By the Sword 2007-12-18 Richard Cohen “Like swordplay itself, By the Sword is elegant, accurate, romantic, and full of brio—the definitive study, hugely readable, of man’s most deadly art.”—Simon Winchester With a new Preface by the author Napoleon fenced. So did Shakespeare, Karl Marx, Grace Kelly, and President Truman, who as a schoolboy would practice fencing with Bess—his future wife— when the two of them returned home from school. Lincoln was a canny dueler. Ignatius Loyola challenged a man to a duel for denying Christ’s divinity (and won). Less successful, but no less enthusiastic, was Mussolini, who would tell his wife he was “off to get spaghetti,” their code to avoid alarming the children. By the Sword is an epic history of sword fighting—a science, an art, and, for many, a religion that began at the dawn of civilization in ancient Egypt and has been an obsession for mankind ever since. With wit and insight, Richard Cohen gives us an engrossing history of the world via the sword. Praise for By the Sword “Touché! While scrupulous and informed about its subject, Richard Cohen’s book is about more than swordplay. It reads at times like an alternative social history of the West.”—Sebastian Faulks “In writing By the Sword, [Cohen] has shown that he is as skilled with the pen as he is with the sword.”—The New York Times “Irresistible. . . extraordinary. . . vivid and hugely enjoyable.”—The Economist “A virtual encyclopedia on the subject of sword fighting.”—San Francisco Chronicle “Literate, learned, and, beg pardon, razor-sharp . . . a pleasure for practitioners, and a rewarding entertainment for the armchair washbuckler.”—Kirkus Reviews (starred review)

British Military Swords 1786-1912 2003 Harvey J. S. Withers

Fire in the Minds of Men 1999 James H. Billington This book traces the origins of a faith—perhaps the faith of the century. Modern revolutionaries are believers, no less committed and intense than were Christians or Muslims of an earlier era. What is new is the belief that a perfect secular order will emerge from forcible overthrow of traditional authority. This inherently implausible idea energized Europe in the nineteenth century, and became the most pronounced ideological export of the West to the rest of the world in the twentieth century. Billington is interested in revolutionaries—the innovative creators of a new tradition. His historical frame extends from the waning of the French Revolution in the late eighteenth century to the beginnings of the Russian Revolution in the early twentieth century. The theater was Europe of the industrial era; the main stage was the journalistic offices within great cities such as Paris, Berlin, London, and St. Petersburg. Billington claims with considerable evidence that revolutionary ideologies were shaped as much by the occultism and proto-romanticism of Germany as the critical rationalism of the French Enlightenment. The conversion of social theory to political practice was essentially the work of three Russian revolutions: in 1905, March 1917, and November 1917. Events in the outer rim of the European world brought discussions about revolution out of the school rooms and press rooms of Paris and Berlin into the halls of power. Despite his hard realism about the adverse practical consequences of revolutionary dogma, Billington appreciates the identity of its best sponsors, people who preached social justice transcending traditional national, ethnic, and gender boundaries. When this book originally appeared The New Republic hailed it as “remarkable, learned and lively,” while The New Yorker noted that Billington “pays great attention to the lives and emotions of individuals and this makes his book absorbing.” It is an invaluable work of history and contribution to our understanding of political life.

Swords and Hilt Weapons 2013 Mike Sharpe Swords and other weapons with handles, or hilt weapons, were originally designed for use in melee, or confused fighting, where combatants were little more than an arm's length apart. Even today, infantryman carry some sort of knife into battle. Swords & Hilt Weapons is an illustrated guide to these remarkable tools. From the simple stone knives manufactured during ancient times to today's albion swords, it offers a complete visual history for experienced swordsmen or anyone fascinated by the beautiful construction of a steel blade. Readers will learn about the anatomy of a sword—from the point, to the blade, to the grip—and the differences between one made in Central Europe and one made in Central Asia. What's better: a battle-axe or a bayonet? Become an expert with Swords & Hilt Weapons!

Wellington at Waterloo 2010-10-18 Jac Weller Jac Weller studies every move and counter-move of the battle, recreating not only the actions and tactics of the two great leaders but the epic engagements and clashes between the troops themselves that were pivotal for the victory or defeat. The author also studies the related battles of Quatre Bras and Ligny. He takes the reader with him onto the battlefield of Waterloo, a terrain whose features are still recognisable today, and which is bought to life for the reader by detailed maps and by the authors vivid and riveting descriptions of the progress of the fighting.This completely original approach, appreciated by the Times Literary Supplement on the books first publication, strikes as fresh today, and this new edition, with an introduction specially written for it by the author, will be eagerly read by military enthusiasts and general reader alike.

Muye Dobo Tongji 2000 Chôngjo ((Roi de Corée ; ) In 1789, King Chongjo, ruler of the Yi dynasty, ordered General Yi Duk-moo to compile an official textbook on all martial art forms then present in Korea to preserve them for future generations. The result, the Muye Dobo Tongji, is the only surviving classical text on the Korean arts of war. Based on the earliest known Korean martial arts treatise, the Muye Chebo written in 1599, the Muye Dobo Tongji clearly shows the influence of the neighbouring Japanese and Chinese armies. Through hundreds of wars and invasions, Korean soldiers adapted battlefield skills and tactics from their enemies, creating a unique system of their own. Organised into 24 distinct disciplines comprised of empty hand fighting, weaponry and horsemanship, this book is an accurate historical snapshot of the warrior arts of the hermit kingdom in the late 18th century. The release of 'The Comprehensive Illustrated Manual of Martial Arts of Ancient Korea' marks the first time this volume is available in English. Carefully translated from the original text and illustrated with reproductions of ancient woodblock carvings, this book provides fascinating insights into Korea's martial arts legacy.

Interdiction in Southern Laos, 1960-1968 2005-01-01 Jacob Van Staaveren Throughout the War in Southeast Asia, Communist forces from North Vietnam infiltrated the isolated, neutral state of Laos. Men and supplies crossed the mountain passes and travelled along an intricate web of roads and jungle paths known as the Ho Chi Minh Trail to the Viet Cong insurgents in South Vietnam. American involvement in Laos began with photo-reconnaissance missions and, as the war in Vietnam intensified, expanded to a series of air-ground operations from bases in Vietnam and Thailand against fixed targets and infiltration routes in southern Laos. U.S. Air Force leaders and aircrews flying interdiction missions over Laotian territory faced a unique set of challenges. Their efforts were plagued by political controversies, daunting weather, rugged terrain, a tenacious foe, and above all a bewildering array of rules of engagement limiting the effectiveness of air operations. Interdiction in Southern Laos, 1960-1968 examines this complex operational environment. Many of these issues-particularly those relevant to conducting a politically sensitive, limited war from foreign bases, with a commitment to minimizing civilian casualties-are still relevant today and for the foreseeable future as the modern Air Force meets its responsibilities in an ever-changing global environment. Richard P. Hallion Air Force Historian
