ABOUT THE TESTThe Advanced Placement Program is designed to allow high school students to pursue college-level studies while attending high school. The three-hour five-minute AP U.S. History exam is usually given to high school students who have completed a year's study in a college-level U.S. History course. The test results are then used to determine

the awarding of course credit and/or advanced course placement in college. According to the College Board, students taking this exam are called upon to demonstrate systematic factual knowledge and bring to bear critical, persuasive analysis of the full sweep of U.S. history. This is why we make every effort to establish and build upon context for you, rather than encouraging rote memorization of disconnected facts. The AP U.S. History Exam is divided into two sections: 1) Multiple-Choice: This section is composed of 80 multiple-choice questions designed to gauge your ability to understand and analyze U.S. history from the Colonial period to the present. The majority of the questions, however, are based on 19th- and 20th-century history. This section tests factual knowledge, scope of preparation, and knowledge-based analytical skills. You'll have 55 minutes to complete this section, which accounts for 50 percent of your final grade. 2) Free-Response: This section is composed of three essay questions designed to measure your ability to write coherent, intelligent, well-organized essays on historical topics. The essays require you to demonstrate mastery of historical interpretation and the ability to express views and knowledge in writing. The essays may relate documents to different areas, analyze common themes of different time periods, or compare individual and group experiences which reflect socioeconomic, racial, gender, and ethnic differences. Part A consists of a mandatory 15-minute reading period, followed by 45 minutes during which you must answer a document-based question (DBQ), which changes from year to year. In Part B the student chooses to answer on two of the topics that are given. You will have 70 minutes to write these essays. The free-response section counts for 50 percent of your final grade. These topics are broken down into thirds: - Political Institutions (1/3rd)- Social and Economic Change (1/3rd)- Behavior and Public Policy, Diplomacy and International Relations, Intellectual and Cultural Development (1/3rd) The time periods covered are as follows: - Pre-Colonial through 1789 (1/6th of exam)- 1790-1914 (1/2 of exam)- 1915-present (1/3rd of exam) ABOUT THE REVIEW SECTIONThis book begins with REA's concise yet thorough 230-page review of U.S. history designed to acquaint you with the exam's scope of coverage. Our review covers these topics and historical time periods: - The Colonial Period (1500-1763)- The American Revolution (1763-1787)- The United States Constitution (1787-1789)- The New National (1789-1824)- Jacksonian Democracy and Westward Expansion (1824-1850)- Sectional Conflict and The Causes of the Civil War (1850-1860)- The Civil War and Reconstruction (1860-1877)- Industrialism, War, and the Progressive Era (1877-1912)- Wilson and World War I (1912-1920)- The Roaring Twenties and Economic Collapse (1920-1929)- The Great Depression and the New Deal (1929-1941)- World War II and the Post-War Era (1941-1960)- The New Frontier, Vietnam, and Social Upheaval (1960-1972)- Watergate, Carter, and the New Conservatism (1972-2001) SCORING THE EXAMThe multiple-choice section of the exam is scored by crediting each correct answer with one point and deducting one-fourth of a point for each incorrect answer. You will neither receive a credit nor suffer a deduction for unanswered questions. The free-response essays are graded by instructors and professors from across the country who come together each June for a week of non-stop AP essay grading. Each essay booklet is read and scored by several graders. Each grader provides a score for the individual essays. The DBQ is scored on a scale from 0 to 15, 0 being the lowest and 15 the highest. Each topic-based essay receives a score from 0 to 9. These scores are concealed so that each grader is unaware of the previous graders' assessments. When the essays have been graded completely, the scores are averaged-one score for each essay-so that the free-response section generates three scores. The total weight of the free-response section is 50 percent of the total score. Your work in the multiple-choice section counts for the other 50 percent. Each year, grades fluctuate slightly because the grading scale is adjusted to take into account the performance of the total AP U.S. History test-taker population. When used with the corresponding chart, the scoring method we present here will strongly approximate the score you would receive if you were sitting for the actual AP U.S. History exam. SCORING THE MULTIPLE-CHOICE SECTIONFor the multiple-choice section, use this formula to calculate your raw score: Number right - (number wrong x 1/4) = raw score (round to the nearest whole number) SCORING THE FREE-RESPONSE SECTIONFor the free-response section, use this formula to calculate your raw score: DBQ + Essay #1 + Essay #2 + = raw score (round to the nearest whole number) You may want to give your essays three different grades, such as a 13, 10, and an 8, and then calculate your score three ways: as if you did well, average, and poorly. This will give you a safe estimate of how you will do on the actual exam. Try to be objective about grading your own essays. If possible, have a friend, teacher, or parent grade them for you. Make sure your essays follow all of the AP requirements before you assess the score. The statistical formulations used by the AP Program preclude our REA practice-test scoring system from precisely replicating the procedures and determinations of the AP Program. Bear in mind that the cut-off point between each of the five AP grades typically shifts slightly from year to year. This occurs both because one year's exam cannot be expected to be exactly as difficult as another year's and because no two test-taker groups can be expected to be equally strong. THE COMPOSITE SCORETo obtain your composite score, use this method: 1.13 x multiple choice raw score = weighted multiple-choice score (do not round)2.73 x free response raw score = weighted free response score (do not round) Now, add the two weighted sections together and round to the nearest whole number. The result is your total composite score. See the range within which your score falls on this table to approximate your final grade: AP Grade / Composite Score Range5 / 114-1804 / 91-1133 / 74-902 / 49-731 / 0-48 These overall scores are interpreted as follows: 5-extremely well qualified;4-well qualified; 3-qualified, 2-possibly qualified; and 1-no recommendation. Most colleges grant students who earn a 3 or better either college credit or advanced placement. Check with your high school's guidance office about specific requirements. *American Government* 3e Glen Krutz 2021-07-28 *American Government* 3e aligns with the topics and objectives of many government courses. Faculty involved in the project have endeavored to make government workings, issues, debates, and impacts meaningful and memorable to students while maintaining the conceptual coverage and rigor inherent in the subject. With this objective in mind, the content of this textbook has been developed and arranged to provide a logical progression from the fundamental principles of institutional design at the founding, to avenues of political participation, to thorough coverage of the political structures that constitute American government. The book builds upon what students have already learned and emphasizes connections between topics as well as between theory and applications. The goal of each section is to enable students not just to recognize concepts, but to work with them in ways that will be useful in later courses, future careers, and as engaged citizens.

