Tree Kangaroos 2020-11-26 Tree Kangaroos: Science and Conservation, a volume in the Biodiversity of the World: Conservation from Genes to Landscapes series, provides an overview of tree kangaroo species and their relationship with humans. This exciting, interdisciplinary work on tree kangaroo science and conservation is divided into six major sections: (1) tree kangaroo evolution, genetics, taxonomy, ecology, behavior, and conservation status; (2) current and emerging threats to the species; (3) conservation programs in Australia and New Guinea with an emphasis on the human aspect of conservation; (4) the role of zoos in conservation solutions; (5) techniques and technologies to study this elusive marsupial; and (6) what is needed to keep tree kangaroos and their landscapes healthy in the future. The series on Biodiversity of the World: Conservation from Genes to Landscapes includes titles focused on specific species or taxa across disciplinary boundaries and spatial scales—from genes to landscapes. Volumes are edited and written by prominent scholars and practitioners to illuminate and advance biodiversity science and conservation. Includes coverage of all known tree kangaroo species Features contributions edited and written by the world's leading researchers and practitioners focusing on these scientifically mysterious marsupials Provides accessible scientific and general information to a wide audience including students, academics, researchers, conservation professionals, policy makers, business leaders, zoo professionals, health professionals, and people interested in communitybased conservation Presents the current knowledge of tree kangaroos, helping to lay the foundations and best practices for future conservation and research in Australia and New Guinea

Poop Detectives 2016-10-11 Ginger Wadsworth How can dogs that sniff for excrement, urine, vomit, and mucus help protect animals from extinction? In the race to save endangered animals, finding solutions now is critical. Scat-detection dogs like Wicket, Tucker, and Orbee are conservation heroes and pioneers in a cutting-edge field of science. Canine detectives use their super sense of smell to locate the scat of target animals. From loose bear dung to gooey whale poop, scat can tell scientists valuable information about an animal's sex, age, diet, and health—all without harming the animal or endangering the researcher.

Tree Kangaroos 1996 Tim Fridt jof Flannery A three-part scientific work based on a study conducted by scientists from the Australian Museum in PNG, Irian Jaya and Australia. Contains contributions from a range of people including biologists, curators and those who live with the tree kangaroos. Part one considers a brief history of the animal and people who co-share the environment; Part two looks at tree kangaroos evolution, distribution and taxonomy; Part three is about the biology of the animal. Colour plates accompany part two with colour illustrations and diagrams in parts one and three. Includes appendices, biographical notes, references and an index. Illustrations are by Peter Schouten.

Kakapo Rescue 2010-05-24 Sy Montgomery 2011 Sibert Medal Winner On remote Codfish Island off the southern coast of New Zealand live the last ninety-one kakapo parrots on earth. These trusting, flightless, and beautiful birds—the largest and most unusual parrots on earth—have suffered devastating population loss. Now, on an island refuge with the last of the species, New Zealand's National Kakapo Recovery Team is working to restore the kakapo population. With the help of fourteen humans who share a single hut and a passion for saving these odd ground-dwelling birds, the kakapo are making a comeback in New Zealand. Follow intrepid animal lovers Sy Montgomery and Nic Bishop on a ten-day excursion to witness the exciting events in the life of the kakapo.

Chasing Kangaroos 2008 Tim Flannery The acclaimed naturalist and author of The Weather Makers celebrates his native Australia and one of its most extraordinary creatures as he crisscrosses the continent to look at how the kangaroo both shapes and is shaped by its environment, looks at Australia's natural history and habitats, and traces the evolution of the kangaroo. Reprint.

Storm Warriors 2008-12-30 Elisa Carbone Driven from his home by the Ku Klux Klan and still reeling from the death of his mother, Nathan moves with his father and grandfather to the desolate Pea Island on the Outer Banks of North Carolina to start a new life. Fortunately, life on Pea Island at the end of the 19th century is far from quiet. The other island residents include the surfmen--the African American crew of the nearby U.S. Life-Saving Station--and soon Nathan is lending an extra hand to these men as they rescue sailors from sinking ships. Working and learning alongside the courageous surfmen, Nathan begins to dream of becoming one himself. But the reality of post-Civil War racism starts to show itself as he gradually realizes the futility of his dream. And then another dream begins to take shape, one that Nathan refuses to let anyone take from him.

The Tarantula Scientist 2007-10-01 Sy Montgomery A School Library Journal Best Book of the Year: A "fascinating" photo-filled book on these amazing arachnids! (Booklist) Yellow blood? Skeletons on the outside? These attributes don't belong to comic book characters or alien life forms, but to Earth's biggest and hairiest spiders: tarantulas. In this book you are invited to follow Sam Marshall, spider scientist extraordinaire (he's never been bitten), as he explores the dense rain forest of French Guiana, knocking on the doors of tarantula burrows, trying to get a closer look at these incredible creatures. You'll also visit the largest comparative spider laboratory in America—where close to five hundred live tarantulas sit in towers of stacked shoeboxes and plastic containers, waiting for their turn to dazzle and astound the scientists who study them. "Superb color photos abound in this spectacular series addition...This is a vivid look at an enthusiastic scientist energetically and happily at work...A treat, even for arachnophobes."—School Library Journal (starred review) A Sibert Honor Book An ALA Notable Book A John Burroughs Nature Book for Young Readers A Kirkus Reviews Editors Choice

