The Peabody Picture Vocabulary Test Fourth Edition (PPVT-4) is a highly regarded vocabulary test that has been in use for nearly 50 years. Formulated by Lloyd M. Dunn and Douglas M. Dunn, the assessment is made to evaluate receptive vocabulary for American English. It is quick and simple to administer, saving important time so that focus can be placed on applying intelligent interventions.

The PPVT-4 assessment subject matter covers a broad range of vocabulary comprehension grades, extending from pre-kindergarten through adult age. The assessment questions broadly sample words that represent 20 topic areas (e.g., actions, vegetables, tools), speech parts (nouns, verbs, attributes), and household and educational vocabulary.

The assessment gives two equivalent versions which contain distinct vocabulary words, ensuring that the individual has not “learned” the assessment. One version can be used before intervention implementation to measure people’s vocabulary comprehension and the alternative edition can be employed for re-assessment to assess and note improvement. The PPVT-4 also features a distinctive Growth Scale Value (GSV) which is responsive to slight changes over time.
