**Plutocrats** Chrystia Freeland 2012-10-11 A Financial Times Best Book of the Year Shortlisted for the Lionel Gelber Prize There has always been some gap between rich and poor in this country, but recently what it means to be rich has changed dramatically. Forget the 1 percent—Plutocrats proves that it is the wealthiest 0.1 percent who are outpacing the rest of us at breakneck speed. Most of these new fortunes are not inherited, amassed instead by perceptive businesspeople who see themselves as deserving victors in a cutthroat international competition. With empathy and intelligence, Plutocrats reveals the consequences of concentrating the world’s wealth into fewer and fewer hands. Propelled by fascinating original interviews with the plutocrats themselves, Plutocrats is a tour de force of social and economic history, the definitive examination of inequality in our time.

The subject of folklore covers an extremely wide field, with connections to virtually every aspect of life. It ranges from the bizarre to the seemingly mundane. Aimed at a broad general readership, the dictionary provides an authoritative reference source on such

*The Development of Social Network Analysis* Linton C. Freeman 2004 Ideas about social structure and social networks are very old. People have always believed that biological and social links among individuals are important. But it wasn't until the early 1930s that systematic research that explored the patterning of social ties linking individuals emerged. And it emerged, not once, but several times in several different social science fields and in several places. This book reviews these developments and explores the social processes that wove all these "schools" of network analysis together into a single coherent approach.

*Banksy* Ulrich Blanché 2016-01-18 About this Book / Bristol born Banksy is usually categorized as a Street Artist, although his art, in content and form, transcends a narrow understanding of this term. This publication primarily deals with Banksy as a contemporary Urban Artist and his relationship with consumer culture. It examines Banksy not only in light of his illicit work on the street, but also in regard to his gallery exhibitions. The study highlights

representative works of his art, pieces which demonstrate his versatility, but also stand for different periods of his oeuvre. This book presents the first academic study of Banksy's art in English; with a history and discussion of the terms Graffiti, Street Art and Urban Art and a rich array of biographical information. It will be of interest to academics and the general public as well. About this Edition / Street Artist Banksy and former Young British artist Damien Hirst are two of the most popular representatives of British contemporary art. Situated in a triangle of art, consumerism and pop culture their work is among the most well-known. A systematic academic study of their artistic viewpoints and references to consumer culture has long been missing, and Ulrich Blanche is finally closing this gap: He examines Hirst's and Banksy's art against the background of the London art scene since 1980. Blanche points out connections to Duchamp, Warhol and Koons, and reflects on the role of the observer, the meaning of location and, especially, the references between art, consumer culture and marketing in their pieces. This two volume edition is the translated and expanded version of the authors dissertational thesis." *The German Model* Brigitte Unger 2015-04-08 Since the Financial Crisis in 2008 Germany has performed economically far better than most of its neighbouring countries. What makes Germany so special that nobel prize winner Krugman called it a German miracle and is this sustainable? Is it its strong economic and political institutions, in particular trade unions, which by international comparison are a solid rock in turbulent waters, its vocational training which guarantees high skilled labour and low youth unemployment, its social partnership agreements which showed large flexibility of working time arrangements during the crisis and turned the rock into a bamboo flexibly bending once the rough wind of globalization was blowing? Or was it simply luck, booming exports to China and the East, a shrinking population, or worse so, a demolition of the German welfare state? All along from miracle to fate to shame of the German model: Is there such a thing like a core of Germany? The debate on the German model is controversial within Germany. But what do neighbours think about Germany? The Nordic countries want to copy German labor market institutions. The Western countries admire it for its high flexibility within stable institutions, the Austrians have a similar model but question Germany's welfare arrangements and growth capacities. Many Eastern European countries are relatively silent about the German model. There is admiration for the German economic success, but at the same time not so much for its institutions and certainly not for its restrictive migration policy. The Southern countries see it as a preposterous pain to Europe by shaping EU policy a la Germany and forcing austerity policy at the costs of its neighbours. Can the German model be copied? And what do neighbours recommend Germany to do?

***Schindler's List*** Thomas Keneally 2013-08-06 In remembrance of the 75th anniversary of the liberation of Auschwitz and the Nazi concentration camps, this award-winning, bestselling work of Holocaust fiction, inspiration for the classic film and “masterful account of the growth of the human soul” (Los Angeles Times Book Review), returns with an all-new introduction and beautifully redesigned cover. An “extraordinary” (New York Review of Books) novel based on the true story of how German war profiteer and factory director Oskar Schindler came to save more Jews from the gas chambers than any other single person during World War II. In this milestone of Holocaust literature, Thomas Keneally, author of *The Book of Science and Antiquities* and *The Daughter of Mars*, uses the actual testimony of the Schindlerjuden—Schindler’s Jews—to brilliantly portray the courage and cunning of a good man in the midst of unspeakable evil. “Astounding...in this case the truth is far more powerful than anything the imagination could invent” (Newsweek).