Gorilla Doctors 2008-08-06 Pamela S. Turner The author of The Frog Scientist showcases the work of the Mountain Gorilla Veterinary Project in "an outstanding science nature title" (Kirkus Reviews, starred review) Mountain gorillas are playful, curious, and protective of their families. They are also one of the most endangered species in the world. For years, mountain gorillas have faced the threat of death by poachers. Funds raised by "gorilla tourism"—bringing people into the forest to see gorillas—have helped protect them. This tourism is vital but contact between gorillas and people brought a new threat to the gorillas: human disease. The Mountain Gorilla Veterinary Project is a group of scientists working to save the mountain gorilla population in Rwanda and Uganda. The gorilla doctors study the effects of human exposure, provide emergency care, and act as foster parents to an orphaned gorilla. "Excellent photographs prominently feature the scientists at work (predominantly women and people of color in scientific roles) as well as the photogenic gorillas."—Horn Book, starred review "The author, who has a degree in public health, is especially successful in explaining how improving community public health benefits both gorillas and humans. Spectacular and appealing photos of gorillas, scientists and the Rwanda Preserve add even more appeal."—Kirkus Reviews (starred review) "The readable text records their efforts to treat the great apes in the field as they encounter poachers, meet with loss of habitat, and face their newest threat: human diseases that can cross species lines . .. The whole is accompanied by striking, full-color photographs and includes a list of other resources, a postscript, and an index."—School Library Journal

Tarra & Bella 2014-03-06 Carol Buckley A friendship unlike any other! After retiring from the circus, Tarra became the first resident of the Elephant Sanctuary in Tennessee. When other elephants moved in and developed close friendships, only Tarra remained alone—until the day she met a stray mixed-breed dog named Bella. From then on, the two were inseparable. Color photographs of Tarra and Bella at home in the Elephant Sanctuary deftly illustrate this inspiring story of inter-species companionship.

Eat Like a Bear 2013-10-22 April Pulley Sayre Can you eat like a bear? A sleepy bear awakes in spring and goes to find food. But what is there to eat in April? In May? Follow along and eat like a bear throughout the year: fish from a stream, ants from a tree, and delicious huckleberries from a bush. Fill up your belly and prepare for the long winter ahead, when you'll snuggle into your warm den and snore like a bear once again.

The Snake Scientist 1999-03-26 Sy Montgomery Dr. Robert Mason, the current recipient of the National Science Foundation's Young Investigator Award, has been studying a mysterious phenomenon for over fifteen years - one of the most extraordinary events of the natural world - the reemergence from a winter spent in a state of suspended animation in subterranean caverns of tens of thousands of red-sided garter snakes - the world's largest concentration of snakes. The work of scientists can often seem mysterious and intimidating to the nonscientist. No longer! Introducing an exciting perspective on the important work of scientists in all areas of research and study. Scientists in the Field show people immersed in the unpredictable and dynamic natural world, making science more accessible, relevant, and exciting to young readers. Far from the research laboratory, these books show firsthand adventures in the great outdoors - adventures with a purpose. From climbing into a snake den with thousands of slithering snakes to tracking wolves

How to Be an Elephant 2017-09-19 Katherine Roy "This nonfiction picture book follows an elephant's growth from a newborn calf to a full-grown adult in one of the most socially and structurally complex family groups on earth."--

Wayside School is Falling Down 2010-11-01 Louis Sachar 'Watch closely,' said Mrs Jewls. 'You can learn much faster using a computer instead of paper and pencil.' Then she pushed the computer out of the window. The children all watched it fall thirty floors. 'See?' said Mrs Jewls. 'That's gravity . . . ' That's the way things happen at Wayside School. There are twenty-nine kids in Mrs Jewls' class and this book is about all of them: there is Todd, who is in trouble every day, until he gets a magic dog; Paul, whose life is saved by Leslie's pigtails; Ron, who dares to try the cafeteria's mushroom surprise; and all the others who help turn a day at Wayside School into one madcap adventure after another.

The Hyena Scientist 2018-05-15 Sy Montgomery This myth-busting new addition to the critically acclaimed Scientists in the Field series by Sibert medal winning team Sy Montgomery and Nic Bishop is perfect for nonfiction readers looking for more female scientist narratives, or a fresh perspective on an underrepresented animal—Hyenas! Timely and inspiring, The Hyena Scientist sets the record straight about one of history's most hated and misunderstood mammals, while featuring the groundbreaking, pioneering research of a female scientist in a predominately male field in this offering by Sibert-winning duo Sy Montgomery and Nic Bishop. As a scientist studying one of the only mammalian societies led entirely by females, zoologist Kay Holecamp has made it her life's work to understand hyenas, the fascinating, complex creatures that are playful, social, and highly intelligent—almost nothing like the mangy monsters of pop culture lore.

