thomas Drake, former National Security Agency senior executive and whistleblower Governments and corporations now have the tools to track and control us as never before. In this whistleblowing how-to, we are provided with tools and techniques to fight back and hold organizations, agencies, and corporations accountable for unethical behavior. Can one person successfully defy a globe-spanning corporation or superpower without being discovered? Can a regular citizen, without computer expertise, release information to the media and be sure her identity will be concealed? At a time we're told we are powerless and without agency in the face of institutions such as Google, Facebook, the NSA, or the FBI, digital security educator Tim Schwartz steps forward with an emphatic "yes." And in fewer than 250 pages of easy-to-understand, tautly written prose, he shows us how. A PUBLIC SERVICE can teach any one of us the tricks to securely and anonymously communicate and share information with the media, lawyers, or even the U.S. Congress. This book is an essential weapon in the pervasive battle to confront corruption, sexual harassment, and other ethical and legal violations.

This book's ABC model guides readers through the stages of program planning, implementation planning, teaching, assessment, and evaluating. Readers are also shown how to use IEPs and develop goals and objectives for lesson plans. In addition, Teaching Disability Sport provides instruction on wheelchair selection and fitting, equipment concerns, and Web addresses for adapted sports and activities. And an inclusion index makes selecting the right sports and games easy. The 200+ games and activities are cross-referenced to functional profiles (low, medium, high) of students with disabilities. The Translational Design of Schools 2016-10-13 Kenn Fisher This book summarises the deep level of research carried out since 2008 within the emerging, evidence-based, translational design (EBD) approach to learning environments research. This programme has been carried out by the Learning Environments Applied Research Network of the University of Melbourne, its partners and colleagues. The chapters are based on ten, 3-4 year full-time doctoral research dissertations with each chapter outlining the key findings from these studies. The book links the chapters through the lens of evidence-based design which originates from the health planning sector. The rigour of that sector is based on the well-accepted methodology of translational research used in clinical medicine for many years. In adapting that practice, translational medicine is akin to translational development. When applied to other sectors and disciplines this becomes EBD health planning, translational engineering or, in the case of evidence-based architecture, translational design. Thus educational planning becomes the translational design of learning environments. These doctoral dissertations are

examples of this approach. The chapters are organised into a narrative that examines evidence-based design through three key themes. The first explores key issues in learning environments, with three chapters covering spatial literacy in pedagogical practice; engaging students in learning spaces; and re-placing classrooms through flexibility. The second theme focusses on the socio-cultural implications of learning environments exploring student identity formation; aligning learning environment affordances for effective professional development in an innovative senior secondary school; and occupying curriculum as space in the arts. The third theme investigates the design implications for learning environments with four chapters covering corridors, nooks and crannies: making space for learning; the role of the primary school library in learning; plans and pedagogies: school design as socio-spatial assemblage; and evaluating the spatial changes in a technology enabled primary years setting.

Mapping Career Counseling Interventions 2022-06-07 Shékina Rochat Mapping Career Counseling Interventions provides an innovative insight into identifying and resolving problems within career management. In recent years, myriad of counselling tools has been developed so that practitioners can offer the most appropriate support possible. To guide the selection of such tools, this book offers a "map" that introduces and links 63 frequent career management difficulties with more than 160 qualitative interventions and solutions. Through its highly organized layout and extensive detail, major career management difficulties—namely lack of motivation, indecisiveness, dysfunctional beliefs, lack of information, conflicts, and lack of employability—are scrutinized and divided into specific, more manageable sub-difficulties. Targeted interventions to address each of those difficulties, originating from vocational, motivational, and positive psychology, are then suggested and described. From these conclusions, the book delivers practical advice to help conduct these interventions in a sensitive and respectful manner. Overall, this book outlines the most effective ways to foster a good working alliance. One of the book's standout features is its inclusion of an inventory and card sort to facilitate the identification of obstacles to professional choice and career management. This book is a pivotal resource for the large and diverse community of career development practitioners, such as career counsellors, career advisors, employment counsellors, and career coaches, regardless of their specific audience and work settings.

KI 2008: Advances in Artificial Intelligence 2008-09-24 Andreas Dengel KI 2008 was the 31st Annual German Conference on Artificial Intelligence held September 23-26 at the University of Kaiserslautern and the German Research Center for Artificial Intelligence DFKI GmbH in Kaiserslautern, Germany. The conference series started in 1975 with the German Workshop on AI (GWAI), which took place in Bonn, and represents the first forum of its type for the German AI Community. Over the years AI has become a major field in computer science in Germany involving a number of successful projects that received much international attention. Today KI conferences are international forums where participants from academia and industry from all over the world meet to exchange their recent research results and to discuss trends in the field. Since 1993 the meeting has been called the "Annual German Conference on Artificial Intelligence," designated by the German acronym KI. This volume contains the papers selected out of 77 submissions, including a number of submissions from outside German-speaking countries. In total, 15 submissions (19%) were accepted for oral and 30 (39%) for poster presentation.

Oral presentations at the conference were in a single track. Because of this, the choice of presentation form (oral, poster) was based on how well reviews indicated that the paper would fit into one or the other format. The proceedings allocate the same space to both types of papers. In addition, we selected six papers that show high application potential - describing systems or prototypical implementations of innovative AI technologies. They are also included in this volume as two-page extended abstracts.