***Transhumanism*** David Livingstone 2015-09-02 Transhumanism is a recent movement that extols man’s right to shape his own evolution, by maximizing the use of scientific technologies, to enhance human physical and intellectual potential. While the name is new, the idea has long been a popular theme of science fiction, featured in such films as 2001: A Space Odyssey, Blade Runner, the Terminator series, and more recently, The Matrix, Limitless, Her and Transcendence. However, as its adherents hint at in their own publications, transhumanism is an occult project, rooted in Rosicrucianism and Freemasonry, and derived from the Kabbalah, which asserts that humanity is evolving intellectually, towards a point in time when man will become God. Modeled on the medieval legend of the Golem and Frankenstein, they believe man will be able to create life itself, in the form of living machines, or artificial intelligence. Spearheaded by the Cybernetics Group, the project resulted in both the development of the modern computer and MK-Ultra, the CIA’s “mind-control” program. MK-Ultra promoted the “mind-expanding” potential of psychedelic drugs, to shape the counterculture of the 1960s, based on the notion that the shamans of ancient times used psychoactive substances, equated with the “apple” of the Tree of Knowledge. And, as revealed in the movie Lucy, through the use of “smart drugs,” and what transhumanists call “mind uploading,” man will be able to merge with the Internet, which is envisioned as the end-point of Kabbalistic evolution, the formation of a collective consciousness, or Global Brain. That awaited moment is what Ray Kurzweil, a director of engineering at Google, refers to as The Singularity. By accumulating the total of human knowledge, and providing access to every aspect of human activity, the Internet will supposedly achieve omniscience, becoming the “God” of occultism, or the Masonic All-Seeing Eye of the reverse side of the American dollar bill.

***Mission Possible*** Valeria Gontareva 2020-07-15 “This is an extraordinary book from an extraordinary person. This book is an insightful, candid and passionate account of her approach and policy experience. She has called it a ‘Practical Manual’ for reforms - it is that but also much more: a historical record of reforms against all odds.” – Erik Berglof, Director of LSE Institute of Global Affairs “Many emerging economies often lack practical experience in transforming themselves into fully-functioning market-oriented economies and this Practical Manual will help you with this task. Moreover, the book is precisely about how to accomplish drastic reforms in wartime - and I truly believe that the wartime of COVID-19 is an unprecedented opportunity for reform.” – Valeria Gontareva, Former Governor of the National Bank of Ukraine In addition, Valeria received a nomination for her work as the Governor of the National Bank of Ukraine in the Financial Times’s Women of the Year 2019 list.

Twelve Years a Slave is Northup’s moving memoir, revealing unimaginable details of the horrors he faced

as a slave on Southern plantations, and his unshakable belief that he would return home to his family. Written in the year after Northup was freed and published in the wake of Harriet Beecher Stowe’s Uncle Tom’s Cabin, Northup’s story was quickly taken up by abolitionist groups and news organizations as part of the fight against slavery, and continues to resonate more than a century after the end of the American Civil War.

***Adhocism, expanded and updated edition*** Charles Jencks 2013-05-24 The triumphant return of a book that gave us permission to throw out the rulebook, in activities ranging from play to architecture to revolution. When this book first appeared in 1972, it was part of the spirit that would define a new architecture and design era—a new way of thinking ready to move beyond the purist doctrines and formal models of modernism. Charles Jencks and Nathan Silver's book was a manifesto for a generation that took pleasure in doing things ad hoc, using materials at hand to solve real-world problems. The implications were subversive. Turned-off citizens of the 1970s immediately adopted the book as a DIY guide. The word “adhocism” entered the vocabulary, the concept of adhocism became part of the designer's toolkit, and Adhocism became a cult classic. Now Adhocism is available again, with new texts by Jencks and Silver reflecting on the past forty years of adhocism and new illustrations demonstrating adhocism's continuing relevance. Adhocism has always been around. (Think Robinson Crusoe, making a raft and then a shelter from the wreck of his ship.) As a design principle, adhocism starts with everyday improvisations: a bottle as a candleholder, a dictionary as a doorstop, a tractor seat on wheels as a dining room chair. But it is also an undeveloped force within the way we approach almost every activity, from play to architecture to city planning to political revolution. Engagingly written, filled with pictures and examples from areas as diverse as auto mechanics and biology, Adhocism urges us to pay less attention to the rulebook and more to the real principle of how we actually do things. It declares that problems are not necessarily solved in a genius’s “eureka!” moment but by trial and error, adjustment and readjustment.