A Taxonomy for Learning, Teaching, and Assessing Lorin W. Anderson 2001 This revision of Bloom's taxonomy is designed to help teachers understand and implement standards-based curriculums. Cognitive psychologists, curriculum specialists, teacher educators, and researchers have developed a two-dimensional framework, focusing on knowledge and cognitive processes. In combination, these two define what students are expected to learn in school. It explores curriculums from three unique perspectives-cognitive psychologists (learning emphasis), curriculum specialists and teacher educators (C & I emphasis), and measurement and assessment experts (assessment emphasis). This revisited framework allows you to connect learning in all areas of curriculum. Educators, or others interested in educational psychology or educational methods for grades K-12.

**Strangers in the Land** John Higham 2002 "This book attempts a general history of the anti-foreign spirit that I have defined as nativism. It tries to show how American nativism evolved its own distinctive patterns, how it has ebbed and flowed under the pressure of successive impulses in American history, how it has fared at every social level and in every section where it left a mark, and how it has passed into action. Fundamentally, this remains a study of public opinion, but I have sought to follow the movement of opinion wherever it led, relating it to political pressures, social organization, economic changes, and intellectual interests."--from the Preface, taken from back cover.

**Global Trends 2040** National Intelligence Council 2021-03 "The ongoing COVID-19 pandemic marks the most significant, singular global disruption since World War II, with health, economic, political, and security implications that will ripple for years to come." -Global Trends 2040 (2021) Global Trends 2040-A More Contested World (2021), released by the US National Intelligence Council, is the latest report in its series of reports starting in 1997 about megatrends and the world's future. This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and describes a contested, fragmented and turbulent world. It specifically discusses the four main trends that will shape tomorrow's world: - Demographics-by 2040, 1.4 billion people will be added mostly in Africa and South Asia. - Economics-increased government debt and concentrated economic power will escalate problems for the poor and middleclass. - Climate-a hotter world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve and cause problems for human life. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading.