Almost Astronauts 2011-09-27 Tanya Lee Stone They had the right stuff. They defied the prejudices of the time. And they blazed a trail for generations of women to follow. What does it take to be an astronaut? Excellence at flying, courage, intelligence, resistance to stress, top physical shape -- any checklist would include these. But when America created NASA in 1958, there was another unspoken rule: you had to be a man. Here is the tale of thirteen women who proved that they were not only as tough as the toughest man but also brave enough to challenge the government. They were blocked by prejudice, jealousy, and the scrawled note of one of the most powerful men in Washington. But even though the Mercury 13 women did not make it into space, they did not lose, for their example empowered young women to take their place in the sky, piloting jets and commanding space capsules. ALMOST ASTRONAUTS is the story of thirteen true pioneers of the space age. Back matter includes an author's note, an appendix, further reading, a bibliography, sources, source notes, and an index.

The Story Of Seeds 2016-02-23 Nancy Castaldo Something as small as a seed can have a worldwide impact. Did you know there are top-secret seed vaults hidden throughout the world? And once a seed disappears, that's it—it's gone forever? With the growth of genetically modified foods, the use of many seeds is dwindling—of 80,000 edible plants, only about 150 are being cultivated. With a global cast of men and women, scientists and laypeople, and photographic documentation, Nancy Castaldo chronicles where our food comes from, and more importantly, where it is going as she digs deeper into the importance of seeds in our world. This empowering book also calls young adult readers to action with suggestions as to how they can preserve the variety of one of our most valuable food sources through simple everyday actions. Readers of Michael Pollen will enjoy the depth and fascinatingly intricate social economy of seeds.

What Do You Do If You Work at the Zoo? 2020 Steve Jenkins From Caldecott Honor-winning team Steve Jenkins and Robin Page comes an early introduction to one of young readers' favorite places: the zoo! Going to the zoo is so exciting! You might see penguins swimming underwater, snakes sunning in the reptile house, or giraffes eating leaves out of high trees. You might even see people at the zoo, ones just like you! But what do those people do? Caldecott Honor-winning team Steve Jenkins and Robin Page introduce young readers to the people who keep zoo animals safe, healthy, and happy, even though they aren't in the wild habitats they've evolved for. From cuddling a baby kangaroo to trimming elephant toenails to playing soccer with a rhino, zookeepers work hard and do some pretty wacky things to take care of the incredible animals we see. So, what would you do if you were in the zookeeper's shoes? Turn the page and find out!

Tree-kangaroos of Australia and New Guinea 2005 Roger William Martin To many people, the suggestion that a kangaroo could live up a tree is fantasy. Yet, in the rainforests of Far North Queensland and New Guinea, there are extraordinary kangaroos that do just that. Many aspects of these marsupials' anatomy and biology suggest a terrestrial kangaroo ancestor. Yet no one has, so far, come forward with a convincing explanation of how, why and when mammals that was so superbly adapted for life on the ground should end up back in the trees. This book reviews the natural history and biology of tree-kangaroos from the time of their first discovery by Europeans in the jungles of West Papua in 1826 right up to the present day, covering the latest research being conducted in Australian and New Guinea. Combining information from a number of disparate disciplines, the author sets forth the first explanation of this apparent evolutionary conundrum. Features \* Provides a fascinating and readable account of an unusual evolutionary conundrum \* Written by a field biologist with more than a decade's experience working with tree-kangaroos

The Soul of an Octopus 2016-07-12 Sy Montgomery Finalist for the National Book Award for Nonfiction \* New York Times Bestseller \* Starred Booklist and Library Journal Editors' Spring Pick \* A Huffington Post Notable Nonfiction Book of the Year \* One of the Best Books of the Month on Goodreads \* Library Journal Best Sci-Tech Book of the Year \* An American Library Association Notable Book of the Year "Sy Montgomery's The Soul of an Octopus does for the creature what Helen Macdonald's H Is for Hawk did for raptors." —New Statesman, UK "One of the best science books of the year." —Science Friday, NPR Another New York Times bestseller from the author of The Good Good Pig, this "fascinating...touching...informative...entertaining" (The Daily Beast) book explores the emotional and physical world of the octopus—a surprisingly complex, intelligent, and spirited creature—and the remarkable connections it makes with humans. In pursuit of the wild, solitary, predatory octopus, popular naturalist Sy Montgomery has practiced true immersion journalism. From New England aquarium tanks to the reefs of French Polynesia and the Gulf of Mexico, she has befriended octopuses with strikingly different personalities—gentle Athena, assertive Octavia, curious Kali, and joyful Karma. Each creature shows her cleverness in myriad ways: escaping enclosures like an orangutan; jetting water to bounce balls; and endlessly tricking companions with multiple "sleights of hand" to get food. Scientists have only recently accepted the intelligence of dogs, birds, and chimpanzees but now are watching octopuses solve problems and are trying to decipher the meaning of the animal's color-changing techniques. With her "joyful passion for these intelligent and fascinating creatures" (Library Journal Editors' Spring Pick), Montgomery chronicles the growing appreciation of this mollusk as she tells a unique love story. By turns funny, entertaining, touching, and profound, The Soul of an Octopus reveals what octopuses can teach us about the meeting of two very different minds.