***Power Play*** Raymond Boyle 2009-05-21 The fully revised and updated version of this classic text examines the link between three key obsessions of the 21st century: the media, sport and popular culture. Gathering new material from around the 2007 Rugby World Cup, the Beijing Olympics and the rise of new sports stars such as boxing’s Amir Khan and cycling’s Victoria Pendleton, the authors explore a wide range of sports, as well as issues including nationalism, gender, race, political economy and the changing patterns of media sport consumption.For those interested in media and sport the second edition combines new and original material with an overview of the developing field of media sport, and examines the way in which the media has increasingly come to dominate how sport is played, organized and thought about in society. It traces the historical evolution of the relationship between sport and the media and examines the complex business relationships that have grown up around television, sponsors and sport.Covers the following topics: the history of media in sport; television, sport and sponsorship; why sport matters to television; sports stars; sports journalism; fans and the audience; sport in the digital media economy.

***Dynamics of Critical Internet Culture (1994-2001)*** Geert Lovink 2009 This study examines the dynamics of critical Internet culture after the medium opened to a broader audience in the mid 1990s. It is Geert Lovink's PhD thesis, submitted late 2002, written in between his two books on the same topic: Dark Fiber (2002) and My First Recession (2003). The core of the research consists of four case studies of non-profit networks: the Amsterdam community provider, The Digital City (DDS), the early years of the nettime mailinglist community; a history of the European new media arts network Syndicate; and an analysis of the streaming media network Xchange. The research describes the search for sustainable community network models in a climate of hyper growth and increased tensions and conflict concerning moderation and ownership of online communities.

***World Cinema and the Ethics of Realism*** Lúcia Nagib 2011-01-20 World Cinema and the Ethics of Realism is a highly original study. Traditional views of cinematic realism usually draw on the so-called classical cinema and its allegiance to narrative mimesis, but Nagib challenges this, drawing instead on the filmmaker's commitment to truth and to the film medium's material bond with the real. Starting from the premise that world cinema's creative peaks are governed by an ethics of realism, Nagib conducts comparative case studies picked from world new waves, such as the Japanese New Wave, the French nouvelle vague, the Cinema Novo, the New German Cinema, the Russo-Cuban Revolutionary Cinema, the Portuguese self-performing auteur and the Inuit Indigenous Cinema. Drawing upon Badiou and Rancière, World Cinema and the Ethics of Realism revisits and reformulates several fundamental concepts in film studies, such as illusionism, identification, apparatus, alienation effects, presentation and representation. Its groundbreaking scholarship takes film theory in a bold new direction.

***My First Recession*** Geert Lovink 2003 My First Recession starts when the party is over. This study maps the transition of critical Internet culture from the mid-to-late 1990s Internet craze to the dotcom crash, the subsequent meltdown of global financial markets, and 9/11. In his discussion of the dotcom boom-and-bust cycle, Geert Lovink lays out the challenges faced by critical Internet culture today. In a series of case studies, Lovink meticulously describes the ambivalent attitude that artists and activists take as they veer back and forth between euphoria and skepticism. As a part of this process, Lovink examines the internal dynamics of virtual communities through an analysis of the use of moderation and "collaborative filtering" on mailing lists and weblogs. He also confronts the practical and theoretical problems that appear as artists join the growing number of new-media education programs. Delving into the

unexplored gold mines of list archives and weblogs, Lovink reveals a world that is largely unknown to both the general public and the Internet visionaries. *Global Wage Report 2018/19* International Labour Office 2018-11-26 The 2018/19 edition analyses the gender pay gap. **More Brilliant than the Sun** Kodwo Eshun 2020-02-04 The classic work on the music of Afrofuturism, from jazz to jungle More Brilliant than the Sun: Adventures in Sonic Fiction is one of the most extraordinary books on music ever written. Part manifesto for a militant posthumanism, part journey through the unacknowledged traditions of diasporic science fiction, this book finds the future shock in Afrofuturist sounds from jazz, dub and techno to funk, hip hop and jungle. By exploring the music of such musical luminaries as Sun Ra, Alice Coltrane, Lee Perry, Dr Octagon, Parliament and Underground Resistance, theorist and artist Kodwo Eshun mobilises their concepts in order to open the possibilities of sonic fiction: the hitherto unexplored intersections between science fiction and organised sound. Situated between electronic music history, media theory, science fiction and Afrodiasporic studies, More Brilliant than the Sun is one of the key works to stake a claim for the generative possibilities of Afrofuturism. Much referenced since its original publication in 1998, but long unavailable, this new edition includes an introduction by Kodwo Eshun as well as texts by filmmaker John Akomfrah and producer Steve Goodman aka kode9.