**Parenting Matters** National Academies of Sciences, Engineering, and Medicine 2016-11-21 Decades of research have demonstrated that the parent-child dyad and the environment of the family—“which includes all primary caregivers—are at the foundation of children's well- being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

**Pain Management and the Opioid Epidemic** National Academies of Sciences, Engineering, and Medicine 2017-10-28 Drug overdose, driven largely by overdose related to the use of opioids, is now the leading cause of unintentional injury death in the United States. The ongoing opioid crisis lies at the intersection of two public health challenges: reducing the burden of suffering from pain and containing the rising toll of the harms that can arise from the use of opioid medications. Chronic pain and opioid use disorder both represent complex human conditions affecting millions of Americans and causing untold

disability and loss of function. In the context of the growing opioid problem, the U.S. Food and Drug Administration (FDA) launched an Opioids Action Plan in early 2016. As part of this plan, the FDA asked the National Academies of Sciences, Engineering, and Medicine to convene a committee to update the state of the science on pain research, care, and education and to identify actions the FDA and others can take to respond to the opioid epidemic, with a particular focus on informing FDA's development of a formal method for incorporating individual and societal considerations into its risk-benefit framework for opioid approval and monitoring.

*The Future of Disability in America* Institute of Medicine 2007-10-24 The future of disability in America will depend on how well the U.S. prepares for and manages the demographic, fiscal, and technological developments that will unfold during the next two to three decades. Building upon two prior studies from the Institute of Medicine (the 1991 Institute of Medicine's report *Disability in America* and the 1997 report *Enabling America*), *The Future of Disability in America* examines both progress and concerns about continuing barriers that limit the independence, productivity, and participation in community life of people with disabilities. This book offers a comprehensive look at a wide range of issues, including the prevalence of disability across the lifespan; disability trends the role of assistive technology; barriers posed by health care and other facilities with inaccessible buildings, equipment, and information formats; the needs of young people moving from pediatric to adult health care and of adults experiencing premature aging and secondary health problems; selected issues in health care financing (e.g., risk adjusting payments to health plans, coverage of assistive technology); and the organizing and financing of disability-related research. *The Future of Disability in America* is an assessment of both principles and scientific evidence for disability policies and services. This book's recommendations propose steps to eliminate barriers and strengthen the evidence base for future public and private actions to reduce the impact of disability on individuals, families, and society.

*Communities in Action* National Academies of Sciences, Engineering, and Medicine 2017-04-27 In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

**Learning and Understanding** National Research Council 2002-08-06 This book takes a fresh look at programs for advanced studies for high school students in the United States, with a particular focus on the Advanced Placement and the International Baccalaureate programs, and asks how advanced studies can be significantly improved in general. It also examines two of the core issues surrounding these programs: they can have a profound impact on other components of the education system and participation in the programs has become key to admission at selective institutions of higher education. By looking at what could enhance the quality of high school advanced study programs as well as what precedes and comes after these programs, this report provides teachers, parents, curriculum developers, administrators, college science and mathematics faculty, and the educational research community with a detailed assessment that can be used to guide change within advanced study programs.

**The Federalist Papers** Alexander Hamilton 2018-08-20 Classic Books Library presents this brand new edition of “The Federalist Papers”, a collection of separate essays and articles compiled in 1788 by Alexander Hamilton. Following the United States Declaration of Independence in 1776, the governing doctrines and policies of the States lacked cohesion. “The Federalist”, as it was previously known, was constructed by American statesman Alexander Hamilton, and was intended to catalyse the ratification of the United States Constitution. Hamilton recruited fellow statesmen James Madison Jr., and John Jay to write papers for the compendium, and the three are known as some of the Founding Fathers of the United States. Alexander Hamilton (c. 1755–1804) was an American lawyer, journalist and highly influential government official. He also served as a Senior Officer in the Army between 1799-1800 and founded the Federalist Party, the system that governed the nation's finances. His contributions to the Constitution and leadership made a significant and lasting impact on the early development of the nation of the United States.

**Learning from SARS** Institute of Medicine 2004-04-26 The emergence of severe acute respiratory syndrome (SARS) in late 2002 and 2003 challenged the global public health community to confront a novel epidemic that spread rapidly from its origins in southern China until it had reached more than 25 other countries within a matter of months. In addition to the number of patients infected with the SARS virus, the disease had profound economic and political repercussions in many of the affected regions. Recent reports of isolated new SARS cases and a fear that the disease could reemerge and spread have put public health officials on high alert for any indications of possible new outbreaks. This report examines the response to SARS by public health systems in individual countries, the biology of the SARS coronavirus and related coronaviruses in animals, the economic and political fallout of the SARS epidemic, quarantine law and other public health measures that apply to combating infectious diseases, and the role of international organizations and scientific cooperation in halting the spread of SARS. The report provides an illuminating survey of findings from the epidemic, along with an assessment of what might be needed in order to contain any future outbreaks of SARS or other emerging infections.

*Care Without Coverage* Institute of Medicine 2002-06-20 Many Americans believe that people who lack health insurance somehow get the care they really need. Care Without Coverage examines the real consequences for adults who lack health insurance. The study presents findings in the areas of prevention and screening, cancer, chronic illness, hospital-based care, and general health status. The committee looked at the consequences of being uninsured for people suffering from cancer, diabetes, HIV infection and AIDS, heart and kidney disease, mental illness, traumatic injuries, and heart attacks. It focused on the roughly 30 million-one in seven-working-age Americans without health insurance. This group does not include the population over 65 that is covered by Medicare or the nearly 10 million children who are uninsured in this country. The main findings of the report are that working-age Americans without health insurance are more likely to receive too little medical care and receive it too late; be sicker and die sooner; and receive poorer care when they are in the hospital, even for acute situations like a motor vehicle crash.

*The Pig Book* Citizens Against Government Waste 2013-09-17 The federal government wastes your tax dollars worse than a drunken sailor on shore leave. The 1984 Grace Commission uncovered that the Department of Defense spent \$640 for a toilet seat and \$436 for a hammer. Twenty years later things weren't much better. In 2004, Congress spent a record-breaking \$22.9 billion dollars of your money on 10,656 of their pork-barrel projects. The war on terror has a lot to do with the record \$413 billion in deficit spending, but it's also the result of pork over the last 18 years the likes of: - \$50 million for an indoor rain forest in Iowa - \$102 million to study screwworms which were long ago eradicated from American soil - \$273,000 to combat goth culture in Missouri - \$2.2 million to renovate the North Pole (Lucky for Santa!) - \$50,000 for a tattoo removal program in California - \$1 million for ornamental fish research Funny in some instances and jaw-droppingly stupid and wasteful in others, The Pig Book proves one thing about Capitol Hill: pork is king!

**Sports-Related Concussions in Youth** National Research Council 2014-02-04 In the past decade, few subjects at the intersection of medicine and sports have generated as much public interest as sports-related concussions - especially among youth. Despite growing awareness of sports-related concussions and campaigns to educate athletes, coaches, physicians, and parents of young athletes about concussion recognition and management, confusion and controversy persist in many areas. Currently, diagnosis is based primarily on the symptoms reported by the individual rather than on objective diagnostic markers, and there is little empirical evidence for the optimal degree and duration of physical rest needed to promote recovery or the best timing and approach for returning to full physical activity. Sports-Related Concussions in Youth: Improving the Science, Changing the Culture reviews the science of sports-related concussions in youth from elementary school through young adulthood, as well as in military personnel and their dependents. This report recommends actions that can be taken by a range of audiences - including research funding agencies, legislatures, state and school superintendents and athletic directors, military organizations, and equipment manufacturers, as well as youth who participate in sports and their parents - to improve what is known about concussions and to reduce their occurrence. Sports-Related Concussions in Youth finds that while some studies provide useful information, much remains unknown about the extent of concussions in youth; how to diagnose, manage, and prevent concussions; and the short- and long-term consequences of concussions as well as repetitive head impacts that do not result in concussion symptoms. The culture of sports negatively influences athletes' self-reporting of concussion symptoms and their adherence to return-to-play guidance. Athletes, their teammates, and, in some cases, coaches and parents may not fully appreciate the health threats posed by concussions. Similarly, military recruits are immersed in a culture that includes devotion to duty and service before self, and the critical nature of concussions may often go unheeded. According to Sports-Related Concussions in Youth, if the youth sports community can adopt the belief that concussions are serious injuries and emphasize care for players with concussions until they are fully recovered, then the culture in which these athletes perform and compete will become much safer. Improving understanding of the extent, causes, effects, and prevention of sports-related concussions is vitally important for the health and well-being of youth athletes. The findings and recommendations in this report set a direction for research to reach this goal. *English Literature 2000-2001* Douglas McMullen 2000-01-25 The Book That Gets You Results We Know the AP English Literature Exam The experts at The Princeton Review study the AP U.S. Government and Politics exam and other standardized tests each year to make sure you get the most up-to-date, thoroughly researched books possible.
